Global Leader in Connectivity Solutions

A Better Alternative for Connectivity Solutions

L-com's expert manufacturing is paired with a service initiative that combines highly personalized customer service with a vast product inventory for off-the-shelf availability and same-day shipments for many products.

With a robust component supply chain and technical services and engineering functions that deliver service benefits other component manufacturers are unable to offer, L-com is the only connectivity company to offer the best features of both a manufacturer and a value-added service provider.

Expert Manufacturing

The most unique characteristic of L-com is that it is both a component manufacturer and a value-added service provider.

L-com has been manufacturing high-reliability connectivity products for over thirty years and has manufacturing and fulfillment facilities worldwide. Whether you require custom NEMA enclosures, unique cable assemblies built to your specifications, overmolded assemblies, or even custom built RF amplifiers, L-com has the expertise and capabilities to meet your custom manufacturing requirements.

As a Manufacturer:

- Consistent, quality products that meet or exceed specifications and match exact product feature needs
- Unrivalled technical knowledge and support, with expert application assistance available
- Lower minimum order quantity for custom products

As a Value-Added Service Provider:

- Strong inventory position
- Same day shipping
- Personalized service
- Robust ecommerce website for easy ordering

Products and Solutions for Every Need

- Vast inventory of over 20,000 in-stock catalog products
- Expert technical and application support
- Same-day shipping
- No minimum order requirements for catalog items
- Modifiable, custom-designed or prototype components
- ISO 9001:2008, ITAR and GSA Registered
- Award winning customer service
- Quick response to quotes, designs, prototypes and manufacturing requests
- Tutorials, product drawings, tech info and more

L-com is the premier source for the connectivity solutions you need when you need them.

Over 30 years in the wired and wireless connectivity business has given us the expertise to help you solve the tough problems. We offer free technical resources online to help you do your job. Choose from a host of tips, videos, white papers and tools designed to assist you in the planning, design and implementation of your communications network.

Connector Charts

L-com's connector reference charts help you find the exact connector you need. You may not know the name of every connector in the industry, but you know what you want. Compare our detailed images of widely used and not so common connectors to identify the connector you are looking for.

- Audio/Video Connectors

Wireless Antenna Tutorial

What are Wireless Antennas?

Wireless antennas are the part of a radio communications system that radiate and/or collect radio frequency energy.

How are Wireless Antennas used?

Wireless antennas are typically connected via low loss coaxial cable either to an amplifier, splitter, filter or directly to a wireless access point or router. For outdoor applications wireless antennas are often attached via mounting

clamps to a mast or to the side of a building via mounting brackets. Wireless Antennas used indoors are typically ceiling mounted or sometimes mounted high up on a wall.

Where are Wireless Antennas used?

Wireless antennas are used in many environments and for many applications. Models for both indoor and outdoor use are available as well as specialty antennas such as Marine antennas used in nautical applications.

Wireless antennas are used in both commercial and military/government applications including small office/home office (SOHO) networks, Enterprise (office) networks, supervisory

control and data acquisition (SCADA) networks, homeland security, factory automation, mining, oil processing, wireless cafe "hotspots", energy management and control, police, fire and emergency services networks, radio frequency identification (RFID) applications and industrial science and medical (ISM) networks.

Wireless antennas are used in/on buildings, oil rigs, wind turbines, terrestrial vehicles, boats, aircraft and other mobile and stationary platforms.

There are two main types of WiFi antennas, Omni Directional and Directional

Omni Directional Antennas provide a 360° donut shaped radiation pattern to provide the widest possible signal coverage in indoor and outdoor wireless applications. An analogy for the radiation pattern would be how an un-shaded incandescent light bulb illuminates a room. Types of Omni Directional Antennas include "Rubber Duck" Antennas often found on access points and routers, Omni Antennas found outdoors and Ceiling Antennas used inside buildings and structures.

Omni Directional Antennas

Outdoor Omni Antenna	Rubber Duck Antenna	Ceiling Antenna
		

Directional antennas, as the name implies, focus the wireless signal in a specific direction resulting in a limited coverage area. An analogy for the radiation pattern would be how a vehicle head light illuminates the road. Types of Directional Antennas include Yagi, Patch and Panel Antennas.

Directional Antennas

Yagi Antenna	Panel Antenna	Patch Antenna
		

Parabolic Dish Antennas - Superior Strength Design Ensures Durability

L-com's WiFi parabolic dish antennas feature a high quality aluminum reflector dish for superior strength. The dish is coated in a light gray UV-inhibited polymer for durability and aesthetics. These directional dish antennas can be used in point to point as well as point to multipoint applications. Built to withstand the elements, our dish antennas offer high performance at competitive prices.

When designing these WiFi parabolic dish antennas, our design team factored in requirements such as location usage and environmental extremes. From versatile mounting options to features such as perforated reflectors, these antennas were built to withstand the test of time while maintaining optimal performance.

Item #	Style	Description	1-9	10-24	25-99	100+
--------	-------	-------------	-----	-------	-------	------

2.4 GHz Dish Antenna

HG2414D	3	14 dBi, 260mm Dia, N Female Connector	46.60	42.87	39.14	CALL
---------	---	---------------------------------------	-------	-------	-------	------

4.9 GHz Dish Antenna

HG4931D	4	30.5 dBi, 900mm Dia, N Female Connector	312.60	287.59	262.58	CALL
---------	---	---	--------	--------	--------	------

4.9 - 5.8 GHz Dual Polarized Dish Antennas

Because of its superb electrical performance and mechanical stability, the parabolic dish antenna can be used in a wide variety of high performance 4.9 GHz and 5 GHz range (5.1/5.3/5.4/5.8 GHz) wireless applications. The wide band design of this antenna eliminates the need to purchase different antennas for each frequency. This simplifies installations since the same antenna can be used for a wide array of wireless applications. This antenna features 25 - 34 dBi of gain with a 4.8° horizontal beam-width and 4.9° vertical beam-width.

Radome Cover Kits

L-com radome covers are an ideal way to provide additional protection to our parabolic dish antennas. These lightweight radome kits feature fiberglass construction and UV stable gray finish. Drain holes are provided on the radome cover to help prevent moisture build-up inside the dish antenna.

HGR-04	Radome Cover Kit for 400mm Dia Dish	59.61	58.42	57.23	CALL
HGR-06	Radome Cover Kit for 600mm Dia Dish	74.06	72.58	71.10	CALL
HGR-09	Radome Cover Kit for 900mm Dia Dish	85.95	84.23	82.51	CALL

Dish Antenna Replacement Hardware

L-com offers replacement parts for your parabolic dishes. These spare part kits consist of the dish, pole mounting bracket and all of the hardware.

2.4 GHz Dish Replacement Feedhorns

5.8 GHz Dish Replacement Feedhorns

HGFH-524D	24 dBi Parabolic Dish Replacement Feedhorn	72.94	72.21	71.48	CALL
HGFH-529D	29 dBi Parabolic Dish Replacement Feedhorn	87.53	86.65	85.78	CALL
HGFH-533D	33 dBi Parabolic Dish Replacement Feedhorn	107.33	106.26	105.18	CALL

Tip Easily attach a radome cover

L-com's radome kits bolt directly to the dish antennas with the provided stainless steel hardware. Drilling mounting holes in the antenna is not required. The radome cover can be attached to existing antennas already mounted in the field or preassembled to the antenna before mounting.

Tip Mounting options for L-com's Sector, Panel and Omni WiFi Antennas

If it is not possible to install a WiFi antenna on a mast or pole, you can use the HGX-UMOUNT mounting bracket for side of building installations. In the diagram below two of L-com's HGX-UMOUNT brackets are connected to a HG2414SP-090 sector antenna. This mounting option will work with sector style antennas that have two (one upper and one lower) mounting point and with standard flat panel and Omni antennas using just one HGX-UMOUNT (see diagrams below).

2.6 GHz Omni Directional Antenna

The HyperGain HG2609U is a high performance Omni Directional WiFi antenna designed for the 2.6 GHz MMDS band. This compact and lightweight antenna is compatible with IEEE 802.16, 802.20 and WiMAX applications as well as NLOS applications. The HG2609U is ideal for Wireless Internet Service Providers (WISP) offering service in the less crowded 2.6 GHz band and is compatible with Navini™ Rtpwave®.

5.8 GHz Omni Directional Down-Tilt Antenna

L-com's HG5811UDT-PRO is a Profession Grade Omni Directional Down-Tilt antenna that can be used for Commercial installations. The antenna features high gain and superior VSWR. The unit is optimized for the 5.8 GHz band applications. The pattern is electrically tilted downward to improve coverage from higher mounting elevations in difficult sites such as apartment complexes and similar installations.

L-com Embedded/Internal PCB Antennas

Our embedded/internal antennas are designed to directly integrate into devices requiring wireless capability. By embedding these antennas directly into a device, the need for external antennas is eliminated. In addition to our standard embedded antenna offerings, L-com engineering can also custom design embedded antenna solutions to meet specific customer applications.

Mounting:

L-com's patch antennas offer several unique mounting options. They can be mounted flat against a wall, or to a mast using a pair of 2 inch U-bolts. The antennas also accept most tilt-and-swivel security camera brackets equipped with standard 1/4-20 threads.

Flush Mount:

The HG2408P-NF can be mounted flat against the wall or ceiling. Its unique design allows the cable to exit out of the side or from the back of the unit which is ideal for mounting in locations that require the cable to be hidden.

L-com Patch and Panel Antennas - Compact and Lightweight

These high performance directional patch and panel antennas are available for indoor and outdoor applications covering multiple popular frequencies. Our patch antennas are lightweight and feature aesthetic UV-stable, UL flame rated plastic radomes which can also be painted to match the room or building structure. Designed to be installed for horizontal or vertical polarization, they can be wall or ceiling mounted, as well as mast mounted using U-bolts.

Designed specifically as cost-effective solutions for today's demanding wireless applications, L-com's patch and panel antenna products offer a unique combination of superior all-weather performance, durability and aesthetics. Applications include IEEE 802.11b/g/n, 900 MHz cellular, RFID, 802.16, 802.20 and WiMAX.

These are low cost high gain antennas that come with their own enclosure space within the antenna radome. Mount your wireless card radio behind the antenna and seal the radome. All come with quick connect Cat5/6 connections. Antenna pigtail cable options are RP-SMA Plug, RP-TNC Plug, MMCX and UFL (with others available).

2.4 GHz Wide Angle Patch Antennas						
These compact 2.4 GHz WiFi antennas provide 5 dBi Gain with broad horizontal beam width of 135 degrees. They are ideally suited for applications requiring coverage of a wide area such as an office, public hotspot, industrial or warehouse use. These antennas are lightweight and feature an aesthetic UV-stable, white ABS UL Flame Rated radome and can also be painted to match the room or building structure. The HG2405P-135 can be installed for horizontal or vertical polarization.

2.4 - 5.8 GHz High Density Panel Antenna

The L-com HG2458-13HDP-4NF High Density Flat Panel Antenna combines four dual band antennas in a single housing. The unit consists of two vertically and two horizontally polarized multi-patch antennas. It is a professional quality antenna designed primarily for MIMO point-to-multipoint and point-to-point applications in the 2.4 GHz and the 4.9-5.8 GHz frequency bands. The unit can be used with APs and Routers with one to four antenna ports.

1.9 GHz, 2.4 GHz, 2.4/5.8 GHz Rubber Duck Desktop Mobile Antennas

L-com's Omni Directional rubber duck wireless LAN antennas provide broad coverage and 3-9 dBi gain. These magnetic mount antennas feature a coaxial sleeve design with an Omni Directional pattern. These antennas were designed for IEEE 802.11b/g/n wireless LANs and 1.9 GHz cellular PCS radio applications. Mobile applications for these antennas include service vehicles, public transportation, mining vehicles, as well as numerous other commercial and industrial applications where mobility is required. The magnetic base is suitable for affixing to vehicles or other metal surfaces as well as sitting on a tabletop or shelf.

Tip Rubber Duck Antennas

Rubber Duck antennas usually come with an articulated "Swivel" joint, permitting the antenna base to pivot 90°. The antenna can also be ordered with a "Rigid" connector base, when the swivel is not required or needed. These antennas are numbered with an "RDR" suffix after the basic part number. The base can also have a "Rigid 90°" connector base which carries the "RDR90" suffix. If your application requires these options, please inquire about special orders at reasonable pricing.

Sectorial Omni Directional Antennas

L-com's sector antennas are designed for Cell Site installations and include a variety of gain, frequency and radiation patterns. These WiFi antennas feature our unique heavy-duty mounting systems that allow installation from level to over 20° down-tilt. These 120° arrays are available supporting a wide range of applications. These antennas feature stainless steel construction for all-weather operation.

Sectorial Panel Antennas

L-com's sectorial panel antennas are available in multiple frequencies, gain and 65-180°. They can be used stand alone or in circular groups to maximize coverage and feature heavy-duty plastic radome for all-weather operation, with mounting systems that adjust to pinpoint direction.

380-6000 MHz DAS and Public Safety DAS Antennas

L-com's high performance DAS and Public Safety DAS ceiling mount omni directional antennas are specifically designed to distribute Cellular and WiFi signals throughout a building or area. Public Safety DAS antennas also provide low band coverage for UHF, 600 MHz, 1390-1432 MHz and AWS-3 bands. The Multi-Band design of these omni antennas eliminates the need to purchase different antennas for each frequency.

2.4 GHz/2.4-5.8 GHz Ceiling Antennas - Indoor Single Band/Dual Band/MIMO Antennas

L-com offers a number of Ceiling Antennas in 2.4 GHz and 2.4/5.8 GHz frequencies for many indoor applications. The coverage is 360° and operating with single feed (1 X 1) as well as the new MIMO Multiple feeds (3 X 3 and 6 X 6). MIMO antennas provide the user with a single antenna to couple with the many multiple feed wireless radios operating in 802.11a/b/g/n.

Medical Facility DAS Network

In the application diagram, L-com's DAS ceiling antennas are connected via low loss coaxial cable to fiber distribution units and then to the data center via fiber optic cabling providing staff, patients and guests with broadband wireless access supporting both cellular and WiFi device connectivity.

"STYLE" refers to shape of antenna in series.

L-com Range Extender Antennas (To see our full line of Range Extender Antennas go to L-com.com)

L-com's range extender antennas can be used to achieve greater range than standard Rubber Duck antennas or a PC card's internal antenna. Full 360° coverage is provided by the Omni Directional antennas and the Patch style range extender antennas feature directional operation. This series supports various applications including 2.4 GHz IEEE 802.11b/g/n wireless LANs, 800-1800 MHz ISM, GSM and RFID.

Tip What is Polarity?

Polarization refers to the orientation of the electric field component of an electromagnetic wave with respect to the Earth's surface. An electromagnetic wave is composed of electric and magnetic fields propagating perpendicular to each other. Radio and light are both electromagnetic waves. Electromagnetic waves can propagate with linear, circular or elliptical polarization. Linear polarization is the most popular method used in WiFi communications and can take two forms, vertical and horizontal. Some antennas utilize dual polarity which provides access and interoperability with both vertical and horizontal polarized antennas. Other polarization options include cross polarization where one element is +45° polarized and the other is -45° polarized. The two opposing 45° angle of the elements produces a cross or X orientation. Circular-polarized antennas have equal response to either horizontal or vertical polarized antennas. These antennas are designed to either support right hand or left hand polarization to suit varied wireless connectivity applications.

RET/AISG 8-Pin FS1 Type Male or Female Connectors

Remote Electrical Tilt (RET) antenna systems are designed so that wireless providers can make adjustments remotely to their antenna systems. The Antenna Interface Standards Group (AISG) has created specifications for the control interface for these types of systems. L-com now offers these FS1 type connectors for AISG applications as well as industrial control applications.

Wireless CPE, Access Points, Adapters

Wireless Networking Tutorial

802.11 Wireless Standards - Commonly Known as WiFi

IEEE Standard	802.11a	802.11b	802.11g	802.11n	802.11ac
Year Adopted	1999	1999	2003	2009	2014
Frequency	5 GHz	2.4 GHz	2.4 GHz	2.4/5 GHz	5 GHz
Max. Data Rate	54 Mbps	11 Mbps	54 Mbps	600 Mbps	1 Gbps
Typical Range Indoors*	100 ft.	100 ft.	125 ft.	225 ft.	90 ft.
Typical Range Outdoors*	400 ft.	450 ft.	450 ft.	825 ft.	1,000 ft.

*Range estimates are typical and require line of sight.

Access Point/CPE Overview

An access point or Customer Premise Equipment (CPE) performs the function of connecting wireless users (and wireless device) to a wired router or wired WLAN controller. Most modern access points or CPEs can be configured for several modes of operation.

Access Point (AP) Mode:

Allows wireless equipment such as a Smart Phone or Laptop to be connected to a wired network. In this mode the CPE unit is typically connected to a router on a wired network. The CPE unit provides security features that allow only select wireless devices to connect to it.

Wireless Client Mode:

In this mode the CPE unit connects to another active access point as if it were a wireless device like a Laptop. Once connected it can provide network/internet connectivity to wired devices without wireless functionality via the CPE's Ethernet port.

Bridge Mode:

Wireless bridge mode is used to connect two or more network segments that are physically separated. Using the WDS settings, only the selected CPEs can communicate with each other and will deny access to other wireless devices trying to access them. Bridges can be used in Point-to-Point (connecting two commercial buildings) or Point-to-Multipoint (connecting multiple buildings on a college campus) applications.

Repeater Mode:

This mode is used to extend the range of an existing access point. This mode is also ideal when an obstruction is preventing wireless connectivity within a select area. Repeaters are commonly used when providing wireless connectivity to multi-story buildings and large homes.

Wireless Network Design Resources

L-com offers an online library of wireless network application diagrams to show how our products work together to support various WiFi applications. Additionally we offer free technical design documents and calculators to help you with your wireless network applications.

L-com MIMO Antennas with Ubiquiti® RocketM2/M5 Mounting Kits

These ARK Series kits feature L-com MIMO Dual Polarized 2.4 GHz and 5 GHz antennas available in Dish, Omni and Sector models. Included with each antenna is a unique mounting bracket that allows the Ubiquiti RocketM2 or RocketM5 radio to be attached directly to the antenna. Also included are a pair of cable assemblies to connect the Rocket to the antenna. Customers can enjoy the cost saving of these kits compared to purchasing an Ubiquiti antenna to use with the RocketM2 or M5 radio. See our full line of ARK Series kits at L-com.com.

L-com USB Wireless Adapter

The L-com WLAN-LCUSB2458 USB wireless adapter is designed to provide high-speed and unrivaled wireless performance for your PC or Laptop. With a faster wireless connection, you can get better Internet service, decrease download time, improve gaming performance.

WLAN-LCUSB2458	L-com USB 2.0 Wireless 802.11a/b/g/n Adapter with 5 dBi Antenna	46.39
----------------	---	-------

PLANET WAP Series 802.11ac Wireless Access Points

PLANET's WAP series access points supports IEEE 802.11a/b/g/n/ac dual band standards. These high speed PoE access points are feature packed and easy to setup. Order some today and move up to 802.11ac speeds.

PT-WDAP-1750AC-FCC	PLANET WAP-1750AC-FCC 1750Mbps Dual Band Wall Mount Enterprise Wireless Access Point	248.00
PT-WDAP-8350	PLANET WAP-8350 600Mbps IP66 Rated Outdoor Dual Band CPE	967.09

PLANET CPE/Access Points

PLANET's outdoor CPE/AP's are designed to provide a highly-stable, better performance and cost-effective wireless solution in outdoor wireless deployment. With the same transmission power, it offers better significant range and excellent throughput than those of the traditional wireless devices. Available in 2.4 GHz 802.11n or 5 GHz 802.11a/n models with internal antennas.

PT-WAP-252N	PLANET 2.4 GHz 300Mbps 802.11n Outdoor Wireless AP (IP67, 802.3af/at PoE), (2) Type N Connectors	194.29
PT-WNAP-7335	PLANET 5 GHz 300Mbps 802.11a/n Outdoor Wireless CPE, (2) RP-SMA Connectors	121.38

PLANET 802.11ac Range Extender

PLANET's WRE-1200, an 802.11ac Dual-band Wi-Fi Range Extender with universal wall plug design is easy to install and connects to your router wirelessly. The WRE-1200 supports Gigabit Ethernet connectivity and conforms to IEEE 802.11a/b/g/n/ac Dual Band standard technology.

PT-WRE-1200-US	PLANET 1200Mbps 802.11ac Dual Band Wall Plug WiFi Range Extender	62.59
----------------	--	-------

EnGenius® 802.11ac Series Access Points/Routers/Bridges/Adapters

With speeds up to 3 times faster than 802.11n, the IEEE standard 802.11ac provides better performance and quality in wireless communications. The following wireless EnGenius products in this section all feature 802.11ac capability.

EN-EUB-1200AC	EnGenius EUB1200AC Dual-Band 802.11ac Wireless AC1200 USB Adapter	88.57
EN-ECB1750	EnGenius ECB1750 802.11ac 3 x 3 Dual-Band High-Power Access Point/Client Bridge	486.58
EN-EAP1200H	EnGenius EAP1200H 802.11ac Dual-Band AC1200 Indoor Access Point	291.75
EN-EAP1750H	EnGenius EAP1750H 802.11ac 3 x 3 Dual-Band Ceiling-Mount Access Point/WDS	432.43
EN-ENS1200	EnGenius ENS1200 802.11ac Dual-Band AC1200 Outdoor Access Point	416.79
EN-ENS1750	EnGenius ENS1750 802.11ac Dual-Band AC1750 Outdoor Access Point	520.99
EN-ENH1750EXT	EnGenius ENH1750EXT 802.11ac High-Power, Long-Range, Ruggedized 3 x 3 Dual-Band AC1750 Outdoor Access Point	1121.61

EnGenius® Cloud IoT Routers and Gateways

EnGenius Cloud Internet of Things (IoT) Solutions are designed to make your family, your home or your business more secure; the way you communicate effortless and less costly; your music, photos, video and documents safer and quicker to store and retrieve.

EN-EPG600	EnGenius EPG600 Intelligent Phone Gateway	156.29
EN-EPG5000	EnGenius EPG5000 Dual-Band IoT Intelligent Cloud Gateway	187.55
EN-ESR300	EnGenius ESR300 2.4 GHz N300 IoT Cloud Router with Built-in Switch and USB Port	67.73
EN-ESR600	EnGenius ESR600 Dual-Band 2.4/5 GHz N600 IoT Gigabit Cloud Router with USB Port	97.69
EN-EBK1000	EnGenius EBK1000 EnGuardian Kit with HD720P IP Camera and Dual-Band IoT Gateway	333.43

EnGenius® ECB Series Indoor Access Points

With the quality and functionality expected of an EnGenius product, the ECB series provides up to 800mW of high wireless output power and also adds advanced features such as SNMP management, Wireless Distribution System (WDS), and Power over Ethernet (PoE) capability.

EN-ECB-300	EnGenius ECB300 802.11b/g/n Wireless-N, N300 Indoor Access Point/Client Bridge/WDS/Repeater	109.41
EN-ECB-350	EnGenius ECB350 802.11b/g/n Wireless-N, N300 Indoor Access Point/Client Bridge/WDS/Repeater	146.30
EN-ECB-600	EnGenius ECB600 802.11b/g/n Wireless-N, N600 Indoor Access Point/Client Bridge/WDS/Repeater	227.58

EnGenius® EAP Series Access Points/Repeaters

EAP Series are smoke detector looking Wireless Access Point/Universal Repeaters that operate seamlessly in the 2.4GHz frequency spectrum supporting the 802.11b (2.4GHz, 11Mbps) standard and SuperG 108Mbps high speed feature.

EN-EAP-300	EnGenius EAP300 802.11b/g/n 29dBm WDS Bridge, Indoor VLAN Access Point	109.41
EN-EAP-350	EnGenius EAP350 800mW, 300Mbps, 802.11b/g/n Indoor Access Point	135.46

EnGenius® ENH Series Outdoor Access Point/Client Bridge

The ENH series Business-Class Long-Range Wireless-N Outdoor Access Point/Client Bridge is an affordable, high-performance, secure wireless networking solution. Designed for outdoor deployments that require secure and robust wireless coverage.

EN-ENH202	EnGenius ENH202 Wireless Outdoor 500mW Long-range Access Point/Client Bridge	113.25
EN-ENH210	EnGenius ENH210 802.11n 2.4GHz Wireless Outdoor Access Point/Client Bridge	291.76
EN-ENH500	EnGenius ENH500 Long Range 11n 5GHz Wireless Outdoor Access Point/Client Bridge	111.81
EN-ENH710EXT	EnGenius ENH710EXT High-Powered, Dual Band Ruggedized N600 Outdoor Access Point	540.76
EN-ENH900EXT	EnGenius ENH900EXT 802.11b/g/n Dual-Band 3 x 3 Ruggedized Outdoor Access Point/Client Bridge	812.76

EnGenius® ENS Series Outdoor Access Point/Client Bridge

The ENS series is a long-range Wireless-N Outdoor Access Point/Client Bridge operating in the 2.4/5 GHz frequency bands at data rates of 300Mbps. ENS high power output of up to 400mW is ideal for high-speed wireless connection for building-to-building deployments.

EN-ENS202	EnGenius ENS202 High-Powered, Long-Range 2.4 GHz Wireless N300 Outdoor Client Bridge	93.00
EN-ENS202EXT	EnGenius ENS202EXT High-Powered, Long-Range 2.4 GHz Wireless N300 Outdoor Access Point	108.95
EN-ENS500	EnGenius ENS500 High-Powered, Long-Range 5 GHz Wireless N300 Outdoor Client Bridge	105.36
EN-ENS500EXT	EnGenius ENS500EXT High-Powered, Long-Range 5 GHz Wireless N300 Outdoor Access Point	112.00

RF Filters/Splitters Tutorial

What are RF Filters?

RF Filters reduce out of band interference and improve performance of co-located equipment. An RF Filter will only pass the signal within the frequency band and channel of interest and reduce the interference of signals outside your channel. Interference is usually caused by transmission sources near the channel you are transmitting on.

L-com's RF Filters are available in full band versions or fixed channel versions and provide excellent adjacent channel rejection. All filters feature rugged aluminum construction and are available for indoor or outdoor applications.

Typical RF Filter Application

2.4 GHz Bandpass Channel Filter Application

What are RF Splitters/Combiners?

An RF Splitter/Combiner is a transmission component which divides or combine signals between two or more ports. Typically they are used for connecting more than one antenna to a single radio and can also be used to connect multiple radios to a single antenna using the same frequency.

Typical RF Splitter Application

4-Way Signal Splitter Application

What are RF Diplexers?

An RF Diplexer is a device that combines two signals onto a single transmission line. In general the two signals operate at different frequencies. L-com's Diplexers are designed to split 2.4 GHz and 5 GHz from a single radio feed to separate 2.4 GHz and 5 GHz antennas. Many dual-band 802.11a/b/g radios share a single antenna. These devices split these signals so that two separate 2.4 GHz and 5 GHz antennas can be used to improve performance. In addition, L-com Diplexers can also be used to combine 2.4 GHz or 5 GHz signals onto a single cable.

Typical RF Diplexer Applications

Dual Band Radio Application

Dual Band Antenna Application

4.9 GHz and 5.8 GHz Full Band Ultra High Q 4-Pole Bandpass Filters

L-com's 4.9 GHz and 5.8 GHz 4-Pole ultra high Q full band channel filters are ideal for co-located equipment installations. These filters are designed for full band applications. By reducing interference outside the respective bands (4900 MHz or 5800 MHz depending on model), improved performance on the co-located equipment can be achieved.

2.4/5 GHz Diplexers

L-com's 2.4/5 GHz diplexers are designed to split 2.4 GHz and 5 GHz from a single radio feed to separate 2.4 GHz and 5 GHz antennas. They can also be used to combine those frequencies into a single cable. Our diplexers are available for indoor and outdoor applications and feature Type N Female connectors.

Weatherproof Industrial Enclosures Tutorial

Ideal for Wired and Wireless Applications

L-com's Weatherproof Industrial Enclosures are ideal for Municipal/State/Federal wired and remote sensor applications (Water Management, Traffic controls,

Utility monitoring stations, etc.); secure WLAN WiFi equipment installations; Industrial Data and Control Systems in factories and manufacturing plants; SCADA applications and field installations; indoor and outdoor or hot and cold temperature environments where equipment and critical systems need power, connectivity, protection and security for the system operator. They are also great for solar powered applications, use in corrosive environments, sub-zero installations for monitoring and reporting, hotspot applications and protection of equipment from theft or

damage. Available with the widest range of enclosure options including heat, cooling and Power over Ethernet interfaces of anyone in the industry. In addition to our standard enclosure products listed below, we can custom manufacture enclosures based on customer requirements for large-scale projects. L-com enclosures offer the quality built, professionally integrated NEMA Enclosures for the systems user with the largest "OFF-THE-SHELF" configured enclosures product offerings of any supplier in the world.

Industrial NEMA Enclosures

Industrial NEMA Enclosures from L-com are extremely configurable to meet your EXACT equipment protection needs.

- With weatherproofing for climate and environmental protection
- For outdoor and indoor applications
- To operate in hot and/or cold temperatures
- With the ability to withstand harsh environments
- To protect electrical and/or electronic equipment
- For wired or wireless technologies
- To deploy and secure equipment
- To deliver power and data to equipment

Many Standard Configurations Available

Starting from simple enclosures to powered enclosures with cooling and heat, L-com makes it easy to find the exact enclosure you need from our standard selection.

L-com Custom Modifications

In most cases, our standard enclosures can be adapted with options or custom modifications to suit a customer's specific need. Below is a sampling of the many alterations that L-com can provide:

- Any number of ports added to the enclosure
- Ports can be of any specific size to accommodate both data and power feeds
- Custom cut-outs for glands, etc.
- Mounting plates and brackets (metallic or non-metallic)
- Pre-wired and/or pre-terminated enclosures
- Temperature controls for setting heating and cooling to maintain a desired temperature
- Custom insulation
- Specific color requirements
- Digital Printing is available on our FRP line of enclosures. www.l-com.com/multimedia/datasheets/DS_DIGITAL-PRINTING.PDF

L-com Enclosure Benefits

Our Industrial NEMA Enclosures are the most flexible and configurable in the industry. Choose from our huge selection of standard sizes and features or we can provide a custom enclosure for you.

- Largest selection of models available
- More options than you'll find elsewhere
- Fiberglass (FRP), plastic ABS and metallic enclosures offered
- Competitively priced for high value/performance ratio
- Quick turn-around time for custom modifications
- Ability to include enclosures as part of a total L-com "Engineered Solution," where other L-com products and engineering services are employed to deliver a product or system solution for your specific application

L-com Industrial Enclosures - Designed to Address all your Wired and Wireless Networking Applications

The examples below show just two of the many ways these enclosures can be utilized.

Model: NBW181608-00DR

18x16x8 Inch Windowed Enclosure with DIN Rails

This model features a lid with a Lexan window which provides visibility of the internal equipment inside the enclosure. The DIN rails provide mounting points for DIN mountable equipment, such as the Ethernet equipment shown in this example.

Model: NB141207-10F

14x12x7 Inch Enclosure with Cooling Fan

This model features four standard surge protected 120 VAC outlets and a terminal strip to supply power to internal equipment. The thermostat-controlled cooling fan provides high airflow and allows air to be pushed or pulled through the enclosure. This helps prevent overheating of the internal equipment mounted in the enclosure, such as the wireless Access Point shown in this example.

L-com's NEMA ENCLOSURE

NEMA and weatherproof enclosure products feature ABS, Fiberglass and Steel NEMA rated designs and are available with a wide range of sizes and options including: heat, cooling, AC or DC power, and Power over Ethernet (PoE) interfaces.

Default Temperature Setting	ON	OFF
UL Solid State Fan Controller Temp Range	93°F / 34°C	84°F / 29°C
UL Model Solid State Heater Controller Temp Range	16°F / -9°C	25°F / -4°C
PoE & Non-UL Fan only Solid State Fan Controller Temp Range	90°F / 32°C	81°F / 27°C
Power Saver Model Fan# 2 Solid State Fan Controller Temp Range	100°F / 38°C	91°F / 33°C
Heater only Solid State Heater Controller Temp Range	15°F / -10°C	24°F / -5°C
Mechanical Fan Thermostat Controller Temp Range	120°F / 49°C	90°F / 32°C
Mechanical Heater Thermostat Controller Temp Range	40°F / 4°C	60°F / -15°C

NEMA/IEC

NEMA, (National Electrical Manufacturers Association) and the IEC (International Electrotechnical Commission) are two standards groups, which have devised two different rating systems for enclosures, which define the enclosures resistance to dust, moisture, water immersion and ice. The IEC's rating is referred to as the IP or Ingress Protection rating. The table below outlines NEMA and IEC IP enclosure ratings. This chart only works in one direction from NEMA to IEC. An IP rating only considers protection against ingress of solid foreign objects and ingress of water.

NEMA enclosure type no.	ENCLOSURE CONSTRUCTION DEFINITIONS	IEC enclosure class
1	General-purpose. Protects against dust, light and indirect splashing but is not dust-tight; primarily prevents contact with live parts; used indoors and under normal atmospheric conditions.	IP20
2	Drip-tight. Similar to Type 1 but with addition of drip shields; used where condensation may be severe (as in cooling rooms and laundries).	IP22
3 and 3S	Weather-resistant. Protects against weather hazards such as rain and sleet; used outdoors on ship docks, in construction work and in tunnels and subways.	IP54
3R	Intended for outdoor use. Provides a degree of protection against falling rain and ice formation. Meets rod entry, rain, external icing and rust-resistance design tests.	IP14
4 and 4X	Watertight (weatherproof). Must exclude at least 65 GPM of water from 1 inch nozzle delivered from a distance not less than 10 ft for 5 minutes. Used outdoors on ship docks, in dairies and in breweries.	IP56
5	Dust-tight. Provided with gaskets or equivalent to exclude dust; used in steel mills and cement plants.	IP52
6 and 6P	Submersible. Design depends on specified conditions of pressure and time; submersible in water; used in quarries, mines and manholes.	IP67
7	Hazardous. For indoor use in Class I, Groups A, B, C and D environments as defined in the NEC.	—
8	Hazardous. For indoor and outdoor use in locations classified as Class I, Groups A, B, C and D as defined in the NEC.	—
9	Hazardous. For indoor and outdoor use in locations classified as Class II, Groups E, F or G as defined in the NEC.	—
10	MSHA. Meets the requirements of the Mine Safety and Health Administration, 30 CFR Part 18 (1978).	—
11	General-purpose. Protects against the corrosive effects of liquids and gases. Meets drip and corrosion-resistance tests.	—
12 and 12K	General-purpose. Intended for indoor use, provides some protection against dust, falling dirt and dripping noncorrosive liquids. Meets drip, dust and rust resistance tests.	IP52
13	General-purpose. Primarily used to provide protection against dust, spraying of water, oil and noncorrosive coolants. Meets oil exclusion and rust resistance design tests.	IP54

NEMA RATED ENCLOSURES

Standard Enclosure Part Numbering System

The chart to the right is provided as a reference to help you understand L-com's standard enclosure part numbers. From a single number, you can obtain information such as enclosure series, size, power options and enclosure options.

Please note that all option combinations may not be available. Some option combinations may be offered as custom. Please contact our sales team to discuss your requirements.

FOOT NOTES:

1 = Available in NBV Series Enclosures, blank, non-power versions only

2 = Part numbers without Power and Enclosure Options indicate blank non-powered enclosures

3 = Available in NB141207 VAC Powered Series Enclosures only

4 = NB, NBB, NBC, NBG, NBN, NBV and NBW Series Enclosures in blank non-powered configurations are UL Listed

5 = Available in NBG Series Enclosures, blank, non-powered versions only

Standard Unmodified Enclosure Kits with Mounting Plates

L-com's non-powered NEMA rated enclosures are perfect for housing both wired and wireless communications equipment. We offer our standard unmodified enclosures as kit options consisting of the base enclosure & a mounting plate. -KIT consists of a blank aluminum mounting plate and the -KIT01 consists of a non-metallic marine "Starboard" mounting plate that can be screwed into directly without the need for pre-drilling any holes. The kit options are available in FRP (Fiberglass Reinforced Polyester), ABS (Plastic) and Carbon Steel.

Lightning/Surge Protectors Tutorial

What are Lightning and Surge Protectors?

Lightning and surge protectors are devices whose purpose is to eliminate transients on a conductor which are induced by nearby lightning activity. They are used to prevent damage to valuable electronic equipment from these high-voltage surges and spikes.

How are Lightning and Surge Protectors used?

A lightning and surge protector is used inline between devices such as antennas and amplifiers and radios or between connections on Ethernet switches and routers. They are connected via copper cabling (Coaxial, UTP etc.).

Where are Lightning and Surge Protectors used?

Lightning and surge protectors are used in many different applications including outdoor wireless networks, indoor Ethernet network installations and in any instance where the potential for a power surge could damage or destroy communications equipment.

Don't let lightning destroy your network!

A single bolt of lightning carrying up to 100 million volts of electricity has the power to rip through roofs, explode brick walls and destroy electronic networking/communications equipment as well as industrial equipment. Don't be fooled into a false sense of security if you never receive direct strikes. Indirect lightning strikes on telephone and power lines can be just as catastrophic! Protect your valuable communications equipment with L-com's surge protectors.

Coaxial Lightning and Surge Protectors

L-com's coaxial lightning and surge protectors are available in two types, Quarter Wave and Gas Discharge models.

Quarter Wave coaxial protectors are designed to pass the desired frequency while suppressing lightning surges, much like a signal filter. Lightning strike electrical surges which operate at low frequencies are diverted through the protector's short-circuit to the ground.

Gas Discharge coaxial protectors are a type of lightning arrestor which employs a replaceable gas discharge tube, which is a component containing a small amount of gas. The gas tube dumps extremely high amounts of surge energy directly to the ground of the protector. L-com coaxial lightning protectors are available for 0-3 GHz operation or 0-6 GHz operation.

Data Line Lightning and Surge Protectors

The use of surge protectors to protect sensitive equipment from lightning strikes and surges on Ethernet data lines has become more important than ever with the advent of faster standards like 100 and 1000 Base-T Ethernet. The faster data speeds have required equipment manufacturers to use fragile high speed components.

Designed for Cat5, Cat5e and Cat6 applications, L-com's data line protectors are available in different power levels. From low power models for typical hub or client installations to high-power, 3-stage protectors designed for maximum surge protection.

In addition to our data line protectors, we offer protectors for Telephone, DSL, T1, RS422/485, RS232, 4-20 mA Current Loop, AC/DC and Video applications.

Three Stage Data Line Protector

Weatherproof Analog Pan-Tilt-Zoom (PTZ) Video Camera Lightning and Surge Protectors

Outdoor video security equipment is often mounted on top of buildings and light poles, areas more vulnerable to lightning strikes. This can damage not only the video cameras, but the controllers as well. The AL-VDP series is designed to provide lightning and surge protection for analog PTZ video cameras. These protectors incorporate individual protection circuits for the analog video line, RS485 control line and AC/DC power lines.

Grounding Note:

Proper grounding of lightning and surge protectors is required to ensure proper operation. Connecting the ground lug on the protectors to an earth ground is the recommended method. Please refer to the National Electric Code (or your local codes) for additional information or contact a licensed electrician for assistance.

L-com Data Line Lightning and Surge Protectors

L-com's Cat5/5e/6 lightning protectors are designed to protect expensive wired and wireless 10/100 and 10/100/1000 Base-T Ethernet systems. These robust lightning protectors are also great to use in Power over Ethernet (PoE) camera installations.

Rack Mount Ethernet and Telephone/DSL Protectors

The RMSP series lightning and surge protectors provides multiple line protection in a standard 19" rack panel. Available in 4/12/24 port versions, the RMSP series mounts into any standard 19" (48.3cm) rack system and may be installed in the rear of the rack where they are normally required of line in and out.

RS422/RS485 Control Lines with AC/DC Supply Voltage Protectors

L-com's AL-D15P and ALS-D25P protectors incorporate individual protection circuits for RS422/485 control lines and AC/DC power lines. These protectors are ideal for RS422/485 lines with AC/DC supply voltage, analog or IP video surveillance cameras, pool/spa controllers and Pan-Tilt-Zoom (PTZ) camera controllers.

USB Lightning and Surge Protectors, Panel Mountable

The L-com AL-ECF504 series USB surge protectors are commercial quality devices designed to protect a computer's sensitive USB ports from surges and spikes from attached devices. To ensure USB 2.0 speeds, the device uses ultra-low capacitance diodes to protect the data lines. In addition, a protection device clamps the power lines to safe levels. These panel mount protectors are available with or without a pigtail cable.

AL-ECF504-AB		USB Type A Female Bulkhead/Type B Female	21.22	19.95	18.67	CALL

*Also available in lengths of 24" (61.0cm), 36" (91.4cm), 48" (121.9cm) and 72" (182.9cm). See web site for details.

Telephone/DSL/T1 Protectors

The LPXTRJ11-1F surge suppressor is a high-current, solid-state device designed to protect equipment from transient over-voltages on telephone lines with RJ-11 connectors using pins 3 and 4. The LPXTRJ45-T1 Surge Suppressor is a high-speed, high-current, solid-state device designed to protect equipment from transient over voltages on data lines.

LPXT Data Line Protector Modules and Chassis

The LPXT-MOD-CHASSIS is a 1RU 19" rack mount chassis designed to hold up to 16 LPXT protection modules which when installed into the chassis leaves all input/output connections facing front. The LPXT Series Protection Modules employ a hybrid protection solution comprised of high-energy gas discharge tube technology and low-capacitance transient blocking technology. You can mix & match the different modules to meet your unique configuration requirements.

Note: The dedicated dual ground studs on the rear of the unit must be connected to the nearest master ground bar for proper operation.

Data Line Protectors for Indoor/Outdoor					
The LPXT-WP Wallmount/ Pole Mount Series of Broadband Communications Protectors are designed to protect data networks with combinations of high speed data protocols. The protection circuits utilize silicon avalanche diode technology. The units are intended to be wall mounted and an optional bracket is available to allow a wide range of pole mount applications.

Data Line Surge Protection Designed to Support GbE, PoE+ and GbE, PoE++ Protocols, for Indoor/Outdoor

The LPXT-WP-GB-POE series of data line surge protectors are designed with ease of installation in mind to protect GbE, PoE+ and GbE, PoE++ networks for indoor and IP 65 applications. The LPXT-WP-GB-POE series offers gas tube and hybrid technology options providing superior cost effective protection for data speeds up to 1 Gb/s.

Data Line Protectors Bulkhead Mount

The LPXT Series Din-Rail DC surge suppressors are modular, high-speed, high-current, solid-state devices designed to protect electronic equipment and systems from transient overvoltage. The suppressor limits the magnitude of transient overvoltage that may occur on low voltage DC power lines, 4-20mA current loops or low frequency data lines. Data lines that benefit from LPXT suppression include: Ethernet, RS-485/232, Profibus, Foundation Fieldbus, DH+ or DeviceNet.

Serial Protector Wallmounts with Terminal Blocks

LPXT-WM-TERM series of surge suppressors are a high-speed, high-current solid state device designed to protect RS 422, 4-20 ma Double Wire Pair (4-Wire) configurations and other balanced pair applications from transient over voltages. The LPXT-WM-TERM series uses only silicon suppression components. It connects to the equipment and line via two (2), Six (6) position terminal blocks.

Note: "EQUIP GND" connection should be kept as short as possible and utilize the largest gauge wire possible.

LPXT-WM-TERM-12V	Serial Protector Wallmount with Terminal Block 12VDC	107.85	103.54	99.22	CALL

High Performance RF Broadband Coaxial Lightning and Surge Protectors

L-com's LCSP1000 series of surge arrestors use a patented surge filter design. The almost instantaneous response to a lightning surge minimizes energy let-through and protects critical wireless equipment. Models available with ultra-low PIM performance and DC Pass (AISG) capability, used in 4G and 5G applications.

LCSP1000	Type N Female/Female In/Out RF Surge Protector 698MHz - 2.7GHz DC Block 500W IP67 40kA Surge Filter	89.10

RF Coaxial Lightning and Surge Protectors for UH, UHF and VHF Bands

L-com's LCSP1021-1032 series of DC block surge protectors are designed to protect against lightning events and are ideal for HF, UHF and VHF radios. This family of RF protectors can be used for applications such as emergency response, SCADA and public safety communications with frequency ranges between 1.5 MHz to 1000 MHz. Optional weather proofing kit and copper cleaning kit are available for purchase separately.

LCSP1021	Type N Female/Female In/Out RF Surge Protector 125MHz - 1GHz DC Block 375W 20kA Blocking Cap and Gas Tube	58.15
LCSP1022	Type N Female/Female In/Out RF Surge Protector 125MHz - 1GHz DC Block 500W Blocking Cap and Gas Tube	70.34
LCSP1023	Type N Male/Female In/Out RF Surge Protector 125MHz - 1GHz DC Block 375W 20kA Blocking Cap and Gas Tube	58.15
LCSP1024	Type N Female/Female Bulkhead RF Surge Protector 10MHz - 1GHz DC Block 1.5kW 20kA Blocking Cap and Gas Tube	64.71
LCSP1025	Type N Female/Female In/Out RF Surge Protector 1.5MHz - 700MHz DC Block 2kW 50kA Blocking Cap and Gas Tube	58.15
LCSP1026	UHF Female/Female In/Out RF Surge Protector 1.5MHz - 700MHz DC Block 2kW 50kA Blocking Cap and Gas Tube	64.99
LCSP1027	Type N Female/Female In/Out RF Surge Protector 1.5MHz - 700MHz DC Block 500W 50kA Blocking Cap and Gas Tube	96.60
LCSP1028	Type N Male/Female In/Out RF Surge Protector 125MHz - 1GHz DC Block 375W 20kA Blocking Cap and Gas Tube	64.71
LCSP1029	Type N Female/Female In/Out RF Surge Protector 125MHz - 1GHz DC Block 200W 50kA Blocking Cap and Gas Tube	101.43
LCSP1030	Type N Female/Female In/Out RF Surge Protector 1.5MHz - 700MHz DC Block 3kW 20kA Blocking Cap and Gas Tube	70.34
LCSP1031	Type N Male/Female In/Out RF Surge Protector 125MHz - 1GHz DC Block 500W 50kA Blocking Cap and Gas Tube	73.86
LCSP1032	UHF Female/Female Bulkhead RF Surge Protector 1.5MHz - 700MHz DC Block 2kW 50kA Blocking Cap and Gas Tube	67.95

RF Coaxial Lightning and Surge Protectors for VHF Bands

L-com's LCSP1033-1037 series of surge protectors provides DC block surge protection for LMR and remote monitor applications requiring frequencies between 100 MHz and 512 MHz. Industry leading PIM rated products are also available.

