

STARTING FLUID

 **STARTS**  **CONDITIONS**

Engines need the right conditions to perform properly. If temperatures drop too low, gasoline can have problems evaporating, making it harder to burn. Extreme humidity can also have an effect on fuel's performance. Gumout® Starting Fluid helps engines start in all types of extreme weather, while conditioning fuel and engine parts to prevent friction and corrosion.

- For Gasoline
- Extreme Cold or Humid Weather
- Lubricates Upper Cylinders
- Inhibits Corrosions

Information

Size	US Item #	CAN Item #