LCSP1033	Type N Female/Female In/Out RF Surge Protector 100MHz - 512MHz 750W IP67 20kA Surge Filter Bracket Toward Body	98.47
LCSP1034	7/16 Male/Female In/Out RF Surge Protector 100MHz - 512MHz 750W IP67 20kA Surge Filter Low PIM -155 dBc	140.67
LCSP1035	Type N Female/Female In/Out RF Surge Protector 100MHz - 512MHz 750W IP67 20kA Surge Filter with Bracket	98.47
LCSP1036	Type N Male/Female In/Out RF Surge Protector 100MHz - 512MHz 750W IP67 20kA Surge Filter	98.47
LCSP1037	7/16 Female/Female In/Out RF Surge Protector 100MHz - 512MHz 750W IP67 20kA Surge Filter	130.97

RF Coaxial Lightning and Surge Protectors 0-7GHz with Gas Tube Technology

L-com's LCSP1038-1042 series of RF DC pass broadband surge arrestors are cost-effective and can be used for many general applications such as land mobile radio, WiFi and GPS. Products offer excellent VSWR and superior RF performance for equipment operating between DC and 7GHz. They are available in a variety of connector options with replaceable gas-tube options also available.

LCSP1038	Type N Female/Female RF Surge Protector DC - 7GHz and 3GHz - 4GHz DC Pass 90W IP67 20kA Gas Discharge Tube	42.21
LCSP1039	Type N Female/Female In/Out RF Surge Protector DC - 3GHz and 1GHz - 3GHz DC Pass 90W IP67 Gas Discharge Tube	54.14
LCSP1040	Type N Female/Female In/Out RF Surge Protector DC - 2.4GHz DC Pass 40W IP67 18kA Gas Discharge Tube	70.34
LCSP1041	Type N Female/Male In/Out RF Surge Protector DC - 7GHz DC Pass 90W IP67 Gas Discharge Tube	44.32

RF Coaxial Lightning and Surge Protectors for WiFi Applications

L-com's LCSP1048-1050 series of surge arrestors use a patented surge filter design to provide superior lightning and surge protection performance targeted for WiFi applications.

LCSP1048	Type N Female/Female In/Out RF Surge Protector 2GHz - 6GHz DC Block 10W IP67 10kA Surge Filter	50.27
LCSP1049	Type N Female/Male In/Out RF Surge Protector 2GHz - 6GHz DC Block 10W IP67 10kA Surge Filter	50.27
LCSP1050	Type N Female/Female In/Out RF Surge Protector 1.8GHz - 3.8GHz 10W IP67 18kA Surge Filter	89.10

Grounding Kits and Clamps

L-com's coax cable grounding kits are designed to withstand the damaging effects of lightning currents in excess of 200kA as well as meet the MIL-STD-188-124A protection requirements. Our grounding pipe clamp fits around existing conduit pipes or water pipes for a secure ground.

Power over Ethernet (PoE) Midspan/Injectors

L-com offers a wide range of PoE Midspan/Injectors styles including reverse polarity and 4-port models. These PoE Midspan/Injectors can be used to supply power as well as data to PoE compliant devices such as access points, CPEs, IP phone and wireless routers over a single Ethernet cable.

Cat5 Splitter/Tap with Adjustable DC Output

The BT-CAT5-R0512 PoE Splitter/Tap delivers both data and DC power to non-PoE equipped Ethernet devices using a single Cat5 cable. It features a user adjustable output voltage selector which can be set for 5VDC, 7.5VDC, 9VDC or 12VDC allowing it to be used with a wide range of non-PoE devices.

Typical PoE Midspan/Injector and Splitter Applications

Telecom/Modular-Premise Wiring Tutorial

What is Premise Wiring?

Premise Wiring is the cabling, connectors and accessories that are used to connect LAN (Local Area Network) and phone equipment inside a commercial building.

How is Premise Wiring used?

Premise Wiring is made up of vertical and horizontal cable runs from a central location throughout buildings to individual desktops.

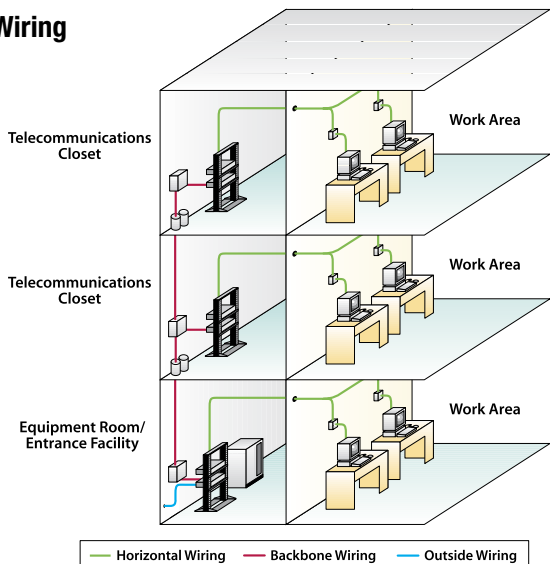

Where is Premise Wiring used?

Premise wiring can be found in just about all public and private buildings, including educational and government buildings as well as in many newer homes.

Typical LAN Premise Wiring

Wiring Notes:

1. Category 5e/6 unshielded twisted pair is the norm. Use 4 pair solid conductor inside the walls, 4 pair stranded for patch cords. Plenum rated cabling may be necessary depending upon fire codes in your area.
2. Maximum distance for a horizontal run is 90m (solid conductor) plus an additional 10m (stranded conductor) for patching.
3. Fiber is the common choice for backbone wiring. It is also recommended for horizontal runs over 100m.

Typical Telecommunications Closet

Approximately 70% of network downtime is due to faulty cables

Quality Components are the building blocks of a reliable network

Cable

Many low cost telecom/modular cables use copper clad aluminum or copper clad steel. Aluminum and steel have much higher resistance than copper, resulting in increased data loss and low transmission speeds. L-com uses only pure copper conductors on its cables. Additionally, cable jackets can be made with less fireproofing materials than claimed and in some cases the writing on the jacket might state 24 AWG but is actually made from 25 or 26 AWG wire.

Gold flash on competitors RJ45 contact has deteriorated, degrading connectivity.

L-com connectors with 50 microinches (1.27µm) of gold do not degrade.

Connectors

Some competitor's connectors use only a gold flash where L-com ensures 50 microinches (1.27µm) or better of gold flash on our connectors.

Gold flash on connectors quickly rubs off, especially for patch cables. This can result in a measurably slower network and even dropped connectivity.

To view the entire article concerning counterfeit and low quality telecom/modular cables visit our website: L-com.com/CableTest

Ethernet Cable Applications

Download this helpful chart at L-com.com/EthernetCableGuide

CONSTRUCTION

UTP

Used in controlled environments with very little to no EMI/RFI. Used in home, small office and Enterprise business networks.

Shielded

For environments where EMI/RFI is present, such as near motors, generators and other "noise" generating machines.

Double Shielded

Used in extremely high EMI/RFI environments such as factories and processing plants where "noise" generating equipment including generators, power transmission lines, and electric motors are present.

High Flex

Used in continuous motion applications such as a robot arm control cable in a manufacturing environment.

MATERIAL

PVC

Very common jacket and over mold compound used in basic small office/home office (SOHO), small to medium business (SMB) and Enterprise network applications. PVC burns rapidly and releases hazardous gases when burned. Applications consist of general open space connectivity (not used in walls or ceilings).

LSZH

Low Smoke Zero Halogen cables produce very little smoke when burned and release no halogen compounds including Fluorine, Chlorine, and Bromine. This type of cabling is typically used in confined spaces where human lives and expensive communications equipment reside. LSZH is used on ships, submarines, aircraft, terrestrial vehicles etc.

Plenum

Plenum cabling is used in buildings in the plenum air space usually above ceiling tiles or in the plenum airspace under the flooring in a server room or data closet. Plenum cables will self extinguish and not re-ignite.

PUR/TPE

PUR (polyurethane) and TPE (thermoplastic elastomer) cabling are typically used in harsh or Industrial Ethernet networking applications where the presence of petroleum based contaminants, UV rays, and physical impacts occur. Applications include oil refineries, factory floor, manufacturing, processing industries (food and chemical) etc.

Telecom/Modular Connectors

MALE PLUGS

Modular (6x2)

Modular (8x2)

Modular (8x4)

Category 6a 28 AWG Shielded Slim-line Patch Cables

L-com's slim-line Ethernet patch cables are the ideal solution for high density patching applications. The patent pending spline-free design provides a reduced diameter profile which offers a perfect solution for applications that require a smaller and more flexible cable. With a performance rating of Category 6a, these cables support data rates up to 10Gbps for demanding high-speed voice, video and data applications. L-com's low profile short boot design saves additional space on your patch panel allowing for a clean organized look to patch bays. Available with a standard PVC jacket or a dual rated LSZH (low-smoke zero halogen) jacket that meets both CM and LSZH standards.

Premium Category 6a RJ45 10-Gig Shielded Patch Cords

L-com's TRD695A Category 6a cable assemblies offer true 10 Gigabit Ethernet speeds at frequencies up to 500 MHz. These robust Category 6a cables are perfect for high speed computing applications often found in data centers. Category 6a cable color options include blue (BLU), black (BLK), red (RD), and gray (GRY).

Ordering is easy, add the desired color code to the part number Ex: TRD695ABLK-1

Premium Category 6 RJ45 to RJ45 Shielded Patch Cords

Category 6 has become the de facto standard when installing new network cabling. With high bandwidth applications on the rise and Ethernet network deployments venturing into new areas such as factory environments, the need for shielded Category 6 cable assemblies has also increased. L-com has stepped up to this new demand and created a line of high performance Category 6 patch cords that feature a 100% foil shield and the option of either a PVC, Plenum or Zero Halogen jacket.

Category 6 Patch Cords

Ordering is easy, add the desired color code to the part number. Ex: TRD695DSZ-BLK-1.

*Note: No suffix necessary for gray TRD695SZ assemblies.

Premium Category 6 RJ45 Hi-Speed Network Patch Cords with PVC Jacket

Competitive pricing and high quality is what makes L-com's Category 6 patch cords the right choice. Made with high performance 4-pair Category 6 cable and snagless plugs, these cables are ready to be installed in your network.

Affordability and peace of mind are assured when choosing L-com's patch cords. Large volume OEM requests are welcomed with this series. Contact us today for all your patch cord needs.

Ordering is easy, add the desired color code to the part number. Ex: TRD695BL-1

Category 6 Shielded RJ45 to RJ45 Plenum (CMP) Patch Cords – 4 Pair Solid

Designed for environments where PVCs combustive toxicity is restricted, L-com's shielded Plenum (CMP) Ethernet cables provide the ideal alternative. Featuring shielded RJ45 connectors and aluminumized polyester shielded cable with drain wire, these assemblies are designed to protect against EM/RFI while maintaining high performance data transmission characteristics. The cables meet the stringent CMP (Plenum) burn rating requirements as well. Ensure the protection of your investment by utilizing these L-com exclusive shielded plenum cables. Custom lengths and quantity pricing available.

Category 6 28 AWG Slim-line Patch Cables

L-com's slim-line Ethernet patch cables are the ideal solution for high density patching applications. The patent pending spline-free design provides a 38% smaller cross sectional area, a perfect solution for applications that require a smaller and more flexible cable. With a performance rating of Category 6, these cables support data rates up to 1Gbps for demanding high-speed voice, video and data applications. L-com's low profile short boot design saves additional space on your patch panel allowing for a clean organized look to patch bays. Available with a standard PVC jacket or a dual rated LSZH (low-smoke zero halogen) jacket that meets both CM and LSZH standards.

Premium Category 5e RJ45 Molded Ethernet Patch Cords

Designed for today's high-density patch panels, these unique Category 5e molded patch cords feature an easy to depress "shark fin" snagless molded boot that makes connecting cables easier. The clear boot also allows the color of each cable to be easily seen on each port for easy cable identification. Each cable is tested for Category 5e performance to ensure maximum network throughput.

Tip Which patch cords are best for a 10/100 Mbps Ethernet network?

Any of the TRD815 series patch cords will work effectively for ethernet networks. Choosing different colors for separate network segments in your wiring closet makes troubleshooting quick and easy.

Premium Category 5e RJ45 Molded Crossover Ethernet Patch Cords

Also designed for today's high-density patch panels, these unique Category 5e molded patch cords feature an easy to depress "shark fin" snagless molded boot that makes connecting cables effortless. The clear boot also allows the color of each cable to be easily seen up to each

port for easy cable identification. Each cable is crossover wired (EIA568A/B) for usage as either uplink connections or for direct connecting of two computers. Contact us today for all your patch cord needs.

Category 5e Shielded RJ45 to RJ45 Plenum Patch Cords - 4 Pair Solid for EIA568 Wiring

Designed for environments where PVC's combustive toxicity is restricted, L-com's shielded plenum Ethernet cables provide the ideal alternative. Featuring all-metal-body RJ45 connectors and aluminumized polyester shielded cable with drain wire, these assemblies are designed to protect against EMI/RFI while maintaining high performance data transmission characteristics. These unique cable assemblies feature an easy to depress "shark fin" snagless molded boot that makes connecting your cables easier.

Category 5e Shielded RJ11 to RJ11 Patch Cords - 2 Pair USOC Wiring

For protection against EMI/RFI interference choose L-com's Shielded Category 5e Voice and Data Patch Cables the right choice. Made with 2-Pair shielded Category 5e rated cable and shielded RJ11 plugs, your voice and data signal is protected from interference. Affordability and peace of mind are assured when choosing L-com's patch cables. Large volume OEM requests are welcomed with this series.

Unshielded Twisted Pair Patch Cords - Category 5e, For Most Network Environments

L-com offers the high quality Category 5e patch cords for use in today's rapidly changing network environments. Category 5e calls for 100 MHz bandwidth @ 100 Mbps data rate which is currently more than adequate for standard Ethernet environments. Unshielded assemblies are manufactured with UL Listed 24 AWG stranded cable with PVC jacket. Plugs have 50 microinches (1.27µm) of gold; assemblies tested 100% prior to shipping.

Twisted Pair Pinning: 2 & 5, 3 & 4

Category 5e RJ45 to RJ45 Patch Cords

Realistic pricing and high quality is what makes L-com's Category 5e Network Patch Cables the right choice. Made with 2-Pair Category 5e rated cable and plugs, these cables are ready to be installed in your network. Since most 10Base-T and 100Base-T networks only use 2-pairs for data transmission, why pay for the other pairs to be terminated. Affordability and peace of mind are assured when choosing L-com's patch cables.

Category 5e and 6 Network Extension Cables

L-com's unique network extension cables offer the perfect solution for extending an Ethernet network cable to the outside of an enclosure or by making a hard to reach port more accessible. Available in either Category 5e or Category 6, shielded or unshielded, these cables are up to the task for your high demand data tasks. These extensions feature either a panel mountable flange or an inline flange-free design.

Premium Category 5e RJ45 Right Angle Ethernet Patch Cords

L-com's unique, patented design, right angle patch cables provide true Category 5e performance at an affordable price. These right angle Ethernet patch cables feature a specialized channel separator and load bar to achieve Category 5e performance while maintaining a right angle bend. L-com's right angle cables are superior to competitor's right angle assemblies.

We've tested it ourselves and the competitor's right angle cables do not pass Category 5e testing for NEXT or Return Loss since the twists of the individual pairs are not maintained through the strain relief and into the connector body. These industry first cables are perfect for use in tight fit applications and dense connectivity applications commonly found in data centers.

Choosing the correct orientation Right Angle for your specific need:

DIRECTION - Add Code

	Straight	Down	Up	Right	Left

Premium Category 5e and 6 RJ45 90° Stackable Angle Ethernet Patch Cords

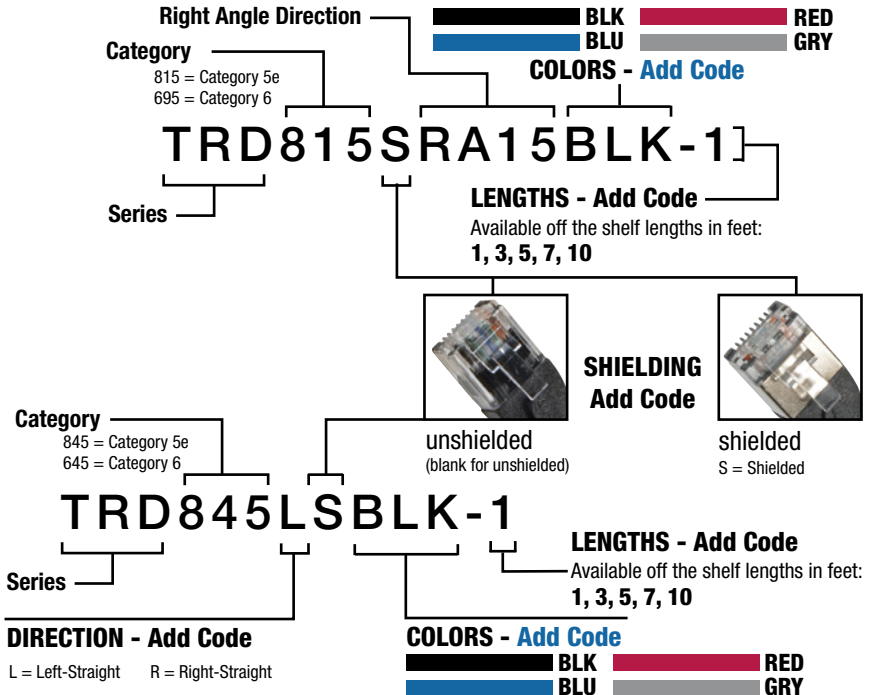

L-com's unique, patented, stackable right angle Ethernet cable assemblies provide true Category 5e and 6 performance at an affordable price. Our right angle Ethernet cable assemblies feature a specialized channel separator and load bar to achieve high performance while maintaining a right angle bend. Stackable Ethernet is designed to be used with L-com's standard 90 degree boot to "stak" the cables and achieve maximum panel density while allowing the cables to exit in the same direction. These cable assemblies are superior to competitor's right angle cable assemblies. L-com's industry first right angle Ethernet cables are perfect for use in tight fit applications and dense connectivity applications commonly found in data centers and enclosures. We offer Category 5e and 6 shielded and unshielded stackable right angle cable assemblies off the shelf.

What makes L-com's Right Angle Category 5e cable design superior?

Our competitors' right angle cable designs are inferior as they do not maintain the proper pair twists as the cable enters the right angle. These cables have no mechanism for controlling the twisted pairs as they travel through the right angle strain relief. We tested these cables ourselves and they do not pass Cat5e testing for NEXT or Return Loss.

Competitors' Design

L-com's unique patented design utilizes a specialized channel separator and load bar to maintain the twists through the right angle. L-com's right angle cables are truly Cat5e rated.

Tip What does transversely sealed mean?

Did you know that all of L-com's new ruggedized RJ45 jam-nuts, flanges and in-line receptacles are transversely sealed? As the name implies, this means that they are waterproof. The parts meet or exceed IP-68 rating with or without dust covers or mated connectors engaged with the receptacle. The jacks are waterproof even without a mated cap or connector when submerged under 1 meter of water for up to two days. Your equipment will not be at risk from moisture or dust even if you lose or forget the dust cap.

Ruggedized RJ45 Plugs and Jacks Category 5e and Category 6 Applications

In today's world of high-speed communications, Ethernet has become the standard platform for all voice, video and data services. L-com's Category 5e and Category 6 ruggedized family of RJ45 plugs and receptacles provide an efficient, comprehensive and affordable solution to Ethernet connectivity for harsh and environmentally challenged applications. The jacks feature 100% transversely sealed (IP-68) configurations as a standard product design, preventing dust, water and moisture penetration, with or without dust cap or plug engagement. The ruggedized parts offer comprehensive shielding and grounding effectiveness capable of sustaining higher data transmission rates as well as Electro-Magnetic Conductance (EMC) for Military applications (Zinc-Nickel and Electroless Nickel finished parts offer EMC grounding). Suggested areas of usage include Data, VOIP, IPTV in harsh environments, 10/100/1000 Base-T networks, battlefield communication systems, industrial process control, data acquisition and control, factory environments, radar systems, railways and shelters among other things.

Ruggedized RJ45 Plugs, Category 5e or Category 6

L-com's ruggedized RJ45 plugs are designed to integrate with other ruggedized jam-nuts, flange mounts and in-line receptacles. Special compressive fittings allow these plugs to work with shielded or unshielded cable. A compression nut establishes 10lb of cable strain relief establishing robust cable strength. Internal conductive compression is used to interoperate with the cable braid to form a 360° ground plane. Plugs are available with or without dust caps. Ruggedize your plugs for harsh environmental applications today.

Panel Mountable Ruggedized RJ45 Receptacles, Category 5e or Category 6, Flange Mount Style

These ruggedized RJ45 receptacles are transversely sealed for complete moisture and dust protection. L-com's ECRD line provides both the Flange mount and sealing gasket. The ECRH line comes with full mounting hardware including bracket, self-sealing mounting screws, and O-rings for an easy installation. See L-com.com for our full line of harsh environment products.

Panel Mountable Ruggedized RJ45 Receptacles, Category 5e or Category 6, Jam Nut Styles

L-com's Category 5e or Category 6 transversely sealed jam-nuts are an ideal fit for situations requiring a ruggedized RJ45 jack and a simple D-hole for mounting with no additional hardware required. They boast an IP68 rating even without a mated connector or dust cap. The ECRK line is a simple D-hole jam nut and requires no additional hardware for mounting and the ECRJ line fits a D38999/24 and M83723/60 cutout. Zinc-Nickel and Electroless Nickel versions are available with an EMI grounding plate on both sides of the receptacle to ensure proper grounding for shielded RJ45 cables. Jam-nuts are available both with and without dust caps. Don't see what you are looking for? Call today to discuss custom solutions for all your interconnect needs.

Tip Grounding RJ45 ruggedized jacks

Many applications that require the use of higher data rates require proper grounding and shielding. To address this, L-com offers our Zinc-Nickel finished line of RJ45 Ruggedized jacks which are designed to establish sufficient grounding between shielded cord sets and chassis ground. They also provide EMC/EMI shielding for applications where immunity

to electromagnetic interference is crucial. The parts provide $<0.033\Omega$ for shielded cable to cable or cable to ground use. This is accomplished using a grounding plate, conductive O-ring and gasket. The parts adhere to and are tested to IAW MIL-STD-461F, RS103 for EMI emission and susceptibility.

Category 5e Ruggedized RJ45 Assemblies with FR-TPE Outdoor Rated Cable

L-com is proud to offer assemblies using our IP68 rated ruggedized RJ45 plugs and jacks in various combinations. Each cable is built using CMX Outdoor Rated, double-shielded industrial cable for the most durable Category 5e cable L-com has ever offered. Please see our custom cable configurator on L-com.com to create your own custom length variations. All ruggedized jacks and plugs come with dust caps. The armored versions have 1,500 PSI crush resistance. Call today for assistance.

M12 Economy D-Coded 4 Position Cables for Ethernet and Fieldbus Applications

L-com offers popular 22 AWG 2-pair, 4 Position, D-coded M12 cable assemblies for use in Ethernet and fieldbus applications. We stock multiple configurations including male to male, male to female and male (straight) to male (right angle), as well as male M12 to RJ45 plug styles. These robust assemblies are 100% factory tested and feature UV and chemical resistant PUR jackets. Applications for these assemblies include manufacturing, process control, factory automation and more.

M12 Premium D-Coded 4 Position Cables for Ethernet and Fieldbus Applications

L-com's M12 premium line is here for your roughest and most demanding applications. Built with Category 5e rated high flex, industrial, outdoor, double shielded TPE bulk cable and using IP68 rated M12 connectors, these assemblies are as robust as they come. Designed to exceed category standards to ensure network throughput. Contact us today with your M12 custom applications.

M12 Premium 4 Position D-Coded Right Angle Assemblies For Ethernet Applications

L-com's premium line of M12 cables now includes right angle options. These assemblies are here for your roughest and most demanding applications. Built with high flex, outdoor CMX rated, double shielded, FR-TPE cable and using IP67 M12 connectors, these assemblies are as robust as they come. They are designed to exceed category standards to ensure network throughput even in harsh industrial or weather environments. Off the shelf connector options include D-coded, 4 position male and female M12s plus standard RJ45s.

M8 3 and 4 Pole IP67 Rated Cable Assemblies

L-com offers Brad® Nano-Change® M8 assemblies. Built with IEC Compliant M8 connectors, these rugged, space-saving cables are ideal for use with miniature sensors and actuators in industrial control applications. Nano-Change® connectors are designed to withstand harsh-industrial and weather environments. They also feature an anti-vibration feature to prevent loosening under high vibration applications.

M8 3 and 4 Pole Receptacles, Front and Rear Mounting Style with 0.3m Leads

L-com offers M8 receptacles for your enclosure and panel mounting needs. These receptacles can be used to connect cables in sensor, actuator or any other application that requires an M8 interface. They are IP67 rated to ensure protection against liquids and particulate. Flying leads make it very easy to terminate in any way you see fit for your application. Threaded or locked mates make the connectors secure from accidental disconnect and vibration.

High Temperature and Aerospace Ethernet Assemblies, Category 5e and Category 6a

L-com's new High Temperature and Aerospace Ethernet assemblies are here for your aerospace and aerospace-lite applications. Ideal for use in-flight systems, cabin management, backbone avionics, ground vehicle trunks, high temp testing and general military use. These cables are built with special FEP jacketed cable that is rated for -55° to +150°C. All cables are double shielded with 100% foil and an 85% braid and are highly flexible and easy to install as well as light weight and durable. They comply with all RoHS directives and pass FAR, Airbus and Boeing Smoke & Toxicity Requirements. Contact us today with your custom applications.

Extreme Hi-Flex Oil Resistant Category 5e Patch Cords

This series features 26 AWG stranded conductors and a braid and foil shield. The outer jacket is low-friction halogen-free PUR. This cable has been tested to 10 million flex cycles.

Category 5e and 6a RJ45 Outdoor Continuous Flex Oil Resistant Shielded Industrial Ethernet Patch Cords

Designed for industrial or outdoor environments where ordinary patch cables fail, these exclusive ultra flexible Cat5e and 6a patch cord series from L-com is built to take a beating. These cables utilize an outdoor rated FR-TPE (Flame-Retardant Thermoplastic Elastomer) jacket that is resistant to industrial oils and UV damage while maintaining a CMX flame rating. Double shielding along with L-com's shielded RJ45 connectors remove EMI/RFI interference as a concern for your installation. The cable is EIA568 color-coded for compatibility with standard installations.

Category 5e Braid Shielded High-Flex, Continuous Motion Patch Cords

L-com's affordable braid shielded high flex cables are designed for continuous motion applications where ordinary patch cables fail. They are rated for 10 million flex cycles at 8x the cable diameter and come with a tinned copper braid to protect from EMI and RFI interference. They are highly flexible and ideal for continuous motion, factory automation and robotics applications.

Category 5e Continuous Flex Unshielded Ethernet Patch Cords

Designed for industrial or outdoor environments where ordinary patch cables fail, this exclusive ultra flexible Category 5e patch cord series from L-com are built to take a beating. The TPE (Thermoplastic Elastomer) series is resistant to oils, UV damage, weld spatter and is CMX rated. The PUR (Polyurethane) series is resistant to UV damage.

Category 6a M12 8 Position X Code Double Shielded Industrial Cables, M12 M/GigE

L-com's premium family of M12 cables now includes X-coded assemblies rated for 10Gig speeds. These assemblies are here for your roughest and most demanding applications. Built with high flex, outdoor CMX rated, double shielded, FR-TPE cable and using IP67 M12 connectors, these assemblies are as robust as they come. They are designed to exceed category standards to ensure network throughput even in harsh industrial or weather environments. Off the shelf connector options include X coded, 8 position male and female M12s plus standard RJ45s and even GigE machine vision RJ45 connectors. X-code cables are rated for Category 6a.

Double Shielded Category 5e and 6a GigE Vision Assemblies

L-com offers RJ45 GigE Vision connectors using Category 5e or 6a Ethernet. The GigE connectors are built to the Vision standard and are perfect for machine vision camera and PoE applications. The screw mount hardware is beneficial in many applications where standard RJ45 connectors can become dislodged due to jostling, vibration, ect. These assemblies are built with L-com's outdoor, industrial, high-flex cable and are excellent for industrial, heavy duty and outdoor applications.

Outdoor Ethernet Assemblies

Protect Ethernet cable runs outside with L-com's Outdoor Category rated assemblies. All are built with UV and moisture protected jackets suitable for outdoor use. Available in shielded or unshielded and Category 5e, Category 6 or Category 6a, L-com has all options covered. One version is LSZH and some are suitable for direct burial. Contact L-com with your outdoor application requirements today.

Category 5e and 6 Dual Use Outdoor Rated Waterproof Assemblies

Dual use IP67 rated waterproof cables can be used with WPBH jacks (found on next page) for a watertight seal and also have an innovative design that allows mating with standard jacks as well. This eliminates the need to find specialized cables that are IP rated on one end and have a standard RJ45 on the other. These assemblies are foil shielded, come with a tethered dustproof cap and have a CMX burn rating.

Category Rated IP67 Bulkhead Shielded Panel Mount Couplers with Dust Cap

Bring waterproof protection to your network today with L-com's IP67 rated RJ45 bulkheads. Available in both Category 5e and Category 6, these couplers are available in RJ45 female to female or female to 110 punch down and are shielded for maximum EMI/RFI protection. These couplers are designed to keep things simple as they do not require special mating assemblies and are designed to be capped when not in use. As such, each coupler comes with a dust cap tethered by a lanyard. If you wish for a permanent IP67 rated seal, these couplers are compatible with the TRD815WP and TRD695WP assemblies found on the previous page. A coupling nut and o-ring along with a simple cut-out allow for mounting without additional hardware or tooling. The couplers are standard RJ45 jacks on both sides and the inner side has as little protrusion as possible allowing you have the maximum space to work with inside your panel or box. The punch down versions are also PoE+ compliant.

IP67 or IP68 Rated RJ45 Cable Glands

L-com offers a versatile solution for running RJ45 connections into enclosures and panels. The CG series feature EPDM rubber gaskets to keep moisture and dust out of your critical LAN connections. The glands are suitable for wired LAN applications or wireless WiFi installations. Available in unrated, Category 5e, Category 6 or Category 6a versions and an IP67 or IP68 rating when installed properly.

Ruggedized IP67 Rated RJ45 Ethernet Plug Kit

Installing Ethernet in harsh environments has never been easier. This IP67 rated plug housing is available for use with either shielded or non-shielded connections. A gasket seal keeps out unwanted contaminants and moisture. The optional flexible strain relief controls the bend radius of the cable. Call today to discuss your application with us.

IP67 Panel Mount RJ45 Couplers and Connectors

L-com offers a complete IP67 rated RJ45 connection solution for all your demanding Industrial Ethernet applications. With feed-through couplers, 110 punch-down jacks and plug kits, these robust IP67 RJ45 products are constructed of ABS 94V-0 plastic and feature gaskets to keep dust and moisture out. The IP67 RJ45 panel mount couplers are designed for panels up to a thickness of 2.8mm.

L-com's Tool-less Jack Series

For the best performance with a unique IDC connection that is easy to use and reliable, L-com's tool-less jacks are the answer. This simple wire guide makes it effortless for users to terminate their conductors securely. Each jack is intelligently designed into a compact and efficient body. Jacks are also available with a flanged connector for installation in panels too thick for a standard keystone.

Tip How to install a keystone style connector into a wall plate

Online Video

www.L-com.com/Videos/A12

STEP 1

Align the connector with the wall plate with the spring retainer side down for 45 degree entry plates (as shown) or spring retainer side up for standard entry wall plates.

STEP 2

Seat fixed retainer first. Pivot connector down towards the spring retainer while depressing the spring retainer. Press connector into plate until retainer snaps and locks firmly in place.

STEP 3

The wall plate can now be installed and cables attached.

Miscellaneous Keystone Jacks - Coaxial, and Fiber Couplers

Add more than just data and telephone connections to workstation outlets. L-com features coaxial and fiber adapters designed to fit our wall plate systems.

Tip How to easily panel mount a Keystone style connector

Keystone style refers to the snap-in mounting mechanism that many manufacturers have adopted. It is simple, requires no tools and is easily removable.

STEP 1

L-com's two piece wall plate design hides the screw holes from view to provide a sleek, clean display.

STEP 2

Seat bottom retainer and pivot connector upward while depressing upper retainer.

STEP 3

Slide the dust cover up to connect a cable assembly. The dust cover will slide closed when nothing is connected.

Decora Style Wall Plate System with Keystone Ports

Combine all your cable connections into L-com's Decora style wall plates. This popular design provides a clean, modern look to cable connections in a finished room. With support for up to three keystone jacks, you can easily combine all your telephone, network, and video connections needs in one Decora plate for a professional, finished appearance. Volume discounts are available; contact us today with your project needs.

Wall Plate Mounting Bracket for Class 2 Wiring

The wall plate mounting bracket is an excellent aid for electricians and cable installers to mount single gang wall plates at any convenient wallboard location. There is no need for traditional metal boxes which inhibit the installation of coaxial and data cables. Furthermore, users can make use of the complete wall cavity to hold excess cable and avoid sharp bends. These brackets have universally spaced threaded holes to accept any standard single or double gang wall plate. It's simple to install, just start by making a 2.125"W x 3.625"H (5.4cm x 9.2cm, single gang) or 3.875"W x 3.625"H (9.8cm x 9.2cm, double gang) rectangular hole and then tighten the built-in mounting screws. Large quantity pricing for installation contractors is available upon request.

110 blocks are protected by metal cover

Item #	Description	1-9	10-24	25-99	100+
--------	-------------	-----	-------	-------	------

110 Style Accessories - The Most Popular Way to Achieve Category 5e and 6 Performance

The 110 connect system is a high performance means of terminating UTP wiring and it is currently the most popular choice in installations. This system utilizes wiring blocks, connecting blocks, patch panels, 24 AWG UTP cabling and patch cords.

Most 110 style wiring blocks come pre-configured to a number of RJ45 ports, allowing easy patching with RJ45-RJ45 data grade patch cords. L-com offers a variety of common 110 style components. Other styles and configurations can be supplied on a custom basis; call our Technical Support Department for assistance.

Category 5e Wall Mount 12 Port Patch Panel

The Category 5e wall mount 12 port patch panel offers users an economical way to terminate smaller groups of connections without the need to install a rack system. Each block features industry standard 110 style connections and write-on surfaces for port identification. These panels are universally marked for EIA568A and EIA568B color codes.

DCWM110C5E-12	Category 5e Patch Panel, 12 Port EIA568A/B	57.29	52.71	48.12	CALL
---------------	--	-------	-------	-------	------

Category 6 Wall Mount 12 Port Patch Panel

The Category 6 wall mount 12 port patch panel offers users high performance in a small package. Users can terminate Category 6 cabling without the need to install a rack system. Each block features industry standard 110 style connections and write-on surfaces for port identification. These panels are universally marked for EIA568A and EIA568B color codes.

Category 5e 19" (48.3cm) Rack Mount Patch Panel - 24 and 48 Port

L-com's Category 5e 19" (48.3cm) rack mount patch panels come pre-configured in 24 and 48 port versions. These panels feature industry standard 110 punch-down style termination for quick installation. Users can identify ports by either writing directly on the screened in label surfaces or using a regular label printer to create labels. Each port is EIA568A/B color encoded for compatibility with all types of network jacks and cabling.

24/48 Port Category 5e/6 Shielded 19" (48.3cm) Patch Panel - Industrial Grade

These Category 5e/6 rack panels are fully shielded for use in areas with high levels of noise and EMI. Commonly used in industrial environments the panels are made using heavy gauge sheet metal that fully encloses over the circuit board and cable terminations for ultimate shielding. Permanent connections are made to 110 style IDC contacts and patching is made through shielded RJ45 (8x8) modular connectors. These panels mount into standard 19" (48.3cm) racks and take 1U of rack height 1.75" (4.4cm). Compatible with EIA568A or B wiring schemes. 18 AWG grounding wire included.

Tip How to terminate a cable drain wire

Termination of drain wire for each cable assembly that you wish to punch down to the panel.

Punch down your conductors onto the block to either the EIA/TIA 568A or 568B standard and make sure to keep the drain wire long enough for the next steps.

Wrap the Drain wire around the cable management holder (see image) and then around the jacket of the cable.

Using the included cable ties secure the cable and drain wire to the cable management holder. (repeat for each port)

Cut off any excess from the cable tie.

Tela-Crimp Tool Provides High Level of Versatility and Termination Reliability

The ultimate design based on many years experience, this new model produces a perfect crimp every time and is offered at an affordable price. Dies need to be purchased separately. The following features should be noted:

- Full cycle ratchet action assures consistent terminations.
- A release lever is provided to prevent faulty crimps.
- The compound action produces high crimping forces with minimal user effort.
- A replaceable cutter and stripper are conveniently placed offering two strip lengths per industry standards.
- All dies are interchangeable and guarantee perfect alignment.
- The modular plug nests accept most configurations available within the industry today.
- Spring activated handles have cushion grips to minimize user fatigue.
- Tools are conservatively rated for 50,000 crimps.

Tip What is a primary and secondary strain relief?

The three main points of contact within any plug are the crimp contact, primary strain relief and secondary strain relief. Compatibility issues exist between various plug and tool designs with respect to the secondary strain relief. If the plug and tool are slightly misaligned due to incompatibility, bad crimps end up crushing the plug. The plugs and tools listed have been carefully chosen to minimize compatibility problems.

UTP/STP Cable Stripper for Round or Flat Cable

This handy cable stripping tool is a great addition to any cable installer's tool belt. Featuring an adjustable blade for all sizes of UTP, STP, and flat silver satin cabling, this tool allows users to consistently remove the cable jacket without damaging the internal conductors. The cable stripper also features a built in cable cutter.

HTS2700 RJ45 (8P8C) Crimp, Cutter and Stripper Tool

L-com's HTS2700 RJ45 (8P8C) crimp tool combines a cable cutter and stripper to provide installers with the perfect tool for terminating L-com's unique TDS series RJ45 (8P8C) Ethernet connectors. An integrated crimp section allows proper termination of the shielded strain relief on our TDS series RJ45 connectors. Its compact design fits easily in your tool bag and eliminates the need to carry multiple tools for one job.

Cable Prep Tools - Fast, Easy Stripping of UTP or Data Cable Jacket Covers

These are the simplest tools we've ever seen for removing the jacket from round, unshielded or shielded twisted pair cable. The TCPT2 tool is intended for removing the jacket on UTP cable only. The second tool, the TCPT110, also incorporates a 110 blade for punching 110 blocks. Just insert the cable into the tool, twist/turn a couple of times and pull off the jacket slug. Simple and yet inexpensive enough to have a few on hand.

110 Wiring Block Field Termination Kits - Everything Necessary to Wire a 110 Block

Wiring blocks are the main instrument in setting up horizontal wiring in a 110 style connector system. Each kit contains one 100 pair wiring block with detachable legs, label holders with designation labels and sufficient connecting blocks. Each kit includes five four pair and one five pair connecting block per 25 pair termination strip. Designation strips are mounted to the wiring block addressing each cable termination.

The Ultimate in Modular Telco Plugs, Made in the USA, Comply with Industry Standards

L-com offers Stewart modular plugs featuring mirror smooth contact surfaces for extended mating life. Lowest contact resistance and high reliability. Pre-inserted selectively gold plated contacts are ready for mass termination on most industry compatible crimping machines and hand tools. Fully complies with FCC & telephone industry standards for size and performance. Choice of plugs for flat modular or round UTP cable. Plugs accept 24-28 AWG stranded or solid conductors. Sold in packages of 100 plugs.

Standard Alignment

Staggered Alignment

Tip

What is the difference between stranded and solid contact design?

Solid or Stranded

Two point staggered for solid or stranded. The contact prongs straddle the conductor.

Stranded Only

Piercing type for stranded. Jagged end pierces jacket and embeds into the strands of the conductor.

Solid or Stranded

Tripoint type for solid or stranded. Long contact prongs spread apart to accept conductor.

Tip How to assemble a TDS8PC5 and TDS8PC6 series shielded Category 5e and Category 6 modular plug

Online Video

[L-com.com/Videos/A22](https://www.l-com.com/Videos/A22)

STEP 1

Strip jacketing and shield to dimensions shown.

STEP 2

Fold shield back onto jacketing. Wrap drain wire one and a half times around shield. Trim excess.

STEP 3

Untwist pairs and arrange to desired order. Trim conductors at an angle and insert into loading bar. Trim excess wires.

STEP 4

Insert prepared cable into plug.

STEP 5

Bend strain relief to lay along cable.

STEP 6

Crimp plug with the specially designed HTS2700 crimp tool.

Tip Easily install a premium ECF coupler kit**Online Video**L-com.com/Videos/A09**STEP 1**

Secure frame in specified opening with supplied hardware and align coupler in proper orientation to the opening.

STEP 2

Seat bottom retainer and pivot coupler upward while depressing upper retainer.

STEP 3

Coupler fully seated.

Cat5e/6 Shielded and Unshielded Feed-Thru Panels Featuring L-com's Flange Mounted Mini Couplers

Secure mounting of category 5e/6 couplers has never been easier. L-com's exclusive Low Profile flange mount mini-couplers pre-installed into standard 19" rack panels provide the best method for coupling up to 32 category 5e/6 grade patch cables on a rack. The metal flange is attached permanently to the panel with two 4-40 screws. Panels have a black powder coat finish for durability and each port is numbered to simplify cable organization and tracking. Both shielded and non-shielded versions are offered to fit individual applications. Larger volume quotations are available. All Panels and Mini Couplers are Black.

Tip What is the difference between Category 5e & Category 6 100 Ohm UTP?

The Category 6 standard adopted in mid 2002 extended key parameters over Category 5e specifications. The additional headroom is intended to provide quality transmission at higher data rates required by emerging applications. As the chart indicates, the most prominent difference is the frequency at which the key parameters are measured. The jump from 100 to 250 MHz places a great deal of emphasis on component quality as well as installation techniques. This improvement is commonly noticed by the increased pair twisting and staggering of twisted pairs.

	Category 5e	Category 6
Frequency	100 MHz	250 MHz
Attenuation	22db	19.8db/100M @ 100 MHz 32.8db/100M @ 250 MHz
Return Loss	19db	19db @ 100 MHz 15.6db @ 250 MHz
Delay Skew	45ns	45ns
Near End Crosstalk (NEXT)	35.3db	44.3db @ 100 MHz 38.3db @ 250 MHz
Power Sum Near End Crosstalk (PS-NEXT)	32.3db	42.3db @ 100 MHz 36.3db @ 250 MHz
Equal Level Far End Crosstalk (ELFEXT)	23.8db	27.8db @ 100 MHz 19.8db @ 250 MHz
Power Sum Equal Level Far End Crosstalk (PS-ELFEXT)	20.8db	24.8db @ 100 MHz 16.8db @ 250 MHz

Tip**Build Custom Configurations with L-com's Universal Rack Panel System****STEP 1**

Start with the Master Rack Panel, UPR35-6B.

STEP 2

Now select a ready made sub-panel that works with your rack panel.

STEP 3

Using a Phillips or Flat screwdriver, install your sub-panels in the master rack panel.

Item #	Description	1-9	10-24	25-99	100+
--------	-------------	-----	-------	-------	------

Universal Master Rack Panel with Six Openings

L-com's Universal Master Rack Series offers installers the ability to customize their installation with different connections within a single rack panel. The Universal Series panels can save time, money and rack space in an installation project. The master panels feature six punched rectangular openings that will accept any of the numerous USP Series sub-panels shown in this catalog. Sub-panel openings are 2.20" x 2.75" (5.6cm x 7.0cm).

Universal Series Blank Sub-Panels

Universal Series blank sub-panels can be used to cover unused openings or may be used to customize a panel assembly. These panels come in 3 different styles for users to choose from: black anodized aluminum, white high impact plastic or black steel. The aluminum and plastic panels offer the easiest option for custom drilling or punching holes. The black steel panels are constructed of sturdy .060 inch (0.2cm) (16 ga) cold rolled steel for durability. Each sub-panel is equipped with four pre-tapped holes to accept the four 6-32 mounting screws which are supplied.

Universal Series Sub-Panels Featuring Telecom/Network Grade Connections

The Universal sub-panel series offers connections for telecom and network equipment. Choose between Category 3, Category 5e or Category 6 rated connections either shielded or non-shielded. Panel choices offer both feed-thru style couplers and jacks with 110 style punch terminations. Either 2 or 4 connections per panel can be chosen and blank panels are available for further customization. All panels are black steel and come equipped with four pre-tapped holes to accept the four 6-32 mounting screws which are supplied.

Deluxe Panel Mounted Modular Jacks - 10" Wire Leads, 30 Microinches (0.762µm) Gold

One difficulty in using modular jacks is the mounting problem on a panel. L-com's solution to this problem is providing a flange that mounts with two screws in a 0.675" (1.7cm) x 0.900" (2.3cm) rectangular opening. Choice of RJ11/12 (6x6) or RJ45 (8x8K) usable with keyed or non-keyed plugs. Custom versions of other jack types considered in quantities of 500/up. Mounting screws must be purchased separately.

Deluxe Panel Mounted Couplers, 50 Microinches (1.27µm) Gold

These couplers are similar to the ECF504 Series with two changes. The molding has been changed to a black color for applications when ivory is not wanted. Also, the contacts have 50 microinches (1.27µm) of gold for superior mating with modular plugs. Mounting screws must be purchased separately. Category 3 rated.

Keystone Style - 16 and 32 Port Feed-Thru Modular Panels - Category 5e and 6 Rated

High speed network patching is made easy with L-com's keystone patch panels. L-com's unique straight and offset low-profile keystone couplers are pre-installed into standard 19" rack panels providing an easy method for coupling up to 16 or 32 category 5E grade patch cables on a rack. Panels have a black powder coat finish for durability and each port is numbered to simplify cable organization and tracking. Both shielded and non-shielded versions are offered to fit individual applications.

**Tip** Using L-com's right angle Cat5e coupler

The unique design of the L-com TDG1026KC-R5E right angle Cat5e coupler allows for cable connectivity in tight fit/confined space applications found with premise wiring installations involving wall plates and with MDF and IDF applications where patch panel depth is limited.

Wall Plate Mounting

Patch Panel Mounting

L-com's Exclusive Right Angle Category 5e Keystone Couplers

An exclusive product design from L-com, these right angle Category 5e couplers offer true 90° connectivity and meet Category 5e standards. These unique right angle keystone couplers were designed to address tight fit applications commonly seen with wall plates and some patch panel designs. These robust right angle Category 5e couplers fit standard .765" (0.3cm) x .585" (0.2cm) keystone openings and can be used for myriad voice, video and data applications.

RJ45 (8x8) Keystone Feed-Thru Couplers - Shielded and Unshielded Category 3, 5e, 6 and 6a

These couplers utilize two RJ45 (8x8) modular jacks and fit into a standard keystone style opening. A slim housing design permits high density mounting. Couplers listed include Category 3, Category 5e, Category 6 and Category 6a performance ratings in both shielded and unshielded versions. Connector housings enclosed within a fully stamped shielding. Designed to work with EIA/TIA 568A and B wiring.

Premium Keystone Style RJ45 (8x8) Feed-Thru Modular Couplers - Category 5e Rated

Two Category 5e feed-thru modular couplers for mating EIA568 A or B Category 5e connections. In both shielded and unshielded versions, this unique offset design maintains Category 5e performance and limits depth to only 1.25" (0.5cm). Designed to mate with keystone style holes.

Category 5e to 100 MHz - Hi-Speed UTP for LAN and Emerging Applications

Unshielded twisted pair has become the cabling of choice in voice and data applications. Low cost and easy installation are driving popularity. As new higher speed applications emerge, higher performance from cabling systems is required. Category 5e performance requirements add margin over existing Category 5 specifications to support more robust, bi-directional signaling schemes over all four pairs. Applications supported include: 10Base-T, 100Base-T, 100Base-TX, 1000Base-T, 100BaseVG-Any-LAN, 155Mbps ATM and a number of emerging multimedia applications.

Category 5e Bulk Cable

Category Rated UV Resistant Bulk Cable - Ethernet Grade Cable for Outdoor Usage

Protect Ethernet runs outside with L-com's outdoor Category rated cables. Featuring moisture and UV resistant PE jackets, outdoor runs are protected from damage caused by water and sunlight. Some options are even direct burial capable or appropriate for cell tower runs. All cables are solid conductor for easy termination into IDC connectors.

Shielded F (UTP) 5e to 100 MHz Bulk Cable - Help Suppress Noise in Networks - 2 and 4 Pair

Screened (shielded) twisted pair is ideal for use in environments where EMI/RFI is a concern. A foil wrap with a drain wire protects signals from external noise. Available in stranded 26 AWG conductor with PVC and Low Smoke Zero Halogen jackets. Double shielded (foil + braid) 24 AWG solid is now available for use where extra noise protection is required. Plenum version is 24 AWG solid conductor. Sold in 1000' (304.8m) spools.

Category 5e Shielded Continuous Hi-Flex Oil Resistant Industrial Ethernet Bulk Cable

Designed for environments where ordinary cables fail, these exclusive ultra flexible Category 5e shielded bulk cables are built to take a beating. These Hi-Flex cables will not breakdown when exposed to oil based lubricants making them ideal for robotic control systems on the factory floor. Our cables are tested to 10 Million flex cycles (20 X cable O.D. min radius).

Category 6a High Performance Shielded Bulk Cable

For Protection against EMI/RFI interference L-com's High-Performance Category 6a foil shielded bulk cable is the perfect choice. Surpassing the Category 6 standard, this Category 6a cable is designed for 10 gigabit networks. With a 100% foil shield covering 4-Pair 26 AWG stranded conductors, your data is protected from interference. Designed to exceed EIA568B standards, this cable will easily handle 10 Gigabit Ethernet applications. Contact us today for all of your network cabling needs.

Category 6 to 250 MHz UTP Bulk Cable - Maximum Performance for LAN Environments

Maximize performance in your next cabling project with L-com's Category 6 twisted pair cabling. Designed for today's hi-speed gigabit networks. This series is EIA568 color-coded for compatibility with standard installations. Solid conductors terminate easily into standard IDC connectors and panels. Designed to exceed EIA568B standards, this cable will easily handle Gigabit Ethernet applications.

Tip Solid vs Stranded Center Conductors

Online Video

L-com.com/Videos/A19

In network cabling there are two distinct types of cable that are offered. Each type of cable has advantages and disadvantages: **Stranded cable**, used on workstation patch cords, is very flexible and easily bends but has a slightly higher attenuation factor. **Solid cable**, used in horizontal runs, is stiff but offers better transmission performance.

Comparison Between Solid and Stranded Conductor Cable

	Solid Conductor Cable	Stranded Conductor Cable
Advantages	Lowest Cost Best Transmission Performance Terminates to IDC110 Blocks/Jacks	Very Flexible Easy Plug Termination
Disadvantages	Not Flexible Difficult to terminate to plug	Higher Cost Recommended Distance (<10m) Higher Attenuation Cannot connect to IDC 110 blocks

What is the difference between stranded and solid cable?

Online Video

L-com.com/Videos/A19

Category 3

Flat Modular Cord

Category 3 to 16 MHz - Medium Speed UTP - 2, 3, 4, 12 and 25 Pair Solid Conductor

Category 3 twisted pair cabling is the perfect choice to control cost when low speed telephone or data is required. This PVC-jacketed cable is EIA568 color-coded for compatibility with standard installations. Category 3 cabling is perfect for telephone and low speed data applications. Solid conductors terminate easily into standard IDC connectors and panels. Available in PVC or Plenum rated jacket styles.

FREQUENCY	NEAR END CROSS TALK (NEXT)	ATTENUATION	CAPACITANCE	IMPEDANCE
1 MHz	41 db min.	2.6 db/330 ft max.	20 pF/ft Max	100 Ohms ± 15 Ohms

TPC4759	Category 3, Plenum Bulk, 1,000ft (304.8m) Box, 4 Pr. Solid	Gray	135.41

100 Ohm T1 Cables

Reduce interference for T1/E1 communication with 2 pair cable with individually shielded pairs (FTP). Cables are Telcordia GR 137-CORE compliant. Unique two-layer insulator allows for termination into RJ45 plugs.

TSC9720	2 100 Ohm (T1) Shielded Pair, PVC 1,000ft Reel	Gray	467.04
TSC9738	2 100 Ohm (T1) Shielded Pair, Plenum 1,000ft Reel	Gray	1209.24

Tip UTP and STP installation guidelines

The minimum recommended bend radius for UTP is typically 10 times the cable's OD (Outside Diameter).

DO NOT twist the cable

DO NOT overtighten wire ties

DO NOT bend cable greater than 90 degrees

DO NOT use a stapler for installations

DO NOT stretch or apply pull force greater than 25 lbs (11.4kg).

Flat Modular Cord - 26 AWG Stranded - 4, 6, 8 and 10 Conductors

Flat modular (POTS) cable is suitable for voice and low speed data applications. Flat oval design permits fast stripping and crimping of modular plugs. Cable construction features flexible PVC jacketing. Available in popular 4, 6, 8 and 10 conductor counts. UL listed. Sold in 100' (30.5m), 500' (152.4m) and 1000' (304.8m) spools.

Category 3, Octopus Cables - Convert 25-Pair Telco to a Variety of Modular Cable Breakouts

This is a useful cable arrangement that allows conversion from a 90° 50 pin Telco connector to a variety of modular cables terminated with male RJ plugs having 2, 4, 6 or 8 active pins. All cables are three feet (0.9m) long. Wired per USOC Standard. Category 3 rated.

Harmonica Style Cluster Bars - An Efficient Way to Distribute Your 25 Pair Lines

Break out your 50 pin Telco terminated cabling by connecting to a harmonica style cluster bar. These units use one male or female 25 pair Telco connector as input and 6, 8 or 12 modular jacks as output. Two holes for screw mounting or 2-sided tape may be used. Connector has Hook and Loop hold-down straps to eliminate screw tightening. USOC and 10Base-T wiring only.

Tip What is the difference between straight-thru and cross pinning?

Straight-thru means each contact is straight pinned to its respective contact (1-1, 2-2, 3-3, etc.). Crossed pinning means contacts are pinned through to the opposite contact.

Ex: on an 8 position RJ45: 1-8, 2-7, 3-6, etc. When using a coupler between two patch cords it is important to choose the correct type. As the diagrams illustrate, if the desired pinning from end to end is crossed then the coupler and cables must be crossed. For straight pinning, all cables and couplers must be straight-thru type.

Socket Saver Adapters - Extend the Life of Frequently Used Modular Jacks

Avoid costly repairs trying to replace modular jacks. Particularly useful with cable testers where jacks are in constant use. A small price to pay to assure maximum performance for the life of your equipment. Also available is the EC535D-10X 10Base-T crossover adapter. Attach this in series with any 10Base-T compatible patch cord and the 1-2 pair crosses to the 3-6 pair. This wiring is often necessary for stacking Ethernet hubs.

Premium Modular Adapter Kits - Design Features Molded Knurled Hold Down Screws

The increased popularity of modular adapters prompted L-com to offer an off-the-shelf product that is a superior design featuring dark Gray 94V-0 plastic and 50 microinches (1.27µm) of gold plating on the pins. L-com offers quotations for custom programming to fit your needs and with legends and/or logo, either molded-in or on labels for your application. TDT series insertion/extraction tools are necessary for programming.

Modular Adapter Kits With Long Thumbscrews, Mate with DB9, DB15 and DB25

With one-piece housing, the modular adapter kits offer users a simple way to prepare custom wired adapters in the field. Featuring 30 microinches (0.762µm) gold plating on the contact pins and long metal thumbscrews. Each unit is programmable to fit your needs by simply inserting the prepared flying leads into the appropriate positions. TDT series insertion/extraction tools are necessary for programming.

Modular Adapter Kits - With Slotted Screws, Mate with DB9 and DB25

This series is identical to the RA Series except for the fact that the thumbscrew is replaced with a shorter screw head requiring a screwdriver for fastening to the system. A full range is provided which includes the DB9 and DB25 interface, available with RJ11/12 or RJ45 jacks. Modular contacts have 30 microinches (0.762µm) of gold plating. TDT series insertion/extraction tools are necessary for programming.

Shielded Modular Adapter Kits - Feature Special Internal Design - EMI/RFI Shield

Similar in appearance and use to our standard RA Series but the similarity ends there. Built into the Gray plastic case assembly is an inner formed metal shield. Modular contacts have 30 microinches (0.762µm) of gold plating. This is our best adapter; guaranteed to provide the best shielding effectiveness. Mandatory for systems utilizing fully shielded cabling and shielded modular plugs. Use TDT series tools to insert/remove contacts. 4-40 hardware.

Shielded Dual RJ45 Die-cast Adapters

L-com's exclusive die cast dual RJ45 to D-Sub 25 male or female adapters provide 100% shield coverage. These unique fully die cast adapter housings ship as a kit so that you can terminate as needed for your project. L-com can custom wire these for you with modest minimums. Contact us today with your project needs.

Modular Y Adapters - Allow Line Splitting Flexibility in Today's DataCom Networks

Market demand for varied types of modular Y splitter cables has prompted this choice of six standard listings. The most popular types are stocked in one foot overall lengths. However, custom lengths are available. A dark gray molded box design style with all rounded edges is used as well as round U.T.P. Category 3 cable. All contact surfaces have 50 microinches (1.27µm) gold plating. **Note:** Custom variations solicited to include: choice of modular jacks, any length of cable, different modular or DIN or other style plugs on cable. Minimum quantity of 250 may apply for most custom quotes.

Shielded Modular 2-Way Splitters - Allow Multiple Uses of 4-Pair Cabling

This series is designed for use in environments where shielding protection is required. Features include fully shielded PCB mounted jacks, RJ45 plugs with a 360 degree strain relief and a sturdy ABS housing. Three configurations in 12" (30.5cm) lengths are offered. The bridging adapter combines all like numbered pins allowing devices to share a single interface. Two splitter versions are available configured for 10Base-T and Token Ring applications. Custom configurations will be considered with modest minimums. Please contact our sales group for assistance.

Modular 4-Way Splitters - Allow Multiple Uses of 4-Pair Cabling

This series allows users to take advantage of installed 4-pair to gain access to individual pairs or bridge multiple jacks. Four configurations in a 12 inch (30.5cm) overall length are offered. The bridging adapter combines all like numbered pins allowing devices to share a single interface. The breakout models allow access to each individual pair at the 8x8 plug through four 6x2 or 8x2 jacks. Custom configurations will be considered with modest minimums. Please contact our sales group for assistance.

Data Cabling Tutorial

What is D-Subminiature?

D-Subminiature products are connection products utilizing various D-Subminiature style interface types to transmit data signals.

How is D-Subminiature used?

D-Subminiature products are used to connect a data generating device such as a CPU (Central Processing Unit) to a data producing device such as a printer.

Where is D-Subminiature used?

D-Subminiature products are used in numerous data transmission applications found in office, industrial, home or testing environments.

Poorly shielded cables can cause systems to fail EMI Certification

L-com's manufacturing process includes 360 degree shielding under the mold to insure full shielding from the bulk cable shield to the connector shell. Some competitors shortcut this process by just tack soldering the cable drain wire to the connector shell. In many applications this shortcut results in EMI leakage causing systems to fail testing.

Economy Series

360° Foil Shield

Deluxe Series

360° Copper Shield

Premium Series

Terminal Shield
Custom steel box provides 100% shielding

What is the difference between assembled and molded cable assemblies?

The difference between an assembled and molded cable assembly is in the construction of the backshell. An assembled backshell can be plastic (not shielded) or metal (shielded) and can be disassembled by removing hardware. On a molded cable assembly, the backshell is typically molded PVC that cannot be disassembled.

ASSEMBLED

MOLDED

What is the difference between standard and High-Density D-Sub configurations?

The industry uses 5 different shell sizes; each shell size can have 2 different configurations of pins. Standard configurations are listed on top and High-Density are listed below.

Economy D-Sub Cable Assemblies - Fully
Populated with 4-40 Hardware

The CSM Series of D-Sub cable assemblies offer solid performance at economical prices. All assemblies utilize 26 AWG stranded conductors with foil shielding for flexibility and performance. Backshells are fully molded for reliability in environments where flexing is an issue. Mating hardware is 4-40 machine screws. Hex nuts on female connectors are removable to expose 4-40 machine screws. Color is gray.

Copper wire current carrying capacity

Current carrying capacity is the maximum number of amperes (amps) that can flow through a conductor before it breaks down. Many factors determine actual current carrying capacity including conductor size, temperature, number of bundled conductors, air flow and insulation material and thickness. Therefore, this chart should only be used as a general guideline to determine actual performance.

Note:

Figures based on 30°C ambient temperature
Units are measured in Amps

x = Current reduction factor

Reduction factors apply when conductors are bundled

INSULATION MATERIAL	WIRE SIZE						
	30 AWG	28 AWG	26 AWG	24 AWG	22 AWG	20 AWG	18 AWG
PVC - Standard Data Cables	2x	3x	4x	6x	8x	10x	15x
Polyethylene - Low Smoke, Zero Halogen Cable	3x	4x	5x	7x	9x	12x	17x
Halar - Plenum, High Temperature Data Cable	3x	5x	6x	8x	11x	14x	20x

# Bundled Conductors	Reduction Factor (x)
2-5	0.8
6-15	0.7
16-30	0.5

Example:

Q: What is the estimated current capacity for L-com data cable CS9-100?

A: The important factors are:

1) 24 AWG conductors, 2) PVC Insulation, 3) 9 Conductors.
The current rating is: $[6x(x=0.7)] = 4.2$ Amps per conductor.

Deluxe D-Sub Cable Assemblies - Fully Populated with 4-40 Thumbscrews

The CSMN Series of D-Sub cable assemblies is our middle of the line offering excellent performance and lower pricing. All assemblies utilize 26AWG stranded conductors with foil shielding for flexibility and performance. Backshells are fully molded with copper shielding for better immunity to outside noise. Mating hardware is 4-40 thumbscrews which makes securing without tools quick and easy. Hex nuts on female connectors are removable to expose 4-40 thumbscrews.

Note: 50 pin assemblies use 28AWG twisted pairs due to space constraints in backshell molding. Color is light gray.

Heavy Duty D-Sub Cables - 20 AWG Conductors, Double Shielded

L-com's ground breaking D-Sub cables use 20 AWG conductors, the largest conductor most D-Sub connectors can accommodate. This allows for maximum current throughput as well as an extremely durable assembly. Other key features include double shielding to prevent against data corrupting EMI/RFI, threaded inserts allowing the cable to be panel mounted directly without use of an adapter, and straight through wiring to accommodate most applications. Standard lengths range from 1 to 50ft (0.3 to 15.2m) and custom lengths/pinouts are available with modest minimum requirements.

---------	--	------	------	------	------

Premium D-Sub Cable Assemblies - Fully Populated and Double Shielded

The CS2N Series of D-Sub cable assemblies is our top of the line D-Sub cabling offering. These cables offer the best features for those applications where only the best will do. The bulk cable utilizes 26AWG stranded conductors with double shielding (copper braid plus aluminum mylar foil) and flexible PVC jacket. Fully molded backshells also have a unique stamped steel internal enclosure that provides the ultimate in shielding performance. Mounting is done via rugged 4-40 thumbscrews that are easy to grip without the need for a screwdriver. Hex nuts on female connectors are removable to expose 4-40 thumbscrews. Color is light gray.

Deluxe Null Modem Cable Assemblies with Thumbscrews, Fully Shielded

The CSNULL series of cable assemblies features the same construction as the CSMN series but is wired to the most common null modem wiring schemes. The transmit data and receive data signals are crossed to allow two DTE or DCE devices to communicate.

Tip Defining 90 degree angled D-Sub cable assemblies

Angled connector hoods help connect D-Sub cables in tight places. L-com now offers four 90 degree angled options for each DB9, DB15 and DB25. The photos below detail the connector position relative to the cable entry direction.

Exit 1 - Left Exit

Exit 2 - Right Exit

Exit 3 - Down Exit

Exit 4 - Up Exit

Deluxe D-Sub Right Angle Cables - 4 Options each for DB9, 15 and 25

L-com's CSMNRA series cables are perfect for tight fit and confined space D-Sub applications. These rugged cable assemblies feature a standard D-Sub connector on one end and right angle (4 options) D-Sub connector on the other. These right angle D-Sub cables are designed for use in enclosures, cabinets or other confined spaces where standard D-Sub connectors will not fit.

Metal Armored Cables - Double Shielded with Additional Outer Metal Shield

These unique cables feature a stainless steel crush resistant jacket over our premium D-Sub braid & foil shielded cable to provide protection in applications where standard cables would be damaged due to excessive force. A custom steel internal enclosure under the backshell mold provides further strength. Crush resistance is 1500 PSI (Pounds per Square Inch).

Tip D-Subminiature armored cables explained

Metal Coupling Nut
Heavy duty construction ensures that the crush resistant jacket remains in place

Crush Resistant Metal Jacket
Up to 1500 PSI (pounds per square inch)

Plastic Coupling Nut
Heavy duty plastic construction ensures that the crush resistant jacket remains in place

Crush Resistant Plastic Jacket
Up to 800 PSI (pounds per square inch)

Uses our Premium bulk cable including PVC cable jacket and braid/foil shield under the armor.

Data Cables - With Reversible Hardware to Mate any Serial Cables or Mount on Panels

L-com is proud to offer an **exclusive family** of D-Sub data cables featuring user defined mounting hardware. Each cable end is capable of being connected with either male jack screws or female hex standoffs regardless of D-Sub gender. This capability allows a user much more flexibility to interface ports with opposite gender hardware. A by-product feature is to use the same cable with the male or female connector end mounted on a panel. No other standard off-the-shelf cable has this capability. The secret is in the kit of four custom hex standoffs that are included with each cable assembly. The specially made cable readily accepts these hex standoffs mounting on panels no thicker than 0.062" (0.2cm).

Exclusive

CRMN9

CRMN15

CRMN25

CRMN37

Comes complete with male and female 4-40 hardware plus instruction sheet.

STEP 1

This cable is shipped with male knurled thumbscrews regardless of D-Sub gender.

STEP 2

If you need a female fastening system, simply unscrew the knurled thumbscrew.

STEP 3

Then: install (thread) hex jack screws, provided.

STEP 4

To install your cable on a panel it should be no thicker than 0.062" (0.2cm). Simply follow step 2. Provide proper panel opening, install hex jack screw, and tighten.

Deluxe High-Density 15 Pin D-Sub Cables - Fully Populated and Completely Shielded

High-density D-Sub connectors are used in a number of PC and network applications. This type of connector can usually be recognized because they have three rows of smaller pins versus the larger pins used in conventional D-Subs. Fully populated with stranded conductors and aluminum mylar shielding. Hex nuts on female connectors are removable to expose 4-40 thumbscrews.

Waterproof D-Sub Connectors and Backshells - IEC IP67 Rated

Harsh outdoor or indoor environments can destroy electronic equipment. Standard D-Sub connectors are not intended to withstand contaminants such as water and dust. By utilizing tough ABS housings, rubber gaskets and silicone insulating rings, these products achieve IEC IP67 ratings. Panel mounted D-Sub solder connectors are rear mounted and fit into standard D-Sub holes. Backshells conform to a variety of cable diameters by adjusting the sealing nut. L-com will manufacture cable assemblies using waterproof backshells with modest minimum requirements.

Waterproof D-Sub Panel Mount Solder Connectors

These solder cup connectors are available in male or female genders and DB9, DB15, DB25 and HD15 sizes. They will accommodate wire ranges from 30 - 20 AWG. Construction features gold plated brass contacts, nickel plated steel shells and a silicone insulating ring. Maximum recommended panel thickness is 0.078" (0.2cm).

Waterproof D-Sub Connector Covers

L-com's WPSD series of waterproof covers are perfect for protecting D-Subminiature connectors from contamination and moisture. Designed for harsh environments, these protective covers can be used with L-com's WPSD series waterproof D-Sub connectors to ensure IP67 rated protection. Several versions are available for the most common D-Sub connector styles including DB9 (HD15), DB15 and DB25.

WPSD1-CVR	Waterproof D-Sub Connector Cover, DB9 and HD15	9.66	9.08	8.50	CALL

Waterproof D-Sub Backshell Kits

These backshell kits include solder cup connectors and are also available in male or female genders and DB9, DB15, DB25 and HD15 sizes. The connectors will accommodate wire ranges from 30 - 20 AWG. Backshell construction features ABS housings, nylon seals, nickel plated brass thumbscrews and rubber sealing gaskets to insure IEC IP67 rating.

Tip How to apply panel mount waterproof D-Sub products

STEP 1

Mount D-Sub connector from inside of panel or enclosure using hex jack screws provided.

Maximum panel thickness is 0.078"

STEP 2

Apply sealing gasket (supplied with backshell kit) in backshell channel around perimeter of D-Sub connector.

STEP 3

Mate connectors and secure backshell thumbscrews to threaded jack screws.

Tip How are Slim-Line adapters used?

Gender Changers:

Allow two same gender connectors to mate. Very handy to have on hand to solve problems in the field or lab. See detail 1.
Can also be used as pass through connectors for panel mounting. See detail 3.

Socket Savers:

Extend the life of more expensive D-Sub connectors on PCBs and cable assemblies that are subject to frequent mating and unmating. See detail 2.
Can also be used as pass through connectors for panel mounting.

Null Modem, Reverser and Custom Wired Adapters:

Convert existing straight wired cables to the desired wiring scheme.
Can also be used for panel mounting.

Online Video

L-com.com/Videos/A24

Slim-Line adapters are used in a variety of applications, as illustrated here. Due to their low profile, they help reduce leverage strain on overstressed interface ports. (F = Female Connector, M = Male Connector)

Tip How Slim-Line adapters are constructed

All Slim-Line adapters are fully shielded providing EMI protection in electrically noisy environments. Gender Changers and Socket Savers use a one piece contact design ensuring reliability in applications requiring frequent connector mating/unmating. Standard mating hardware is easily removed and replaced for situations such as mismatched hardware, panel mounting, etc.

Mating Hardware	Brass, Nickel Plated
Durability Mating/Unmating	Approx. 100 cycles
Temperature Rating	-55°C to 105°C
Current Rating	5 amps max.
Voltage Rating	50 volts max.

Components	Materials
Hollow Rivet	Steel/Tin Plated
Female Connector Shell	Steel/Tin Plated
Female Connector Housing	Glass filled PBT, UL94 V-0 rated
Metal Shield	Steel/Tin Plated
Contacts	Brass/Gold Flash Plated
Male Connector Housing	Glass filled PBT, UL94 V-0 rated
Male Connector Shell	Steel/Tin Plated

Slim-Line DB9 or DB25 Null Modems, Adapters and Reversers - Communicate Without Modems

L-com's series of Null Modems and Reversers are completely shielded. More important, their extremely low profile reduces leverage strain and breakage on overstressed computer ports. The Null Modems shown are typical of our Slim-Line manufacturing technique. They are also available in virtually any wiring configuration.

Slim-Line Block Ferrite Filter Adapters - Eliminate Problem EMI in Computing Devices

L-com's plug-receptacle feed-thru adapter is a viable alternative solution for companies that need to rework (retrofit) existing designs in their effort to meet FCC regulations. Use these filtered D-Sub adapters where it's necessary to limit electromagnetic interference (EMI). Easy installation, economical cost, low profile and fully shielded. Four D-Sub sizes available, supplied with male/female hardware. Engineer's kit is also available and contains one of each adapter in a plastic carrying case.

Tip Easy panel mount adapters

Online Video

L-com.com/Videos/AQ3

1. Remove standard hardware provided with adapter. Mount adapter from rear of panel.

2. Secure with jackscrew SDG450XS (purchased separately) from the front of the panel.

3. Thread hex nut SDHS (purchased separately) onto exposed threads of SDG450XS.

*Note: Maximum recommended panel thickness is 0.062" (0.2cm). Dimensions in excess of 0.062" (0.2cm) can limit proper cable mating due to hex nut protrusion. Panels exceeding 0.062" (0.2cm) can be milled down to the recommended thickness in the area around the adapter.

How filter adapters are constructed

Filtered adapters provide a cost effective method for reducing electromagnetic interference (EMI) and can help to avoid costly product redesigns. L-com offers two styles of filtered adapters, Ferrite and Capacitive.

Ferrite

Detail of ferrite block

Ferrite block

Male/Female Contacts. All pins pass through ferrite block.

Capacitive

Detail of PCB with contacts and capacitors

PCB

PCB with Male/Female Contacts. Capacitors are soldered to each connector position.

Mating Hardware		Brass, Nickel Plated
Durability Mating/Unmating	Approx. 100 cycles	
Temperature Rating	-55°C to 105°C	
Current Rating	5 amps max.	
Capacitors (Ceramic)	820 pF ± 10%	
Dielectric Withstanding Voltage	500 VDC, 1 minute	
Insulation Resistance	500m Ohms @ 100 VDC	

Components	Materials
Hollow Rivet	Steel/Tin Plated
Female Connector Shell	Steel/Tin Plated
Female Connector Housing	Glass filled PBT, UL94 V-0 rated
Metal Shield	Steel/Tin Plated
Contacts	Brass/gold flash plated
Male Connector Housing	Glass filled PBT, UL94 V-0 rated
Male Connector Shell	Steel/Tin Plated

Slim-Line Ceramic Capacitive Filter Adapters - For Excellent, Economical Noise Removal

Filtering is the simplest method of removing unwanted interference from within a circuit. A capacitive filter is built into a male/female D-Sub adapter that provides an easy-to-use retrofit adapter. Although reasonably priced, there is a cost associated with capacitors and that is signal degradation, particularly in CMOS circuits with extremely low signal levels. Systems that transmit strong signals and can tolerate moderate loss are well suited for capacitive filtering. Our compact design allows an extremely low profile of only 0.2" (0.5cm). Individual capacitance on each pin is 820pF. Also available in an engineer's kit of 4 adapters.

DB9, DB15, DB25 or HD15 Connectors for Field Termination - Panel Mountable, Male or Female

These field termination connectors provide an easy and convenient way to perform field termination of any DB9, DB15, DB25 or HD15 cable. Separate connection points are provided for all positions of the connector plus the ground. Terminal block design with set screws provides reliable electrical connections without special tools. The terminal block area is clearly marked making proper termination virtually foolproof. Panel mountable for thickness up to 0.062" (0.2cm). Please note the orientation of the terminal blocks on the new male connectors.

DB9, DB15, DB25 or HD15 Female Connectors for Field Termination with Screwless Terminal Block

These field termination female connectors provide an easy and convenient way to perform field termination of any cable. Separate connection points are provided for all positions of the connector plus the ground. Screwless terminal block design with spring clamp provides reliable electrical connections utilizing no special tools. Simply depress the spring clamp, insert wire, release and the wire is secure. The terminal block area is clearly marked making proper termination virtually foolproof. Panel mountable for thickness up to 0.062" (0.2cm).

Y Adapters/Splitters for DB9, DB15 and DB25 Connector Sizes

These handy Y adapters are wired straight through for applications requiring splitting signals. The single end is male while the dual/split end is female for easy attachment to standard cable assemblies. The housing is fully shielded to maintain EMI protection and the contacts are 30 microinch (0.762µm) gold plated allowing for many mating cycles.

ADPT-DB25Y	Y Splitter Adapter, DB25M - DB25F & DB25F	22.77	21.86	20.95	CALL

Tip How are right angle adapters used?

Right angle adapters assist in connecting cables in tight spaces by allowing the cable to mate at a 90 degree angle. This reduces the backshell and cable bend distance required when mating cables. L-com offers right angle adapters in DB9, DB15, DB25, DB37 and HD15 male to female configurations with three cable exit directions each. Hardware is reversible allowing for use in virtually any application.

Cables require approximately 2.5" (6.4cm) to exit a mating connector depending on backshell length and cable diameter/flexibility.

Choose the proper adapter for desired cable exit direction and simply plug the cable into the adapter.

Cable Exit 1 Side View

Cable Exit 2 Side View

Cable Exit 3 allows the user to rotate the female connector 180° compared to Cable Exits 1 and 2.

Choose the proper adapter for desired cable exit direction and simply plug the cable into the adapter.

Note: When mating to a male connector, Cable Exits 1 and 2 exit in the same direction.

Do-It-Yourself Kits - Everything You Need to Build Your Own Data Line Adapters

Allows the creation of many types of data line adapters. Utilizes the most popular D-Subminiature connectors with solder cup terminations. Simply solder short wire jumpers to pins of your choice. The following components are included in each kit: two D-Sub Connectors of appropriate size and gender, two snap-on half covers and a complete set of hardware for the connectors. No jumper wires are supplied.

Tip How to crimp D-Sub contacts using hand tool CP3127CT**STEP 1**

Strip the wire to 3/32" (0.2cm). You can use part #HTC2030.

**STEP 2**

Squeeze tool handles together to release ratchet.

STEP 3

Slide the contact locator down from the top of the tool.

**STEP 4**

Then from the back, push the contact locator forward between tool crimp jaws.

STEP 5

Orient the contact so open side of wire and insulation barrels are facing up and insert contact into locator.

**STEP 6**

Slide locator back placing contact between crimping jaws. Then squeeze tool handles together until ratchet engages (listen for clicking sound).

STEP 7

Insert wire over contact and against wire stop. Squeeze tool handles together until ratchet releases.

**STEP 8**

Slide locator down, push forward and remove crimped contact.

D-Sub Hood Covers - Offering a Better Selection for Your Varied Cable Making Needs

L-com offers a better selection of D-Sub hoods than ever before. We've discovered in our own cable production that needs are varied because users are more demanding in style selection than traditional plastic or metal hoods. They are supplied as kits with appropriate hardware for male mating. Order hex standoffs separately for female adaptation.

Plastic D-Sub Hoods - Features One Piece Foldover Hinge Design

One piece unshielded hoods are available for DB9, DB15, DB25 and DB50 sizes. They are constructed of Black plastic with long knurled thumbscrews. They feature a side snap lock for connector security and metal screw down strain relief. Attractive appearance.

Low Smoke Zero Halogen Data Cable - Double Shielded, 24 AWG Stranded Conductors

Low smoke zero halogen cable reduces the amount of toxic and corrosive gasses emitted during combustion. Typically used in poorly ventilated areas, low smoke zero halogen is becoming very popular with military contractors. Cable construction features 24 AWG stranded tinned copper conductors with high density polyethylene insulation, overall aluminum polyester foil shield with tinned copper braid and a 24 AWG drain wire. Cable jacket color is black. Choose from 9, 15, or 25 conductor cable and 100, 500, or 1,000 foot (30.5m, 152.4m & 304.8m) put ups. L-com will manufacture cable assemblies featuring low smoke zero halogen cable with modest minimum requirements.

Heavy Duty Double Shielded Multiconductor Data Cable - 20 AWG Conductors, Foil + Braid Shield

Large gauge cable is now available for applications requiring higher current than typical data systems use. Features a dark gray UL2464 listed PVC jacket, aluminum mylar foil shield, tinned copper braid and 20 AWG stranded conductors. Available in 100, 500 or 1,000 foot (30.5m, 152.4m and 304.8m) spools.

USB Connectors Tutorial

What is USB?

Universal Serial Bus is a high speed connectivity standard enabling simple plug and play connections to devices such as printers, digital cameras, camcorders, keyboards and mice. The standard is supported by many leading suppliers of computers and peripherals. An attractive advantage of USB is that the devices are hot plug-gable meaning a live connection/disconnection without data loss or interruption. Currently there are three relevant revisions of USB, 2.0, 3.0, and 3.1. USB 3.0 is an emerging standard that allows

large amounts of data or video to be transferred up to 10 times faster than USB 2.0. However, USB 2.0 is still much more common in the marketplace and is expected to remain relevant for applications that do not require large amounts of data to be moved. It is important to note that in order to take advantage of the increased bandwidth USB 3.0 provides all components must be 3.0 compliant - host, cables and peripherals. Otherwise the bandwidth will perform to the lowest rated component. USB 3.1 utilizes the

type C connector, which is only backwards compatible through the use of an 3.0 adapter or cable that also uses a type C connector. USB 3.1 cables utilize a type C connector on each end.

Applications

Initially USB products were used mainly to link computers and their associated peripherals. Today USB is used in nearly every market including communications, entertainment, medical and automotive.

USB Connectors

The USB specification requires a host system to be equipped with an A type jack. The B / mini B type jack is typically found on peripheral devices requiring detachable cables. Therefore, detachable USB cables are configured as an A to B / mini B male combination which prevents improper bus configurations and topology miswiring. USB 3.1 cables work differently. Both sides utilize the type C connector, the cable will work regardless of which way it is plugged in.

For a complete listing of USB Connectors, see the Connector Chart on the inside back cover of this catalog or online at L-com.com/ConnectorChart

USB 2.0 Cable Construction

USB 3.0 Cable Construction

USB 3.0 adds two shielded data pairs to the USB 2.0 cable specifications. This addition allows for the faster performance in downloading data or video. Similar concept to changing a 2 lane highway to a 6 lane highway - much more traffic can pass through.

USB 3.1 Cable Construction

USB 3.1 cable utilizes 8 mini coax lines and 1 shielded twisted pair for data transfer. One large power conductor along with smaller ground and configurators complete this more sophisticated, high speed cable. Please note that this is an emerging technology and this specification is subject to change.

USB 3.0 Cable Assemblies

The type C connector provides a compact, easy to use interface that is quickly spreading across the electronics market. We offer not only the newest Type C to Type C assemblies for cutting edge equipment, but also type C to traditional 3.0 USB connectors.

USB 3.0 Cable Assemblies

USB 3.0 cables are up to 10 times faster than USB 2.0 - 4.8 Gbps versus 480 Mbps. The increased bandwidth substantially reduces the time required for transferring large amounts of data or video. For example, an HD movie that would require 14 minutes to download with USB 2.0 devices and cables would take approximately 70 seconds using USB 3.0 equipment.

USB 3.0 Cable Assemblies

L-com's USB Type-C Cable Assemblies provide a quick and easy way to connect older peripheral devices to a new computer, or to connect new peripherals that use a USB Type-C connector to an older computer system. Our USB Type-C cable assemblies feature simple "plug & play" connections to hand held devices and other devices that utilize USB Type C ports. Twisted pair data lines help reduce crosstalk and allow for maximum cable flexibility.

USB Cables with Ferrites

Highest quality USB cables allow for transfer rates up to USB 2.0 480 Mbps or USB 3.0 5Gbps. These cables allow for simple "plug & play" connections for devices such as printers, keyboards/mice, digital cameras and other USB peripherals. Twisted pair data lines help reduce crosstalk while 24 AWG power conductors enable maximum power transfer from host to peripheral. The addition of ferrites to the end of the cable helps to suppress any further high frequency noise.

USB High Flex Cable Assemblies

Designed for applications where ordinary USB cables fail, this exclusive ultra flexible cable family is rated for 10,000 flex cycles minimum. Standard USB cable fails at approximately 1,000 bend cycles. The special bulk cable uses a polyurethane jacket plus high strand count data (28 and 30 AWG) and power (24 AWG) conductors to achieve the extra durability.

Tip Defining Angled USB 3.0 Cable Assemblies

Angled connector hoods help connect USB cables in tight places. L-com now offers two options each for standard A, B and micro B style connectors. The photos below detail the connector position relative to the cable entry direction.

A Style Connectors

For A style connectors, the position of the connector dielectric* is key in determining the correct angle for your application. *Note: The connector dielectric is the plastic material that contains the contacts.

For Micro B connectors, the two latches on the connector are key in determining the correct angle for your application. Reference the location of the latches in the photos below:

B Style Connectors

For B style connectors, the extended hood of the connector is key in determining the correct angle for your application.

Tip What is the difference between a USB Type A or B connector?

Type A jacks are found on the host and on hubs.

Type B jacks are found on peripherals requiring detachable cables.

Tip USB 3.0 Machine Vision Panel Mount Cable Assemblies

L-com now offers a panel mount variation of its Machine Vision cable assemblies. The four imbedded screw slots allow this extension cable to be securely mounted to a panel, while maintaining a secure connection with the side thumbscrews.

For this type A receptacle, the top and bottom holes are used to mount the cable to the panel, while the side holes are used to screw down the mating connector.

Item #	Description	Color	1-9	10-24	25-99	100+
--------	-------------	-------	-----	-------	-------	------

USB 3.0 Machine Vision Panel Mount Cable Assemblies

This Machine Vision compliant extension cable provides a secure panel mountable connection that is able to maintain the secure thumbscrew interconnect needed in these systems. By utilizing two mounting holes in addition to the two thumbscrew receptacles, these assemblies ensure that the extension will remain firmly mounted, even if the mating cable is removed and mated frequently.

USB 3.0 Vision Cable Assemblies with Thumbscrews

These cables are manufactured per the USB3 Vision standard. In addition to supporting the machine vision camera market, the screw mount hardware is beneficial in many applications where standard USB connectors can become dislodged due to jostling, vibration, etc. L-com is a member of the AIA (Automated Imaging Association) trade group.

Premium USB 2.0 Cables - Type A to A or A to B Connectors, Clear Jacket and Mold

These sharp looking cables highlight L-com's high quality standards when "looking under the hood". A metal shielding under the mold and high coverage braid shield can protect your data even in the noisiest electrical environments. These cables use the same design as the popular CSMUAB series featuring 20 AWG power conductors enabling maximum power transfer from host to peripheral.

USB 2.0 Type A to Micro B Y Split Cable

This 3-foot USB A to Micro B Y-Cable provides 2 USB 'A' Male connectors and 1 USB 'micro B' Male connector, providing a solution for supporting the additional power required by some Micro USB external hard drives connected to the standard USB ports which is provided by most computers. Especially valuable in situations where a single USB 2.0 port may not offer sufficient power to external hard drives, the USB A/Micro B Y-split cable can be connected to 2 ports on 1 PC, to increase the power output to the external device. In addition it provides digital data transmission for high speed data transfers.

CAUAMICBY	USB 2.0 Type A to Micro B Y Split Cable, 3ft. (0.9m)	Black	8.18	7.53	6.87	CALL

Tip How does the latching USB connector work?

Insert the latching USB connector into the USB jack.

The latches on each side of the connector lock into the channel cut-outs of any USB jack.

Note: It may be necessary to rock the latching connector slightly to set the latches into the channels.

To remove the latching USB connector, simply depress the release mechanisms on the sides of the backshell and pull apart.

USB Cable Assemblies with Latching Connectors

These unique cable assemblies feature a latching Type A USB plug which provides lock down mating retention with any USB Type A jack. Two styles are available – latching A to latching A and latching A to standard B. Fully shielded and USB 2.0 compliant, this cable contains two 24 AWG power conductors and one 28 AWG pair for the data lines. Please note latching Type B plugs are available as custom products but require a custom Type B jack.

USB Coil Cable - Type A Latching Connector to Type B Connector, 12.5 Feet (3.8m) Extended

This unique cable assembly features a polyurethane jacketed coil cable plus a latching Type A USB connector providing improved mating retention with any USB Type A jack. The latches lock into the channels on each side of a USB jack when fully mated. Retracted length is approximately 2.5 feet (0.8m) expanding to 12.5 feet (3.8m). Fully shielded and USB 2.0 compliant, this cable contains two 28 AWG power conductors plus one 28 AWG twisted pair for data lines.

Variable Length USB Coil Cable - Mini B 5 Position Male to Female

This innovative USB coil cable from L-com features a retracted length 0.5 meters and an expanded length of two meters and can be used with GPS systems as well as cameras and other peripherals using the USB Mini B5 interface. All 5 mini B positions are connected to insure proper functionality in every application. The tough, durable polyurethane jacket enhances recoil memory and 30 microinch (0.762µm) gold plated contacts provide reliable connections with repeated mating cycles.

Angled USB 2.0 Cable Assemblies - Choice of 24 Options, all Lengths and Styles at L-com.com

Molded, angled connector hoods solve difficult connection issues in tight places. Four mold options each for standard A and B style connectors are available. These high quality constructed cables feature USB 2.0 compliant 26 AWG power leads and are finished in an attractive gray color. Custom configuration options are available with modest minimum requirements, please contact your customer service representative for a quote.

All families are available in lengths of 0.3, 0.5, 0.75, 1, 2, 3, 4, and 5 meters:

Tip Defining angled USB cable assemblies

Angled connector hoods help connect USB cables in tight places. L-com now offers four options each for standard A and B style connectors. The photos below detail the connector position relative to the cable entry direction.

A Style Connectors

For A style connectors, the position of the connector dielectric* is key in determining the correct angle for your application. *Note: The connector dielectric is the plastic material that contains the contacts

B Style Connectors

For B style connectors, the angled corners of the connector are key in determining the correct angle for your application.

45 Degree Angled USB 2.0 Cable Assemblies - Choice of 6 Options, all Lengths and Styles at L-com.com

L-com has added 45 degree angled USB cables to complement our extensive 90 degree angled offering. 45 degree bends offer an alternative in applications where 90 degree bends can't clear nearby obstacles. Two mold options each for standard A and B style connectors are now available. These high quality constructed cables feature USB 2.0 compliant 26 AWG power leads and are finished in an attractive gray color. Custom configuration options are available with modest minimum requirements, please contact our sales team for a quote. All families are available in lengths of 0.3, 0.5, 0.75, 1, 2, 3 and 5 meters.

Waterproof USB Field Installable Connectors - Revision 2.0 Compliant, IP67 Rated

Available in type A or B styles, these connectors are a perfect complement to our popular IP67 USB cable assemblies. Solder connectors and a sealing nut that conforms to any USB cable diameter allows the user to make their own water/dust proof cable assemblies. In addition, these connectors are panel mountable and mate with our male IP67 cable assemblies as well as our IP67 covers. L-com will manufacture custom cable assemblies using these connectors with short lead times and low minimum quantity requirements.

USB Panel Mount Adapter - High Retention Connectors, 30 Microinches (0.762µm) Gold

L-com's ECF style High Retention USB adapters provide an easy to use mountable USB solution featuring a high retention connector that provides 50% (minimum) greater connector retention than standard USB connectors. This feature is ideal for applications where mated cables can become detached by jostling, vibration, etc. These adapters are available in B-A, A-A, and A-B connector configurations, and all three feature a shielded housing. L-com's 4-40 screws (PN# ECF440) are used to mount these adapters and are sold separately.

USB Surge/Lightning Protectors - Type A to A and A to B Connectors, Panel Mountable

The L-com AL-ECF504 series USB surge protectors are commercial quality devices designed to protect a computer's sensitive USB port from surges and spikes from attached devices. To ensure USB 2.0 speeds, these device use ultra-low capacitance diodes to protect the data lines. In addition, a protection device clamps the power lines to safe levels. They can be mounted on an enclosure, panel mounted or used in-line as a stand alone product. Mounting screws must be purchased separately.

USB 3.0 Harsh Environment Coupler

Bring waterproof protection to your network today with L-com's IP67 rated USB 3.0 bulkheads. These couplers are designed to keep things simple as they do not require special mating assemblies and are designed to be capped when not in use. As such, each coupler comes with a dust cap tethered by a lanyard. A coupling nut and o-ring along with a simple cut-out allow for mounting without additional hardware or tooling. The inner side of the coupler has as little protrusion as possible allowing you have the maximum space to work with inside your panel or box.

LSZH USB Revision 2.0 Compliant Bulk Cable		
Halogen free USB bulk cable features a flexible LSZH jacket that covers the braid, foil, and drain wire shield. Low smoke zero halogen cable reduces the amount of toxic and corrosive gases emitted during combustion. Typically used in poorly ventilated areas, low smoke zero halogen is very popular with military contractors and anywhere the protection of people and equipment from toxic and corrosive gases is critical. Choose from 100, 500 or 1000 foot put-ups. Jacket color is black. Available in both 28/20 AWG and 28/28 AWG. Compatible with L-com CNUB connector series.

USB Type A and B Female Field Termination Connector						
The USB field termination female connectors provide an easy and convenient way to perform field termination for USB applications. USB 2.0 standard A and B connector styles are available. Separate connection points are provided for all 4 positions of the connector plus the ground. Terminal block design with set screws provides reliable electrical connections utilizing no special tools. The terminal block area is clearly marked making proper termination virtually foolproof. Panel mountable using 4-40 screws provided.

L-com Isolated and Non-Isolated Inline USB to RS232/RS422/RS485 Converters		
Universal Serial Bus (USB) has become the connectivity workhorse of today's PCs, replacing the familiar serial ports. But many commercial and industrial devices still use RS232 interfaces. To connect these devices to modern PCs you need robust and reliable conversion solutions. At the same time, USB ports are becoming more common on commercial and industrial equipment such as point-of-sale peripherals, medical devices, scientific instrumentation, laboratory equipment and other devices. Sometimes these are used in environments where surges, spikes and ground loops are likely to occur. Get the extended range and multi-drop capability of RS232 or RS422/485 from the USB port of your PC. Isolated models protect PCs and laptops from dangerous surges and spikes on the network. Windows automatically configures the serial output as an additional COM port, compatible with your Windows application.		
LC-USB-422-485	L-com USB to RS422/485 Term Block, 2kV Isolation	118.79
LC-USB-485	L-com USB to RS485 to DB9 Female Connector	97.27
LC-USB-TB485	L-com USB to RS485 Term Block	97.27

L-com USB Isolators

At just 2.0 x 1.7 x 0.8 inches (5.1 x 4.3 x 2.0 cm), these isolators pack a powerful punch against electrical noise, surges and spikes - up to 4kV isolation. They protect expensive PCs and equipment from damaging electrical storms, power surges and other high EMI/RFI disturbances. This isolation barrier eliminates ground loops which are disruptive in measurement applications. All models are USB bus powered and provide up to 100mA of current to attached downstream devices when they are attached to a full power (500mA) USB host port.

LC-USB-232I	L-com USB to RS232 1 Port Isolator, 2kV	120.36

L-com 4 Port USB 2.0 Industrial Hub

L-com's LC-IND-4USBHUB is a compact, bus powered USB hub that can be securely surface mounted to a panel or wall. This hub utilizes high retention USB ports, which are ideal for high vibration environments, and has a wide operating temperature (-40 to 80C) for harsh conditions.

LC-IND-4USBHUB	L-com USB 2.0 Industrial Hub, 4 Port	141.98

USB Conversion

USB has quickly become the defacto PC/Peripheral data interface of the 21st century. Data transfer speeds have rapidly increased from the original USB 1.1 specification of 12 Mbps (Released in 1998) to the then astounding Hi-Speed USB 2.0 specification of 480 Mbps (Released in 2000) and now the revolutionary SuperSpeed USB 3.0 specification of 5 Gbps (Released in 2008) is finally becoming more common on most new Desktop/Laptop computers, external storage devices and peripherals.

However, there are a wide array of legacy devices that many still need to interact with due to infrastructure demands or upgrade costs. The versatility of the USB protocol allows for a variety of conversion products to accommodate these devices and allows them to communicate with today's computer equipment.

USB conversion products are available to replicate the standard RS232 serial port(s) found on older computer systems. Conversion products are also available to replicate IEEE-1284 parallel printer ports as well as older PS/2 Mini-Din Keyboard and Mouse interfaces that were also quite common on older computers, allowing for the continued use of older peripherals. There are even conversion products available for more exotic industrial interfaces like IEEE-488 (GPIB).

USB to RS232 Converter Cable

This easy to install USB to serial converter allows you to connect a USB port on a PC or laptop to legacy RS232 devices such as PDAs, GPS systems etc. This USB to serial converter features DB9 male connectors for the RS232 connection and a USB type A Male connector for the PC or Laptop connection. Each USB to serial converter ships with a driver/installation CD.

USB to GPIB Converter Cable

The USB-488 is a USB to GPIB controller module that converts any PC with a USB interface into a full-function, IEEE 488.2 Bus Controller. The unit performs all of the basic IEEE-488.1 functions such as talker, listener and system controller. Its IEEE-488.2 controller routines make it fully compliant with the IEEE 488.2 specification. The USB-488 module is a Plug and Play USB peripheral that supports Microsoft Windows 98SE/ME/2000/XP operating systems. The driver includes National Instruments' style 488.1 'ib' and 488.2 command Sets. Additionally the driver provides support for Visual Basic and C/C++ language programs and is compatible with National Instruments' VISA and LabView.

Tripp Lite USB 3.0 to Video Adapters (VGA/DVI/HDMI/DP), Add Additional Video Output Options to your PCs

Tripp Lite's U344-001 Series of Video Adapters enables you to add additional video outputs to your Notebook/Laptop or Desktop PCs. Using USB 3.0's High Speed and Bandwidth; they provide reliable and high quality images in a simple 2-step process. First step is to install the driver software; the second is to connect the selected video adapter to your computer with a standard USB 3.0 cable assembly. You can connect up to six adapters to one computer allowing you to set up multiple screen solutions and providing enhanced flexibility in how you choose to display your data and greatly improving productivity. The VGA/DVI & HDMI models support max resolutions up to (2048X1152) and the DisplayPort model supports a max resolution of (2560X1600). Small physical footprint enhances portability. USB Port Powered, no external power required, fully supports Windows XP/Vista/7/8 as well as Intel Based Mac's using OS 10.8 and above. **As an authorized Tripp Lite reseller, we can bid on RFQs for any Tripp Lite part numbers. Tripp Lite USB 2.0 Active Extension Cable Type A Male - Female 5 Meter

The TL-U026-016 is a 16 ft. USB certified 2.0 active extension cable that is Bus Powered and can be used to increase the length of a USB device without the worry of signal loss and potential performance problems. USB limits a cable's length to 16 feet. Any length over 16 feet requires the use of an active cable such as this one. This cable has a signal booster built in. The overall cable length can be extended up to 80 feet by daisy chaining up to 5 of these active cables. The cable must be plugged directly into a USB port, either on the PC or a hub. **As an authorized Tripp Lite reseller, we can bid on RFQs for any Tripp Lite part numbers. Contact us to request a non-obligatory quote.**

Icron Technologies' USB Extenders with ExtremeUSB® Technology

When you need your USB devices to operate at distances beyond five meters from the computer or source host, rely on ExtremeUSB® – the industry recognized premium standard for USB extension.

ExtremeUSB extension incorporates numerous innovative patented technologies working together to provide transparent USB extension across all Operating Systems (Windows®, OS X® and Linux®) without the requirement of additional software drivers. Whether extending USB 1.1, 2.0, 3.0 or uncompressed Full High Definition Video with USB, Icron Technologies extenders provide reliable USB extension over CAT 5e/6/7, Local Area Network or fiber up to 10km. Choose ExtremeUSB for Plug and Play installation and installers will never have to return to the jobsite once the job is done.

All Icron USB extender solutions include the ExtremeUSB® suite of features:

- Transparent USB extension
- True plug and play (no software drivers)
- Compatibility with all major operating systems

Note: Icron USB and KVM extenders shown above reflect the most current models.

Please contact L-com for supply status on legacy models.

A USB extender system is designed to overcome a cable distance limitation of five meters for USB 2.0 and approximately three meters for USB 3.0 (also known as USB 3.1 Gen 1). The system typically consists of a pair of extender units: a Local extender unit connected to a host such as a computer, and a Remote extender unit connected to USB peripherals such as keyboard, mouse, flash drive or camera. These two extender points are joined by transmission link cable such as CAT 5e/6/7, Local Area Network, or fiber to provide an extension connection at the required distance.

Firewire, DIN, SCSI, SATA Tutorial

What is Firewire?

Firewire is a high speed communication interconnect standard defined by IEEE-1394. It was originally developed to connect PCs to other PCs or to peripherals such as digital cameras, camcorders, scanners, etc. An attractive advantage is the devices are hot pluggable (live connection/disconnection without data loss or interruption).

What is SCSI?

Small Computer System Interface or SCSI is a standard and interface for transferring data between PCs and peripherals such as disk drives. Some SCSI interfaces are also found on peripherals such as scanners and CD drives.

What is SATA?

SATA or Serial ATA is a storage interface used to connect laptop and desktop computers or external mass storage devices such as a hard disk drives or optical drives. SATA can support data transfer rates as high as 3.0 Gbps per device (depending on hardware used).

What is eSATA?

eSATA or external SATA, was developed in 2004 to provide external high speed connectivity to external storage devices. eSATA technology supports hot plugging and a maximum cable length of 2 meters.

What are DIN and Mini DIN?

DIN stands for Deutsches Institut für Normung which is the German standards organization that developed this interface. DIN connectors are available in many configurations from 3 to 9 positions. Also there are several different versions of the 5 pin connector where the angle of the arc swept between the first and last pin can be 180°, 240° or 270°. The most common uses for DIN connectors are analog audio, AT keyboard and mouse connections and MIDI applications.

Mini DIN connectors were also developed by Deutsches Institut für Normung. These connectors are similar to the DIN series but feature a smaller diameter connector and are available in different styles (pin counts and pin orientation). Some popular applications for Mini DIN connectors include S-Video and PS/2 Keyboard and mouse interconnects.

Common Connector Types

• SATA, eSATA,

Serial ATA Latching

Serial ATA

External Serial ATA

• Firewire

- Type 1 (6 position) connectors are typically located on computers and hubs.

- Type 2 (4 position) connectors are commonly found on peripheral devices.

- Type B (9 position) connectors are commonly found on computers and hubs.

• DIN and Mini DIN

- 6 Pin Mini DIN PS/2 Keyboard and Mice

- 5 Pin DIN AT Keyboards

- 8 Pin Mini DIN Macintosh Peripherals

• SCSI

Serial ATA (SATA) Cable Assemblies with Latching Connectors - Straight and Right Angle Connectors

L-com's latching Serial ATA cable assemblies provide a secure connection every time. These SATA assemblies feature two shielded 26 AWG pairs in a PVC jacket, gold plated contacts and two straight polarized seven position connectors. Both straight to straight and straight to right angle versions are offered. Custom lengths are available with modest minimum requirements. Call us today with your custom SATA requirements.

CASATAL-8	Latching Serial ATA Cable, Straight/Straight, 8.0in (20.3cm)	4.53	4.17	3.81	CALL
CASATAL-12	Latching Serial ATA Cable, Straight/Straight, 12.0in (30.4cm)	4.76	4.38	4.00	CALL

CASATAR-1M	Serial ATA Cable, Straight/Right Angle, 1.0m	6.93	6.38	5.82	CALL

Serial ATA Extension Cable Assemblies (SATA) - Male to Female Connectors

These handy cables can be used to extend SATA cables as well as to create space in tightly packed areas where bulky disk-on-modules (DOMs) are difficult to connect. These cables feature a bright red PVC jacket, gold contacts and are fully shielded.

CASATAEXT-12	Serial ATA Extension Cable, 12" (30.4cm)	5.51	5.07	4.63	CALL
CASATAEXT-20	Serial ATA Extension Cable, 20" (50.8cm)	6.92	6.37	5.81	CALL

External Serial ATA Cable Assemblies - Fully Shielded, Protect Against EMI/RFI

L-com's CAESA series of external Serial ATA cables provide fast data transfer speeds for external storage devices. SATA is now available "outside the box". These fully shielded cables provide extra protection from EMI/RFI and support speeds up to three Gigabits per second.

CAESA-05M	External Serial ATA Cable Assembly, 0.5m	8.65	8.13	7.61	CALL

Making cable choices

To minimize the possibility of timing errors (skewing) always attempt to minimize the total bus length which includes the internal cables. When making cabling choices, consider the following recommended parameters for SCSI systems:

	DATA RATE	MAXIMUM BUS LENGTH	DEVICES SUPPORTED
SCSI-1	5 Mbps	6 meters	8 devices
SCSI-2	10 Mbps	6 meters	8 devices
SCSI-3	20 Mbps	3 meters	15/31 devices
SCSI-5	40 Mbps	3 meters	8 devices

Codes for SCSI Connector Ends

Standard Grade SCSI-3 Cables - Fully Molded and Shielded

All SCSI-3 cables are fully populated with 34 twisted pairs. The high density DB68 connectors utilize 2-56 threaded screws for mounting.

CA900MM-05M	SCSI-3 Cable, HPDB68 Male/Male, 0.5m	34	C-C	46.87	43.12	39.37	CALL
CA900MM-1M	SCSI-3 Cable, HPDB68 Male/Male, 1.0m	34	C-C	52.08	47.91	43.75	CALL
CA900MM-2M	SCSI-3 Cable, HPDB68 Male/Male, 2.0m	34	C-C	62.50	57.50	52.50	CALL

Premium Grade SCSI-3 Cables with Ferrite Cores - Reduce Noise Problems

Frequent OEM requests have prompted us to add a premium SCSI-3 cable utilizing ferrite cores to the line. Molded ferrites reduce radiated emissions and undesirable currents within the shield. These cables can be helpful in passing today's tough emissions standards.

CAF900MM-05M	SCSI-3 Cable, HPDB68 Male/Male with Ferrites, 0.5m	34	C-C	62.52	57.52	52.52	CALL
CAF900MM-1M	SCSI-3 Cable, HPDB68 Male/Male with Ferrites, 1.0m	34	C-C	67.73	62.31	56.89	CALL
CAF900MM-2M	SCSI-3 Cable, HPDB68 Male/Male with Ferrites, 2.0m	34	C-C	78.15	71.90	65.65	CALL
CAF900MM-3M	SCSI-3 Cable, HPDB68 Male/Male with Ferrites, 3.0m	34	C-C	88.57	81.48	74.40	CALL

Low Smoke Zero Halogen SCSI-3 Cable Assemblies

These cables meet the requirements of SCSI-3 systems. The high density DB68 SCSI connectors use 2-56 threaded thumbscrews for mounting. Cable assembly construction features 30 microinch gold plated copper alloy contacts, die cast zinc alloy hoods, 28 AWG polypropylene insulated conductors, foil/braid shield and a LSZH outer jacket. Color is black. L-com will manufacture custom cable assemblies with modest minimum requirements.

CAUZ900MM-1M	LSZH SCSI-3 Cable, HPDB68 Male/Male, 1.0m	34	C-C	127.95	120.27	112.60	CALL
CAUZ900MM-2M	LSZH SCSI-3 Cable, HPDB68 Male/Male, 2.0m	34	C-C	150.65	141.61	132.57	CALL
CAUZ900MM-3M	LSZH SCSI-3 Cable, HPDB68 Male/Male, 3.0m	34	C-C	173.22	162.83	152.43	CALL

SCSI-2 Computer Cables - Molded, Shielded and Compatible with Differential SCSI-2

These differential SCSI-2 cables utilize 25 twisted pair cable and half pitch DB50 connectors. Half pitch connector housings connect via spring locking latches. All cables are fully molded and have foil and copper braid shielding. Lengths are measured in meters.

CA801-05M	SCSI-2 Molded Cable HPDB50 Male/Male, 0.5m	B-B	38.41	36.11	33.80	CALL
CA801-1M	SCSI-2 Molded Cable HPDB50 Male/Male, 1.0m	B-B	44.32	41.66	39.00	CALL
CA801-2M	SCSI-2 Molded Cable HPDB50 Male/Male, 2.0m	B-B	56.14	52.77	49.40	CALL
CA801-3M	SCSI-2 Molded Cable HPDB50 Male/Male, 3.0m	B-B	67.95	63.87	59.80	CALL

Differential SCSI-1 Cables - Fully Populated, 25 Twisted Pairs, Molded and Shielded

These differential SCSI-1 cables are built to the 25 pair standard used with most SCSI-1 equipment. The differential interface on the equipment allows longer distances to be achieved by sending information simultaneously along two pairs of wires. CN50 cables are fully molded and utilize 26 AWG twisted pairs with foil shielding throughout. Cable length is measured in meters.

CA751MM-05M	SCSI-1 Molded Cable, CN50 Male/Male, 0.5m	D-D	47.12	44.29	41.47	CALL
CA751MM-1M	SCSI-1 Molded Cable, CN50 Male/Male, 1.0m	D-D	56.13	52.76	49.39	CALL

IEEE-1394 Firewire Cable Assemblies - Transmission Rates to 400 Mbps

Highest quality Firewire cables allow for transfer rates up to 400 Mbps and meet the IEEE-1394 specification. These cables allow for simple Plug and Play connections for devices such as printers, scanners, digital cameras and other firewire peripherals. They can also be used to link two computers together for file sharing. Twisted pair data lines help reduce crosstalk while 22 AWG power conductors enable maximum power transfer from host to peripheral.

IEEE-1394 Firewire Cable, Type 1 to Type 1, PVC Jacket, 30 Microinches (0.762µm) Gold

IEEE-1394b Firewire Cable Assemblies - Transmission Rates to 800 Mbps

This version of Firewire cable assemblies utilizes a 9 position connector that is compliant with the IEEE-1394b standard. These cables can double the transmission rates of the traditional IEEE-1394a cable assemblies. Cable construction features two individually shielded 26 AWG data pairs plus two 22 AWG power conductors with an overall foil/braid shield and molded backshells. Color is black.

Waterproof IEEE-1394 Firewire Cable Assemblies - IP67 Rated, Male to Female

L-com now offers IP67 solutions for your harsh environment IEEE-1394 Firewire applications. These robust assemblies feature a specialized IP67 rated 6 position female connector on one end and a standard 6 pin male connector on the other end. These assemblies are perfect for applications where dust and moisture are prevalent and can be used to connect to enclosures, panels, or directly to peripherals or PCs.

IEEE-1394 Firewire Latching Cable Assemblies, Type 1 to Type 1

These assemblies utilize L-com's CN1394L-1 latching Type 1/6 position connector on both ends of the cable. The latching connector provides mechanical retention to mating connectors providing a secure connection every time. It is easy to un-mate by depressing the release mechanism and supports Firewire 400 Mbps speeds. L-com can manufacture custom cable assemblies with low minimum quantity requirements and short lead times.

DIN and Mini DIN Cables for Computer Keyboards, Mice and Other Uses

These Premium DK Series are the finest DIN/Mini DIN cables on the market. As the illustration reveals, the painstaking attention to detail beneath the surface makes the difference. All DK cables listed are wired straight-thru, fully populated, double shielded (copper braid and aluminum mylar), 24 AWG and fully over molded.

Common DIN and Mini DIN Jack Uses

Item #	Description	1-9	10-24	25-99	100+
--------	-------------	-----	-------	-------	------

Premium DIN 5 Cables - Fully Populated - Double Shielded

DK225MM-3	Molded Cable, DIN 5 Male/Male, 3.0ft (0.9m)	10.54	9.91	9.28	CALL
DK225MM-6	Molded Cable, DIN 5 Male/Male, 6.0ft (1.8m)	12.53	11.78	11.03	CALL
DK225MM-10	Molded Cable, DIN 5 Male/Male, 10.0ft (3.0m)	17.70	16.64	15.58	CALL
DK225MM-20	Molded Cable, DIN 5 Male/Male, 20.0ft (6.0m)	29.09	27.34	25.60	CALL
DK225MM-25	Molded Cable, DIN 5 Male/Male, 25.0ft (7.6m)	36.62	34.42	32.23	CALL

DK225MF-3	Molded Extension Cable, DIN 5, Male/Female, 3.0ft (0.9m)	12.44	11.69	10.95	CALL
DK225MF-6	Molded Extension Cable, DIN 5, Male/Female, 6.0ft (1.8m)	13.12	12.33	11.55	CALL
DK225MF-10	Molded Extension Cable, DIN 5, Male/Female, 10.0ft (3.0m)	17.70	16.64	15.58	CALL
DK225MF-20	Molded Extension Cable, DIN 5, Male/Female, 20.0ft (6.0m)	30.25	28.43	26.62	CALL
DK225MF-25	Molded Extension Cable, DIN 5, Male/Female, 25.0ft (7.6m)	36.62	34.42	32.23	CALL

Premium Mini DIN 6 Cables - Fully Populated - Double Shielded

DK226MM-1	Molded Cable, Mini DIN 6 Male/Male, 1.0ft (0.3m)	9.03	8.49	7.95	CALL
DK226MM-2	Molded Cable, Mini DIN 6 Male/Male, 2.0ft (0.6m)	10.32	9.70	9.08	CALL
DK226MM-3	Molded Cable, Mini DIN 6 Male/Male, 3.0ft (0.9m)	11.51	10.82	10.13	CALL
DK226MM-6	Molded Cable, Mini DIN 6 Male/Male, 6.0ft (1.8m)	15.36	14.44	13.52	CALL
DK226MM-10	Molded Cable, Mini DIN 6 Male/Male, 10.0ft (3.0m)	20.50	19.27	18.04	CALL
DK226MM-15	Molded Cable, Mini DIN 6 Male/Male, 15.0ft (4.6m)	26.67	25.07	23.47	CALL
DK226MM-20	Molded Cable, Mini DIN 6 Male/Male, 20.0ft (6.0m)	33.03	31.05	29.07	CALL
DK226MM-25	Molded Cable, Mini DIN 6 Male/Male, 25.0ft (7.6m)	39.39	37.03	34.66	CALL

DK226MF-3	Molded Extension Cable, Mini DIN 6 Male/Female, 3.0ft (0.9m)	11.51	10.82	10.13	CALL
DK226MF-6	Molded Extension Cable, Mini DIN 6 Male/Female, 6.0ft (1.8m)	15.36	14.44	13.52	CALL
DK226MF-10	Molded Extension Cable, Mini DIN 6 Male/Female, 10.0ft (3.0m)	20.50	19.27	18.04	CALL
DK226MF-15	Molded Extension Cable, Mini DIN 6 Male/Female, 15.0ft (4.6m)	26.67	25.07	23.47	CALL
DK226MF-20	Molded Extension Cable, Mini DIN 6 Male/Female, 20.0ft (6.0m)	33.03	31.05	29.07	CALL
DK226MF-25	Molded Extension Cable, Mini DIN 6 Male/Female, 25.0ft (7.6m)	39.39	37.03	34.66	CALL

Premium Mini DIN 8 Cables - Fully Populated - Double Shielded

DK238MM-1	Molded Cable, Mini DIN 8 Male/Male, 1.0ft (0.3m)	11.22	10.55	9.87	CALL
DK238MM-2	Molded Cable, Mini DIN 8 Male/Male, 2.0ft (0.6m)	12.51	11.76	11.01	CALL
DK238MM-3	Molded Cable, Mini DIN 8 Male/Male, 3.0ft (0.9m)	13.79	12.96	12.14	CALL
DK238MM-6	Molded Cable, Mini DIN 8 Male/Male, 6.0ft (1.8m)	17.65	16.59	15.53	CALL
DK238MM-10	Molded Cable, Mini DIN 8 Male/Male, 10.0ft (3.0m)	22.78	21.41	20.05	CALL
DK238MM-15	Molded Cable, Mini DIN 8 Male/Male, 15.0ft (4.6m)	28.92	27.18	25.45	CALL
DK238MM-20	Molded Cable, Mini DIN 8 Male/Male, 20.0ft (6.0m)	35.29	33.17	31.06	CALL
DK238MM-25	Molded Cable, Mini DIN 8 Male/Male, 25.0ft (7.6m)	41.64	39.14	36.64	CALL

DK238MF-3	Molded Extension Cable, Mini DIN 8 Male/Female, 3.0ft (0.9m)	13.79	12.96	12.14	CALL
DK238MF-6	Molded Extension Cable, Mini DIN 8 Male/Female, 6.0ft (1.8m)	17.65	16.59	15.53	CALL
DK238MF-10	Molded Extension Cable, Mini DIN 8 Male/Female, 10.0ft (3.0m)	22.78	21.41	20.05	CALL
DK238MF-15	Molded Extension Cable, Mini DIN 8 Male/Female, 15.0ft (4.6m)	28.92	27.18	25.45	CALL
DK238MF-20	Molded Extension Cable, Mini DIN 8 Male/Female, 20.0ft (6.0m)	35.29	33.17	31.06	CALL
DK238MF-25	Molded Extension Cable, Mini DIN 8 Male/Female, 25.0ft (7.6m)	41.64	39.14	36.64	CALL

Economy Mini DIN Cables - Shielded, Molded, Fully Populated

These cables provide an economical choice suitable for many applications and are comparable with most cables on the market. Available with Mini DIN 6 or 8 position connectors. Construction features durable PVC mold, 28 AWG conductors and 360 degree foil shield. Color is gray.

Economy Mini DIN 6 Cables - Male to Male and Male to Female

CSMD6MM-3	Economy Molded Cable, Mini DIN 6 Male/Male, 3.0ft (0.9m)	6.20	5.83	5.46	CALL
CSMD6MM-6	Economy Molded Cable, Mini DIN 6 Male/Male, 6.0ft (1.8m)	7.54	7.09	6.64	CALL
CSMD6MM-10	Economy Molded Cable, Mini DIN 6 Male/Male, 10.0ft (3.0m)	9.90	9.31	8.71	CALL
CSMD6MM-25	Economy Molded Cable, Mini DIN 6 Male/Male, 25.0ft (7.6m)	15.66	14.72	13.78	CALL

CSMD6MF-3	Economy Molded Cable, Mini DIN 6 Male/Female, 3.0ft (0.9m)	8.18	7.69	7.20	CALL
CSMD6MF-6	Economy Molded Cable, Mini DIN 6 Male/Female, 6.0ft (1.8m)	7.22	6.79	6.35	CALL
CSMD6MF-10	Economy Molded Cable, Mini DIN 6 Male/Female, 10.0ft (3.0m)	8.46	7.95	7.44	CALL
CSMD6MF-25	Economy Molded Cable, Mini DIN 6 Male/Female, 25.0ft (7.6m)	15.66	14.72	13.78	CALL

Economy Mini DIN 8 Cables - Male to Male and Male to Female

CSMD8MM-3	Economy Molded Cable, Mini DIN 8 Male/Male, 3.0ft (0.9m)	7.50	7.05	6.60	CALL
CSMD8MM-6	Economy Molded Cable, Mini DIN 8 Male/Male, 6.0ft (1.8m)	9.45	8.88	8.32	CALL
CSMD8MM-10	Economy Molded Cable, Mini DIN 8 Male/Male, 10.0ft (3.0m)	11.75	11.04	10.34	CALL
CSMD8MM-25	Economy Molded Cable, Mini DIN 8 Male/Male, 25.0ft (7.6m)	21.38	20.10	18.81	CALL

CSMD8MF-3	Economy Molded Cable, Mini DIN 8 Male/Female, 3.0ft (0.9m)	7.90	7.43	6.95	CALL
CSMD8MF-6	Economy Molded Cable, Mini DIN 8 Male/Female, 6.0ft (1.8m)	9.75	9.16	8.58	CALL
CSMD8MF-10	Economy Molded Cable, Mini DIN 8 Male/Female, 10.0ft (3.0m)	11.26	10.58	9.91	CALL
CSMD8MF-25	Economy Molded Cable, Mini DIN 8 Male/Female, 25.0ft (7.6m)	21.38	20.10	18.81	CALL

DIN and Mini DIN Adapters and Connectors

These adapters are an L-com exclusive. Useful in many applications including S-video, computer mice, keyboards and instrumentation. A unique design permits easy mounting in standard size 0.5" (1.3cm) and 0.75" (1.9cm) circular or D shaped openings allowing the use of common punch tooling. Adapter bodies are machined from solid brass. Bright nickel plating provides corrosion resistance and a quality appearance. Gold plated contacts ensure reliable connections. Custom versions will be considered with modest minimums, please contact our sales group for assistance.

Item #	Description	1-9	10-24	25-99	100+
--------	-------------	-----	-------	-------	------

DIN and Mini DIN Feed-thru Adapters - Panel and Wall Plate Mountable

These exclusive adapters offer a unique design suitable for panel mounting DIN and Mini DIN adapters. Female-Female gender.

MD44FF	Feed-Thru Adapter, Mini DIN 4, Female/Female	10.49	9.65	8.81	CALL
MD66FF	Feed-Thru Adapter, Mini DIN 6, Female/Female	11.27	10.37	9.47	CALL
MD88FF	Feed-Thru Adapter, Mini DIN 8, Female/Female	11.74	10.80	9.86	CALL
DD55F	Feed-Thru Adapter, DIN 5, Female/Female	11.74	10.80	9.86	CALL

Mini DIN Bulkhead Jack to Flying Leads

Machined adapters utilize 4, 6 or 8 26 AWG color coded wires for chassis termination.

MD44FJF	Mini DIN 4 Bulkhead Jack/Leads, Front Mount	11.69	10.75	9.82	CALL
MD66FJF	Mini DIN 6 Bulkhead Jack/Leads, Front Mount	12.69	11.67	10.66	CALL
MD88FJF	Mini DIN 8 Bulkhead Jack/Leads, Front Mount	13.04	12.00	10.95	CALL
MD44FJR	Mini DIN 4 Bulkhead Jack/Leads, Rear Mount	11.69	10.75	9.82	CALL
MD66FJR	Mini DIN 6 Bulkhead Jack/Leads, Rear Mount	12.69	11.67	10.66	CALL
MD88FJR	Mini DIN 8 Bulkhead Jack/Leads, Rear Mount	13.04	12.00	10.95	CALL

Mini DIN Bulkhead Adapter Styles

Item #	Description	1-9	10-24	25-99	100+
--------	-------------	-----	-------	-------	------

Mini DIN 6 and 8 Gender Changers

DMB536F	Gender Changer, Mini DIN 6 Female/Female	8.09	7.60	7.12	CALL
DMB538F	Gender Changer, Mini DIN 8 Female/Female	9.59	9.01	8.44	CALL

Premium Mini DIN 6 Y Cable - Fully Populated - Double Shielded - Male to (2) Female

K23-MDY	Molded Y Cable, Mini DIN 6 Male/2 Mini DIN 6 Female, 1.25 ft (0.381m)	15.27	14.05	12.83	CALL
---------	---	-------	-------	-------	------

Mini DIN 4 - S-Video Jack for Field Termination

MD44FT	Mini DIN 4 Female Field Termination Jack	12.40	11.41	10.42	CALL
--------	--	-------	-------	-------	------

Tip Typical installation of an MD44FT field installable jack

STEP 1

Prepare coaxial lines.

STEP 2

Insert center conductors, shields and tighten set screws.

STEP 3

Secure cable with cable tie to connector.

STEP 4

Attach to faceplate and install.

Item #	Description	1-9	10-24	25-99	100+

Interface Modules - DIN Rail Mountable, with Shielded D-Sub and RJ45 Connectors

These DIN rail mountable interface modules feature a unique series of plated through holes that allow for the insertion of electronic components inline or across any circuit. Modules are available with shielded DB9, DB15, DB25 and DB37 female connectors. Also listed is a shielded RJ45 jack version. Terminal block connectors accept 26-12 AWG wire, are easily terminated and do not require crimp ferrules. Please inquire on any custom modifications required.

RBMIDB09F	Interface Module, DB9 Female	73.22	71.76	70.29	CALL
RBMIDB15F	Interface Module, DB15 Female	82.53	80.88	79.23	CALL
RBMIDB25F	Interface Module, DB25 Female	95.79	93.87	91.96	CALL

RBMIRJ45F	Interface Module, RJ45 Jack	66.59	65.26	63.93	CALL

IEEE-488 GPIB Tutorial

What are GPIB cables?

GPIB cables consist of 12 twisted pairs of copper wire and utilize a Centronics 24 style male/female connector.

How are GPIB cables used?

They are used in a bus or star architecture where the connectors "piggy back" each other and then connect primarily test and measurement equipment to PCs and other devices.

Where are GPIB cables used?

GPIB cables are typically used in test and measurement applications and are also used in DAQ (data acquisition) applications.

IEEE-488 Cabling Terms

Adapter: A device used to interconnect two different connector types.

American Wire Gauge (AWG): A U.S. standard set of non-ferrous wire conductor sizes. Typical data wiring is AWG number 24, 26 or 28. The higher the gauge number, the smaller the diameter and thinner the wire.

Backshell (Hood): A mechanical backing that is sometimes put onto a connector. The device protects the conductors and can be assembled or injection molded.

Bus: Also called a "Daisy Chain". A network topology where each node is connected to one another in line. A major disadvantage is that when there is a break in the bus the entire network goes down.

Cable: A set of insulated wires or conductors within an extruded jacket. Many types of cable utilize shielding around the wires and under the cable jacket.

Cable Assembly: A piece of cable that has been terminated with one or more connectors.

Conductor: A metal path, usually copper, that passes electricity. When discussing data cabling, "wire" and "conductor" are synonymous.

Connector: Electromechanical coupling device that provides an electrical interface that can be mated and unmated.

Contact: The specific points of contact within a connector. Contacts can be male (pins) or female (sockets).

Coupler: A device used to connect two similar connector types.

Crosstalk: The coupling of electromagnetic fields from conductors into adjacent conductors. Crosstalk is controlled by twisting the conductors into a pair or by separating/shielding conductors.

Electromagnetic Interference (EMI): Unwanted electromagnetic or electrical energy that causes unwanted responses in electronic equipment.

GPIB: General Purpose Interface Bus. Common name for IEEE-488.

HPIB: Hewlett Packard Interface Bus. Common name for IEEE-488.

IEEE-488: Institute of Electrical and Electronics Engineers interface standard number 488.

Injection Molding: The process used to inject molten polymer into a mold. Connector backshells are often injection molded.

Insulation: A material with very high resistivity used to protect conductors. Insulation is usually extruded over the wire or conductor after the drawing process.

Insulation Displacement Contact: A means of terminating wires without the need of stripping down to the bare wire.

Jack: The female receptacle - usually found on equipment.

Plug: Popular term for a male gender connector of varied types.

Shielding: A conductive foil or braid that covers insulated wires in a cable. The shield provides electrical grounding and protection from external electromagnetic interference (EMI). Shielding is also used to control internal electromagnetic radiation.

Strain Relief: A method of protecting the wire to contact point from flexing or pulling.

Twisted Pair: Two insulated conductors twisted at a fixed rate of twists per unit of length, typically used in balanced circuits where nominal impedance and crosstalk are critical characteristics.

Wire: Conductive material, typically copper, that has been drawn down to a specific size and coated with an insulating material. A "bare wire" utilizes no insulator coating.

In-Line/Linear Configuration

IEEE-488 Connector Specifications

The IEEE-488 GPIB connector utilizes 24 contacts in a parallel configuration.

Physical/Star Configuration

IEEE-488 Construction

- 24 conductors with twisted pairs
- Braid Shield with a minimum 85% coverage
- Centronics style 24 position male to female piggy back connectors allowing for easy daisy chaining
- Metric mating hardware, M3.5 x 0.6

L-com IEEE-488 Cable Assembly Options

L-com offers three different cable options to best satisfy customer needs and maximize value:

	MOLDED	DELUXE	PREMIUM
Backshell Detail	PVC molded backshell over internal steel shell enclosure	Die cast aluminum, nickel plated backshell	Die cast aluminum, nickel plated backshell
Connector Detail	Stamped steel, nickel plated connectors	Die cast alloy, nickel plated connectors	Die cast alloy, nickel plated connectors
Contact Plating	30 microinch (0.762μm) gold plated contacts	30 microinch (0.762μm) gold plated contacts	30 microinch (0.762μm) gold plated contacts
Cable Shielding	One braid and one foil/mylar overall shield	One braid and one foil/mylar overall shield plus one inner foil/mylar shield	One braid and one foil/mylar overall shield plus one inner braid and one inner foil/mylar shield

L-com is the Originator

L-com was the first to introduce molded, in-line, male only GPIB cables. Acceptance was immediate and soon users demanded upgraded models with metal connector shells and better cable shielding gradations. Now the female version has been added to complete the series.

We complied with your wishes and we're proud to offer the latest premium and deluxe versions of single ended cables listed as standard items.

We urge you to try this wiring concept and to discover the many real advantages.

Molded Cable Makeup CMB/CIM/CIMB/CMC/CMD Series

The Industry Standard

Hewlett Packard set the criteria in the design of optimum IEEE-488 GPIB cables with three shields, twisted pairs and metal shells, offering maximum performance.

L-com agreed with this need and developed a comparable cable type that we call the CIF Series. This family of IEEE-488 GPIB cables is directly interchangeable with HP, AMP and Amphenol.

The Deluxe Series is by far your best buy compared to any of the GPIB cables on the market today.

Deluxe Cable Makeup CIF Series

L-com offers the Most Value

A reminder that the difference in cost between good quality wiring components and the IEEE-488 cables offered by discounters is very little indeed. When you consider the total value of the equipment that will be tied into a system, the cost of cables, adapters and accessories becomes only a small part of the total investment.

In many applications, it is wise to use the premier cables on the market, L-com's Premium Series. Our cables and accessories are of the highest quality and our prices are realistic. We feel confident that if you compare Quality, Variety, Service and Price you will find that L-com definitely comes out on top on all counts.

Premium Cable Makeup CIB/CBC/CBD/CBX Series

L-com Molded Grade Cable Assemblies

Cables listed on this page utilize two shields and a fully molded backshell. They are the most economical choice and are the most common substitute to competitor models.

CMB24-M

CMC24-M

CMD24-M

Item #	Description	Connector Orientation	1-9	10-24	25-99	100+
--------	-------------	-----------------------	-----	-------	-------	------

Molded Grade IEEE-488 GPIB Cables - Double Shielded with Molded Backshells

L-com offers many IEEE-488 cable assembly options. The most economical choice uses double shielded cable that is adequate for many applications. Featuring all-molded connector ends which contribute to a long life expectancy and are impervious to breakage at the point where the cable enters the connector housing. A unique stamped steel internal enclosure provides 100% shielding and a robust strain relief. Considerable savings can be realized using this cable, particularly in volume applications.

The CMB Cable Series meets all standards of the IEEE-488 interface, conforms with normal mounting procedures and is directly compatible with HP, AMP and Amphenol.

CMB24-05M	Molded IEEE-488 Cable, 0.5m	Normal/Normal	78.94	77.36	74.20	CALL
CMB24-1M	Molded IEEE-488 Cable, 1.0m	Normal/Normal	82.79	81.13	77.82	CALL
CMB24-2M	Molded IEEE-488 Cable, 2.0m	Normal/Normal	92.16	90.32	86.63	CALL
CMB24-3M	Molded IEEE-488 Cable, 3.0m	Normal/Normal	102.53	100.48	96.38	CALL
CMB24-4M	Molded IEEE-488 Cable, 4.0m	Normal/Normal	113.07	110.81	106.29	CALL
CMB24-5M	Molded IEEE-488 Cable, 5.0m	Normal/Normal	122.62	120.17	115.26	CALL
CMB24-6M	Molded IEEE-488 Cable, 6.0m	Normal/Normal	132.17	129.53	124.24	CALL

Molded IEEE-488 GPIB Cables - Two Reverse Entry Connectors to Overcome Difficult Mounting

There are times when the use of a standard GPIB cable is not desirable because of obstructions from other nearby instruments, etc. In some cases it may be more advantageous to have the cable enter the connector housing from the opposite direction. An obvious advantage is when it is used as an extension cable.

CIM24-05M	Molded IEEE-488 Cable, 0.5m	Reverse/Reverse	83.35	78.35	73.35	CALL
CIM24-1M	Molded IEEE-488 Cable, 1.0m	Reverse/Reverse	87.46	82.21	76.96	CALL
CIM24-2M	Molded IEEE-488 Cable, 2.0m	Reverse/Reverse	98.21	92.32	86.42	CALL
CIM24-3M	Molded IEEE-488 Cable, 3.0m	Reverse/Reverse	108.24	101.75	95.25	CALL
CIM24-4M	Molded IEEE-488 Cable, 4.0m	Reverse/Reverse	118.14	111.05	103.96	CALL
CIM24-5M	Molded IEEE-488 Cable, 5.0m	Reverse/Reverse	128.16	120.47	112.78	CALL
CIM24-6M	Molded IEEE-488 Cable, 6.0m	Reverse/Reverse	138.18	129.89	121.60	CALL
CIM24-8M	Molded IEEE-488 Cable, 8.0m	Reverse/Reverse	152.02	142.90	133.78	CALL

Molded IEEE-488 GPIB Cables - With One Reverse Entry Connector to One Normal Entry

GPIB users realize the virtues of reverse entry and have asked us to provide half and half types. L-com offers GPIB cables that are useful for connecting rack equipment when GPIB receptacles do not orientate properly to allow shortest distance and an orderly appearance.

CIMB24-03M	Molded IEEE-488 Cable, 0.3m	Normal/Reverse	81.35	76.47	71.59	CALL
CIMB24-05M	Molded IEEE-488 Cable, 0.5m	Normal/Reverse	83.35	78.35	73.35	CALL
CIMB24-1M	Molded IEEE-488 Cable, 1.0m	Normal/Reverse	88.31	83.01	77.71	CALL

Molded CMC Series IEEE-488 GPIB Cables - Feature One Inline GPIB Male Termination

These molded GPIB cables are similar in construction and electrical specifications to our popular CMB24 series except that one end terminates to a straight male connector. This is sometimes preferred when there is no apparent need to have the exposed female end. It also eliminates the need for capping the exposed connector. Quite useful when the traditional right angle cable gets in the way of other cables such as in a computer back plane. Both ends of these cables utilize a stamped steel internal closure providing 100% shielding and a robust strain relief.

CMC24-05M	Molded IEEE-488 Cable, 0.5m	Normal/Inline	68.86	64.73	60.60	CALL
CMC24-1M	Molded IEEE-488 Cable, 1.0m	Normal/Inline	73.57	69.16	64.74	CALL
CMC24-2M	Molded IEEE-488 Cable, 2.0m	Normal/Inline	81.71	76.81	71.90	CALL
CMC24-3M	Molded IEEE-488 Cable, 3.0m	Normal/Inline	91.25	85.77	80.30	CALL
CMC24-4M	Molded IEEE-488 Cable, 4.0m	Normal/Inline	99.39	93.43	87.46	CALL
CMC24-5M	Molded IEEE-488 Cable, 5.0m	Normal/Inline	108.95	102.41	95.88	CALL
CMC24-10M	Molded IEEE-488 Cable, 10.0m	Normal/Inline	146.70	137.90	129.10	CALL

Molded CMD Series IEEE-488 GPIB Cables - Have Two Inline GPIB Male Terminations

We've gone one step further with these molded CMD series cables and equipped both ends of the cable with a molded single ended GPIB connector.

CMD24-05M	Molded IEEE-488 Cable, 0.5m	Inline/Inline	52.31	49.17	46.03	CALL
CMD24-1M	Molded IEEE-488 Cable, 1.0m	Inline/Inline	56.27	52.89	49.52	CALL
CMD24-2M	Molded IEEE-488 Cable, 2.0m	Inline/Inline	69.80	65.61	61.42	CALL

Tip The chart below will help you to find the connector orientation style that you need.

Normal Orientation

This is the standard for most GPIB cable assemblies

Reverse Orientation

Great for extending GPIB cable runs

Inline Orientation

Helpful for connecting to GPIB equipment

Item #	Description	Connector Orientation	1-9	10-24	25-99	100+
--------	-------------	-----------------------	-----	-------	-------	------

Deluxe Grade IEEE-488 GPIB Cables - Three Shields Plus Cast Aluminum Shells

Two foil shields plus one copper braid shield (over 90% coverage) provide low capacitance to maintain the IEEE specifications of these cables. Designed and built to handle your system's data rate, up to the 1 Mbyte/s IEEE maximum. All technical features found in our Premium CIB24 Series are incorporated in this series, the only exception is one less shield. This series is as good as, or better than, other name brand IEEE-488 cables on the market today. This is truly the best buy because you get industry standard features at realistic prices. No other IEEE-488 cables of this grade are available at a competitive price. The CIF24 Series IEEE-488 cables may be used to connect two compatible devices such as a personal computer and a plotter. They can be Daisy-Chained to several computer peripherals or may be used to integrate a system of programmable test instruments and control devices. Each end of every cable has a male/female connector and readily accepts a male terminated cable.

CIB24-M

CBC24-M

Premium Grade IEEE-488 GPIB Cables - 4 Shields, Aluminum Nickel Plated Shells

These cables have two copper braid shields coupled with two foil shields to work to reduce the amount of radiated emissions. This helps many systems to pass FCC Part 15, MIL-STD-461A, VDE 0871 and VDE 0875. All wires are twisted pairs to maintain a low capacitance within the 150 pF/m IEEE specification. Besides superior electrical characteristics, this cable has been designed to last a very long time. Care has been given to offer a cable with extreme flexibility that is equipped with a superior strain relief. This prevents the cable from coming apart when it is bent at a sharp angle, which has been a common fault with many IEEE-488 cables on the market today. Cast aluminum, nickel plated shells are used to prevent corrosion and have overlapping seams rather than being butt-jointed. One could hope for nothing else in the makeup of the best IEEE-488 cable. All this offered at a realistic price.

Premium Grade CBC24 Series IEEE-488 GPIB Cables - With One Inline GPIB Male Termination

This premium series has one conventional male-female connector. The other end terminates to a straight male-only connector, a feature sometimes preferred when there is no need to have a female end exposed. This cable is most useful when the dual-right angle connectors get in the way of other system cables and particularly in a computer back plane.

IEEE-488 GPIB Connector Specifications

The IEEE-488 GPIB connector utilizes 24 contacts in a parallel configuration.

PLUG (male)

JACK (female)

Item #	Description	Connector Orientation	1-9	10-24	25-99	100+
IEEE-488 GPIB Extender - This Handy Device Provides a One Inch Added Clearance						
Our GPIB extender is sometimes used to provide a one inch extension allowing right angle cables that extra margin to clear adjoining obstacles.						
CIB24X	IEEE-488 Extension Adapter, Male/Female	Normal	34.10	31.37	28.64	CALL

IEEE-488 GPIB Extender - With Modified Male Guard, Eliminates Thick Panel Interference

This unique extender has a modified male connector flange that is intentionally made shorter. This shorter flange prevents problems in applications requiring plugging into a receptacle that is mounted on a thick panel that interferes and will not allow the connector to seat properly.

CIB24XM	Modified IEEE-488 Extender, Male/Female	Normal	36.94	33.98	31.03	CALL
---------	---	--------	-------	-------	-------	------

IEEE-488 GPIB Slim-line Extenders - Provide One Inch Additional Clearance, Fits Narrow PC Ports

These handy, hard to find extenders are normally used to provide a one inch extension allowing right angle cables that extra margin to clear nearby obstacles. Special 0.73" (1.9cm) height allows for use with computers having narrow port openings.

CIB24XC	Slim-line IEEE-488 Extender, Male/Female	Normal	38.36	35.29	32.22	CALL
CIB24XCR	Reverse Entry IEEE-488 Slim-line Extender, Male/Female	Reverse	42.62	39.21	35.80	CALL

IEEE-488 GPIB Ultra Slim-line Extender - No Frills, Fully Shielded, Cast Body

There's a growing need for a slimmer IEEE-488 extender that will clear narrow PC port openings. The CIB24XE slimline extender fills that need with an overall width of 0.62 inches (1.6cm). Connectors are cast aluminum with nickel plating and shielding is maintained with copper foil.

CIB24XE	IEEE-488 Ultra Slim-line Extender-Cast, Male/Female	Normal	27.00	24.84	22.68	CALL
---------	---	--------	-------	-------	-------	------

IEEE-488 GPIB Socket/Connectors - Standard 24 Pin, Mates with all IEEE-488 Interfaces

These GPIB socket/connectors are ideal for production or replacement use and meet the highest quality standards. Contacts are gold plated for the best connectivity, mating hardware is plated with black oxide. All plastic materials are UL94V-0 flammability rated. Quantity pricing is available upon request.

CIB24MT2	Multi-Tap Bus Strip with 8 IEEE-488 Receptacles	129.15	127.86	126.57	CALL

Audio/Video Tutorial

What are Audio/Video products?

Audio/Video products consist of cables, adapters, converters and extenders which utilize various video and audio interfaces to transmit and receive video and/or audio signals.

How are Audio/Video products used?

The primary function of Audio/Video cables is the interconnection between a signal generating device such as a CPU (Central Processing Unit) and a display device such as a monitor.

Where are Audio/Video products used?

Audio/Video products are used in a wide variety of video and/or audio signal transmission applications found in homes, businesses, government, industrial, and military applications.

Common Audio/Video Interfaces

	HDMI (High Definition Multimedia Interface)	DP (DisplayPort)	DVI (Digital Video Interface)	SVGA (Super Video Graphics Array)
				
Standards Group	HDMI Licensing, LLC. (Consortium of consumer electronics manufacturers)	VESA (Video Electronics Standards Association)	DDWG (Digital Display Work Group)	VESA (Video Electronics Standards Association)
Maximum Channels	8	8	6 (Dual Link)	N/A
Maximum Resolution	HDTV 720P and 1080P	1080p	QXGA (2048 x 1536)	800 x 600
Analog/Digital Combination	No	No	DVI-I (24 + 4 Pin) Yes	No
Digital/Audio	Yes	Yes	No	No

DVI Connector Configuration Chart

Shown are a number of DVI connector interfaces that can be identified by the pin configurations. They include DVI-A (analog only), DVI-D (digital only) and DVI-I (analog and digital). In addition, single link and dual link configurations exist for both DVI-D and DVI-I. Shown are the major configurations illustrating the distinguishing features for each type of DVI interface.

ANALOG AND DIGITAL

DVI-I Single Link

Three rows of 6 pins and two contacts above and below the flat blade.

DVI-I Dual Link

Three rows of 8 pins and two contacts above and below the flat blade.

ANALOG ONLY

DVI-A

One row of 5 pins, one row of 3 pins and one row of 4 pins with two contacts above and below the flat blade.

DIGITAL ONLY

DVI-D Single Link

Three rows of 6 pins and no contacts above or below the flat blade.

DVI-D Dual Link

Three rows of 8 pins and no contacts above or below the flat blade.

Predictable Performance from L-com

As a member of both VESA and HDMI Licensing LLC., L-com ensures our audio/video products comply with the latest standards and undergo the required performance testing to provide our customers with best in class products. Our commitment to the highest quality components, manufacturing processes, and testing ensures predictable performance every time.

Competitors non-certified, low cost cable.
Blurred, ghosted image.

L-com certified and tested cable.
Clear, crisp image.

HDMI® Certification

HDMI Licensing, LLC. is the governing body that controls the HDMI standards and sets forth specific performance criteria for HDMI products. In order to manufacture and market HDMI products legally, a manufacturer must be an active member and their products must pass rigorous testing to ensure optimal performance. Since 2009, L-com has been a member of the HDMI Licensing group to guarantee our customers receive only the highest quality HDMI products.

VESA Member

The Video Electronic Standards Associations (VESA) supports and sets industry-wide interface standards for the PC, workstation, and consumer electronics industries. As a member of VESA, L-com builds and certifies its products to the standards VESA governs ensuring our customers receive quality interoperable solutions.

Premium High Speed HDMI® Male to Male Cable Assemblies - 30 Microinch (0.762µm) Gold Plated Contacts

L-com's HDCAMM series HDMI cables offer a cost effective way to support myriad HDMI applications. Each cable is functionally tested to ensure top performance and features rugged over mold connectors, PVC jackets, and double shielding which protects your A/V signals from EMI/RFI. Available in six standard off the shelf lengths, these cables are perfect for all your HDMI applications. As an HDMI adopter, L-com's HDMI cables are certified by HDMI Licensing LLC. Custom cable lengths are available upon request.

High Speed HDMI® Cable Assemblies

L-com's VHA00009 series HDMI cable products offer a very cost effective way to support myriad HDMI applications. As an HDMI Adopter, L-com's HDMI cables are certified by HDMI Licensing LLC. to perform to the latest HDMI specification. These HDMI cables support HDMI Ethernet Channel, Audio Return Channel, 3D over HDMI, 4K video, and additional color spaces.

HDMI® Male to Male Extended Length Active Cable Assemblies

HDMI active cable for use in applications where standard length cables are too short and you do not have the room for a bulky repeater box in the run. This cable does not require extra power and supports 1080p resolution. Active chipsets in the connector allow the signal to be boosted without a mid-cable repeater box, for use in situations for large room runs with tight spaces.

Tip HDMI armored cables explained

Same premium quality HDMI components used in L-com's HDCA cable assemblies. High performance HDMI with added benefit of extra durability. Great for applications where standard cables may be damaged due to excessive force.

Uses our Premium bulk cable including PVC cable jacket and braid/foil shield under the armor.

Tip What is Analog Video versus Digital Video?

Composite

Component

S-Video

Coax

VGA

DVI-A

DVI-I*

HDMI

DisplayPort

DVI-D

Both of these video formats can provide a great picture for your display, but there are some differences in how they work that are important to know. Analog signal is the older of the two formats, but is still very common today. This is the type of video that gets 'grainy' or 'fuzzy' as the signal strength weakens. Common formats include:

Composite, Component, S-Video, Coax, VGA, DVI-A, DVI-I*

Digital video is a newer format, but all new computers and televisions have a digital input. This signal, rather than the picture degrading if the signal weakens, will generally just cut out. Digital signals tend to provide a crisper, higher resolution picture than Analog. Common formats include: HDMI, DisplayPort, DVI-D, DVI-I*

One important thing to note is that these two signals are not directly compatible with each other. A cable with a HDMI connector on one end and a VGA on the other would not work, for example. An active conversion, usually provided by a small powered box, is required to convert an analog signal to a digital one.

*A DVI-I cable is capable of transmitting either analog or digital signal, but cannot convert the signal from one to the other.

Tip HDMI and DVI - Premium vs. Deluxe

L-com offers two levels of product to give our customers choices based on their cable assembly needs. The Premium offering is superior to industry standard cables. The Deluxe offering is comparable or slightly superior to industry standard cables depending on the quality and workmanship of the factory assembling them.

HDMI Deluxe

- Gold flash contact plating
- Nickel plated connector shell

HDMI Premium

- 30 microinch gold contact plating
- Gold flash plated connector shell

DVI Deluxe

- Gold flash contact plating
- 360° copper tape wrap under mold

DVI Premium

- 30 microinch gold contact plating
- Custom steel enclosure under mold

Tip What is a Panel Mount DVI?

If you know that you need to extend your DVI cable, but you are not sure if you want to mount it to your rack or not, Panel Mount DVI cables are a great solution. With two sets of hardware, you are able to either mate the female end inline, or mount it to a panel (Max thickness 0.063"). Flexibility is key with these cables, allowing you to have one set to fill multiple jobs.

Premium HDMI® to DVI-D Cable Assemblies - Fully Molded

High Definition Multimedia Interface (HDMI) is the latest interface for the connection of audio/video equipment. HDMI is fully backwards compatible with DVI video signals. This series of cable allows connection of the digital video signal from a DVI-D interface to a HDMI interface. Available in 5 standard lengths from 1 to 5 meters.

Premium Panel Mount DVI-D Dual Link Cable Assemblies

L-com's Premium Panel Mount DVI-D Dual Link cable assemblies provide a simple and cost effective method to pass a digital video signal through a panel, enclosure or wall plate. The female panel mount cable comes with cable mount and panel mount jackscrews, allowing a quick transition to an inline extension cable if needed. These cables include dual ferrite beads to reduce EMI/RFI and 30 microinch gold plated connectors for reduced signal loss.

Tip How do I distinguish between various DVI configurations?

Shown are a number of DVI connector interfaces that can be identified by the pin configurations. They include DVI-A (analog only), DVI-D (digital only) and DVI-I (analog and digital). In addition, single link and dual link configurations exist for both DVI-D and DVI-I. Shown are the major configurations illustrating the distinguishing features for each type of DVI interface.

ANALOG AND DIGITAL

DVI-I Single Link

Three rows of 6 pins and two contacts above and below the flat blade.

DVI-I Dual Link

Three rows of 8 pins and two contacts above and below the flat blade.

ANALOG ONLY

DVI-A

One row of 5 pins, one row of 3 pins and one row of 4 pins with two contacts above and below the flat blade.

DIGITAL ONLY

DVI-D Single Link

Three rows of 6 pins and no contacts above or below the flat blade.

DVI-D Dual Link

Three rows of 8 pins and no contacts above or below the flat blade.

Tip Defining 90° angled cable assemblies

Angled connector hoods help connect cables in tight places. L-com now offers four options each for HDMI and DVI style connectors. The photos below detail the connector position relative to the cable entry direction.

HDMI Style Connectors

For HDMI style connectors, the position of the connector's long side is key in determining the correct angle for your application.

DVI Style Connectors

For DVI style connectors, both Single Link and Dual Link types, the flat blade of the connector is key in determining the correct angle for your application.

DVI-D Angled Cable Assemblies

L-com's angled DVI cables are perfect for tight fit and confined space DVI applications. These rugged cable assemblies feature a standard, straight DVI connector on one end and an angled DVI connector on the other. Four angled options available for both Single Link and Dual Link. These right angle DVI cables are designed for use in enclosures, cabinets or other confined spaces where standard DVI connectors will not fit.

CVRDVI-F	DVI Dust Cover, Female, Pkg/10	7.05	6.77	6.49	CALL

Tip What is the difference between DVI Single Link and Dual Link?

DVI dual link, as the name implies, has more conductors than the DVI single link for transmitting signal. Single link DVI supports a maximum bandwidth of 165 MHz (1920 x 1080 at 60 Hz, 1280 x 1024 at 85 Hz) and utilizes 18 of the 24 available pins. Dual link DVI utilizes all 24 available pins and supports 2x 165 MHz maximum bandwidth (2048 x 1536 at 60 Hz, 1920 x 1080 at 85 Hz).

DVI Single Link

DVI Dual Link

Tip *DVI armored cables explained*

Uses our Premium bulk cable including PVC cable jacket and braid/foil shield under the armor.

Item #	Description	1-9	10-24	25-99	100+
--------	-------------	-----	-------	-------	------

Metal Armored DVI-D Cable Assemblies

These cables feature a stainless steel crush resistant jacket over our premium DVI cable to provide protection in applications where standard cables would be damaged due to excessive force. Crush resistance is 1500 PSI (Pounds per Square Inch). Additional features include rugged over mold connectors, 30 microinch (0.762µm) gold plated contacts and double shielding which protects your A/V signals from EMI/RFI.

DVI to DisplayPort LSZH Cable Assemblies

The DVI to DP cable is a cost-effective solution to send video signal from an existing source device to a projector or monitor, without the expense of upgrading to a new monitor. The cable offers high quality construction and supports high bandwidth video resolutions up to 1920x1200 or HDTV resolutions up to 1080p. An ideal component for solutions in auditoriums, conference rooms, or other applications. Features low smoke zero halogen cable jacketing.

EVC Cable Assemblies P&D Male to Male

This series of EVC cable assemblies complies with the Video Electronics Standards Association (VESA) requirements for advanced high bandwidth, high resolution monitors. The P&D interface is capable of carrying both analog and digital video signals. Fully molded backshells produce a durable assembly. Optimum video signal quality is achieved by the use of six 75 Ohm coaxial cables to carry the video signal.

--------	-------------	-----	-------	-------	------

DisplayPort High Definition Audio/Video Cables

L-com's DisplayPort cables offer a single cable solution providing high definition digital audio and video for computing displays, graphic cards and laptops. DisplayPort replaces DVI and VGA cables and is the new digital display standard for PC computing. It is the HDMI equivalent for computers and provides a simple and easy connection for both high definition digital audio and video.

DPCAMM-0.5	DisplayPort Cable Assembly, Male/Male, 0.5m	27.74	26.08	24.41	CALL
DPCAMM-1	DisplayPort Cable Assembly, Male/Male, 1.0m	29.51	27.74	25.97	CALL

DPCAMM-3	DisplayPort Cable Assembly, Male/Male, 3.0m	39.31	36.95	34.59	CALL

Low Profile DisplayPort High Definition Audio/Video Cables

This cable family is identical to our popular DPCAMM DisplayPort cables except it uses a shorter backshell. The shorter backshell allows these cables to fit in a tighter space without compromising performance. L-com's DisplayPort cable offering provides a single cable solution for high definition digital audio and video for computing displays, graphic cards, and laptops. Seven lengths to choose from ranging from 0.5 to 15 meters.

DPCAMMSB-3	DisplayPort Short Body Cable Assembly, Male/Male, 3.0m	34.77	32.68	30.60	CALL

Low Smoke Zero Halogen DisplayPort High Definition Audio/Video Cables

This cable family is identical to our popular DPCAMM DisplayPort cables except it uses Low Smoke Zero Halogen (LSZH) jacketed cable. LSZH cable reduces the amount of toxic and corrosive gases emitted during combustion. Typically used in poorly ventilated areas, low smoke zero halogen is very popular with military contractors and anywhere the protection of people and equipment from toxic and corrosive gases is critical.

Premium Grade Gray SVGA Cables - HD15M to HD15M or HD15M to HD15F with Coaxial Inners

These premium cables mate with high resolution color monitors and workstations with HD15 D-Sub connectors. High efficiency coaxial wiring is featured to support critical color lines. All molded construction, fully shielded throughout. OEM quantity pricing and special lengths upon request. Color is gray.

Standard Grade Black SVGA Cable Assemblies - HD15M to HD15M or HD15M to HD15F

L-com's new competitively priced standard grade SVGA cables feature three 75 Ohm coaxial cables to assure high quality video signal transmission. Fully molded backshells provide durability and long life expectancy. These rugged RoHS compliant assemblies are available in standard off the shelf lengths from 3 to 50 feet (0.9 to 15.2m).

45 Degree VGA Cable Assemblies

These premium 45 degree VGA extension cables feature three 75 Ohm coaxial cables to assure high quality video signal transmission. The fully molded backshells of the HD15 connectors provide a very durable assembly. In addition the 45° HD15F connector accommodates difficult installation situations. Available in 3, 5 and 10 ft lengths.

Super Thin SVGA is Ideal for Tight Fitting Spaces

The Super Thin SVGA series offers comparable performance of standard size SVGA assemblies in a more compact size. Not only is the cable diameter greatly reduced, but the depth of the HD15 backshell is also more shallow than backshells found on most SVGA assemblies. This results in a cable assembly that can be used in tight confines where a standard size SVGA assembly would be difficult if not impossible to use.

Another feature of this series is reversible hardware allowing either panel mount using standoffs or traditional thumbscrews. The combined results of these features is a product series that is both compact and versatile. These features can be utilized to solve many difficult installation problems without sacrificing performance.

The Super Thin small profile construction is also utilized on our SVGA with disconnect series and our low profile KVM cables.

Note: All dimensions are for reference only.

Reversible Hardware

Detail of female end being panel mounted using standoffs

Detail of male end being mounted using thumbscrews

Super Thin SVGA Cables with 3 Mini Coaxial Lines - HD15M to HD15M or HD15M to HD15F

Utilize a revolutionary cable made with 3 ultra thin coaxial lines and still measures .205" (0.52cm) in diameter. Another unique feature is user defined mounting hardware. Each cable end is capable of being connected with either male jack screws or hex standoffs with the supplied hardware.

LSZH Jacket Super Thin SVGA Cables - HD15M to HD15M or HD15M to HD15F Cable Assembly

This series of SVGA cables features both our small diameter Super Thin cable and our LSZH jacket for applications where low smoke is critical. An additional feature of this series is our reversible hardware allowing both panel mount using standoffs or traditional thumbscrews. High quality video signal transmission is assured as a result of the three 75 Ohm coaxial lines used in these premium SVGA assemblies. The low profile configuration of our fully molded HD15 backshell makes these assemblies ideal for tight fit installations. Available in 5 standard lengths from 5 to 50 feet (1.5 to 15.2m).

Tip Use the CTLB series cable for running through 3/4" (1.9cm) conduit

STEP 1

Feed socket end through conduit (3/4" min. dia.) into destination outlet.

STEP 2

Slip shrinkable tubing onto cable, mate the breakout connector matching alignment arrows and secure.

STEP 3

Attach pre-terminated HD15 connector to faceplate and attach to outlet.

SVGA Cables with Low Profile Disconnect Feature - HD15 Male to HD15 Male or HD15 Female

Now there is a solution to your difficult installation problems. A fully populated DDC compliant assembly with HD15 male/male or male/female connectors utilizing our Super Thin cable, reversible hardware plus a low profile break connector. The low profile break connector's small size (.75" wide /1.9cm) allows routing through .75" (1.9cm) conduit and through tight spaces that would not accommodate the size of a HD15 connector. Color is black.

Tip When do you use Plenum Cable?

In building construction, the space used for air circulation (heating and air conditioning) is called the plenum. This space is also commonly used to route communications cable. This poses a serious hazard in the event of fire due to lack of barriers to contain the smoke and flames. This is why various fire codes and the National Electrical Code (NEC) require the use of fire resistant and low smoke producing cable in these areas. This type of cable is called plenum cable which is made with a fire retardant compound that exhibits self extinguishing characteristics.

Tip What is S-Video (S-VHS)?

The term S-Video is derived from the way the video signal is transmitted. In S-Video the signal is separated into two components hence the term Separate Video or S-Video. Two 75 Ohm coaxial cables and a Mini DIN 4 connector are utilized to transmit the two component signals. One of the coaxial cables carries the Luminance Signal (brightness or Y component) while the second 75 Ohm coaxial cable carries the Chrominance Signal (color or C component). By separating the video signal into two components a better quality picture is produced than composite video that utilizes one coaxial cable to transmit both signals. The term S-VHS is an acronym for Super-Video Home System.

Tip Video signal transmission

Video images are transmitted across cables in a variety of ways. From a single coaxial cable (even non coaxial cable in some cases) to the use of as many as 5 coaxial lines to transmit the video image. Basically, the more the video signal is broken down by the use of more transmission lines into individual components, the better the video image. The following is a progressive list on commonly used video signal transmission methods:

Red, Green, Blue (RGB): This method uses 3 to 5 coaxial lines with BNC style connectors or HD15 interface. The video signal is split into three primary colors, Red, Green, Blue with separate lines often used for control signals. This method produces an extremely high quality video image.

Component: Three coaxial lines are used in this method with RCA style connectors. Black and White information is carried on one coaxial line while color differential signals are carried on the two remaining coaxial lines. This method produces a very high quality video image.

S-Video (SVHS): This method utilizes two coaxial lines contained within one outer jacket with a Mini DIN 4 circular connector. One coaxial line carries the Black and White information; the second coaxial line carries all the color information. This produces a high quality video image.

Composite: A single coaxial line with an RCA connector carries both the Black and White as well as the color signal. This method produces a relatively good quality video image.

RF Video: A single coaxial line with a Type F connector. It produces the lowest quality video image of all the interface types.

Premium Grade Black or Gray SVGA Breakout Cables - HD15M to 5 BNC Plugs

This is our best quality VGA cable. It makes use of the most comprehensive shielding to minimize the amount of RF radiation that may escape through the cable. Five 75 Ohm miniature coaxials have a durable double shield composed of aluminum mylar and a copper braid; and another double shield composed of aluminum mylar and copper braid over the 5 coaxials. The connector shell has a full metal shell which is fully over-molded. There is just no better VGA cable made. Color is black or gray. **Note:** HD15 connections: pin #1 red, 2 green, 3 blue, 13 horizontal, 14 vertical. All shields terminate to pins 5 thru 10. No connection pins 4, 9, 11, 12 and 15.

Premium 3 Line Coaxial Cable with BNC Plugs

These extraordinary low loss coaxials are particularly suitable for transmission of RGB signals over extended distances without worry of signal deterioration or crosstalk. Each individual Simline coaxial has a 75 Ohm impedance and a full shield coverage comprised of a copper braid and mylar shield. Coaxial colors are red, green and blue. Outer appearance is black including molded strain reliefs.

RG59A/U - 75 Ohm Coaxial Cables with Inline Molded BNC and RCA Plugs					
L-com offers a wide variety of RG59A/U cable assemblies utilizing BNC and RCA connectors. RG59A/U cable is one of the most commonly used 75 Ohm cables. In addition to inline configurations L-com offers right angle and female bulkheads. All connectors feature a molded strain relief while the Type F connector features a captivated gold plated center pin for enhanced performance. The stranded center conductor of the RG59A/U cable provides maximum flexibility.

Thinline 75 Ohm (.11"/2.8mm Dia.) Coaxial Cable Assemblies with Two Inline BNC Plugs

Substitute our smaller diameter, more flexible, lighter weight thinline cable assemblies for your traditional 75 Ohm cable assemblies. This coaxial cable features a spiral tinned copper shield and a proprietary air foamed dielectric.

RG6/U Quad Shielded - 75 Ohm Coaxial Cable Assemblies with Two Inline Type F Plugs

This series features premium grade RG6 cable with four layers of shielding for enhanced performance coupled with our BAC529 weather resistant Type F male connectors. These Type F connectors utilize both silicone sealant as well as an internal O-ring to achieve performance suitable for both indoor and outdoor applications.

RG6/U Plenum - 75 Ohm Coaxial Cable Assemblies with Inline BNC Plugs

This series offers the commonly used RG6 cable sizes with a plenum jacket for applications that require this level of fire retardation and low smoke attributes. Offered with BNC male connectors in eight convenient lengths. Custom lengths available with modest minimums.

Premium 3.5mm (1/8") 3 Conductor Cables for Microphone, Speaker and other Applications

These low loss premium 3.5mm cable assemblies offer superior performance when compared to similar commercial counterparts. Connectors are gold plated reducing corrosion while maintaining reliable contact. 22 AWG conductors and double shield provide minimum loss even at long lengths.

Super Thin 3.5mm Cables

L-com's CTL35MMT-XX series of high quality stereo cable assemblies produces distortion free audio transmission. Features include gold plated center contacts to minimize signal loss as well as fully molded strain relief for enhanced durability and long life. These super thin 3.5mm cables feature an outside diameter (OD) of only 3.5mm. Available in 7 standard lengths from 3 to 100 feet, custom lengths are also available.

ThinLine 3.5mm 4 Circuit TRRS

L-com's CTL354MM-XX series of high quality stereo audio/video cable assemblies produces distortion free audio and video transmissions. The cables are commonly used on Apple's iPod and iPhone products and work with other TRRS audio/video applications as well. Features include gold plated center contacts to minimize signal loss as well as fully molded strain relief for enhanced durability and long life. These super thin TRRS cables feature an outside diameter (OD) of only 3.5mm. Available in 8 standard lengths from 3 to 100 feet, custom lengths are also available.

Coiled 3.5mm Cables

L-com's line of coiled 3.5mm cables are perfect for variable reach application where access to a 3.5mm jacks can fluctuate. These rugged coiled 3.5mm cables feature black polyurethane jackets which stand up to UV and chemical exposure. The CTL35MMC-XX series cables from L-com can be used in myriad applications where length variation and mobility are required such as medical, industrial, and manufacturing scenarios.

3.5mm Audio Bulkhead Coupler

L-com's 3.5mm audio bulkhead coupler offers a practical and economical way to feed audio cables through panels, wall plates and enclosures. The .50" D-hole design and lock washer ensure a secure fit. This versatile coupler is also available pre-mounted on L-com's USP2-35MM and USP4-35MM two port and four port Universal Sub Panels.

HD15 Low Profile Right Angle Adapters - Molded and Fully Shielded

Connecting cables in tight spaces can be a problem in many applications. These low profile adapters solve this problem by allowing cables to be connected at a 90 degree angle. Two versions are available to allow cables to exit in opposite directions. Adapters are male to female, fully shielded and are overmolded with Gray PVC. Mating hardware is reversible allowing for use in virtually any application.

Field Installation Products

Often times the use of finished cable assemblies is simply not possible due to space limitations of an existing installation. In these cases, L-com's offering of field friendly products are the perfect solution. Our terminal block connectors allow termination of data, audio, and video lines without the use of any special tools. These products were designed to address existing infrastructure applications where space is limited and running new cable is not an option.

Tip

How to perform a field installation of a DGBH15FT HD15 (SVGA) jack

STEP 1

Prepare bulk cable by exposing coax and conductor lines as shown.

STEP 2

Insert coax center conductor and shield as well as conductors into appropriate terminal slot as indicated in the supplied wiring diagram. Tighten the setscrews.

STEP 3

Attach the completed assembly to the mounting surface.

Pro Audio 1/4" (0.6cm) to 1/4" (0.6cm) Male TS Cable Assemblies

L-com offers an extensive line of TS (Tip and Sleeve) 1/4" (0.6cm) audio cables for use in professional audio applications including instrument connections and audio patching. Our quality constructed TS cables feature 22 AWG cable and are offered with myriad color code choices to help in identifying attached equipment. Contact us today with your custom length and connector requirements.

B **G** **R** **Y** ***--**

Ordering is easy, add desired color code to part number. Ex: CA14214B-1. *Note: No suffix necessary for Black assemblies.

Tip *Balanced Audio vs. Unbalanced Audio*

Balanced Audio uses impedance balanced lines to interconnect audio equipment. Balanced connections use three conductor connectors. Most common in professional settings is the XLR connector. It is also sometimes referred to as a "cannon plug" or "cannon connector". Also used for this application are TRS Plugs. They derive their name from the different functions of the sections of the plug. Tip, Ring and Sleeve. (see diagram). They are also often referred to as .25" (6.3mm) 3 channel audio phone plugs. Their appearance is similar to the .25" (6.3mm) stereo plugs used for head phones, even though the two different applications utilize them differently. The durable construction of the XLR makes it ideal for microphones. Most, if not all, high end microphones make use of this interface. In contrast the TRS smaller form factor makes it ideal for mixer inputs/outputs allowing for greater port density.

Balanced Audio Connectors are typically Low Impedance Interfaces. By connecting the balanced lines to identical impedances at both source and load, it allows any differential amplifier to filter out any EMI (Electro-Magnetic-Interference) that the cable may have picked up or generated along the two signal lines.

Unbalanced Audio in contrast uses a two conductor system whereby the shield must carry the return signal. Often used for this application are TS Plugs. Similar in appearance to their TRS siblings, these plugs derive their name similarly. Tip and Sleeve. (see diagram). Noise that is induced onto an Unbalanced line will typically be modulated onto the signal being carried, whereas Balanced lines would not experience this issue. Ground loops are another issue to contend with Unbalanced lines. Unbalanced Audio Connectors are typically high impedance interfaces. Unbalanced Audio is typical for most home audio equipment. Unbalanced Signals can be converted to Balanced signals by the use of a Balun (Balanced/Unbalanced) adapter typically run through a DI (Direct Input) box.

L-com HDMI® Splitter 1x2 - 3D Ready, HDCP Compliant

Easily split your HDMI signal with L-com's 3D ready HDMI splitters. These plug and play HDMI splitters set up in seconds and are perfect for home or professional use. Features include HDCP compliant hardware, 1080/60p resolutions and 3D support.

HD-SP-102	L-com HDMI Splitter, 1x2, 3D Ready, HDCP Compliant	111.70
-----------	--	--------

Tripplite HDMI® Splitter 1x4 – 3D Ready, HDCP Compliant

The Tripplite 4 Port HDMI Splitter provides a simple solution to transmit from a source up to 4 displays. The splitter can be located 13 feet (4m) away from the source, and the display 16 feet (5m) from the splitter. There is no software to set up, and this display will support 1080p, 1920x1200 resolutions. **As an authorized Tripplite reseller, we can bid on RFQs for any Tripplite parts. Contact us to request a non-obligatory quote.**

TL-B118-004	Tripplite 4-Port HDMI Splitter for Video & Audio 1080p	149.01
-------------	--	--------

L-com HDMI® Switches 2x1 or 4x1 - 3D Ready, HDCP Compliant

Easily switch your HDMI signal with L-com's 3D ready HDMI switches. These plug and play HDMI switches set up in seconds and are perfect for home or professional use. Features include HDCP compliant hardware, 1080/24p resolutions and 3D support.

HD-SW-201	L-com HDMI Switch, 2x1, 3D Ready, HDCP Compliant	81.90
HD-SW-401	L-com HDMI Switch, 4x1, 3D Ready, HDCP Compliant	115.43

L-com HDMI® Active Extender (TX & RX Units) Extends your Video over Cat5e (or Better) Cabling up to 150 feet (45.7m) HDCP Compliant

L-com's HD-EXT-HSL HDMI extender extends HDMI signal over 24 AWG solid Cat5e (or better) cabling up to 150 feet (45.7m). This active HDMI extender features a TX and RX unit distance up to 150 feet (45.7m) at Blu-ray 1080/60p. Features include HDCP support, adjustable 8-level EQ control and 7.1-channel surround sound audio.

HD-EXT-HSL	L-com Active HDMI over UTP Extender, 150ft (45.7m)	223.44

Tripplite DVI Splitter with 3.5mm Audio 1x2 and 1x4 (Max Resolution 1920x1200)

Tripplite's 2 and 4 port DVI and 3.5mm Audio Splitters provide an easy way to add additional displays and sound to your display source. A built in signal booster provides an additional 16 feet (5m) of distance between the splitter and the display, and will also allow 3 levels of splitters to be cascaded, allowing for a large number of monitors to be connected. **As an authorized Tripplite reseller, we can bid on RFQs for any Tripplite parts. Contact us to request a non-obligatory quote.**

TL-B116-002A	Tripplite 2-Port DVI Splitter with 3.5mm Audio (Max Resolution 1920 X 1200)	118.77
TL-B116-004A	Tripplite 4-Port DVI Splitter with 3.5mm Audio (Max Resolution 1920 X 1200)	213.79

DVI-D Single Link UTP Extender

This simple extender will provide up to 100 feet (1024x768) or 50 feet (1920x1080) of additional distance for a DVI-D Single Link connection via Category 5e UTP cable or better. No external power is required, just connect the cables and the DVI connection is ready.

R05-EXT-DSS	UTP DVI-D Single Link Extender	50.02
-------------	--------------------------------	-------

Tripplite DisplayPort Splitter 1x2 (Max Resolution 3840x2160)

The Tripplite 2 Port DisplayPort Splitter is a great tool for setting up a dual display for a source with only one video output. This splitter will allow you to either run it in clone/mirror mode, or to extend your desktop over both displays. The displays can be placed up to 25 feet away from the splitter, and the splitter up to 16 feet away from the source, although 6 feet is recommended for best performance. **As an authorized Tripplite reseller, we can bid on RFQs for any Tripplite parts. Contact us to request a non-obligatory quote.**

TL-B156-002	Tripplite 2-Port DisplayPort Splitter (Max Resolution 3840 x 2160)	296.93
-------------	--	--------

L-com VGA Video Splitters 1x2 and 1x4 (Max Resolution 1920x1440)

L-com's LCVS series of VGA video splitters are perfect for distributing VGA video signals from one source to multiple displays. These plug and play video splitters can be installed in seconds and provide crisp, clear images. Perfect for Digital Signage and Pro A/V applications, these robust yet affordable VGA splitters feature rugged metal cases as well as external power supplies (included). Signal bandwidth to 350 MHz (2 and 4 port), (Max Resolution 1920 x 1440).

LCVS-12	L-com 1x2 VGA Video Splitter	44.77
LCVS-14	L-com 1x4 VGA Video Splitter	57.90

L-com VGA Splitter/Extender (TX & RX Units) Extends your Video over Cat5e (or Better) Cabling up to 150 Meters (492ft)

L-com's LCVX-VGA VGA Extender is perfect for Digital Signage and PRO A/V applications where the extension of analog computer video is necessary. The LCVX-VGA features both TX (Transmit) and RX (Receiver) units, each with its own power supply. The TX unit has an HD15F VGA in port that would connect to your video source with a standard VGA M/F cable. It also includes two local HD15F outputs to support two local monitors with standard VGA M/M cabling. Using Cat5e (or better) cabling you can also extend your video to the RX unit up to 150 meters (492ft) away, (24 AWG solid cabling recommended for runs over 100ft). The RX unit takes the video received over the Cat5e (or better) cabling and provides two HD15F outputs to support two monitors with standard VGA M/M cabling. The LCVX-VGA is capable of supporting resolutions of up to 1280x1024 at 150 meters (492ft).

AdderLink AV100 Series Audio/Video Extenders		
The AdderLink AV100 Series is a range of audio visual extenders delivering high video resolutions and superb quality audio up to 300m (1,000ft) using standard Cat5e (or better) cables. Designed for use in Digital Signage applications, the innovative design allows for flexible distribution that can grow in line with project developments and ensures direct delivery of crystal clear communication to consumers at the point of decision. The AdderLink AV Series avoids the prohibitive costs of fiber optic cabling, displays with built in CPUs or locating a CPU next to each screen. The AdderLink AV Series consists of 4 interchangeable units. As an authorized Adder reseller, we can bid on RFQs for any Adder part numbers. Contact us to request a non-obligatory quote.

AdderLink LPV150 Series Digital Signage Extenders

The AdderLink LPV has been designed to deliver stunning results at a really attractive price, making it the perfect introduction to professional digital signage. The AdderLink LPV Digital Signage Extender is possibly the easiest to install point to point extender available today. In addition to its simplicity the LPV Extender also delivers fantastic quality video up to 150 meters (500ft) away. The ALPV154T is able to take the same HD input and split it to 4 different screens connected via the ALPV150R receivers. There is a feed through port on the unit to allow a local display or you can cascade another ALAV154T so you can supply 8 screens. **As an authorized Adder reseller, we can bid on RFQs for any Adder part numbers. AdderLink Infinity Network DVI Extenders

The AdderLink INFINITY demonstrates Adder's leading IP capability by delivering fluid interaction with computers as far away as your network can extend. AdderLink INFINITY allows you to build a flexible infrastructure, the likes of which have not been possible before. Locate computers anywhere you like, share connections to computers, watch the interactions others have with computers, share control, collaborate, switch computers and so on. The AdderLink INFINITY is also the first device of its kind to allow multicasting across your network. Adder's expertise in IP based KVM solutions also means that you get the very best video quality and fluid USB based interactions with your computer. Adder's own USB True Emulation technology has also been built into the AdderLink INFINITY, allowing you to connect all HID (Human Interface Devices) as well as storage devices and many other USB device types too. Optimized for both HID and Mass Storage devices, the AdderLink INFINITY uses USB 2.0 technology to deliver reliable and flexible device support. **As an authorized Adder reseller, we can bid on RFQs for any Adder part numbers. CS84U	Aten Desktop 4-Port PS/2-USB KVM Switch	122.96

AdderView Pro VGA, DVI and DisplayPort 4 and 8 Port KVM Switches

The AdderView Pro series are professional grade KVM switches which deliver ultimate flexibility for users who wish to share a high resolution screen(s) and modern USB peripherals between multiple computers. The AV4PRO-VGA is designed to enable up to four computers to be controlled from a single high resolution KVM console using HD15 VGA cabling. The AV4PRO-DVI-xx group is designed to enable four to eight computers to be controlled from a single high resolution KVM console using dual link DVI cabling. The AV4PRO-DP is designed to enable up to four computers to be controlled from a single high resolution KVM console using the new DisplayPort cabling system. The switches makes use of Adder's True Emulation technology which enables USB HID devices to be continuously emulated to each computer. This unique technology enables instantaneous and reliable hotkey switching while also supporting the extra keys and features of enhanced keyboards and mice. Furthermore, the AdderView includes two independently switchable USB 2.0 channels and an audio channel, giving the user the flexibility to attach selected peripherals to different computers. **As an authorized Adder reseller, we can bid on RFQs for any Adder part numbers. Contact us to request a non-obligatory quote.**

AdderLink X2 KVM Extenders with Local Console, Extends KVM over Cat5e (or Better) Cabling up to 1,000 Feet (300m)		
The AdderLink X2 range of KVM Extenders use the latest technology to deliver perfect video pictures at high resolutions over long distances. Using Cat5e (or better) Cable, the X2 enables you to extend KVM signals up to 300m (1,000 feet). X2s are fitted with a range of advanced features that Adder has developed and enhanced over many years of building robust KVM extenders. Flash upgradeable firmware ensures that the latest upgrades and product enhancements can be readily supported via simple downloads. Great attention has also been paid to the quality of the audio signals to avoid the annoying clicks found on some other KVM extension products. The X2-Gold supports high fidelity bi-directional stereo audio and audio signals are transmitted digitally using 16 bit, 44.1kHz sampling to ensure a low noise level. As an authorized Adder reseller, we can bid on RFQs for any Adder part numbers. Contact us to request a non-obligatory quote.

AdderLink ipeps KVM over IP

For Enterprise KVM solutions the AdderLink ipeps (IP Engine per Server) provides a non-blocking global solution by providing each computer with a dedicated KVM-via-IP engine. This can be enhanced by using the ADDER.NET Enterprise Management Software that provides a centralized and secure user access management interface. Where a KVM switch exists without KVM-over-IP functionality, the AdderLink ipeps is ideal for adding global management capabilities. Increasing numbers of computers are being used in remote, stand alone applications such as ATMs and digital signage play out devices. The incredibly small size of the AdderLink ipeps makes it perfect for remote management and control of dispersed computers, meaning that many tasks that would have required an expensive site visit can now be done from anywhere. **As an authorized Adder reseller, we can bid on RFQs for any Adder part numbers. Contact us to request a non-obligatory quote.**

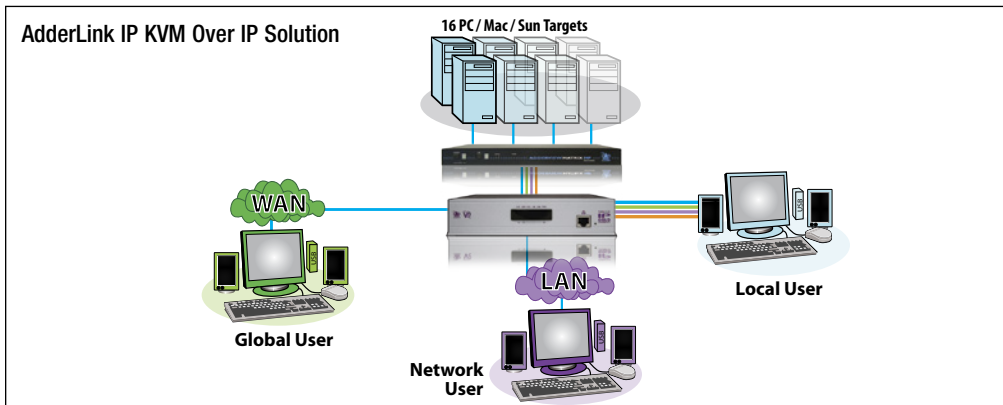

AL-IPEPS	AdderLink ipeps KVM over IP	547.20
AL-IPEPS-DA	AdderLink ipeps KVM over IP (with Local Access)	696.69

AdderLink IP KVM over IP

Manage your computers from anywhere in the world with the high-performance AdderLink IP. The AdderLink IP only requires a KVM (keyboard, video, mouse) connection to your computer or KVM switch and doesn't need any custom software to be loaded on your servers. The AdderLink IP is fully compatible with VNC (Virtual Network Computing) and Java based web browsers and doesn't require the purchase of extra software "seat" licenses. Features video modes up to 1280 x 1024 x 75Hz, video captured at 24 bits per pixel, adaptive color depth to match link speed and security features including AES 128 encryption, RSA 2048 authentication, auto logout after selectable inactive period and IP address restriction. Ships with KVM cable, universal power supply and installation CD. Rack mounting kits sold separately. Covered by a 2 year manufacturer's warranty. **As an authorized Adder reseller, we can bid on RFQs for any Adder part numbers. Contact us to request a non-obligatory quote.**

Coaxial Cabling Tutorial

What is Coaxial Cabling?

A coaxial cable is a two conductor electrical cable consisting of a center conductor and an outer conductor with an insulating spacer between the two.

Coaxial Cabling Terms

Attenuation (Insertion Loss): Loss of power. Attenuation is usually measured in dB loss per length of cable (ex. 31.0 dB/100ft.). Attenuation increases as frequency increases.

Bend Radius: The amount of radius a cable can bend without any adverse effects.

Center Conductor: The solid or stranded wire in the middle of the coaxial cable. The conductor diameter is measured by the American Wire Gauge (AWG).

Coaxial Adapter: A device used to change one connector type to another or one gender to another (ex. BNC to SMA Adapter).

Coaxial Cable: A two conductor cylindrical transmission line typically comprised of a center conductor, an insulating dielectric material and an outer conductor (shielding). Coaxial cable can be flexible (typical to the assemblies found in this catalog), semi-rigid or rigid in nature.

Coaxial Connector: The interconnection device found at each end of a coaxial cable assembly. There are many common types of coaxial connectors such as: BNC, SMA, SMB, Type F, etc.

Dielectric: The insulating material that separates the center conductor and shielding.

Electromagnetic Interference (EMI): Electrical or electromagnetic energy that disrupts electrical signals.

How is Coaxial Cabling used?

Primarily, coaxial cables are used for the transmission of Radio Frequency energy. The system offers tight control over electrical impedance. This yields excellent performance at high frequencies and superior EMI control/shielding.

Frequency: Number of times a periodic action occurs in one second. Measured in Hertz.

Impedance: The opposition to the flow of alternating or varying current. Measured in Ohms. Two common impedance values are 50 Ohms used primarily for data and 75 Ohms used to transmit video signals.

Insertion Loss: A measurement of attenuation determined by the system output before and after the connection of a cable and/or device.

Jack: The female connector usually containing a center socket.

Microwave Frequencies: Microwave frequencies range from Ultra-High Frequency (UHF) .3-3 GHz, Super High Frequency (SHF) 3-30 GHz to Extremely High Frequency (EHF) 30-300 GHz.

MIL-C-17: MIL-C-17 is a specification document that has been used since the 1940s to standardize the physical and electrical characteristics of coaxial cables. There is no longer any control of RG specifications so cables may perform differently than the cables that adhere to MIL-C-17.

Plug: The male connector usually containing a center pin.

RF (Radio Frequency): A frequency band from 3 MHz to 300 GHz. Primarily used for transmission of radio and television signals.

RG/U: A designation that originated with a US Government specification. No longer in effect.

Where is Coaxial Cabling used?

A broad range of applications exist for coaxial cabling. The two primary impedance values of 50 and 75 Ohms determine specific applications with 50 Ohms primarily used in data signal applications and 75 Ohms used in video signal applications.

Currently used as a general reference. (R=Radio Frequency, G=Guide, U=Universal Specification). Letters that appear before the/U characters (i.e. A, B or C) means a specification modification or revision. For instance, it is common in the CB industry to see the designation RG-58A/U. The original RG-58/U coaxial cable had a solid center conductor. The "A" modification replaced the solid center conductor with a more flexible stranded center conductor (that is highly recommended for use in mobile installations). Other designators often seen are: A=Modification to the Solid Core Material Specification, B=Modification to the Outer Jacket Specification, C=Modification of the Dielectric Insulator Specification. These designators are not precise and specifications may vary from one vendor to another.

Shielding: Conductive envelope made of wires or metal foil that covers the dielectric and the center conductor.

Twinaxial: An offshoot of coaxial cabling. Two center conductors with one dielectric and braided shielding.

Velocity of Propagation (VP): Usually expressed as a percentage, VP is the transmission speed of electrical energy in a determined length of cable compared to the speed of light.

VSWR (Voltage Standing Wave Ratio): The ratio of the maximum effective voltage to the minimum effective voltage measured along a RF transmission line. This value generally increases with frequency and higher values are not desirable.

Common Applications for Coaxial Cable Assemblies

Entertainment Systems

Coaxial cable assemblies are used extensively to connect a wide variety of home and commercial entertainment products. Entertainment equipment such as monitors, TVs, cameras, recording equipment and broadcast equipment are interconnected using coaxial cables.

Common cable types:
75Ω-RG6 or RG59

Common connectors:
BNC, F and RCA

GPS

Global Positioning Systems utilize coaxial cable for connections between receiving antennas and other related equipment.

Common cable types:
50Ω-RG58, RG174, RG188 or RG316

Common connectors:
TNC, N, MCX, MMCX and SMA

Video Systems

The transmission of a video signal from a video camera to a display monitor is typically through coaxial cable.

Common cable types:
75Ω-RG59, RG59A/U, RG59B/U or RG179

Common connectors:
BNC, F and RCA

Telecom

The infrastructure of most telecommunication systems relies heavily on coaxial cabling. Cell towers, communications equipment and base station facilities are typical examples of coaxial cable interconnection applications.

Common cable types:
50Ω-RG58, RG223 and RG213

Common connectors:
BNC, TNC and Type N

WAN/LAN

Wide Area Networks and Local Area Networks often utilize coaxial cable for equipment interconnections. Also, reverse polarized connectors are found on many wireless antenna connections.

Common cable types:
50Ω-RG174, RG58

Common connectors:
BNC

Typical Coaxial Cabling (Exploded View):

Center Conductor:
The main signal path.
Can be solid or stranded wire.

Shielding:

One of the two conductors in coaxial cable. Braid or braid + foil is typical.

Dielectric:

Insulating material isolates shield from center conductor. This also gives the cable its impedance property.

Jacket:

Insulates and protects shielding and center conductor. Extruded PVC is typical.

Typical Coaxial Connector (BNC Exploded View):

Center Pin:

Terminates to center conductor via crimping or soldering.

Crimp Sleeve:

Provides strain relief by securing braid to connector.

Ferrule:

Provides mating surface for coaxial shielding.

Connector (Plug) Body:

Nickel plated brass is typical.

Understanding Coaxial Cable

Coaxial is a term derived from the construction of the cable, as illustrated here. In a coaxial cable an electrical impulse signal is transmitted along the cable length between the center conductor and the outer conductor. The center conductor and the outer conductor share the same center line or axis hence the term coaxial.

Shielding Effectiveness is the relative ability of a shield to screen out undesirable interference. In coaxial cable, the outer conductor provides a shield to keep interfering signals from getting in and to keep signals from leaking out to become undesirable interference for nearby devices. Shielding Effectiveness is measured in dB with higher values indicating better shielding properties. The table below illustrates the relative shielding properties of various shielding types.

Cable Construction Cross Section

Notice as the shielding density increases there is a correlated increase in the shielding effectiveness value. The best shielding effectiveness value can be found in a rigid coaxial cable due to the solid tube construction of the outer jacket. In this type of cable the limiting factor for shielding effectiveness is the quality of the connector attachment.

Shielding Type			
Single Braid Shield (95% coverage)	Single Braid Shield (60%) + Foil Wrap (100%)	(2) Braids (60%) + (2) Foil Wraps (100%)	Conformable Cable
Approximate Shielding Effectiveness Value			
-55dB	-90dB	-110dB	-150dB

Coaxial Connectors

See all of our connectors online at L-com.com/ConnectorChart

*See L-com.com for actual models this connector is compatible with.

Tip When is 50 Ohm coaxial cable used?

The primary use of 50 Ohm coaxial cable is transmission of a data signal in a two-way communication system. Some of the common applications for 50 Ohm coaxial cable are computer Ethernet backbones, wireless antenna feed cables, GPS (Global Positioning Satellite) antenna feed cables and cell phone systems. The cable assemblies offered in this section cover the most common RG style cables and connector interfaces that are used in these applications.

What is Low Loss cable?

The term low loss refers to the cables relative low attenuation (loss) over distance. The main difference between standard RG cable and low loss coaxial cable is the shielding. Low loss cable has far better shielding than typical RG style cable thus achieving better low loss characteristics.

Additionally, low loss coaxial cables use solid center conductors which offer lower attenuation than stranded conductors that are sometimes found on RG style cables. Low loss coaxial cables are typically used in WLAN, Cellular, PCS, ISM and many other wireless applications.

Low Loss Attenuation Comparison		
Cable	MHz	db/100ft
RG213/U	2500	14.9
400 Series	2500	6.8

1.13mm Series Low Loss Coaxial Pigtaills

Tip Solid vs stranded center conductors

In coaxial cable there is a trade off in center conductor construction. A solid center conductor will give the best attenuation performance but will be somewhat stiff, while a stranded center conductor will be more flexible but have slightly higher attenuation.

Tip *Identifying a reverse polarized connector*

A reverse polarized coaxial connector alters a standard polarized connector interface by utilizing a male center pin in a jack body or a female center pin in a plug body. Reverse polarity connectors are sometimes used in an attempt to "key" connections so that incorrect connections are not possible. This also prevents mating with a standard non-polarized connector. Common reverse polarized interfaces are RP-SMA and RP-TNC.

Plenum Rated Low PIM Series Coaxial Assemblies

L-com's Plenum Rated Low PIM cable assemblies feature RG401 or RG402 cable and are available with 7/16 DIN Male and Type N Male connectors. Ideal for Distributed Antenna Systems (DAS), these cables assemblies are not only Plenum Rated, but feature PIM specifications as low -160 dBc. These cables assemblies are available to order using L-com's online cable configurator. Customers can select cable type, connector options and select custom lengths in inches, feet or meter.

RG402 Plenum Rated Low PIM Coaxial Cable

Semi-Rigid and Formable 50 Ohm Coaxial Assemblies

L-com offers quality crafted Semi-Rigid and Formable coax cable assemblies for use in a wide array of applications. These cable assemblies are designed, manufactured and tested using state of the art equipment to ensure the highest quality to our customers.

Have custom cable requirements? We can custom build your Semi-Rigid and Formable cable assemblies using the very best in forming and stripping equipment. In addition to our standard cable types, we can build cable assemblies using Semi-Rigid Low Loss Aluminum or Copper cable from sizes of .047 (1.2mm) to .250 (6.4mm) with a wide array of available connector types. Contact us today with your custom cable requirements.

Tip *What is the difference between Semi-Rigid and Formable cable?*

Semi-rigid
This type of coax offers superior screening compared to cables with a braided outer conductor, especially at higher frequencies. The major disadvantage is that the cable, as its name implies, is not very flexible, and is not intended to be flexed after initial forming. This type of cable is also called "hard line" cable.

Formable
Formable cable is a flexible reformable alternative to semi-rigid coaxial cable used where flexibility is required. Formable cable can be stripped and formed by hand without the need for special tools, similar to standard coaxial cable. Also this cable type is ideal for laying out and designing pre-bent semi-rigid assemblies.

Tip When is a 75 Ohm coaxial cable used?

The primary use of a 75 Ohm cable is to transmit a video signal. One of the typical applications is television signals over cable, sometimes called signal feed cables. The most common connector used in this application is a Type F. Another application is video signals between components such as DVD players, VCRs or Receivers commonly known as audio/video (A/V) cables. In this case BNC and RCA connectors are most often found. In both of these applications RG59 with both solid center conductor (RG59B/U) and stranded center conductor (RG59A/U) as well as RG6 are often found. The cable assemblies offered in the following section cover the most common connection situations found in both applications.

Tip Distinguishing between 50 and 75 Ohm BNC connectors

BNC connectors are one of the few coaxial connectors that are available in two impedance values of 50 and 75 Ohms. You can distinguish the two types by the absence of dielectric material at the interface of the 75 Ohm version as shown.

75 Ohm Coaxial Cables

L-com offers a wide variety of 75 ohm coaxial video cable assemblies. Cable types include RG59, RG6, RG179, RG187, and our small OD Thinline cable. Connector types include BNC male and female, RCA, F, and SMB. Please see our website for our complete offering.

Tip What is the difference between a plug and a jack?

People often have difficulty choosing the correct gender termination on cable assemblies. Plugs are considered male gendered connectors which utilize a center pin. Jacks are considered female gendered connectors utilizing a center socket.

Tip

What is the advantage of using a cable assembly with a male to female bulkhead gender combination?

Typical coaxial cable assemblies commonly found in the marketplace have male gender connectors on both ends. In applications where a cable must pass through an obstruction such as a bulkhead panel, a configuration as shown in Figure 1 is typically used.

Figure 1

By utilizing L-com's male to female bulkhead cable assembly you can simplify the configuration, reducing the number of separate parts needed and reduce overall signal loss by eliminating an interface connection and the signal loss of the feedthru bulkhead. Figure 2 shows this set up.

Tip *Why is a molded strain relief superior to a heat shrink strain relief?*

As shown in Figure 1, a heat shrink strain relief does offer some strain relief at the egress point where the cable exits the strain relief, reducing stress at this critical junction.

Figure 1

As seen in Figure 2, however, a molded strain relief provides far superior stress reduction through a more robust design. The improved adhesion

Figure 2

between the strain relief and the cable/connector interface is achieved during the molding process. In addition, the molded strain relief design provides a more finished appearance than the heat shrink version.

Tip What are twinaxial cables?

Twinaxial cabling, or "Twinax", is a type of cable similar to coaxial cable, but with two inner conductors instead of one. The connectors used on this type of cable also feature two separate conductors. To ensure correct orientation, these connectors are often keyed to prevent incorrect connections.

MIL-STD-1553B 78 Ohm Twinax Cable Assemblies

L-com's MIL-STD-1553B cable assemblies feature high-temperature M17/176-00002 twinax cable and TRB connectors designed for these types of bus applications. Standard lengths from 1' to 50' (0.3m to 15.2m). Custom lengths also available.

Concentric Twinax TRB Type Connectors

TRB type connectors from Trompeter feature a center contact and an intermediate cylindrical contact. The three bayonet design can withstand severe shocks and vibrations. Typically used for MIL-STD-1533B bus applications, these full crimp connectors are available in Straight and Right Angle Plug versions.

78 Ohm Twinaxial BNC Cables - Feature Polarized/Stepped Keyway and Crimp Design

This Twin BNC cable series accommodates the need for low level signal patching and balanced line applications. Fittings have polarized, stepped keyways that look like, but do not match traditional BNC coaxial connectors. Twin BNC connectors are constructed of machined brass with a non-tarnish nickel finish and gold plated contacts.

How do you select the right coaxial cable interface for your application?

There are numerous coaxial interfaces in use today. These interfaces cover a broad range of applications including both 50 Ohm data signal transmission and 75 Ohm audio/video signal transmission. The following chart is a general guide to help you select the best interface for your specific application.

Interface Type	Impedance	Application	Coupling Mechanism	Typical Cable Types	Typical Frequency Range
BNC 	Available in both 50 and 75 Ohm	50 Ohm version is utilized in data signal transmission for such applications as WAN/LAN, Ethernet or Test & Measurement. 75 Ohm version is utilized in audio/video signal transmission for such applications as security and CATV	Two stud bayonet twist and lock	Wide variety of RG style coaxial cables including 50 Ohm RG174, RG58, RG142 etc. And 75 Ohm RG179, RG59, RG6	0-4 GHz
TNC (Threaded version of a BNC) 	50 Ohm	Data signal transmission for such applications as GPS, wireless base stations antennas and instrumentation	Threaded coupling	Wide variety of RG style coaxial cables including RG174, RG58, RG142, etc	0-11 GHz
SMA 	50 Ohm	Data signal transmission for such applications as GPS and instrumentation	Threaded coupling	Generally used on small diameter cable such as RG174, RG188 and RG316	0-18 GHz
Type N 	50 Ohm	Data signal transmission for such applications as GPS antennas and instrumentation	Threaded coupling	Generally used on larger diameter cable such as RG58, RG213 and RG223	0-11 GHz
Type F 	75 Ohm	Video signal transmission in applications such as CATV and entertainment video	Threaded coupling	Primarily RG59 and RG6	0-1 GHz
MCX 	50 Ohm	Data signal transmission for such applications as GPS antennas and instrumentation	Snap on coupling	Generally used on small diameter cable such as RG174, RG188 and RG316	0-6 GHz
MMCX 	50 Ohm	Data signal transmission for such applications as GPS antennas and PCMCIA cards	Snap on coupling	Generally used on small diameter cable such as RG174, RG188 and RG316	0-6 GHz
SMB 	Available in both 50 and 75 Ohm	Data signal transmission for such applications as digital cellular, GPS and wireless LAN	Snap on coupling	Generally used on small diameter cable such as 50 Ohm RG174, RG188 and RG316 and 75 Ohm RG179 and RG187	0-4 GHz
SMC 	Available in both 50 and 75 Ohm	Signal transmission for such applications as automotive GPS and telecom with high vibration requirements	Threaded coupling	Generally used on small diameter cable such as 50 Ohm RG174, RG188 and RG316 and 75 Ohm RG179 and RG187	0-10 GHz
Reverse Polarity TNC and SMA 	50 Ohm	Signal transmission in wireless spread spectrum devices that must comply with FCC non standard interface rule	Threaded coupling and RG58	Primarily used with RG174	TNC 0-11 GHz SMA 0-18 GHz

Coaxial Interseries Adapter Selection Matrix

Use this handy chart to locate the desired interseries adapter. Simply locate the connector type and gender in the top row and repeat in the left hand column. Intersect the row and column to determine availability. Adapters shown in this matrix are listed on this and the opposite page. If a specific adapter type is not listed, please visit our website at **L-com.com** for the latest information or call our technical support group at **800-343-1455** for assistance. Adapters listed are generally intended for use in the RF band.

FME to BNC Interseries Coaxial Adapters - 50 and 75 Ohm - Useful in Cellular Applications

Many cellular communication devices utilize the FME connector on coaxial antenna lines. L-com offers a selection of highest quality components utilizing machined brass with nickel plated surfaces and gold plated pins.

Item #	Description	1-9	10-24	25-99	100+
BA8016	Coaxial Adapter, FME Male/BNC Female, 50 Ohm	6.80	6.39	5.98	CALL
BA8005	Coaxial Adapter, FME Male/BNC Male, 75 Ohm	4.99	4.69	4.39	CALL

1.6/5.6 to BNC Interseries Coaxial Adapters - 50 Ohm - For Conversion to the European Standard

These machined adapters are great for converting standard BNC terminations to 1.6/5.6 terminations which are common in other areas of the world.

Insulated Coaxial Connections - 50 Ohm - Needed to Prevent Ground Loops and Noise

Data signals are particularly susceptible to both ground loop and common mode interference. Reducing the number of ground points of a coaxial wiring system reduces the number of potential ground loops and multiple noise currents.

BIF-CB	Coaxial Coupler, BNC Female/Female	4.15	3.82	3.49	CALL
BIF-TB2	Coaxial T Adapter, BNC Female/Male/Female	8.68	8.16	7.64	CALL

**BNC Connector Identifiers/Insulators - Take on New Look with Color - Coded Insulated Covers**

The conventional BNC crimp connector may now be modified to be fully insulated, helping eliminate ground loop problems. Our colorful slip-on insulated covers are quick to assemble and provide color coding. The hood cover is installed over the BNC movable collar; the plastic bend strain protector is slipped on over ferrule after the crimping operation. An important feature is the added support offered by the bend-protector; it helps prevent cable breakage.

Some Connectors are sold in 10-Packs. See website for details. Adapters are sold individually.

Tip What is the difference between a *WITHIN SERIES* coaxial adapter and an *INTERSERIES* coaxial adapter?

A **WITHIN SERIES** coaxial adapter connects between two interfaces of the same series (i.e. SMA to SMA) in female to female, male to female or male to male configurations.

An **INTERSERIES** coaxial adapter connects between two interfaces of different series (i.e. SMA to BNC) in female to female, male to female or male to male configurations.

Deluxe Coaxial Adapter Kit - Immediate Assembly of 108 Adapters

Thirty component parts interchangeably screw together to form up to 108 different types of coaxial adapters, all in a matter of seconds. Disassemble them when you're through, for use next time. Truly a problem solver for those unique situations and it replaces a drawer full of adapters. Premium quality, having gold center pins and Teflon insulators for good conductivity and low loss. All components are gold plated to prevent long term oxidation. The deluxe coaxial adapter kit contains male and female: Type N, BNC, TNC, SMA, UHF and Mini-UHF types of interconnections. Mix and match to suit your immediate needs. Supplied in a handy leatherette, zippered storage case ideal for portable use.

Premium Coaxial Adapter Kit - Assemble up to 192 Different Adapters

Forty component parts interchangeably screw together to form up to 192 different types of coaxial adapters. The secret is the special in-between fittings that allow you to assemble virtually any coaxial adapter in a matter of seconds. Mix and match to suit your needs. Disassemble them when you're through for use next time. A problem solver for those unique situations and it replaces a drawer full of adapters. Premium quality, featuring gold plated pins and Teflon insulators and gold plated overall. Kit assembles the same types as the BAK300, plus RCA-Phono and Type F. Supplied in portable black leatherette zippered storage case. No technician or third party maintenance person should be without this.

BNC Interseries Assortment - Adapters to Mate SMA, UHF, RCA and Type F

A handy adapter assortment to have in the lab or workshop. How many times did you come up with a mismatch in coaxial cables and nowhere to turn to make the connection? We have the answer with our Interseries Assortment that contains eleven adapters, one each of the following: BA28, BA38, BA50, BA60, BA90, BA94, BA95, BA120, BA125, BA220 and BA230. Seven compartment carry case included.

Tip What makes up the different types of connectors?

The two main components of a connector that determine the mating type (sex) are the **BODY** and the **PIN**.

Here is a Standard Polarity Plug connector:
It is made up of a PLUG BODY and a MALE PIN.
Standard polarity plug connectors can also be known as Male Connectors.

Here is a Reverse Polarity Plug connector:
It is made up of a PLUG BODY and a FEMALE PIN. The polarity of the pin is reversed, thus making it a Reverse Polarity Plug Connector.

Here is a Standard Polarity Jack connector:
It is made up of a JACK BODY and a FEMALE PIN.
Standard polarity jack connectors can also be known as Female Connectors.

Here is a Reverse Polarity Jack connector:
It is made up of a JACK BODY and a MALE PIN. Again the polarity of the pin is reversed, thus making it a Reverse Polarity Jack Connector.

Coaxial Connector Selection Matrix

Use this handy chart to locate the desired coaxial connector. Simply locate the connector type and gender in the top row. Then find the coaxial cable type in the left hand column. Intersect the row and column to determine availability. Connectors shown in this matrix are listed on pages 192 thru 195. If a specific

connector type is not listed, please visit our website at **L-com.com** for the latest information or call our technical support group at **800-343-1455** for assistance. Connectors listed are generally intended for use in the RF band. Assembly tools can be found on pages 200 and 201.

Tip Distinguishing between 50 and 75 Ohm BNC connectors

BNC connectors are one of the few coaxial connectors that are available in two impedance values of 50 and 75 Ohms. You can distinguish the two types by the absence of dielectric material at the interface of the 75 Ohm version as shown.

Dielectric Material
50 OhmAbsence of Dielectric
Material - 75 Ohm

Digital Grade BNC Connectors for 1505A and 1506A Cable, 75 Ohm

Item #	Description	Cable Type	Attachment	1-9	10-24	25-99	100+
BAC-UPL2000-D2B	BNC Male	1505A Coax	Crimp	9.94	9.54	9.14	CALL
BAC-UPL2000-D8B	BNC Male	1506A Plenum Coax	Crimp	9.94	9.54	9.14	CALL

Telecommunications Grade BNC Connectors for 734 and 735 Cable, 75 Ohm

BAC-UPL220-025	BNC Male	734 Coax	Crimp	12.26	11.77	11.28	CALL
BAC-UPL220-026	BNC Male	735 Coax	Crimp	12.87	12.36	11.84	CALL

Twin BNC Connector - Bayonet Style Coupling Polarized Contacts

BAC928	Twin BNC	Twinaxial	Clamp	9.86	9.27	8.68	CALL
--------	----------	-----------	-------	------	------	------	------

BNC, TNC and Type N - Belden 9913 Cable

Belden 9913 style cable is an RG8/U type cable with low loss performance characteristics. This cable utilizes a semi-solid polyethylene as an insulator along with a solid 10 AWG center conductor to achieve this performance enhancement.

HPC992	BNC Plug	9913	Crimp	14.79	14.20	13.61	CALL
HPC993	TNC Plug	9913	Crimp	13.95	13.39	12.83	CALL
HPC994	Type N Plug	9913	Crimp	14.79	14.20	13.61	CALL

SMA, BNC and TNC - Belden 7807 Cable

Belden 7807 cable is an RG58 type cable with low loss performance characteristics. This cable utilizes a gas injected foam HDPE as an insulator along with a solid 17 AWG center conductor to achieve this performance enhancement.

HPC781	SMA Plug	7807	Crimp	14.25	13.68	13.11	CALL

ASNP-1100	SMA Nano-Plug	Low Loss 100-Series	Crimp	5.33	4.90	4.48	CALL
-----------	---------------	---------------------	-------	------	------	------	------

*Note: See website for additional compatibility information.

**Tip** *The anatomy of a coaxial connector*

The two main components of a connector that determine the mating type (sex) are the **BODY** and the **PIN**.

Here are two examples of **PLUG** bodies (aka Male).

This is a **PLUG** body of a typical threaded type connector. Note that the threads are on the inside of the body.

This is a **PLUG** body of a typical bayonet type connector such as a BNC. Note the coupling mechanism on the body.

And these are two examples of **JACK** bodies (aka Female).

This is a **JACK** body of a typical threaded type connector. Note that the threads are on the outside of the body.

This is a **JACK** body of a typical bayonet type connector such as a BNC. Note the bayonets on the body.

This is a **MALE** pin.

This is a **FEMALE** pin.

So what makes up the different types of connectors?

Here is a Standard Polarity Plug connector:

It is made up of a **PLUG BODY** and a **MALE PIN**. Standard polarity plug connectors can also be known as Male Connectors.

Here is a Standard Polarity Jack connector:

It is made up of a **JACK BODY** and a **FEMALE PIN**. Standard polarity jack connectors can also be known as Female Connectors.

Here is a Reverse Polarity Plug connector:

It is made up of a **PLUG BODY** and a **FEMALE PIN**. The polarity of the pin is reversed, thus making it a Reverse Polarity Plug Connector.

Here is a Reverse Polarity Jack connector:

It is made up of a **JACK BODY** and a **MALE PIN**. Again the polarity of the pin is reversed, thus making it a Reverse Polarity Jack Connector.

How do you select the right coaxial cable for your application?

There are a number of coaxial cable styles available today. "RG" style cables were originally designed for military applications but now are extensively used in commercial applications. Low Loss coaxial cables are designed to meet the demands of the wireless communications market. High performance with low signal loss makes them ideal for a wide array of wireless applications. The following coaxial cable selection guide is intended as a general guide to assist you in selecting the right cable for your application.

Cable Type	Impedance	Typical Application	Cable Type	Impedance	Typical Application
RG174/U 	50 Ohm	Transmission of data signals in applications such as LAN/WAN or GPS.	RG179B/U 	75 Ohm	Transmission of a video signal in applications such as security systems where high temperature performance is needed.
RG188A/U 	50 Ohm	Transmission of data signals in applications such as LAN/WAN or GPS in situations where high temperature performance is needed.	RG187/U 	75 Ohm	Transmission of a video signal in applications such as security systems where high temperature performance is needed.
RG316/U 	50 Ohm	Transmission of data signals in applications such as LAN/WAN or GPS in situations where high temperature performance is needed.	100 Series Low Loss 	50 Ohm	Drop-in Low Loss equivalent for RG316/174. Very short radio pigtails/jumper cables.
RG58C/U 	50 Ohm	Transmission of data signals in applications such as antenna feed cables or Ethernet backbones.	195 Series Low Loss 	50 Ohm	Drop-in Low Loss equivalent for RG58/142. Short antenna and jumper cables.
RG142B/U 	50 Ohm	Transmission of data signals in applications such as antenna feed cables or Ethernet backbones in situations where high temperature performance is needed.	200 Series Low Loss 	50 Ohm	Short antenna cable feeds. Applications requiring easily routed low loss cable.
RG59A/U 	75 Ohm	Transmission of a video or audio signal in applications such as security systems or CATV.	240 Series Low Loss 	50 Ohm	Medium length antenna/jumper cables.
RG59B/U 	75 Ohm	Transmission of a video or audio signal in applications such as security systems or CATV.	400 Series Low Loss 	50 Ohm	Drop-in Low Loss equivalent for RG8/9913. Medium distance antenna feed cables.
RG6/U 	75 Ohm	Transmission of a video or audio signal in applications such as security systems or CATV.	400 Ultra Flex Series Low Loss 	50 Ohm	Applications requiring maximum flexibility and repeated bending/flexing. Drop-in Low Loss equivalent for RG-8/9913.
RG223/U 	50 Ohm	Transmission of data signals in applications such as LAN/WAN or GPS in situations where low signal loss and high shielding performance is needed.	600 Series Low Loss 	50 Ohm	Medium distance base station and cell tower applications.
RG213/U 	50 Ohm	Transmission of data signals in applications such as antenna feed cables in situations where low signal loss and high operating voltage performance is needed.	900DB Series Low Loss 	50 Ohm	Outdoor/direct burial applications, jumper cable assemblies for 1-5/8" & 2-1/4" feeders, medium antenna cable feeds with no jumpers required and long distance base station and cell tower applications.

Anatomy of a Coaxial Connector

There are a wide variety of coaxial connectors available today. These connectors are offered in numerous interface types and attachment methods. Illustrated below are some common elements and functions shared by most of these coaxial connectors.

Crimp Ring	Coupling Body	Outer Conductor	Dielectric Support	Center Conductor
				
Attachment sleeve to cable outer conductor.	Attachment mechanism to mating connector.	Outer conducting element for signal transmission.	Non-conductive spacer between center and outer conductor.	Center conducting element for signal transmission.

Building Your Own Coaxial Cable Assembly

In order to successfully build your own coaxial cable assembly, you must make the following decisions:

1. Select a cable type

Many parameters come into play in making this decision from electrical performance properties such as impedance, shielding and attenuation to mechanical properties such as diameter, center conductor construction (solid vs stranded) and jacket material. A selection of the most commonly used cable is listed on pages 198 and 199.

2. Select a connector type

Numerous connector interfaces exist such as BNC, TNC, SMA, F or RCA to name just a few. Each has a different application and come in both male and female versions. A selection of the most popular types is listed on pages 192-195.

3. Select an attachment method

In general, there are three basic methods to attach a coaxial connector to a coaxial cable. They are crimp, clamp and twist-on. Each of these methods is illustrated below.

4. Select a tool

If a crimp attachment method was selected then a crimp tool will be needed. The crimp cross reference chart on page 200 will assist you in selecting the correct tool.

Crimp Method:

This is the most common connector attachment method. In this case the cable shield is crimped to the connector using the crimp ring. The connector center conductor is attached to the cable center conductor by crimp or solder.

STEP 1 	STEP 2 	STEP 3 	STEP 4 	STEP 5 	STEP 6 
Cut cable to length and slide crimp ring onto free end.	Strip free end with Coaxial Cable Stripper.	Slide pin onto center conductor making sure base of pin meets dielectric. Crimp in place.	Fan braid and slide plug over pin.	Pull crimp sleeve over braid and ring.	Crimp in place.

Clamp Method:

The clamp method is often used for weather exposure applications or when crimp tools are not available. In this case the cable shield is clamped between the connector body and back nut. The connector center conductor is usually soldered to the cable center conductor.

STEP 1 	STEP 2 	STEP 3 
Cut cable and slide nut into position. Strip and flair braid.	Position braid clamp and crimp or solder pin.	Attach main body to back nut.

Twist-On Method:

This method is most often used in field applications because of its simplicity and not needing special tools.

STEP 1 	STEP 2 	STEP 3 
Prepare cable with strip tool.	Position connector body.	Twist connector body onto cable.

Crimp Tool:

When using a crimp connector, the HT330K tool kit can be a valuable item. This kit contains dies for all the commonly used crimp sizes. In addition, this kit comes complete with a cable cutter and a rotary cable stripper - helpful tools for building a cable assembly.

Plug or Jack:

A **PLUG** utilizes a center pin = **MALE GENDER**

A **JACK** utilizes a center socket = **FEMALE GENDER**

Solid or Stranded:

SOLID center conductor: best attenuation but somewhat stiff.

STRANDED center conductor: more flexible but slightly higher attenuation.

Economy Crimping Tools - Common Crimp Sizes for Connectors and Center Pins

These heavy-duty crimping tools are economically priced and easy to use. Leverage action produces an enormous force to properly crimp a perfect hex every time. An adjustable cam is added to keep the tool in full conformance with the required tolerance. Tools accept the most popular crimp connector types. HT106D hex sizes are .068", .213" and .255". HT106H hex sizes are .322" and .359".

Item #	Description	1-9	10-24	25-99	100+

USA Made Crimping Tool Accepts Dies for Coaxial or Modular Type Terminations

The HTS2100 crimp tool accepts a variety of dies that allow it to crimp modular or coaxial terminations. This top of the line tool is more compact than competitors' models offering easier crimping ability for people with smaller hands. Molded grips and carbon steel frame is conservatively rated at 50,000+ crimps.

Fluke Pocket Toner® NX1

Test for continuity and short circuits on coax cables in one easy step. Basic professional coaxial testing does not get any more compact and simple as PTNX1. The PTNX1 features lightweight aluminum construction, a standard AAA battery, and new dual buzzers that audibly indicate continuity at both ends of the test cable. Like all Pocket Toner® NX test tools, the PTNX1 is 100% low voltage protected so connecting it to live low voltage systems will not damage the tool. **As an authorized Fluke reseller, we can bid on RFQs for any Fluke part numbers. Contact us to request a non-obligatory quote.**

Item #	Description	List Price
PTNX1	Fluke Pocket Toner NX1	35.64

Fluke Pocket Toner® NX2

The individual PTNX2 is for the technician that works primarily with coaxial cable that wants a powerful but super-compact tool to fit in his or her pocket. In addition to testing for continuity and short circuits PTNX2 is packed with advanced features like indication of AC or DC voltage, 50-75 Ohm terminators and auto shut-off to conserve battery life. PTNX2 instantly displays all test results on an easy to read 8-segment LED display as well as giving audible feedback at both ends of the test cable. Like all Pocket Toner® NX test tools, the NX2 is 100% low voltage protected so connecting it to live low voltage systems will not damage the tool. **As an authorized Fluke reseller, we can bid on RFQs for any Fluke part numbers. Contact us to request a non-obligatory quote.**

Professional Grade 8 Point Center Pin Crimp Tool

This professional grade tool makes pin crimping a breeze. Featuring a multipoint design which has proven to be one of the most reliable attachment methods. Designed for use with the BAC-UPL Series plugs.

HT010-0055	8 Point Center Pin Crimp Tool	215.90
HTS-CD3-11	734/735 Hex Crimp Die (.255", .178")	113.32

Auto-Terminating Adapters 50 and 75 Ohm

Tip Why use an auto terminating adapter?

In today's complex audio, video, data world coaxial cables are used to interconnect various devices. Many times a coaxial cable will not be connected to anything causing an open port which allows signals to escape. This can possibly interfere with an adjacent device and allow signals to enter the network as interference. The use of an auto terminating adapter eliminates this problem by automatically terminating the open port any time a connecting device is disconnected. This eliminates the need to attach a separate terminator which is often lost or forgotten.

SMA Coaxial Line Terminators - Match Impedances of the Unused Port or Cable End

Item #	Description	1-9	10-24	25-99	100+
BTS5F	SMA Terminator, Female, 50 Ohm, Green	9.38	9.00	8.63	CALL
BTS5M	SMA Terminator, Male, 50 Ohm, Green	9.30	8.93	8.56	CALL
ARSP-TERM	SMA Reverse Polarity Terminator, Male, 0-6 GHz (50 Ohm)	7.15	6.58	6.01	CALL

BNC Line Terminators - Fully Insulated, Select Impedance to Match Coaxial Cables

Terminators are generally used at the far end of the line. Resistance should match characteristic impedance of the coaxial line, so no reflections or standing waves are present when the signal enters. All terminators listed are rated at 0.5 watt. Fully insulated male versions include black hood cover as shown. Color coded body to match resistance.

BIF5M	BNC Terminator, Male, use with RG58 (50 Ohm), Green	6.68	6.15	5.61	CALL
BIF7M	BNC Terminator, Male, use with RG59 (75 Ohm), Violet	6.13	5.64	5.15	CALL
BIF9M	BNC Terminator, Male, use with RG62 (93 Ohm), White	6.68	6.15	5.61	CALL
BIF5F	BNC Terminator, Female, use with RG58 (50 Ohm), Green	5.30	4.88	4.45	CALL
BIF7F	BNC Terminator, Female, use with RG59 (75 Ohm), Violet	4.99	4.59	4.19	CALL

Deluxe BNC and Type N Terminators - Machined Metal Construction with Full Shielding

These deluxe terminators offer a machined body versus a plastic one. One model also available with grounding cable.

BTB5MD	BNC Terminator, Male, use with RG58 (50 Ohm)	6.62	6.36	6.09	CALL
BTB5FD	BNC Terminator, Female, use with RG58 (50 Ohm)	6.62	6.36	6.09	CALL
BTB7MD	BNC Terminator, Male, use with RG59 (75 Ohm)	6.25	5.75	5.25	CALL
BTB7FD	BNC Terminator, Female, use with RG59 (75 Ohm)	6.25	5.75	5.25	CALL
BTB9MD	BNC Terminator, Male, use with RG62 (93 Ohm)	6.68	6.41	6.15	CALL

Auto-Terminating Bulkhead or T Adapter - Does Not Need Terminator on Open End

Any rack panel with half inch diameter D-holes will accept either the BA307 or BA307-75 BNC auto-terminating bulkhead adapters. They save the cost and nuisance of using separate terminators. Also available are the BA45 and BA45-75 (F-M-F) T adapters, equipped with internal 50 or 75 Ohm auto-terminators.

BA307	BNC Auto-Terminating (F-F) Bulkhead Adapter, 50 Ohm	9.51	8.94	8.37	CALL
BA307-75	BNC Auto-Terminating (F-F) Bulkhead Adapter, 75 Ohm	8.77	8.07	7.37	CALL
BA45	BNC Auto-Terminating (F-M-F) T Adapter, 50 Ohm	11.66	10.96	10.26	CALL
BA45-75	BNC Auto-Terminating (F-M-F) T Adapter, 75 Ohm	10.82	9.95	9.09	CALL

BNC Test Leads and Adapters - Your Most Useful Laboratory Accessory Items

Here's an opportunity to purchase quality test lead and adapter accessories for your lab. For use primarily with BNC connectors and dual banana plugs which are the most popular in the lab.

Item #	Description	1-9	10-24	25-99	100+

---------	-------------------------------------	-------	-------	-------	------

Tip What are the differences between various laboratory test leads?

The common feature of test leads used in a laboratory environment is ease of connection and disconnection since most attachments are temporary in nature and are often being changed. Below is a list of some of the most common test leads found in a lab.

Banana Plugs

A high-quality plug and socket for speaker cable. The banana plug is pushed into the socket, the spring-like protrusions on the prong make a snug fit.

Alligator Clips

A spring-loaded clip with serrated jaws, often used to make temporary electrical connections.

Test Clips

Used in many probing applications, test clips can be quickly attached to bare wires or other conducting features.

Binding Posts

Typically used in an audio application, it features a threaded collar for gripping bare wires.

BNC Connector

A commonly used coaxial interface for audio, video and networking applications that provides a secure connection. Coupling is achieved utilizing mating post on the jack and a spring loaded coupling nut on the plug. A simple quarter turn of the coupling nut completes the mating process.

Lightning Protected 400 - Series 50 Ohm Coax Cable Assemblies

L-com's lightning protected 400-series cable assemblies feature an in-line gas discharge tube lightning protector attached directly to the cable. This not only reduces the cost since a connector is eliminated, but helps reduce return loss and insertion loss. These cable assemblies feature L-com's CA-400 high performance low loss coaxial cable. Attached directly to the cable is L-com's AL6-NF-14-9 or AL6-NM-14-9 5.8 GHz gas discharge coaxial lightning protector. Along with the standard lengths and connectors, custom lengths and connectors are also available. Contact L-com sales for more information.

0-6 GHz In-line Crimp Type Coaxial Protectors

L-com's crimp type coaxial protectors are designed to be attached directly onto a 400-series Low Loss coax cable via the solderless crimp end of the protector. This helps improve insertion loss since a cable connector is eliminated. They feature a replaceable gas tube element, multi-strike capability and fast response time.

AL6-NF-14-9	Type N Female Bulkhead to Crimp End, 90V	39.65	36.48	33.31	CALL
AL6-NM-14-9	Type N Male to Crimp End, 90V	39.65	36.48	33.31	CALL

How to Install L-com's Crimp Type Coax Lightning Protector

1. Strip unterminated end of 400-Series cable (see drawing on web site for dimensions)

2. Slide supplied heat shrink tube followed by the Ferrule onto the cable

3. Insert the stripped cable fully into the Lightning Protector

4. Slide Ferrule into place and crimp (see drawing on web site for dimensions), then slide heat shrink into place and apply heat

5. Attach ground wire to Crimp Ring Terminal on protector

Stainless Steel Wall Plates - Unbreakable and Offer An Enhanced Appearance

Wall plates that accept a variety of termination devices are found to be useful by many installers. Wall plates also provide a more organized accommodation to your day-to-day cabling needs. Furthermore, stainless steel gives a commercial appearance that is sometimes more acceptable in today's business office environment. The variety we offer fills most installation needs.

Item #	Description	1-9	10-24	25-99	100+
WPC1	Stainless Wall Plate, One 0.5" (1.3cm) dia. D-hole	3.50	3.29	3.08	CALL
WPC10	Stainless Wall Plate, One 0.75" (1.9cm) dia. D-hole	3.39	3.12	2.85	CALL
WPD3	Stainless Wall Plate, One DB25 Opening and One 0.5" (1.3cm) dia. D-hole	3.96	3.72	3.48	CALL

Panel Mount Receptacle Connectors

These series of connectors are intended for panel mounting with discrete receptacle terminations. Offered in BNC, RCA, SMA and Type N interfaces with various mounting configurations.

T1 Communication Systems - A Brief Primer

The T1 line is the most widely used switched digital communication circuit used in America today. T1s are used for connecting phone and computer networks to public switched network infrastructures. Each T1 is equivalent to 24 64Kbps communication channels. Each channel utilizes two 100 Ohm shielded twisted pairs; one for transmit (TX) and one for receive (RX). Some T1 equipment uses two 75 Ohm coaxial connections for the TX and RX channels. Baluns are used to bridge the gap between 75 Ohm coaxial and 100 Ohm twisted pair.

Note: An E1 circuit is the European equivalent of the American T1. The infrastructure uses 120 Ohm shielded twisted pairs so 75/120 baluns would be used in European applications.

T1 - E1 Differences

	NAME	#64Kbps CHANNELS	TWISTED PAIR TYPE	COAXIAL TYPE
USA Standard	T1	24	2 100 Ohms Shielded Twisted Pair (RJ45s Typical)	75 Ohms (BNC Typical)
European Standard	E1	32	2 120 Ohms Shielded Twisted Pair (RJ45s Typical)	75 Ohms (BNC, 1.6/5.6 Typical)

75 to 120 Ohm Transmission Baluns for Telecommunication Applications

75/120 Ohm impedance matching baluns allow users to use inexpensive shielded twisted pair cabling in place of expensive coaxial cabling. They are especially useful in telecommunication applications for patching at the distribution frame. Units meet CCITT Recommendation G703 and are great for American or European applications. Choose from multiple coaxial connector types as well as Krone IDC or compression IDC termination styles.

Item #	Description	List Price
ACK2010	75 to 120 Ohm Balun, 1.6/5.6 Plug (Screw Type)/Krone IDC	23.25
ACK3010	75 to 120 Ohm Balun, 1.6/5.6 Jack/Krone IDC	34.58
ACK8010	75 to 120 Ohm Balun, BNC Plug/Krone IDC	34.83
ACK9010	75 to 120 Ohm Balun, BNC Bulkhead Jack/Krone IDC	34.83
ACC8060	75 to 120 Ohm Balun, BNC Plug/Compression IDC	39.20

Tool-less CCTV Video Balun

The TL-VB-BNC is perfect for on the spot field installations or repairs. The tool-less design makes termination easy and fast. Supports full color video up to 2,200 feet over Cat5 cabling.

Item #	Description	1-9	10-24	25-99	100+
TL-VB-BNC	Tool-less CCTV Video Balun, BNC Male	16.17	15.85	15.52	CALL

ACK SERIES KRONE IDC TYPE

Terminate wires with punch down tool

Tip What is a balun?

The term balun (pronounced "bal-un") is derived from the function of the passive device that converts between a **BAL**anced and **UN**balanced electrical signal. Common types of baluns convert 100 Ohm twisted pair (balanced) to 75 Ohm coaxial (unbalanced).

Fiber Optic Tutorial

What are Fiber Optic Cables?

Fiber optic cables consist of a glass core and cladding, buffer coating, Kevlar strength members and a protective outer jacket. Fiber optic cables use light pulses as opposed to electrical signals to send information.

How are Fiber Optic Cables used?

Fiber optic cables can be plugged into communications equipment and patch panels to provide a physical connection to a network or device.

Where are Fiber Optic Cables used?

Fiber optic cables are used by commercial business, governments, the military and many other industries for myriad applications involving the transmission of voice, video and data.

A Quick Lesson In Optical Transmission

Where copper cabling uses electricity to transmit signals from one end to another, fiber optics use light pulses to accomplish the same purpose. The fiber cable is made of a transparent glass core surrounded by a mirror like covering called cladding. Light passes through the cable, bouncing off the cladding until it reaches the other end of the fiber channel.

In today's high speed networks, Graded Index Multimode fiber or Step Index Single mode fiber is used to improve light transmission over long distances. Multimode fiber has a larger core and is typically used in short runs within buildings. Single mode fiber has a smaller core and is used in long distance runs typically outside between buildings.

Fiber Core Sizes

Fiber specifications list the core and cladding diameters as a ratio to determine the fiber type. Multimode fiber is commonly 62.5/125 or 50/125 micron and Single mode fiber is commonly 9/125 micron.

Polish Types/Typical Back Reflection

In Single mode applications the amount of back reflection on assemblies can be critical. L-com offers both PC and APC Single mode assemblies off the shelf. UPC finishes are available by custom order.

Fiber Glass Types

Stepped Index Fiber relies on the reflection of light whereas in Graded Index Fiber, the properties of the glass are changed in layers to "bend" the light as it travels down the cable. This reduces modal dispersion within the cable allowing for higher transmission rates.

	Connector Type	Coupling Type	Fiber Type	Polish	Number Fibers	Typical Applications	Comment
	LC	Snap On RJ45 Style	Single mode/Multimode	PC, UPC, APC	1	Gigabit Ethernet, Video Multimedia	Small Form Factor (SFF)
	MPO (MTP)	Push/Pull	Single mode/Multimode	N/A	6 or 12	Active Device Transceiver, Interconnections for O/E Modules, QSFP Transceivers	One Mating Connector must have Alignment Pins
	SC	Snap On	Single mode/Multimode	PC, UPC, APC	1	CATV, Test Equipment	Keyed
	ST	Twist On	Single mode/Multimode	PC, UPC	1	LANS, Military	Keyed
	FC	Screw On	Single mode/Multimode	PC, UPC, APC	1	Datacom, Telecommunications	Keyed
	MT-RJ	Snap On RJ45 Style	Single mode/Multimode	N/A	2	Gigabit Ethernet, Asynchronous Transmission mode (ATM)	One Mating Connector must have Alignment Pins

IP67 Harsh Environment Fiber

L-com's IP67 rated Duplex LC cable assemblies are perfect for industrial networks and harsh environments where protection from moisture, dust, chemicals, corrosive gases and other liquids is essential. These rugged assemblies feature robust outdoor rated cable, which stands up to hostile environments, plus IP67 rated LC connectors. Accessories include bulkhead style adapters where one side is designed for standard LC fiber cable connections and the other will accept the industrial LC connector. Additional caps for both the connector and bulkhead adapter are also available. OM3 rated cables are available online or use L-com's Custom Cable Configurator at L-com.com.

IP68 rated Ruggedized LC Plugs and Receptacles

L-com's Ruggedized IP68 rated LC plugs and receptacles combine the small form factor of a duplex LC fiber connector with the ruggedness of a harsh environment connector. When mated properly or capped, an IP68 rating protects your application from moisture, liquid and dust. The plugs utilize a robust 400lb pull strength and all parts are machined metal with an impressive 450lb crush resistance. These ruggedized parts will survive even the most harsh and demanding environments. Parts are available in Multimode, Single mode or Single mode APC polish to suit all applications. All plugs and receptacles come with dust caps.

9/125 Single mode MPO Fiber Ribbon and Fanout Cables

These multi-fiber MPO assemblies provide significant advantages in size by offering 12 times the density when compared to using separate SC connectors. Fan-out assemblies are ideal for making connections within rack or wall mounted fiber enclosures that utilize single fiber connectors and new Flex boot LC connectors are available for applications requiring a 90° bend or other situation with tight space constraints.

OM1 62.5/125 Multimode Duplex Patch Cords

L-com's OM1 62.5/125 fiber optic cables are 100% optically tested and utilize a PC polish. Check L-com.com for additional lengths, colors and connector options. All cable measurements are in meters. 1m=3.28ft. See L-com's Custom Cable Configurator to make your own length variations of existing cables in any whole foot or meter increment.

Item #	Description	1-9
--------	-------------	-----

OM1 62.5/125 Multimode Fiber Patch Cords

PVC RISER (OFNR) RATED OPTIONS

FODLC-01	OM1 Fiber Cable, Dual LC/Dual LC, OFNR Jacket, Gray, 1.0m	19.70
FODLC-02	OM1 Fiber Cable, Dual LC/Dual LC, OFNR Jacket, Gray, 2.0m	22.13
FODLC-03	OM1 Fiber Cable, Dual LC/Dual LC, OFNR Jacket, Gray, 3.0m	24.35
FODSC-01	OM1 Fiber Cable, Dual SC/Dual SC, OFNR Jacket, Gray, 1.0m	18.89
FODSC-02	OM1 Fiber Cable, Dual SC/Dual SC, OFNR Jacket, Gray, 2.0m	20.98
FODSC-03	OM1 Fiber Cable, Dual SC/Dual SC, OFNR Jacket, Gray, 3.0m	21.83

FODSTC-01	OM1 Fiber Cable, Dual ST/Dual ST, OFNR Jacket, Gray, 1.0m	18.52
FODSTC-02	OM1 Fiber Cable, Dual ST/Dual ST, OFNR Jacket, Gray, 2.0m	19.97
FODSTC-03	OM1 Fiber Cable, Dual ST/Dual ST, OFNR Jacket, Gray, 3.0m	21.42

FODSC-LC-01	OM1 Fiber Cable, Dual SC/Dual LC, OFNR Jacket, Gray, 1.0m	26.25
FODSC-LC-02	OM1 Fiber Cable, Dual SC/Dual LC, OFNR Jacket, Gray, 2.0m	27.46
FODSC-LC-03	OM1 Fiber Cable, Dual SC/Dual LC, OFNR Jacket, Gray, 3.0m	28.92

FODST-LC-01	OM1 Fiber Cable, Dual ST/Dual LC, OFNR Jacket, Gray, 1.0m	28.37
FODST-LC-02	OM1 Fiber Cable, Dual ST/Dual LC, OFNR Jacket, Gray, 2.0m	29.83
FODST-LC-03	OM1 Fiber Cable, Dual ST/Dual LC, OFNR Jacket, Gray, 3.0m	31.29

PLENUM (OFNP) RATED OPTIONS

FODPLC-01	OM1 Fiber Cable, Dual LC/Dual LC, OFNP Jacket, Gray, 1.0m	33.59
FODPLC-02	OM1 Fiber Cable, Dual LC/Dual LC, OFNP Jacket, Gray, 2.0m	34.70
FODPLC-03	OM1 Fiber Cable, Dual LC/Dual LC, OFNP Jacket, Gray, 3.0m	35.89

FODPSC-01	OM1 Fiber Cable, Dual SC/Dual SC, OFNP Jacket, Gray, 1.0m	21.44
FODPSC-02	OM1 Fiber Cable, Dual SC/Dual SC, OFNP Jacket, Gray, 2.0m	21.55
FODPSC-03	OM1 Fiber Cable, Dual SC/Dual SC, OFNP Jacket, Gray, 3.0m	22.68

LOW SMOKE ZERO HALOGEN (LSZH) OPTIONS

FODZLC-01	OM1 Fiber Cable, Dual LC/Dual LC, LSZH Jacket, Gray, 1.0m	42.23
FODZLC-02	OM1 Fiber Cable, Dual LC/Dual LC, LSZH Jacket, Gray, 2.0m	42.28
FODZLC-03	OM1 Fiber Cable, Dual LC/Dual LC, LSZH Jacket, Gray, 3.0m	45.72

FODZSC-01	OM1 Fiber Cable, Dual SC/Dual SC, LSZH Jacket, Gray, 1.0m	17.58
FODZSC-02	OM1 Fiber Cable, Dual SC/Dual SC, LSZH Jacket, Gray, 2.0m	19.40
FODZSC-03	OM1 Fiber Cable, Dual SC/Dual SC, LSZH Jacket, Gray, 3.0m	21.16

OM1 62.5/125 Multimode MPO Fiber Ribbon and Fanout Cables

These multi-fiber MPO assemblies provide significant advantages in size by offering 12 times the density when compared to using separate SC connectors. Fan-out assemblies are ideal for making connections within rack or wall mounted fiber enclosures that utilize single fiber connectors and new Flex boot LC connectors are available for applications requiring a 90° bend or other situations with tight space constraints.

6 or 12 FIBER RIBBON CABLES - MPO to MPO

MPMM60M1-1	OM1 6 Fiber Ribbon Cable, MPO/MPO with Pins, OFNR Jacket, Orange, 1.0m	77.85
MPMM60M1-3	OM1 6 Fiber Ribbon Cable, MPO/MPO with Pins, OFNR Jacket, Orange, 3.0m	86.81
MPMM60M1-5	OM1 6 Fiber Ribbon Cable, MPO/MPO with Pins, OFNR Jacket, Orange, 5.0m	95.75
MPMM60M1-10	OM1 6 Fiber Ribbon Cable, MPO/MPO with Pins, OFNR Jacket, Orange, 10.0m	118.14
MPMM60M1-25	OM1 6 Fiber Ribbon Cable, MPO/MPO with Pins, OFNR Jacket, Orange, 25.0m	185.72
MPMM60M1-50	OM1 6 Fiber Ribbon Cable, MPO/MPO with Pins, OFNR Jacket, Orange, 50.0m	298.01
MPMM60M1-100	OM1 6 Fiber Ribbon Cable, MPO/MPO with Pins, OFNR Jacket, Orange, 100.0m	522.64

MPMM120M1-1	OM1 12 Fiber Ribbon Cable, MPO/MPO with Pins, OFNR Jacket, Orange, 1.0m	89.83
MPMM120M1-3	OM1 12 Fiber Ribbon Cable, MPO/MPO with Pins, OFNR Jacket, Orange, 3.0m	99.68
MPMM120M1-5	OM1 12 Fiber Ribbon Cable, MPO/MPO with Pins, OFNR Jacket, Orange, 5.0m	109.48
MPMM120M1-10	OM1 12 Fiber Ribbon Cable, MPO/MPO with Pins, OFNR Jacket, Orange, 10.0m	134.04
MPMM120M1-25	OM1 12 Fiber Ribbon Cable, MPO/MPO with Pins, OFNR Jacket, Orange, 25.0m	221.05
MPMM120M1-50	OM1 12 Fiber Ribbon Cable, MPO/MPO with Pins, OFNR Jacket, Orange, 50.0m	337.80
MPMM120M1-100	OM1 12 Fiber Ribbon Cable, MPO/MPO with Pins, OFNR Jacket, Orange, 100.0m	588.94

MTPF06-1	OM1 6 Fiber Ribbon Cable, MPO/MPO without Pins, OFNR Jacket, Orange, 1.0m	73.78
MTPF06-3	OM1 6 Fiber Ribbon Cable, MPO/MPO without Pins, OFNR Jacket, Orange, 3.0m	82.74
MTPF06-5	OM1 6 Fiber Ribbon Cable, MPO/MPO without Pins, OFNR Jacket, Orange, 5.0m	91.70
MTPF06-10	OM1 6 Fiber Ribbon Cable, MPO/MPO without Pins, OFNR Jacket, Orange, 10.0m	114.11
MTPF06-25	OM1 6 Fiber Ribbon Cable, MPO/MPO without Pins, OFNR Jacket, Orange, 25.0m	190.80
MTPF06-50	OM1 6 Fiber Ribbon Cable, MPO/MPO without Pins, OFNR Jacket, Orange, 50.0m	305.89
MTPF06-100	OM1 6 Fiber Ribbon Cable, MPO/MPO without Pins, OFNR Jacket, Orange, 100.0m	523.78

MTPF12-1	OM1 12 Fiber Ribbon Cable, MPO/MPO without Pins, OFNR Jacket, Orange, 1.0m	85.77
MTPF12-3	OM1 12 Fiber Ribbon Cable, MPO/MPO without Pins, OFNR Jacket, Orange, 3.0m	95.60
MTPF12-5	OM1 12 Fiber Ribbon Cable, MPO/MPO without Pins, OFNR Jacket, Orange, 5.0m	105.46
MTPF12-10	OM1 12 Fiber Ribbon Cable, MPO/MPO without Pins, OFNR Jacket, Orange, 10.0m	129.98
MTPF12-25	OM1 12 Fiber Ribbon Cable, MPO/MPO without Pins, OFNR Jacket, Orange, 25.0m	212.80
MTPF12-50	OM1 12 Fiber Ribbon Cable, MPO/MPO without Pins, OFNR Jacket, Orange, 50.0m	330.83
MTPF12-100	OM1 12 Fiber Ribbon Cable, MPO/MPO without Pins, OFNR Jacket, Orange, 100.0m	579.38

6 or 12 FIBER FANOUT CABLES - MPO to LC FANOUT

MTPM06-LC-01	OM1 6 Fiber Ribbon Cable, MPO with Pins/6x LC Fanout, OFNR Jacket, Orange, 1.0m	84.96
MTPM06-LC-05	OM1 6 Fiber Ribbon Cable, MPO with Pins/6x LC Fanout, OFNR Jacket, Orange, 5.0m	100.04
MTPM06-LC-10	OM1 6 Fiber Ribbon Cable, MPO with Pins/6x LC Fanout, OFNR Jacket, Orange, 10.0m	125.63

MTPM12-LC-01	OM1 12 Fiber Ribbon Cable, MPO with Pins/12x LC Fanout, OFNR Jacket, Orange, 1.0m	123.42
MTPM12-LC-05	OM1 12 Fiber Ribbon Cable, MPO with Pins/12x LC Fanout, OFNR Jacket, Orange, 5.0m	144.53
MTPM12-LC-10	OM1 12 Fiber Ribbon Cable, MPO with Pins/12x LC Fanout, OFNR Jacket, Orange, 10.0m	173.46

Item #	Description	1-9
6 or 12 FIBER FANOUT CABLES - MPO to LC FLEX BOOT FANOUT		
MPM60M1-FLC-1	OM1 6 Fiber Ribbon Cable, MPO with Pins/6x Flex LC Fanout, OFNR Jacket, Orange, 1.0m	91.51
MPM60M1-FLC-5	OM1 6 Fiber Ribbon Cable, MPO with Pins/6x Flex LC Fanout, OFNR Jacket, Orange, 5.0m	112.08
MPM60M1-FLC-10	OM1 6 Fiber Ribbon Cable, MPO with Pins/6x Flex LC Fanout, OFNR Jacket, Orange, 10.0m	140.75
MPM120M1-FLC-1	OM1 12 Fiber Ribbon Cable, MPO with Pins/12x Flex LC Fanout, OFNR Jacket, Orange, 1.0m	138.26
MPM120M1-FLC-5	OM1 12 Fiber Ribbon Cable, MPO with Pins/12x Flex LC Fanout, OFNR Jacket, Orange, 5.0m	161.91
MPM120M1-FLC-10	OM1 12 Fiber Ribbon Cable, MPO with Pins/12x Flex LC Fanout, OFNR Jacket, Orange, 10.0m	194.30

OM1 62.5/125 Multimode LC Loopback

L-com's OM1 LC loopback cable is handy for a number of test applications. A generous yet manageable fiber loop virtually eliminates bend loss.

FOL-LC	OM1 Fiber Loopback, Clipped LC	17.81

Fiber Optic Multimode Couplers/Adapters

Single mode Options Located on pages 208, 209, 218

Need to join two multimode cables with the same connector types? Use these fiber optic couplers which utilize durable bronze sleeves best suited for multimode applications.

Item #	Description	Body	Sleeve	1-9
LC, MPO, SC and ST STYLES (see L-com.com for additional styles and options)				
FOA-802	Duplex LC Coupler with Mounting Flange	Plastic	Bronze	7.04
FOA-803	Duplex LC Coupler, Low Profile	Plastic	Bronze	4.70
FOA-560	Quad LC Coupler with Mounting Flange	Plastic	Bronze	18.66
FOA-MPO	MPO Coupler	Plastic	N/A	22.57
FOA-MPOF	MPO Coupler with Mounting Flange	Plastic	N/A	22.57
FOA-002	Simplex SC Coupler with Mounting Flange	Plastic	Bronze	4.62
FOA-002M	Simplex SC Coupler with Mounting Flange	Metal	Bronze	6.13
FOA-005	Duplex SC Coupler with Mounting Flange	Plastic	Bronze	6.54
FOA-005M	Duplex SC Coupler with Mounting Flange	Metal	Bronze	9.62
FOA-001	Simplex ST Coupler with D-Hole Mount	Metal	Bronze	3.45
FOA-011	Simplex ST Coupler with Rectangular Mount	Metal	Bronze	3.76
FOA-401	Duplex ST Coupler with Mounting Flange	Metal	Bronze	5.85

Need to change from one type of multimode connector to another? Use these fiber optic adapters.

LC, SC and ST STYLES (see L-com.com for additional styles and options)

FOA-020C	Simplex LC/SC Adapter with Mounting Flange	Plastic	Bronze	37.17
FOA-211	Simplex ST/SC Adapter with Rectangular Mount	Metal	Bronze	6.02
FOA-201	Simplex ST/SC Adapter with Square Mount	Metal	Bronze	10.27
FOA-006M	Duplex ST/SC Adapter with Mounting Flange	Metal	Bronze	12.31

Bulk Fiber Optic Cabling - Sold by the Meter (1m = 3.28ft)

L-com offers the most popular types of Simplex, Duplex, Breakout and Distribution style cables. All are available from stock in 1 meter intervals with a 25 meter minimum unless otherwise noted. Other cabling types are available by request. Jacket color of bulk cable may vary. Contact L-com today for custom termination of bulk cable. **NOTE:** Bulk cable custom lengths are non-returnable.

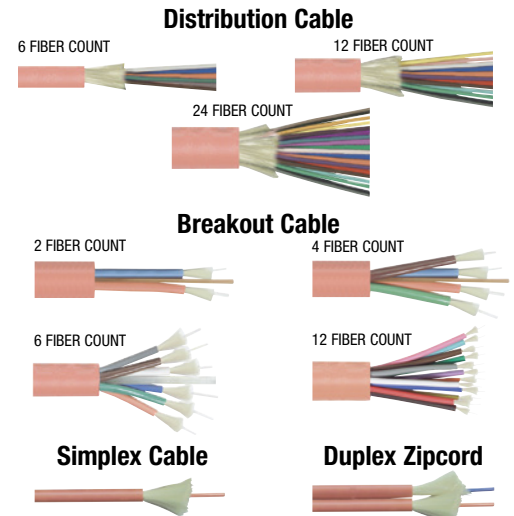

Item #	Description	Color	1-9

OM2 50/125 Multimode LC Loopback

L-com's OM2 LC loopback cable is handy for a number of test applications. A generous yet manageable fiber loop virtually eliminates bend loss.

FOL50-LC	OM2 Fiber Loopback, Clipped LC	17.81
----------	--------------------------------	-------

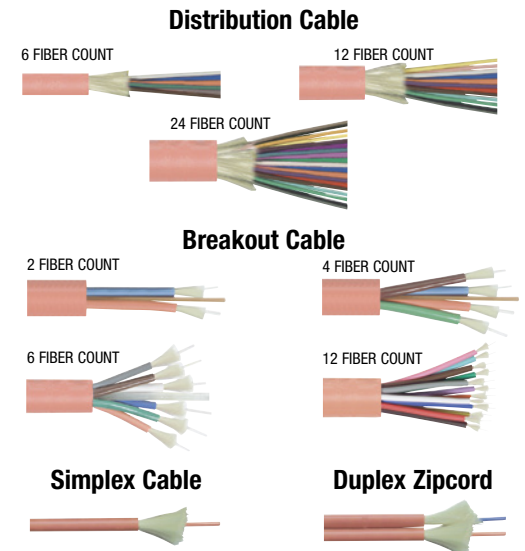

Bulk Fiber Optic Cabling - Sold by the Meter (1m = 3.28ft)

L-com offers the most popular types of Simplex, Duplex, Breakout and Distribution style cables. All are available from stock in 1 meter intervals with a 25 meter minimum unless otherwise noted. Other cabling types are available by request. Jacket color of bulk cable may vary. Contact L-com today for custom termination of bulk cable. **NOTE:** Bulk cable custom lengths are non-returnable.

Tip OM1, OM3, 10 Gig, Multimode, Single mode, Laser Optimized ... What does it all mean?

In today's world of fiber optics many choices are available when choosing fiber optic cable types. Depending on the type of fiber cable and transceiver specification, different distances and speeds are supported per technology (i.e. 100Base FX, 1 Gigabit, 10 Gigabit etc). The size of the fiber core, bandwidth requirements and transceiver wavelengths (i.e. 62.5/125, 850nm) are some of the considerations when designing a network with fiber. The transceiver is the driving force behind a fiber network and its specifications will generally determine what type of fiber cable is required. Always check the manufacturer's transceiver specifications for the equipment you are buying fiber cables for to get the best recommendation about the type of fiber you require.

The chart below outlines some of the common specifications and typical distance/speed limitations for the most popular fiber types.

	Typical Wavelength	1 Gig Typical Distance Limitation	10 Gig Typical Distance Limitation	100 Gig Typical Distance Limitation
OM1, 62.5/125 Multimode	850/1310nm	280m (918ft)	33m (108ft)	n/a
OM2, 50/125 Multimode	850/1310nm	550m (1,804ft)	82m (269ft)	n/a
OM3, 10Gig Rated 50/125 Multimode	850/1310nm	800m (2,624ft)	300m (984ft)	100m (328ft)
OM4, 100Gig Rated 50/125 Multimode	850/1310nm	1040m (3,411ft)	550m (1,804ft)	150m (492ft)
OS1/OS2, 9/125 Single mode	1310/1550nm	100km (62miles)	70km (43.5miles)	40km (25miles)

See L-com's Custom Cable Configurator to make your own length variations of existing cables in any whole foot or meter increment.

OM3 10 Gig Rated, Laser Optimized 50/125 Multimode Duplex Patch Cords

L-com's OM3 10 Gig rated 50/125 fiber optic cables are 100% optically tested and utilize a PC polish. Check L-com.com for additional length, color and connector options. All cable measurements are in meters. 1m=3.28ft.

How to clean fiber cable

Online Video

L-com.com/videos/A05

Tip Check out L-com's Custom Cable Configurator

We understand that many applications require specific and precise lengths and connector combinations that off-the-shelf cables often don't address. We created our Custom Cable Configurator to meet this need. Found on L-com.com/productconfigurator, the Custom Cable Configurator will let anyone create a custom cable in just 4 easy steps.

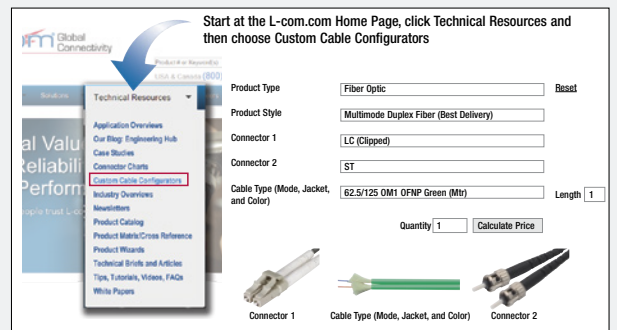

Step 1: Go to L-com's Home Page

Step 2: Click Technical Resources

Step 3: Choose Custom Cable Configurators

Step 4: Follow the drop-down menus and make your choices

The Configurator allows you to create a cable in any whole number length in feet, meters or inches (length options may vary by cable type). You can also select your own connector options to choose what you need for each end of the cable. There is no minimum order requirement for fiber or coax cables and many assemblies can be produced in less than one week. Current configurable options include fiber optic, low-loss coaxial, RG style coaxial and modular Ethernet assemblies. Give L-com a call today and one of our trained reps will be happy to walk you through the menus to get you exactly what you are looking for.

OM4 100 Gig Rated, Laser Optimized 50/125 Multimode Duplex Patch Cords

L-com's OM4 100 Gig rated 50/125 fiber optic cables are 100% optically tested and utilize a PC polish. Check **L-com.com** for more length, color and connector options. Cable measurements are in meters, 1m=3.28ft. See L-com's Custom Cable Configurator to make your own length variations of existing cables in any whole foot or meter increment.

Bulk Fiber Optic Cabling - Sold by the Meter (1m = 3.28ft)

L-com offers the most popular types of Simplex, Duplex, Breakout and Distribution style cables. All are available from stock in 1 meter intervals with a 25 meter minimum unless otherwise noted. Other cabling types are available by request. Jacket color of bulk cable may vary. Contact L-com today for custom termination of bulk cable. **NOTE:** Bulk cable custom lengths are non-returnable.

Item #	Description	Color	1-9
--------	-------------	-------	-----

OM4 100 Gig Rated, Laser Optimized 50/125 Multimode Bulk Fiber Cable

DISTRIBUTION STYLE WITH 900µm SUB UNITS (153 meter minimum)

FOBOM4Z-M	OM4 Duplex (Zipcord) Indoor OFNR Bulk Fiber Cable, 3mm OD	Aqua	3.13

Colored Fiber Patch Cords

Looking for a duplex fiber assembly in a non-standard color or to differentiate between similar cables of the same model without hard to read cable labels? You can do that easily with L-com's colored fiber assemblies. Different colored jackets make it a snap to visually identify a cable. All cables have OFNR (Riser) jackets and utilize PC polish connectors. See L-com.com for complete listings and use L-com's custom cable configurator to create your own custom lengths.

Item #	Description	1-9
--------	-------------	-----

9/125 Single mode Colored Duplex Patch Cords

LC configurations shown below; see L-com.com for SC or ST listings

Available in Blue, Green, Orange or Red (see standard offerings for Yellow)

SFODLC--01	Single mode Fiber Cable, Clipped LC/Clipped LC, OFNR Colored Jacket, 1.0m	23.87
SFODLC--03	Single mode Fiber Cable, Clipped LC/Clipped LC, OFNR Colored Jacket, 3.0m	25.92
SFODLC--05	Single mode Fiber Cable, Clipped LC/Clipped LC, OFNR Colored Jacket, 5.0m	28.08
SFODLC--10	Single mode Fiber Cable, Clipped LC/Clipped LC, OFNR Colored Jacket, 10.0m	36.56

OM1 62.5/125 Multimode Colored Duplex Patch Cords

LC configurations shown below; see L-com.com for SC or ST listings

Available in Blue, Green, Orange, Red or Yellow (see standard offerings for Gray)

FODLC--01	OM1 Fiber Cable, Clipped LC/Clipped LC, OFNR Colored Jacket, 1.0m	21.60
FODLC--03	OM1 Fiber Cable, Clipped LC/Clipped LC, OFNR Colored Jacket, 3.0m	23.76
FODLC--05	OM1 Fiber Cable, Clipped LC/Clipped LC, OFNR Colored Jacket, 5.0m	27.22
FODLC--10	OM1 Fiber Cable, Clipped LC/Clipped LC, OFNR Colored Jacket, 10.0m	35.05

OM2 50/125 Multimode Colored Duplex Patch Cords

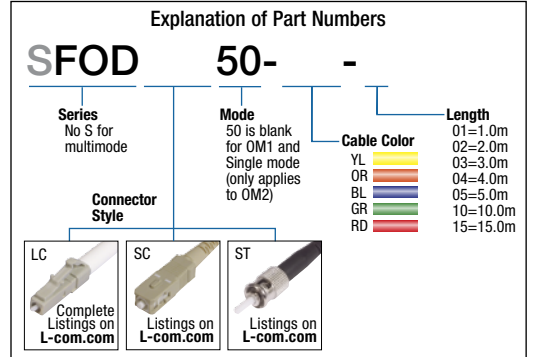

LC configurations shown below; see L-com.com for SC or ST listings

Available in Blue, Green, Red or Yellow (see standard offerings for Orange)

FODLC50--01	OM2 Fiber Cable, Clipped LC/Clipped LC, OFNR Colored Jacket, 1.0m	23.60
FODLC50--03	OM2 Fiber Cable, Clipped LC/Clipped LC, OFNR Colored Jacket, 3.0m	25.97
FODLC50--05	OM2 Fiber Cable, Clipped LC/Clipped LC, OFNR Colored Jacket, 5.0m	27.22
FODLC50--10	OM2 Fiber Cable, Clipped LC/Clipped LC, OFNR Colored Jacket, 10.0m	35.05

A and B markers make the connection

The "A" and "B" markers on duplex fiber jumpers assist in the proper connection between two transceivers. The transmit (Tx) port of one transceiver connects to the Receive (Rx) port of the second transceiver as illustrated at right. It is important to determine how the individual fibers in a duplex assembly are marked (A to A or A to B) to assure proper connections are made between the Tx and Rx ports of the transceivers. L-com's cables are labeled A to B.

A and B markers explained

Bend Insensitive Fiber Patch Cords with Flex Boot LC or SC Connectors

These Flex Boot assemblies are designed to fit in tight spaces and in applications where a non-standard angle of connection is required. These patch cables are built using Bend-Insensitive fiber and feature OFNR (Riser) jackets along with LC or SC style Flex Boot connectors. These special boots can be bent in any angle up to 90° without exceeding the bend tolerance of the cable. Bend them into the angle that best fits your application. All connectors are PC polish. Please see L-com.com for complete listings and use L-com's custom cable configurator to create your own custom lengths.

Tip L-com's Flex Boot fiber connectors explained

Did you know L-com's Flex Boot fiber connectors can be bent in any direction from 180° to 90° without negatively affecting the performance of the fiber? They are great for connector stacking (shown right), tight spaces and right angles. They are also built using Bend Insensitive cable which has superior bend performance with negligible signal loss, even with a very small bend radius.

Military Grade Fiber Optic Solutions

L-com's Military Grade fiber optic patch cables are built with specialized Military Tactical cable that features impact and crush resistance characteristics which comply with Military requirements. These robust assemblies are rated for operating temps of -55° to +85° C. They are available in both single mode and multimode options with ST, LC or SC connector options. ST assemblies feature rust resistant stainless steel bodies and extra high force springs to ensure tight mating even when exposed to shock and vibration as often encountered in the field under combat conditions. These cables are perfect for rough field conditions or other outdoor use. Custom lengths can be created with L-com's Custom Cable Configurator at L-com.com.

MIL-C-83522 ST Connectors and Dust Caps

L-com's Mil ST line of connectors meet or exceed 100% of the requirements of military specification MIL-C-83522 including extreme temperature change, shock, vibration and corrosion making them ideal for military, aircraft, spacecraft, shipboard and land based applications. These connectors are designed to be used with 2mm cable. For use with 2.5 or 3mm cable, please purchase crimp ferrule CF83522 separately. Locking versions prevent accidental disconnects from high shock or vibration environments.

FOC-M83522-ANXB	MIL M83522 ST Connector, Multimode, Locking, Nickel Plated Brass for 2mm Fiber	36.52
FOC-M83522-ANYB	MIL M83522 ST Connector, Single mode, Locking, Nickel Plated Brass for 2mm Fiber	38.57
FOC-M83522-DNXX	MIL M83522 ST Connector, Multimode, Non-Locking, Nickel Plated Brass for 2mm Fiber	19.04

DSTCP-RSTS	ST Dust Cap for MIL and Ruggedized COTS Connectors, Stainless Steel with Lanyard	27.27

MIL-C-83522 ST Couplers and Dust Caps

These ST couplers are fully qualified to MIL-C-83522 standards ensuring the highest performance for an ST connector. These are designed to work with L-com's FOC-M83522 line of connectors but will also work with standard or COTS ST connectors. Couplers are compatible with both multimode and single mode applications.

FOA-M83522-YB	MIL M83522 ST Coupler, Multimode and Single mode, Nickel Plated Brass	21.53
FOA-M83522-YS	MIL M83522 ST Coupler, Multimode and Single mode, Stainless Steel	42.79
DSTCP-RSTADPTN	ST Dust Cap for MIL and Ruggedized COTS Couplers, Nickel Plated Brass with Lanyard	21.80
DSTCP-RSTADPTS	ST Dust Cap for MIL and Ruggedized COTS Couplers, Stainless Steel with Lanyard	24.72

9/125 Single mode APC Couplers

In order to achieve low back reflection values, some fiber assemblies utilize a connector with an APC (Angled Physical Contact) connector. These APC connectors require special couplers that have tight tolerance alignment slots to assure proper orientation of the mated APC connectors. These APC couplers are specifically designed for this application.

Item #	Description	Body	Sleeve	1-9

Fiber Optic Adapter Kits

FOA-123	Fiber Optic Bulkhead Coupler Kit	22.24
FOA-321	Fiber Optic Coupler/Adapter Kit	113.87

Fiber Optic Couplers and Adapters

These devices are used to join together individual connectorized fiber assemblies. They are often used in a patch panel and are mounted on sub-panels. If the two fiber assemblies to be connected have the same style fiber connectors (ST to ST,

SC to SC, etc.) then the connecting device is called a coupler. If the two fiber assemblies to be connected have different style connectors (ST to LC, SC to LC) then the connecting device is called an adapter.

Fiber Optic Coupler/Adapter Selection Matrix

Use this matrix to locate the fiber optic coupler or adapter with the desired interface combination and with the appropriate body and alignment sleeve material.

If a specific type is not listed, please visit our web site at **L-com.com** for the latest information or call our technical support group at **800-343-1455** for assistance.

	SC to LC				FOA-020C	FOA-014							

Tip What are alignment sleeves?

The alignment sleeve is the most critical component of a fiber optic adapter. Bronze sleeves are more durable but the precision is not as good as ceramic. Ceramic ferrules offer a more precise alignment, but they are somewhat less durable. Bronze alignment sleeves are commonly used in multimode applications where precision alignment is not as critical.

Cavity for alignment sleeve

- CERAMIC**
- Better alignment
 - More expensive
 - Typically single mode

- BRONZE**
- Better durability
 - Less expensive
 - Typically multimode

LC and SC Fiber Connector Field Termination Kit

The XPFIT-Kit connector installation kit contains everything needed to install LC or SC XPFIT connectors onto standard 900µm cable. Kit includes a fiber stripper for 250µm or 125µm fiber, a thermal buffer removal tool, replacement blades, a precision cleaver, lint free dry wipes, a fiber optic cleaning pen, Kevlar scissors, a fiber disposal unit, a fine permanent marker pen, a light source fiber checker, a 2.5mm to 1.25mm adapter and a soft carrying case to hold it all. No epoxy, polishing film or other consumables are required and there is no need for electrical power, allowing installers to get in and out of installation sites quickly and efficiently. Connectors can be terminated in less than 2 minutes.

Item #	Description	1-9
XPFIT-KIT	Fiber Optic LC/SC Field Termination Kit	1437.28

LC and SC Field Terminable Fiber Connectors

XPFIT Plus LC and SC connectors are pre-polished, pre-assembled connectors that can be terminated reliably in the field with little equipment or expertise. Each connector contains index matching gel and utilizes an internal mechanical grip to gently but effectively hold the fiber in place for installation, eliminating the need for costly splicing equipment or curing ovens. Plugs exceed TIA/EIA-568-B.3 standards. Each 12 pack of connectors comes with an assembling jig and fiber holder for 900µm tight buffered fiber as well as boots for each connector. Used with the XPFIT-KIT (sold separately), fiber termination in the field is easy and painless. See **L-com.com** for full installation instructions.

How to clean fiber cable

Online Video

L-com.com/videos/A05

F01

F01REF

Tip Avoid the number one cause of fiber optic network failure

In fiber optic networks, the number one cause of network failure is not cable breakage, it's actually dirty or damaged connectors.

In a fiber optic coupling, connectors are in physical contact with each other. Picture a small rock placed between two pieces of glass and then pressed together. This is similar to what a particle of dust is in relation to the glass fiber. Note that a typical fiber's glass core is 1/10 to 1/2 the diameter of a human hair so a little dust can go a long way towards obstructing an optical signal. At right are images of common problems found on connectors installed in the field.

Connectors need to be cleaned before any connection is made. If the cable is disconnected, it needs to be cleaned again. This is a simple process especially with the Senko SMART Cleaners. Just insert the cleaner into the port and then use the same cleaner on the cable connector.

Note: One of the dust particles is larger than the fiber in the center of the connector. This dust, if it covered the fiber, would completely block the light from passing through.

Item #	Description	List Price
--------	-------------	------------

Fiber Optic Cleaner for SC, FC, and ST Connectors

The Senko Fiber Optic Cleaner for SC, FC and ST simplex connections is a dry cloth cleaner specially designed to clean single fiber connectors. The dust cap of the cleaner acts as an adapter for cleaning unmated connectors. The FOC-SS250 Fiber Optic Cleaner is simple, easy to use and highly effective at removing oil and dust contaminants that can inhibit optical performance. Cleaner gets more than 750 cleanings per unit.

FOC-SS250	Fiber Optic Cleaner for SC, FC and ST Connectors	80.92
-----------	--	-------

Fiber Optic Cleaner for LC and MU Connectors

Working with LC connectors often means technicians are faced with a high density of the connectors, making it difficult to get in between to service and clean them. Using Senko's Fiber Optic Cleaner specifically made to be used with LC connectors is the perfect solution with its thin, extendable shaft that can easily get into hard to reach areas. Cleaner gets more than 750 cleanings per unit.

FOC-SS125	Fiber Optic Cleaner for LC and MU Connectors	80.92
-----------	--	-------

Fiber Optic Cleaner for MPO Connectors

MPO has become a popular interface in data centers due to its high density of connections in a very small form factor. This makes it extra important to keep your MPO cables and ports clean for the best performance of your network. This easy to use cleaner will remove dirt, oil and debris from MPO connectors and ports. Its extended shaft makes it easy to get into hard to reach places without having to un-mate nearby connectors. The cleaner is disposable and gets over 600 cleanings per unit.

FOC-SS-MPO	Fiber Optic Cleaner for MPO Connectors	89.90
------------	--	-------

Fiber Optic Consumables - Commonly Used Fiber Optic Cleaning Components

Cleaning fiber optic connections is crucial for proper optical transmission. Compressed air is great for cleaning couplers and connector ends. Kimwipes are lint free tissues, commonly used for cleaning glass surfaces.

FOC-CA	Compressed Air, 12 oz. Can	11.85
FOC-KN	4.5" x 8.5" (11.4cm x 21.6cm) Box Kimwipes, 280 Count	6.25
FOC-AP	Pre-moistened Alcohol Pads, 20 Count	11.63

Fiber Optic Pulling Eye for Duplex Cable Assemblies

A pulling eye is used to protect the terminated end of fiber cable assemblies when pulling through walls or ceilings. 16" long x 0.75" (40.6 x 1.9 cm) diameter plastic tube fits most cables with two connectors.

FOC-EYE	Dual Fiber Pulling Eye	33.31
---------	------------------------	-------

Hellermann-Tyton Fiberclean - Fiber Optic Connector Cleaning System

This is a convenient, economical and easy to use cleaning dispenser system for your fiber optic connectors. This hand held device exposes a portion of "ultra white", non-woven, lint free material sufficient to clean up to six connectors. Used cleaning material is dispensed out of the back of the unit. Up to 400 connectors can be cleaned with a single dispenser.

F01	Fiberclean Dispenser with Cleaning Film	23.25
F01REF	Fiberclean Cleaning Film Refills	18.09

Keep fiber cables clean to maintain performance

It is critically important for fiber optic connectors to be free of dust and dirt to maintain optimum performance. A simple and effective way to do this is to clean the ends of your fiber optic cables often when they are disconnected, as illustrated.

Softly press fiber tip in cleaning window using a figure 8 motion.

Repeat 3 times, inspecting fiber tip for cleanliness.

Tip Fiber enclosures secure sub-panels and cables

STEP 1

Install snap-in sub-panel with couplers.

STEP 2

Prepare distribution cable for installation on rear of panel by sliding tray out of case, either from the front or rear.

STEP 3

Attach feed cables to couplers on rear of panel.

STEP 4

Route and attach patching jumpers to couplers on front of panel.

STEP 5

Slide tray back into case.

STEP 6

Close cover on unit.

Patch Panels/Racks Tutorial

What are racks, enclosures and patch panels?

Racks, enclosures and patch panels are typically constructed of steel, sheet metal and plastic and are used to secure and organize cables and communications equipment in a data center.

How are racks, enclosures and patch panels used?

Patch panels are screwed into the racks and enclosures. Patch panels are populated with couplers and adapters of various types which allow connection points for patch cables.

Where are racks, enclosures and patch panels used?

Racks, enclosures and patch panels are mostly used in data closets and larger data centers and are used by commercial business, governments, the military and many other industries.

Rack and Enclosure Construction

The racks and enclosures manufactured by Middle Atlantic Products have been designed specifically to address both the needs of the equipment that is being mounted, as well as to address any limitations or restrictions of the jobsite. In addition, these racks are contractor-friendly and have been designed with many essential time-saving features.

Thermal Management Best Practices

PROPER PASSIVE CONVECTION with front-intakes on equipment

PROPER FORCED AIR with front-intakes on equipment

Server Cabinet

WMRK Series

- Fully vented front and split rear doors
- Fully vented top
- Temperature sensor
- Cable management
- Power distribution
- Cage nut rackrail
- Hardware
- Other options available

Security Cabinet

WRK Series

- Fully welded construction, open sides
- 2,500 lb (1136.4kg) weight capacity
- Seismic certified (1994 UBC for seismic zone 4) for protecting 1,000 lbs (454.5kg) of essential equipment when used in conjunction with the WRK-Z4 brackets
- Generous 24.25" (61.6cm) OD width provides room for cables
- 2 extra-wide pairs of 10-32 threaded rackrail standard
- Grounding and bonding stud installed in base

Network Cabinet

DRK Series

- 30" (76.2cm) OD width, 31.5" (80cm), 36" (91.4cm) and 42" (106.7cm) OD depth
- Fully welded construction provides a 2,500 lb (1136.4kg) weight capacity
- Seismic certified (UBC 1997 & CBC 1998 Zone 4; IBC 2000, IBC 2003, ASCE7-01, NFPA 5000 Seismic Use Group III) for protecting 750 lbs (340.9kg) of essential equipment when used in conjunction with the MRK-Z4 brackets
- Vented rear door standard
- .125" (0.3cm) thick structural steel internal braces include 100 rack screws
- Grounded and bonding stud installed in base

19" (48.3cm) Relay/Frame Racks - Rugged Telecom Equipment and Patch Panel Mounting

For the highest quality rack system choose the Middle Atlantic 19" (48.3cm) Relay Rack. Constructed with 11-gauge 10-32 threaded steel side channels, this rack can handle up to 400 lbs (181.8kg) of equipment and cabling. Incorporating a self-squaring, self-leveling design greatly reduces assembly time. Unique gusseted base means no shimming on uneven floors.

Item #	Description	List Price
Single, Two, Three or Four Panel DIN Rail Termination Enclosure - For Easy Cable Mounting at the Workplace		
Use this simple enclosure for terminating fiber cabling within industrial workplaces or anyplace that needs a small cable drop. The unit mounts to 35mm DIN Rail allowing cable entry from the top. The DIN connector is also removable for mounting to walls, etc. FSP Series Sub-Panels mount to the front of the enclosure for quick and easy cable termination. Built from .060" (16 ga) Cold Rolled Steel. Color: black.		
FSP-1DIN	DIN Rail/Wall Mount Termination Enclosure for 1 FSP Series Sub-Panel	81.28
FSP-2DIN	DIN Rail/Wall Mount Termination Enclosure for 2 FSP Series Sub-Panels	112.54
FSP-3DIN	DIN Rail/Wall Mount Termination Enclosure for 3 FSP Series Sub-Panels	130.23
FSP-4DIN	DIN Rail/Wall Mount Termination Enclosure for 4 FSP Series Sub-Panels	140.65

19" (48.3cm) Rack Panels Accept 3, 6 or 12 FSP Series Sub-Panels

This series of 19" (48.3cm) rack panels accepts any of our FSP Series Sub-Panels. They snap into place using push button rivets which allow for easy installation or removal of the sub-panels. Built from .060" (0.2cm) (16 ga) cold rolled steel, these panels are rugged and economically priced. Rear cable management option is available as an accessory. Color: black.

PR175-FSP-3	1.75" (1U) (4.4cm) Rack Panel for 3 FSP Series Sub-Panels	34.37
PR35-FSP-6	3.50" (2U) (8.9cm) Rack Panel for 6 FSP Series Sub-Panels	41.66
PR525-FSP-12	5.25" (3U) (13.3cm) Rack Panel for 12 FSP Series Sub-Panels	48.96
PR-CMB	Cable Management Bracket Kit for 19" (48.3cm) Panels (One 19" Crossbar, 6 Management Brackets, 18 Flathead Screws)	57.29

Tip The PR-CMB cable management kit is designed for maximum flexibility.

A unique extension and crossbar design permits side and rear cable routing. All surfaces are perforated for ample cable tie points.

Rear Crossbar: Useful for reducing connector stress from hanging cable lengths.

Management Brackets: Enable cable routing and provide ample tie-down points.

Sub-Panels Used to Populate FSP Series Patch Panels, FE & FSP DIN Rail Mount Enclosures

These versatile sub-panels are used to populate L-com's FE Series Wall Mount & Rack Mount Fiber Enclosures, FSP Series Rack Panels and FSP DIN-Rail Mount Enclosures. Offered in a variety of connector types in Simplex, Duplex and Quad configurations. Ceramic sleeve versions are primarily used in single mode applications while multimode applications typically utilize the bronze sleeve configuration. These units feature a black finish with snap on mounting for easy installation and removal.

Fiber Sub-Panel with 6 LC Keyed Multimode Couplers

These sub-panels are used to populate L-com's FE Series Wall Mount & Rack Mount Fiber Enclosures, FSP Series Rack Panels and FSP DIN-Rail Mount Enclosures. Secured, keyed, LC adapters are designed specifically for mission critical circuits where networks are segregated by color for identification and protected from accidental moves, adds, or changes. They offer mechanical network security for organizations desiring to segregate networks because of privacy or security concerns. Note: The couplers in these sub-panels are designed to only work with L-com's Keyed LC Patch Cords.

Tip What is Impedance?

Impedance is a measurement of opposition to the flow of current within a cable. Two of the most common impedance values used in coaxial cable are 50 Ohms primarily used for data transmission and 75 Ohms primarily used for video transmission. In twisted pair cable, common impedance values are 100 and 120 Ohms.

L-com offers system designers a complete selection of panel configurations for data and serial connections. Each panel features a numerical legend below each port. This allows users a fast and simple way to identify ports for their equipment. Our panels are made with .060 inch (16 ga) cold-rolled steel and finished with a durable black powder coat. An optional cable management bracket kit used on the rear of the panel gives a secure place to tie off cable bundles and prevent connector fatigue. Panels are available with USB, D-Sub or HDMI style couplers.

Tip Build Custom Panels with L-com's Universal Sub-Panel System

STEP 1

Start with the Master Rack Panel, UPR35-6B.

STEP 2

Now select a ready made sub-panel that works with your rack panel.

STEP 3

Using a Phillips or Flat screwdriver, install your sub-panels in the master rack panel.

Universal Master Rack Panel with 6 Openings

L-com's Universal Master Rack Series offers installers the ability to customize their installation with different connections within a single rack panel. The Universal Series panels can save time, money and rack space in an installation project. The master panels feature six punched rectangular openings that will accept any of the numerous USP Series sub-panels shown in this catalog. Sub-panel openings are 2.20" x 2.75" (5.6cm x 7.0cm).

Universal Series Blank Sub-Panels

Universal Series blank sub-panels can be used to cover unused openings or may be used to customize a panel assembly. These panels come in 3 different styles for users to choose from: black anodized aluminum, white high impact plastic or black steel. The aluminum and plastic panels offer the easiest option for custom drilling or punching holes. The black steel panels are constructed of sturdy .060 inch (0.2cm) (16 ga) cold rolled steel for durability. Each sub-panel is equipped with four pre-tapped holes to accept the four 6-32 mounting screws which are supplied.

Universal Series Sub-Panels Featuring Telecom/Network Grade Connections

The Universal sub-panel series offers connections for telecom and network equipment. Choose between Category 3, Category 5e or Category 6 rated connections either shielded or non-shielded. Panel choices offer both feed-thru style couplers and jacks with 110 style punch terminations. Either 2 or 4 connections per panel can be chosen and blank panels are available for further customization. All panels are black steel and come equipped with four pre-tapped holes to accept the four 6-32 mounting screws which are supplied.

Switching Power Supplies, Power Cords, PoE Power Supplies and Lighter Power Adapters

We offer a broad range of switching power supplies which support 110/220 VAC operation. Models in this series include 9 VDC, 12 VDC, 15 VDC and 48 VDC options. Additionally, PoE power supplies are available which provide data and power over a single Cat5 cable to end devices which are compliant with IEEE standard PoE pinout (Pins 4 & 5 Power +/Pins 7 & 8 Power -).

Middle Atlantic 19" x 1.75" (48.3 x 4.4cm) Rackmountable Power Distribution Unit with Surge Protection

The PD-915R rackmount power distribution unit is equipped with 8 rear outlets and one front outlet. Standard equipment includes surge and spike protection, EMI filtering and a 9 foot cord. A generous 8.75" (22.2cm) depth offers easy access to the 15 amp rear panel outlets which are solidly mounted on yokes to eliminate deflection. An illuminated combination power switch/circuit breaker is located on the front panel. Occupies one rackspace, finished with a durable black powder coat. UL recognized, listing pending. **As an authorized Middle Atlantic reseller, we can bid on RFQs for any Middle Atlantic part numbers. Contact us to request a non-obligatory quote.**

Item #	System Type	Number of Outlets	Dimensions (Inches)	Rack Mounting	Shipping Weight	Price

Tripp Lite 16 and 24 Outlet Power Strips with Surge Suppression

These Tripp Lite power strips with AC surge suppression offer a convenient method of horizontal or vertical power distribution in equipment racks, computer rooms, workbenches, raceways and more. By utilizing these power strips you can protect connected equipment from transient surges and line noise with built-in surge suppression rated at 450 joules. Corded, multi-outlet strip reduces cabling clutter and enables the connection of multiple electrical devices to a single AC wall socket. Features rugged all-metal housing, lighted power switch with transparent guard to prevent accidental shutoff, 15A resettable circuit breaker and attractive gray housing with black output receptacles. **As an authorized Tripp Lite reseller, we can bid on RFQs for any Tripp Lite part numbers. Contact us to request a non-obligatory quote.**

Tripp Lite Network and Telephone Surge Suppressors

Protecting equipment at the power input is not complete protection. Static discharge, lightning and faulty wiring can send damaging surges through data ports. This vulnerability can be easily eliminated with an inline suppressor. In considering the cost of replacing damaged equipment and resultant lost productivity, the cost of protection is truly small. Two-year manufacturer's warranty. **As an authorized Tripp Lite reseller, we can bid on RFQs for any Tripp Lite part numbers. Contact us to request a non-obligatory quote.**

Tripp Lite Network Grade Rackmount Surge Suppressor

Tripp Lite's IBAR12 offers network-grade surge and noise suppression in a versatile all-metal multi-mount cabinet. Detachable mounting flanges are configurable for rackmount (1U), wallmount and under-counter installation. Features network grade AC surge suppression with EMI/RFI noise filtering. Outlets are arranged in exclusive isolated filter banks to limit noise interaction among connected items. Includes 12 outlets (2 front/10 rear), 15 ft AC power cord and guarded power switch to reduce the risk of accidental shutoff. Diagnostic LEDs indicate AC present, line fault and protection status. **As an authorized Tripp Lite reseller, we can bid on RFQs for any Tripp Lite part numbers. Contact us to request a non-obligatory quote.**

Note: This power strip does not provide surge or line noise protection.

Tripp Lite Internet Office Series Power Back-up System

Tripp Lite's Internet Office standby UPS systems offer complete protection from blackouts, brownouts and transient surges on both AC and dialup modem lines. The Internet Office offers complete power protection in an ultra-compact, flat-pack housing. Includes 3 battery supported outlets for computer, monitor and one vital system peripheral, plus 3 additional surge suppression-only outlets for printers and other system accessories not requiring battery support. A built-in single line RJ11 phone suppression jacks protect modem, fax machine, cordless phone or other peripheral with standard dialup phone connection. **As an authorized Tripp Lite reseller, we can bid on RFQs for any Tripp Lite part numbers. Contact us to request a non-obligatory quote.**

Tripp Lite SmartOnline UPS Series

Tripp Lite's SmartOnline UPS Systems provide the highest level of power protection for mission-critical applications. True on-line operation completely isolates connected equipment from all power problems: blackouts, brownouts, surges, line noise, even harmonic distortion. Double-conversion operation continually converts incoming AC power into DC power, and then resynthesizes it back into normal AC power. **As an authorized Tripp Lite reseller, we can bid on RFQs for any Tripp Lite part numbers. Contact us to request a non-obligatory quote.**

Tripp Lite Eco Series Energy-Saving Standby UPS System

The ECO550UPS, by Tripp Lite, is comprised of four battery back and surge suppression outputs and four surge suppression-only outputs, three of which offer an intelligent, power-saving design that power off any attached unused equipment. As well as a USB port (cable included) allowing for built-in power management and automatic shutdown, controlled via Tripp Lite's free PowerAlert software. Convenient audible alarm and front panel L.E.D.s offer easy status information regarding line and battery operation. The unit's 550VA/300W power allows entry-level PCs power for up to 17 minutes, mitigating data loss and allowing time for shutdown. **As an authorized Tripp Lite reseller, we can bid on RFQs for any Tripp Lite part numbers. Contact us to request a non-obligatory quote.**

Ethernet Media Converters Tutorial

What is an Ethernet Media Converter?

An Ethernet Media Converter is a network device used to extend network connection beyond the 100 meter maximum segment length of traditional copper UTP/STP Ethernet cabling. It is also useful if EMI/RFI emissions or interference are of concern as the device will convert the electrical data signals into light pulses that will travel over the fiber optic cabling. This has two additional benefits. It electrically isolates both network nodes from each other eliminating any ground loop concerns or voltage spikes from lightning. It also provides a measure of security to your network transmissions as it is virtually impossible to tap into the transmitted signal without detection.

How is an Ethernet Media Converter used?

Ethernet Media Converters typically have two types of ports; one for the copper (UTP/STP) side of the conversion, (usually an RJ45 jack), and one for fiber side, which can vary depending on the unit (usually ST, SC or LC). Once you have selected the media converter that meets your needs, you simply plug your copper network cable into the RJ45 jack and then make your connection to your Fiber optic cabling. For the majority of unmanaged Ethernet Media Converters once you power up the unit you are done with your installation.

Where are Ethernet Media Converters used?

Ethernet Media Converters are used when long network runs are required that exceed the 100 meter maximum segment length of traditional copper UTP/STP such as large Corporate or University campuses, large high rise buildings or Municipal buildings that cover a wide area or wherever ground loops or voltage spikes from lightning may be cause for concern. You will also find these products wherever intense EMI/RFI which could interfere with your network is present such as Industrial/Manufacturing Facilities or in environments where the introduction of stray electrical signals are strictly regulated such as hospitals, clean rooms and aircraft just to provide a few examples.

Distance Limitations of Copper and Fiber Optic Network Cabling Types:

Cable Type	Distance Limitation	Cable Type	Distance Limitation
Category 5/5e/6 UTP and STP cable	100 Meters Max.	Multimode Fiber Cable 50/125µ	2 Km Max. (550m for some Gigabit applications)
Multimode Fiber Cable 62.5/125µ	2 Km Max. (220m for some Gigabit applications)	Single mode Fiber Cable 9/125µ	*15 Km to 80 Km (Typical)

***Note:** Some Single mode fiber media converters can extend up to 100 Km. These devices use special high powered laser transceivers to achieve these distances.

Form Factors

There are typically three styles of Ethernet Media Converters, 1) Standalone units with completely enclosed cases, 2) Card based chassis only models and 3) DIN Rail Mount Industrial Models. Standalone converters are typically used in locations where only

one or two conversions are needed. The chassis based options are often used in large MDF or IDF locations where multiple fiber links are converted to UTP. The DIN Rail Mount Industrial Ethernet Media Converters as the name would suggest are used in

large manufacturing plants where the harsh conditions and limited space and power options make it ideally suited. Note: some standalone unmanaged models can also be used in special multi-slot chassis designed specifically for them.

Standalone

Chassis

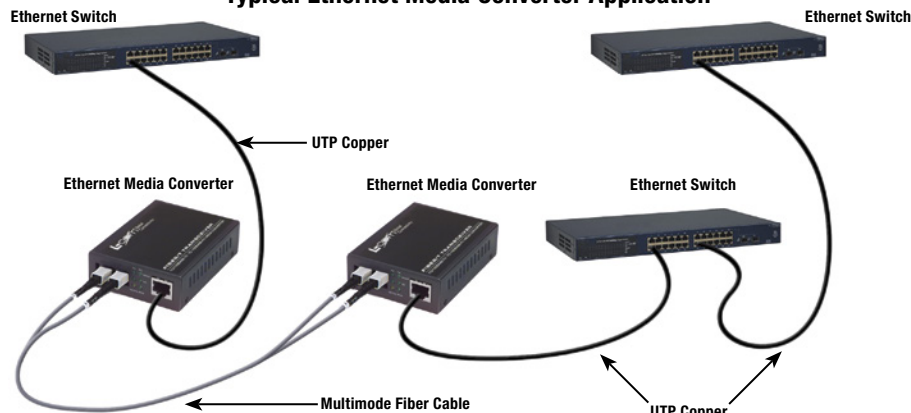

Industrial

Managed and Unmanaged

Unmanaged or "plug and play" Ethernet Media Converters are easy to install and trouble shoot. The disadvantage with unmanaged converters is when a network issue is occurring, there is no way to access the Ethernet Media Converter to see exactly what might be causing the issue. Many chassis based Ethernet Media Converter solutions feature an option for an SNMP card that shows statistics and overall health of all the media converters in the chassis. This is helpful when you have multiple chassis filled with Ethernet Media Converters in a large data center. Additionally there are some standalone converters on the market today that support SNMP management.

Typical Ethernet Media Converter Application

Item #	Description	Maximum Segment Length	List Price
--------	-------------	------------------------	------------

L-com 10Base-T RJ45 to 10Base-5 DB15M AUI Media Converter/Transceiver

L-com's Super-Slim 10Base-T transceiver is small & lightweight, designed to connect your existing Thick Ethernet Adapter Card to a 10Base-T UTP network. This super-slim model accommodates installation into narrow slot spaces typically found in older SUN SPARC™, IBM®, RISC/6000™ and old Apple Macintosh™ systems. The transceiver converts 10Base-5 signals via a DB15M/AUI connector to a standard RJ45 Jack for 10Base-T Ethernet transmission over Unshielded Twisted-Pair (UTP) cable. Port powered, no external power required.

L-com 10/100/1000TX to 1000FX ST/SC Gigabit Ethernet Media Converters

L-com's LC-MCGxx-XX line of gigabit ethernet media converters offer users a cost effective solution to extend their gigabit network over fiber optic cabling to a maximum distance up to 20km. Our LC-MCGxx-XX series of media converters are fully compliant with IEEE802.3, IEEE802.3u, IEEE802.3ab, 10/100/1000Base-Tx, and IEEE802.3z 1000Base-SX/LX standards. They can be used as standalone converters or installed into our LC-MCC14AA 14 slot media converter chassis. Operation status can be locally monitored through a set of diagnostic LEDs located on the front panel. These converters are powered by an external 5V DC power supply (included).

L-com 14 Slot Media Converter Chassis with Dual Power Supplies

L-com's LC-MCC14AA 14 slot media converter chassis provides real-time power backup. Each chassis comes equipped right out of the box with dual redundant power supplies. The LC-MCC14AA chassis is compatible with any of the L-com LC-MCG series media converters found on this page. The LC-MCG series media converters can be hot-swapped to change configuration requirements or replace malfunctioning units without the need to power down the chassis. Both power supplies feature status LEDs (Green = Functioning) (Red = Problem) to help you quickly identify which unit is experiencing a problem. There is also an audible alarm that sounds to alert you to the situation. The Dual power supplies are also truly hot-swappable, allowing you to replace a bad unit while the second unit continues to power the chassis and installed converters minimizing network disruptions. L-com also offers replacement power supplies so that you can keep an emergency spare on hand or be able to quickly order a replacement in the event you need one.

- 19 Inch Rack Mount Ready
- Supports up to 14 Media Converters
- Hot Swap Media Converters
- Easy to Install and Maintain
- Dual Redundant Power Supplies
- Hot Swap Power Supplies
- Status LEDs and Audible Alarm to Alert of Power Supply Problem

Item #	Description	Maximum Segment Length	List Price
TN-S4120-1048	Transition Networks 10GBase-T to SFP+ Media Converter		1873.52

Transition Networks Point System Media Converter Modules

The Transition Networks TN-DAC-10G-SFP series of copper direct attached cables provide a low cost, easy to use solution to short range 10G connectivity. These cables are ideal for a desktop when only a SFP+ port is available, or to stack two network switches. These cables connect two SFP+ ports using one simple plug and play cable. **As an authorized Transition Networks reseller, we can bid on RFQs for any Transition Networks part numbers. Contact us to request a non-obligatory quote.**

PT-ENW-9801

PLANET 10G SFP+ PCI Express Card

The PT-ENW-9801 is a PCI Express 10Gbps ethernet adapter designed to meet high-performance system application requirements. With the innovative PCI Express Bus Architecture, the PT-ENW-9801 provides superior performance over 32/64bit PCI architecture network cards. It provides the best solution to one of the largest issues of Server Farm Networks - communication speed. Ten times faster than the existing 1000Base-SX/LX fiber solutions, the PLANET PT-ENW-9801 is designed to connect your servers and workstations, guaranteeing extremely high throughput and excellent signal quality. Moreover, the PT-ENW-9801 supports IEEE 902.1Q VLAN which allows it to operate in a flexible and secure network environment. With 16K Jumbo Frame ability and IEEE 802.3 Flow Control support, it further optimizes throughput and wire-speed packet transfer performance without risk of packet loss. The high data throughput of the device makes it ideal for most 10 Gigabit Ethernet environments. **As an authorized PLANET reseller, we can bid on RFQs for any PLANET part numbers. Contact your L-com Sales Representative to request a non-obligatory quote.**

PT-MTB-LR

PLANET 10G RJ45 PCI Express Card

The PLANET PT-ENW-9803 provides a fast and easy way to upgrade an existing system to be able to handle 10G speeds. The standard RJ45 interface will accept Cat6a or Cat7 cables, removing the need to bring fiber directly to the desktop. This card is also a great add-on for a network attached storage device (NAS), providing a fast 10G uplink to archive large blocks of data quickly. **As an authorized PLANET reseller, we can bid on RFQs for any PLANET part numbers. Contact your L-com Sales Representative to request a non-obligatory quote.**

L-com 10/100TX to 100FX Industrial Fast Ethernet Media Converters (24 VDC)

L-com offers a series of plug and play industrial Ethernet media converters which feature dual 10/100TX RJ45 ports as well as one duplex SC fiber port. The LCMC series consist of multimode and single mode versions with optics supporting up to 80 kilometers over single mode for long haul industrial media converter applications. Each unit is powered by an external 24V DC power supply (sold separately) and is 35mm DIN rail mountable. Easy to read LEDs provide at-a-glance systems status information. Operating temperature -40°C to +70°C (-40°F to 158°F).

LCMC-M-2	L-com Industrial Ethernet Media Converter (2) 10/100TX to 100FX Multimode Duplex SC 2km	175.06

24 Volt DC DIN Rail Mount Power Supplies

The LCPS series of power supplies provide a cost effective and reliable 24V DC power source for L-com's line of industrial Ethernet switches and media converters. These units can be installed on any standard 35mm DIN Rail and are NEC class 2/LPS compliant. They also provide protection against short circuits, overloads and over voltages.

LCPS-4024	DIN Rail Mount Power Supply 24V DC 40W (1.6A)	85.30
LCPS-6024	DIN Rail Mount Power Supply 24V DC 60W (2.5A)	97.18

EtherWAN 10/100TX to 100FX Industrial Fast Ethernet Media Converters (-10°C to +60°C) (12 to 48 VDC)

EtherWAN's EX42011 series of industrial media converters are able to function at temperatures ranging from -10°C to 60°C (14°F to 140°F) and can be conveniently mounted to any standard 35mm DIN Rail. The single 10/100Base-TX port supports Auto-Negotiation, Auto-MDI/MDIX. The duplex fiber port is available in both multimode and single mode versions. Complies with IEC61000-6-2 EMC generic standard immunity for industrial environment. The variable power terminal block input can support voltages ranging from 12 to 48 VDC. **As an authorized EtherWAN reseller, we can bid on RFQs for any EtherWAN part numbers. Contact us to request a non-obligatory quote.**

EW-EX42011-1A-1-A	EtherWAN Industrial Media Converter 10/100 TX to 100FX, Multimode Duplex SC 2km	169.83

EtherWAN 10/100TX to 100FX NEMA Hardened Fast Ethernet Media Converters (-40°C to +75°C) (12 to 48 VDC)

EtherWAN's EL900 series of NEMA hardened media converters function at temperatures ranging from -40°C to 75°C (-40°F to 167°F) and are tested for functional operation up to 85°C (185°F). Whether on the factory floor or the street corner, the EL900 will provide flawless communications when you need it most. The RJ45 ports on these units provide Auto-MDIX and auto-negotiation. The link-fault-pass-through feature allows the network management agent on adjacent equipment to react to a broken link. Flexibility is the main feature of the EL900, it may be DIN rail or panel mounted and comes with power options to match the applications that require a tough, environmentally hardened product. Complies with NEMA TS1 & TS2 environmental requirements for traffic control equipment. Complies with IEC61000-6-2 EMC generic standard immunity for industrial environment, ISA 12.12.01 (UL1604) Class I, Division 2 Classified for use in hazardous locations (Applicable to versions with DC Terminal Block power option). The variable power terminal block input can support voltages ranging from 12 to 48 VDC. **As an authorized EtherWAN reseller, we can bid on RFQs for any EtherWAN part numbers. Contact us to request a non-obligatory quote.**

Hirschmann PROFIBUS, MODBUS and GENIUSBUS Fiber to Copper DIN Rail Media Converters (24 VDC)

Hirschmann's PROFIBUS, MODBUS and GENIUSBUS media converters are perfect for transmitting data over several miles/kilometers. They connect terminal devices such as computers, image-processing devices, programmable logic controllers (PLCs) and peripheral devices together. With their high availability and redundancy, they are able to hold their own in the harsh world of industrial applications. Fiber optic cables can be laid directly on high-power equipment or parallel to power cables, reducing planning and commissioning costs. Each converter in this series can be mounted on a DIN rail and is powered by an external 24 VDC power supply. **As an authorized Hirschmann reseller, we can bid on RFQs for any Hirschmann part numbers. Contact us to request a non-obligatory quote.**

Ethernet Switches Tutorial

What is an Ethernet Switch?

An Ethernet switch is a multi-port network bridge used to connect multiple PCs, servers, laptops or other Ethernet IP enabled devices such as Networked Printers, NAS (Network Attached Storage), or IP cameras to a Local Area Network (LAN). Most switches feature 10/100 Megabit per second RJ45 ports although many newer switch designs now offer 10/100/1000 triple speed

ports that auto-negotiate up to 1 Gigabit per second access. The switch uses a MAC address table to keep track of where PCs, servers or other connected devices are located. Each device has a unique MAC (Media Access Control) address "burned" into the hardware. For example; if a PC on port one needs to "talk" to a file server, the switch will look at its MAC address table and determine which port the file server is located on and send the PCs data to only that port. This effectively relieves network congestion and is able to scale as your network grows.

How is an Ethernet Switch used?

Ethernet switches typically utilize RJ45 ports for UTP or STP connectivity to PCs, servers, routers etc. Many switches also feature high speed uplink ports where modules can be purchased to connect fiber optic or UTP cabling supporting speeds of 1 Gigabit per second or more. Cables are used to plug into the ports on the switch and then into the Ethernet device (PC, router etc.) on the other end.

Managed and Unmanaged

Unmanaged Ethernet switches, typically referred to as "plug and play", are easy to install but do not provide port level statics, management and control that is often required in larger networks where many switches are installed. Managed switches typically feature an SNMP agent that allows port level control and statistics such as collisions, packets in, packet out etc. Some managed switches also feature filters where only certain devices, PCs etc. are allowed to communicate on a certain port of the switch. By using managed switches a network administrator can see if a port may be malfunctioning and sending bad packets onto the network and shut that port off so the whole network does not go down.

Accessing Scheme:	CSMA/CD - Carrier sense multiple access with Collision Detection.
Speed:	10 Mbps/100 Mbps/1000 Mbps (1 Gbps).
Network Architecture:	Bus, Star, Ring, Hybrid

The diagram below shows a typical Ethernet Switch application

In the diagram above you can see that Ethernet switches are used for sharing resources such as printers, networked file servers and router connections to the Internet or Wide Area Network (WAN).

Commercial Ethernet Switches

Commercial grade Ethernet switches are designed to be used in controlled environments such as an IT closet or data center. Unlike Industrial Ethernet switches, commercial grade Ethernet switches typically have more of a limited operating temperature range and often times have more moving parts such as cooling fans which could be a single point of failure (SPOF). Additionally, commercial grade switches will not stand up to shock and vibration as an Industrial Ethernet switch would. Another concern is mean time between failure (MTBF). Some commercial grade switches may have a lower MTBF than their industrial counterparts. Commercial grade switches typically cost less than industrial switches and are the perfect choice for controlled office/business environments.

Industrial Ethernet Switches

There is a class of Ethernet Switches referred to as Industrial Ethernet switches which are designed to work in harsh environments where extreme temperatures, vibration, dust and moisture are present. These Industrial rated switches generally have no moving parts such as fans and utilize components that are designed for extreme temperatures etc. In very moist environments or areas where condensation is present a conformal coating is sometimes used to cover the entire PCB to protect the components. Typical installations for Industrial Ethernet switches include manufacturing facilities, mining, oil production, power plants, waste water treatment plants and any other application where environmental extremes exist.

--------	-------------	------------

PLANET 5 and 8 Port 10/100/1000 Gigabit Ethernet Switches

The Planet five and eight port Gigabit Ethernet switches deliver cost effective, versatile high speed IP data connectivity to the desktop or data closet. These switches feature a compact footprint as well as a non-blocking switching architecture that guarantees wire-speed packet transfer. The RJ-45 copper interfaces support 10/100/1000Mbps auto-negotiation for optimal speed detection through RJ-45 Category 6, 5 or 5e cables. MDI/MDI-X auto detection is provided for direct wire connection to any Ethernet device without requiring crossover cables. The switches also feature 802.3x, full duplex flow control. Includes a 3-year manufacturer's warranty. **As an authorized PLANET reseller, we can bid on RFQs for any PLANET part numbers. Contact us to request a non-obligatory quote.**

SWTC-PTG503	PLANET 5 port 10/100/1000 Gigabit Ethernet Switch	48.59
SWTC-PTG803	PLANET 8 port 10/100/1000 Gigabit Ethernet Switch	51.83

PLANET 10/100TX 5 and 8 Port Desktop Ethernet Switches

The SW series Ethernet switches from PLANET Technology provide cost-conscious businesses and home users with the foundation of an integrated system for small-office/home-office networking. These economical 10/100 switches are perfect for smaller networks of 10 to 50 users. These easy to install plug and play switches feature easy to read LEDs for monitoring network connectivity and packet flow. **As an authorized PLANET reseller, we can bid on RFQs for any PLANET part numbers. Contact us to request a non-obligatory quote.**

SW-504	PLANET 5 Port 10/100 Mbps Desktop Ethernet Switch (Plastic Case)	16.74
SW-804	PLANET 8 Port 10/100 Mbps Desktop Ethernet Switch (Plastic Case)	28.02

PLANET 10/100TX 16, 24 & 48 Port 19" Rack Mount Fast Ethernet Switches

The PLANET 16, 24 & 48 port 10/100Base-TX Fast Ethernet switches provide an economical and high performance higher port density 19 inch rack mountable Ethernet switching solution. These switches provide high-speed network connections with standard 10/100 Auto-Negotiation capability on all of the RJ45/STP ports. In addition, these switches are equipped with the MDI/MDIX auto-detection for easy plug and play connections, regardless of cabling types. Both straight through and crossover cables are supported. With high-performance throughput at filtering/forwarding rate is up to 14,880 packets per second in 10 Mbps, and 148,800pps in 100 Mbps, along with its dynamic shared memory buffer. **As an authorized PLANET reseller, we can bid on RFQs for any PLANET part numbers. Contact us to request a non-obligatory quote.**

SWTC-PT1601	PLANET 16 Port 10/100 Mbps Fast Ethernet Switch	63.70
SWTC-PT2401	PLANET 24 Port 10/100 Mbps Fast Ethernet Switch	85.29

PLANET 24 Port 10/100TX + 2 Port Gigabit Ethernet Switch

The PLANET FGSW-2620 provides 24 Fast Ethernet Switch ports and 2-Gigabit Ethernet Switch ports. Each Fast Ethernet port supports 10/100Mbps, and 2 Gigabit Ethernet ports supports 10/100/1000Mbps as well as half/full mode and can be easily connected to corporate backbones and servers. With its 8.8Gbps non-blocking switch fabric, 8K MAC Address table, and 802.3x, full-duplex flow control, the FGSW-2620 offers wire-speed packet transfer performance without risks of packet loss. MDI/MDI-X auto detection is provided for direct wire connection to any Ethernet device including switches, hubs, or workstations without requiring a crossover cable. Users can easily monitor network connection status by viewing the front panel LED indicators. Includes a 3-year manufacturer's warranty. **As an authorized PLANET reseller, we can bid on RFQs for any PLANET part numbers. Contact us to request a non-obligatory quote.**

SWTC-PT2620	PLANET 24-port 10/100Mbps-2 port 10/100/1000 Gigabit Ethernet Switch	150.09
-------------	--	--------

PLANET 10/100/1000 16 and 24 Port Rack Mountable Ethernet Switches

The PLANET GSW-1601 and GSW-2401 provide 16 and 24 RJ-45 10/100/1000Mbps ports for high-speed Ethernet network connectivity. The GSW switches can automatically identify and determine the correct transmission speed and half / full duplex mode of the attached devices with its Gigabit ports. Additionally, these robust switches support 9K jumbo frames allowing extremely large amounts of data transmission in a secure topology linking to a backbone or to high-power servers. **As an authorized PLANET reseller, we can bid on RFQs for any PLANET part numbers. Contact us to request a non-obligatory quote.**

GSW-1601	PLANET 16 Port 10/100/1000 RJ45 Ethernet Switch	104.20
GSW-2401	PLANET 24 Port 10/100/1000 RJ45 Ethernet Switch	133.65

PLANET 10/100/1000 16 and 24 Port Rack Mountable Ethernet Switches

PLANET's Managed PoE Ethernet switches are designed to provide data and power to a wide range PoE compatible devices. These robust, feature packed switches are available in rack mount as well as industrial rated versions. These switches feature a built-in web management system which provides access to port management, security, access control lists, PoE and many of the other features these provided. **As an authorized PLANET reseller, we can bid on RFQs for any PLANET part numbers. Contact us to request a non-obligatory quote.**

PT-GS-4210-16UP4C	PLANET 16-Port 10/100/1000T Ultra PoE + 4-Port Gigabit TP/SFP Combo Managed Switch	912.38
PT-GS-4210-24UP4C	PLANET 24-Port 10/100/1000Base-T Ultra PoE + 4-Port Gigabit TP/SFP Combo Managed Switch	1210.39
PT-GS-4210-24P4C	PLANET 24-Port 10/100/1000T 802.3at PoE + 4-Port Gigabit TP/SFP Combo Managed Switch 220 Watt	643.96

PLANET 10/100/1000 SFP Port Managed Rack Mount Switch with 4 10G SFP+ Ports

The PLANET MGSW-28240F managed rack mount switch allows for gradually updating a network from Gigabit speeds up to 10G, or in networks where requirements change. This switch has 24 100/1000 speed SFP slots, allowing for a vast array of communication options where a module can be quickly swapped out if needed. The 10G SFP+ uplinks provide a wide backbone for connecting other portions of the network. Power can be provided to this switch either via the dual terminal block, or a standard AC power cable. **As an authorized PLANET reseller, we can bid on RFQs for any PLANET part numbers. Contact us to request a non-obligatory quote.**

MGSW-28240F	PLANET 24 SFP Port Managed Switch With 4 SFP+ Ports	1216.85
-------------	---	---------

PLANET 10G XFP and SFP+ Single Mode and Multimode Modules

The Planet PT-MTB series of 10G SFP+ and XFP modules provide a flexible option when using a 10G switch or media converter that contains the applicable port. With Single Mode and Multimode options and distances from 300 meters up to 10 kilometers, there is an option available for most high speed data applications. **As an authorized PLANET reseller, we can bid on RFQ's for any PLANET part numbers even if they are not found on our website. Contact us to request a non-obligatory quote.**

PLANET 24-Port 10/100/1000Mbps 802.3at PoE+ Managed Switches with 4 Shared SFP Ports

The WGSW-24040HP series is the latest generation of PLANET Managed Gigabit PoE Switches featuring PLANET intelligent PoE functions to improve the availability of critical business applications. The series provides IPv6/IPv4 management and built-in L2/L4 Gigabit Switching engine along with 24 10/100/1000Base-T ports featuring 30-watt 802.3at PoE+ and 4 Gigabit SFP slots. With total power budget up to 220W for different kinds of PoE applications, the series provides quick, safe and cost-effective Power over Ethernet network solutions to security IP surveillance for small business and enterprises. **As an authorized PLANET reseller, we can bid on RFQ's for any PLANET part numbers even if they are not found on our website. Contact us to request a non-obligatory quote.**

NETGEAR® 10/100/1000TX 5 and 8 Port Desktop Ethernet Switches

NETGEAR's Gigabit Switches offer users high-speed network connections in a compact cost effective switch. The GS series switches feature auto-negotiation between 10, 100 and 1000MB connections allowing users to migrate to higher speeds over time. With Auto uplink and full duplex operation, these NETGEAR Gigabit switches make connections simple and fast. Includes an external power supply. **As an authorized NETGEAR reseller, we can bid on RFQs for any NETGEAR part numbers. Contact us to request a non-obligatory quote.**

SWTC-GS105NA	NETGEAR 10/100/1000Mbps 5 Port RJ45 Switch	54.27
SWTC-GS108NA	NETGEAR 10/100/1000Mbps 8 Port RJ45 Switch	102.55

NETGEAR® 10/100TX 5, 8 and 16 Port Desktop Ethernet Switches (Metal Case)

NETGEAR's 10/100Mbps fast ethernet switches provide your LAN with economical, high-speed, 10/100 Mbps auto-sensing connectivity. Just plug in your Ethernet cables and connect a power cord and you network is up and running. These switches are engineered without the need for an internal fan, thus providing silent operation. The switches feature a very compact footprint and a sturdy metal case for years of dependable use. **As an authorized NETGEAR reseller, we can bid on RFQs for any NETGEAR part numbers. Contact us to request a non-obligatory quote.**

SWTC-FS105NA	NETGEAR 10/100Mbps 5 Port RJ45 Switch	35.61

SWTC-FS116NA	NETGEAR 10/100Mbps 16 Port RJ45 Switch	91.78

NETGEAR® 10/100/1000TX 24-Port plus 2 SFP Gigabit Ethernet Switch

This NETGEAR 24-port Gigabit Ethernet switch is high on value and capability. With 24 10/100/1000 Mbps ports, each capable of powering 2,000 Mbps of data throughput in full-duplex mode, plus two optional fiber ports, the SWTC-GS724T provides a fast backbone and connects servers or power users, delivering large amounts of multimedia, image, and video information in no time at all. In addition, an intuitive, web-browser interface offers SimpleSmart Switch management, making it a snap to monitor switch performance, configure ports, even set up port trunks, VLANs, and, thus providing prioritization. Alternatively, use SNMP-based software to manage your Smart Switch. **As an authorized NETGEAR reseller, we can bid on RFQs for any NETGEAR part numbers. Contact us to request a non-obligatory quote.**

NETGEAR® 8 1000/10GTX Port Smart Switch With 1 10G SFP+ Port

The NETGEAR SWTC-XS708E unmanaged plus 10 Gigabit switch provides a simple to set up and use high speed networking solution. This switch provides 8 10 Gig RJ45 ports and one SFP+ slot to provide additional network flexibility. With the ability to rack mount, or simply use this as a standalone switch, the SWTC-XS708E is a versatile tool to upgrade into a 10G network. **As an authorized NETGEAR reseller, we can bid on RFQs for any NETGEAR part numbers. Contact us to request a non obligatory quote.**

EtherWAN 24 10/100/1000TX Managed Switch with 4 Gigabit SFP Slots and 4 10G SFP+ Slots

The EtherWAN EW-EX25611 managed 24 port ethernet switch is a high speed, flexible networking solution that provides 4 Gigabit SFP combo ports and 4 1/10G SFP+ ports that lets users update their network from Gigabit to 10G gradually. The combo ports will accept Gigabit SFP modules, while the 10G ports will accept either Gigabit or 10G SFP modules. **As an authorized EtherWAN reseller, we can bid on RFQs for any EtherWAN part numbers. Contact us to request a non obligatory quote.**

EW-EX25611	EtherWAN 24 10/100/1000TX RJ45 Switch With 4 SFP and 4 SFP+ Ports	2769.49
------------	---	---------

EtherWAN Unmanaged 5 Port 10/100/1000TX Switches

EtherWAN's EX16900 Series Unmanaged Gigabit Switches are perfect for home or small office environments where only a few connections are needed, but high speed is a requirement. These switches are available in 5 port RJ45 or 4 port RJ45 with one fiber SC, ST, or SFP port. **As an authorized EtherWAN reseller, we can bid on RFQs for any EtherWAN part numbers. Contact us to request a non obligatory quote.**

EW-EX16905	EtherWAN Unmanaged 5 Port 10/100/1000TX Ethernet Switch	72.35
EW-EX16914-3	EtherWAN Unmanaged 4 Port 10/100/1000TX, 1 Port 1000SX SC 550M Ethernet Switch	180.32

Hirschmann OpenRail RS20/RS30 Managed 24V DC Industrial Ethernet Switches

Hirschmann's OpenRail line of managed industrial Ethernet switches are available with a choice of "enhanced" or "professional" firmware. Users can decide which functionality their application requires and select the appropriate firmware option without having to pay for features they do not need. Features like IGMP Snooping and HIPER Ring are available in all OpenRail switches. These robust switches also feature a USB port for backing up and restoring the configuration using an Auto-Configuration Adapter or USB drive. **As an authorized Hirschmann reseller, we can bid on RFQs for any Hirschmann part numbers. Contact us to request a non-obligatory quote.**

Hirschmann (MICE) Managed Modular 8 Port Ethernet/Fast Ethernet Rail Switch

Hirschmann Modular Industrial Communication Equipment (MICE) Ethernet/Fast Ethernet switches offer a unique combination of network management tools, redundancy features for high availability and modular media plug-ins for versatility. The compact switches are DIN rail mountable, with redundant 24-volt power supplies and are compatible with 10BASE-T, 10BASE-FL, 100BASE-TX and 100BASE-FX. The switches will accommodate twisted pair, single mode or multimode fiber optic connections. MICE switches are made up of an integrated backplane and a modular dock that accepts the various media modules. The switches support SNMP management, web-based management, port mirroring, port security, remote monitoring (RMON), bootstrap protocol (BootP), Dynamic Host Configuration Protocol (DHCP) and Hirschmann's unique HIPER Ring. Hirschmann's HIPER Ring provides high availability through self-healing ring redundancy. The switches' rugged construction meets all standards for industrial Ethernet, making them suitable for applications where EMI interference, shock, vibration and temperature might otherwise cause concern. **As an authorized Hirschmann reseller, we can bid on RFQs for any Hirschmann part numbers. Contact us to request a non-obligatory quote.**

Hirschmann Eagle Series Industrial Firewall System

The Hirschmann Eagle series security firewalls provide secure access to and from your Ethernet network. These IP Routers feature one trusted port and one untrusted port to control user access to critical network services such as servers and PCs. Security features include NAT, PPOE, PPTP, APR limiter MAC filtering and Kaspersky anti virus engine. These routers are powered by an external 24V DC power supply (sold separately) and are IP20 rated for harsh environments. **As an authorized Hirschmann reseller, we can bid on RFQs for any Hirschmann part numbers. EAGLE-1TX-1TX	Hirschmann Eagle Firewall System 1 RJ45 Trusted, 1 RJ45 Untrusted	1722.16
EAGLE-1TX-1FX	Hirschmann Eagle Firewall System 1 SC MM Trusted, 1 RJ45 Untrusted	1938.10

Hirschmann 10/100TX Industrial Compact Fast Ethernet Rail Switches

Hirschmann Industrial Compact Switches provide the industrial customer with a cost effective way to add Ethernet connectivity on the factory floor. The Hirschmann Industrial line features rugged metal enclosures and DIN Rail mounting. The switches also feature redundant 24 VDC inputs and an open relay contact to facilitate connection to PLCs, allowing reaction to malfunction or process control alarms. The FX switches feature the extended range of fiber optic cabling via an integrated multimode fiber optic port. The fiber port can be used to create a fiber optic backbone to a central control room. **As an authorized Hirschmann reseller, we can bid on RFQs for any Hirschmann part numbers. Hirschmann Unmanaged SPIDER 10/100TX Fast Ethernet Rail Switches

The Hirschmann SPIDER unmanaged Industrial Ethernet Rail Switches are the perfect small form factor solution for your industrial Ethernet connectivity needs. Each switch features store and forward operation which stops corrupt packets from entering your network and five RJ45 10/100Base-TX Ethernet (10 Mbit/s) and Fast-Ethernet (100 Mbit/s) Ports, which support auto-crossing, auto-negotiation, and auto-polarity. The SPIDER family utilizes a 24V DC power source (sold separately) and is DIN rail mountable. **As an authorized Hirschmann reseller, we can bid on RFQs for any Hirschmann part numbers. Contact us to request a non-obligatory quote.**

L-com 10/100TX IES-Series 5, 8 and 16 Port Industrial Fast Ethernet Switches

L-com's IES-Series Industrial Ethernet Switch line offers ease of deployment, cost savings and robust switching. These rugged industrial Ethernet switches feature auto-negotiating 10/100 RJ45 ports as well as easy to read system status LEDs. These switches are powered by an external 24V DC power supply (sold separately) and feature standard 35mm DIN rail mounting brackets. The IES-Series switches are unmanaged and can be installed in minutes providing industrial network connectivity for myriad applications including industrial automation, factory automation, process control networking and energy network connectivity.

L-com 10/100TX +2 Port 100FX IES-2206 Series Industrial Fast Ethernet Switches

The IES-2206 Series Industrial Ethernet Switches feature four 10/100TX RJ45 ports and two fiber SC ports supporting Ethernet IP communications at 100Mbps. These easy to install DIN rail mountable industrial Ethernet switches are perfect for applications where IP enabled devices require networked communications. The rugged switches can be mounted to standard 35mm DIN rail and are powered by a 24V DC power supply (sold separately). Easy to read LEDs provide at-a-glance system monitoring.

24 Volt DC DIN Rail Mount Power Supplies

The LCPS series of power supplies provide a cost effective and reliable 24V DC power source for L-com's line of industrial Ethernet switches and media converters. These units can be installed on any standard 35mm DIN Rail and are NEC Class 2/LPS compliant. They also provide protection against short circuits, overloads and over voltages.

LCPS-4024	DIN Rail Mount Power Supply 24V DC 40W (1.6A)	85.30
LCPS-6024	DIN Rail Mount Power Supply 24V DC 60W (2.5A)	97.18

IES Series Industrial Ethernet Switches

- 10Base-T/100Base-TX Full/Half Duplex support
- MDI-MDI-X support
- Broadcast Storm protection
- Redundant power inputs
- Fan-less design
- DIN Rail mounting
- MAC Address Table Size: 1K
- Forwarding Rate: 148,800pps
- Operating Temp: -40°C to +70°C
- Relay output option for visual or audible alarms

EtherWAN 10/100TX PoE Switches - Web Based Management

EtherWAN's EX17000 series PoE 10/100BASE Fast Ethernet Web-Smart PoE Ethernet Switches are designed to operate in the small or medium network environment to provide power to PoE driven devices, such as PoE IP cameras. These PoE switches may be desktop or rack mounted and all ports support IEEE802.3af Power over Ethernet (PoE) Power Sourcing Equipment (PSE) and can detect an IEEE802.3af compliant Powered Device (PD). Additionally the EX17000 series switches feature a web browser interface that allows the user to configure IP settings, Port Based VLAN, QoS settings, and more. **As an authorized EtherWAN reseller, we can bid on RFQs for any EtherWAN part numbers. Contact us to request a non-obligatory quote.**

EW-EX17008	EtherWAN Web Based Managed Industrial Ethernet Switch 8 10/100TX PoE Ports	259.46
EW-EX17016	EtherWAN Web Based Managed Industrial Ethernet Switch 16 10/100TX PoE Ports	430.35
EW-EX17082	EtherWAN Web Based Managed Industrial Ethernet Switch 8 10/100TX PoE Ports + 2GIG SFP Combo	409.51
EW-EX17162	EtherWAN Web Based Managed Industrial Ethernet Switch 16 10/100TX PoE Ports + 2GIG SFP Combo	566.84

EtherWAN 10/100TX Unmanaged Industrial Fast Ethernet Switches (Some Models Include 100FX Duplex SC Fiber Ports)

The EX42000 & EX43000 series compact Fast Ethernet Switches are equipped with 10/100Base-TX RJ45 ports and multimode or single mode fiber uplink ports. By using standard auto-negotiation and the inclusion of auto-MDIX, EtherWAN provides a cost-effective way of integrating legacy 10Mbps networks with 100Mbps Fast Ethernet networks. The TX ports auto-negotiate for 10/100Mbps speed and auto-detect full or half-duplex mode. EX42000 & EX43000 series switches can be DIN-Rail mounted and are equipped with terminal block power inputs. **As an authorized EtherWAN reseller, we can bid on RFQs for any EtherWAN part numbers. Contact us to request a non-obligatory quote.**

EW-EX42005-00-1-A	EtherWAN Unmanaged Industrial Ethernet Switch 5 10/100TX Ports	97.18
EW-EX42014-1A-1-A	EtherWAN Unmanaged Industrial Ethernet Switch 4 10/100TX Ports + 1 100FX, MM, 2Km, SC	199.75
EW-EX42014-2A-1-A	EtherWAN Unmanaged Industrial Ethernet Switch 4 10/100TX Ports + 1 100FX, SM, 20Km, SC	313.12

EtherWAN 10/100TX Managed Industrial Fast Ethernet Switch (Some Models with 1000SX or 1000LX Duplex SC Fiber Ports)

The EX61800 series is designed to operate in harsh environments on the factory floor. The EX61800 functions at temperatures ranging from -10°C to 60°C (14°F to 140°F). The EX61800 will provide flawless communications when you need it most. The EX61800 is a managed switch with the flexibility of eight 10/100 Ethernet ports that may be configured in various combinations of copper and fiber optic interfaces. **As an authorized EtherWAN reseller, we can bid on RFQs for any EtherWAN part numbers. Contact us to request a non-obligatory quote.**

EW-EX61800A-00B	EtherWAN Managed Industrial Ethernet Switch 8 10/100TX Ports	653.21

EtherWAN 10/100TX Unmanaged NEMA Hardened Fast Ethernet Switch (-40°C to +75°C)

The EX94000 Unmanaged NEMA Hardened Fast Ethernet Switch is designed to function at temperatures ranging from -40°C to 75°C (-40°F to 167°F) and tested for functional operation up to 85°C (185°F). Equipped with 10/100Base-TX RJ45 ports and multimode or single mode fiber uplink ports, they may be DIN rail, panel or rack mounted. The EX94000 series comes with power options to match the applications that require a tough, environmentally hardened product. Complies with NEMA TS1 & TS2 environmental requirements for traffic control equipment, complies with IEC61000-6-2 EMC generic standard immunity for Industrial environment ISA 12.12.01 (UL1604) Class I, and Division 2 Classified for use in hazardous locations (applicable to versions with DC Terminal Block power option). The variable power terminal block input can support voltages ranging from 12 to 48 VDC. **As an authorized EtherWAN reseller, we can bid on RFQs for any EtherWAN part numbers. Contact us to request a non-obligatory quote.**

EW-EX94008-00-1-A	EtherWAN Unmanaged NEMA Hardened Ethernet Switch 8 10/100TX Ports	269.91

Security Tutorial

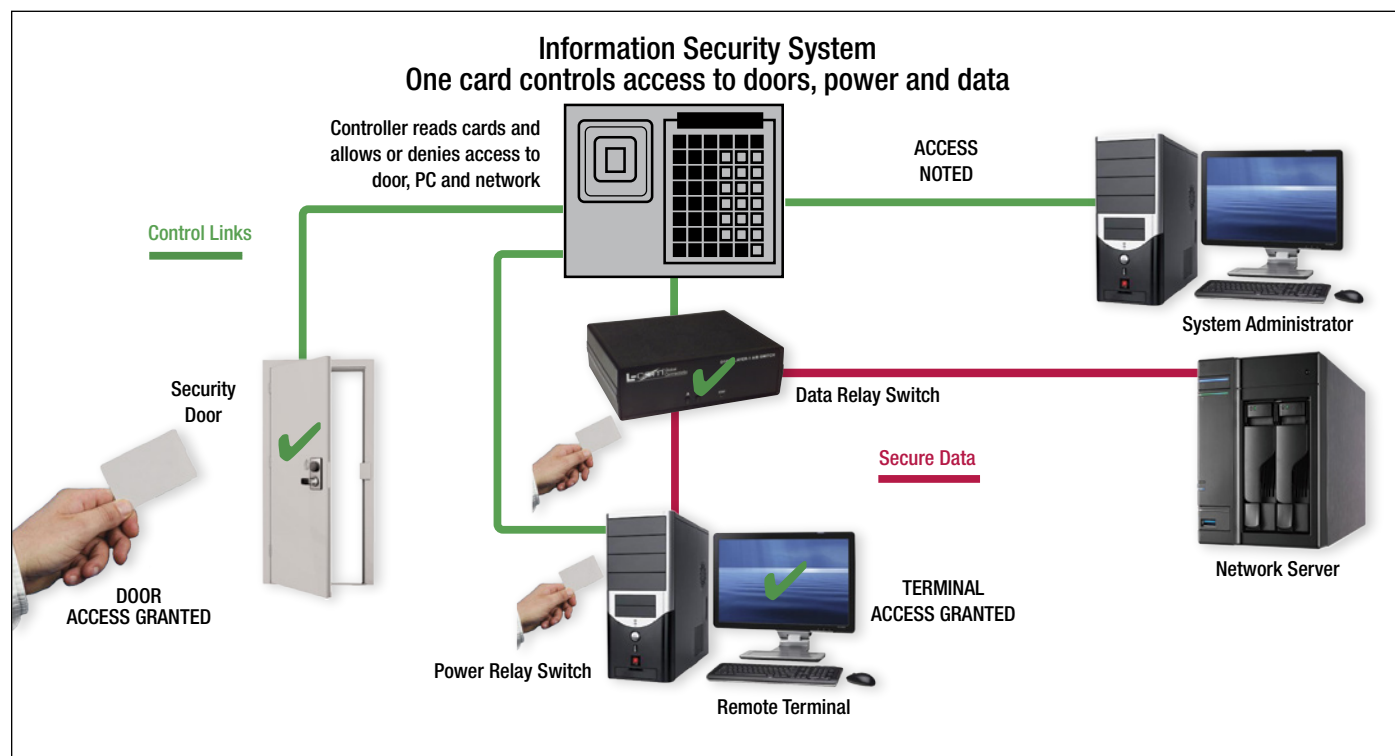

Physical Layer Air Gap Network Switch Overview Air-Gap Network Switches = Secure Hardware Access Control

Unauthorized access to private networks presents the greatest security threat to any organization that deals in sensitive or classified data. Theft of classified information and trade secrets, corruption of data and unauthorized control of automated systems relentlessly challenge security officers and network administrators.

Hardware security centers on the control of the wired and wireless connections at the edges of

networks and systems that tie their elements together. These solutions are air-gap switches that open and close those connections. Whether the switches are controlled manually or automatically, their points of connection to the systems and networks they protect are managed with the absolute assurance of hardware that cannot be breached by unauthorized personnel through the communications channel that passes through the switch.

Hardware security solutions are traditionally applied to the control of physical spaces like buildings, laboratories and data centers. Card and key fob credentials are commonly used to gain access to those spaces. The same credentials can be used to control access to electronic and optical data streams when specialized hardware is integrated with an air gap network switch.

Optional Product Features

Ethernet IP Access/Control

Allows IP access to an Ethernet network for monitoring and control

Serial Access/Control

Allows RS232 serial access for monitoring and control

Latching or Non-Latching

Non-Latching versions provide automatic fail-over to the default port A to C connection state when power fails or is removed

Item #	Description	List Price
--------	-------------	------------

L-com Category 6 A/B Physical Layer Air Gap Network Switch Boxes

L-com's Category 6 A/B Network Switches are a physical layer hardware solution which supports a variety of applications including secure or simple desktop network resource sharing, disaster recovery, network access control, and auto fail-back. These switch boxes feature a unique relay technology that supports the switching mechanism. Additionally, all units incorporate technology that enables these switch boxes to operate independent of data rates, protocol and formats. This allows them to pass 10/100/1000Mbps, 10Gbps, and other future, high speed data rates. Non-latching or latching relay configurations are available. The non-latching units provide automatic fail-over to the default Port A to C connection state when power fails or is removed. Latching relays provide the benefit of maintaining the flow of data between the connected devices even when power is removed. **Note:** The Ethernet models may be controlled via telnet, web browser or SNMP. Ships with a universal 12V DC power supply with four different style country plugs.

L-com Category 6 A/B Physical Layer Air Gap Network Switch Boxes (RJ45 Ports)

LC-SNSW-C6-L	L-com Cat6 A/B Network Switch - Latching	435.56
LC-SNSW-C6	L-com Cat6 A/B Network Switch - Non-Latching	411.57
LC-SNSW-C6-LSC	L-com Cat6 A/B Network Switch with Serial Control - Latching	466.82
LC-SNSW-C6-SC	L-com Cat6 A/B Network Switch with Serial Control - Non-Latching	442.83
LC-SNSW-C6-LEC	L-com Cat6 A/B Network Switch with Ethernet Control - Latching	612.70
LC-SNSW-C6-EC	L-com Cat6 A/B Network Switch with Ethernet Control - Non-Latching	571.02

L-com Fiber Optic A/B Physical Layer Air Gap Network Switch Boxes (Multimode and Single mode)

L-com's fiber optic A/B Network Switches support a variety of switching, or access and control applications all in a compact desktop enclosure. These applications include disaster recovery, air gapped network access control, desktop switching, and secure switching. The fiber optic switch boxes utilize special optical switching mechanisms that redirect the light beams between selected ports. There is no optical-to-electrical-to-optical conversion needed. Because of this, these switches are able to support any data rate, format, or protocol that can be sent over fiber optic cables that are attached to the switch. The multimode fiber switch models support any/all wavelengths from 800 to 1600nm, while the single mode fiber switches support 1310 and 1550nm wavelengths. Non-latching or latching relay configurations are available. The non-latching units provide automatic fail-over to the default Port A to C connection state when power fails or is removed. Latching versions provide the benefit of maintaining the flow of data between the connected devices even when power is removed. **Note:** The Ethernet models may be controlled via telnet, web browser or SNMP. Ships with a universal 12V DC power supply with four different style country plugs.

Serial Products Tutorial

What is a Serial Converter?

A Serial Converter, sometimes referred to as an Interface converter, allows you to convert between different serial protocols to allow for the interconnectivity of various serial devices.

How is a Serial Converter used?

Serial Converters typically consist of a minimum of two bi-directional interfaces, one each for the different protocols being converted, for RS232 (Full Duplex/Half Duplex) for RS422/423/485 (Half Duplex). These interfaces can consist of any combination of Telephony style Modular Jacks, Terminal Blocks or D-Subs (DB9, DB25). In the case of an RS232 to RS485 Converter, one of the interfaces would be used to handle the RS232 signals while the other is used to handle the RS485 signals.

RS232:

First introduced in 1962, it is a series of standards for serial binary single-ended data and control signals for connecting a DTE (Data Terminal Equipment) (PC) and a DCE (Data Communication Equipment) (Modem).

It uses multi-conductor cabling and can function in half duplex as well as full duplex modes of operation. It was designed for point-to-point connections, (1) DTE & (1) DCE.

The accepted max distance for standard cabling is 50 feet (15m) with a maximum baud rate of 20 kbit/s. Theoretically, 1kbit/s can be achieved at 4,000 feet (1,200m). With low-capacitance cabling the 20 kbit/s can be effectively maintained up to a theoretical distance of 1,000 feet (300m).

RS422:

A high-speed protocol similar to RS232 but with differential signaling in a multi-drop configuration.

It was designed for half duplex mode of operation.

It uses Twisted Pair cabling and can support a maximum of 10 Devices (1) DTE & (10) DCE.

With appropriate cabling it can be effectively used up to a theoretical distance of 4,000 feet (1,200m).

With a maximum baud rate of 10 Mbit/s at 40 feet (12m) & 100 kbit/s at 4,000 feet (1,200m).

RS423:

A high-speed protocol similar to RS422 but with unbalanced signaling in a multi-drop configuration.

It uses multi-conductor cabling and was designed for half duplex mode of operation.

It can support a maximum of 10 Devices (1) DTE & (10) DCE.

With a maximum baud rate of 100 kbit/s at 40 feet (12m) 1kbit/s at 4,000 feet (1,200m).

RS485:

A protocol developed from RS422 that can be used as a bus in multi-drop/multipoint configurations.

It was designed for half duplex mode of operation.

It uses Twisted Pair cabling and can support a maximum of 32 Devices.

With appropriate cabling it can be effectively used up to a theoretical distance of 4,000 feet (1,200m).

With a maximum baud rate of 35 Mbit/s at 40 feet (12m) & 100 kbit/s at 4,000 feet (1,200m).

Typical Serial Converter Applications

What is a Device Server?

A Device Server, sometimes referred to as a Serial Server, is used to connect a serial network or device such as RS232 to an Ethernet Network that uses the IP (Internet Protocol) data transmission.

How is a Device Server used?

A Device Server has one or more serial ports and typically one RJ45 Ethernet port. After connecting the serial devices to the server, then connecting the server to the Ethernet Network, some set up is required to configure the communication between the two networks via a management application built into the Device Server.

Typical Device Server Applications

L-com Industrial RS232 to RS422/485 Converter, Din Rail Mountable

L-com's LC-IND232-422-485 serial converter provides a rugged, industrial solution for optically isolated data transmission. Din rail mountable, and powered via a 10-30VDC terminal block, this device is compact and simple to set up.

LC-IND232-422-485	L-com Din Rail Mountable RS232 to RS422/485 Industrial Converter	143.80
-------------------	--	--------

L-com Isolated RS232 to RS422/485 Converter

L-com's RS232 to R422/485 converter is a flexible tool for industrial communications. Providing 2000VAC isolation, easily switchable modes, and accepting between 10-48 VDC to power the device, this converter can be easily inserted into most existing setups.

LC-232I-422-485	L-com Isolated RS232 to RS422/485 Converter	136.40
-----------------	---	--------

L-com Port Powered RS232 to RS485/422 Converter

The LC-232SW-422-485 serial converter is a flexible, easy to use device that can be powered directly from the RS232 connector. Four switches on the top of the device allow you to switch between the different modes quickly, and an external 12VDC power supply can be used for high power or long distance applications.

Tip What are ground loops?

Ground currents or loops are caused when two or more electrical devices are tied together via copper cabling and the equipment has different ground potentials. This combination can cause difficulty in data transmission, can damage equipment and in extreme cases cause bodily harm in medical applications.

The simplest way to protect ground currents is to tie all the equipment in question to a common ground (preferably earth ground). In many applications this is not physically possible due to the distance between equipment. The next simplest way to solve this problem is by installing an optical link in between the copper cabling connecting the equipment. This can be done with an Opto-Isolation Module which converts the electrical data signals to light then back to electrical signals. The last way to solve the problem is to not use copper cabling at all, but to use fiber optic connections between equipment. The biggest advantage here is that the ground current problem is solved and operating distance can be greatly increased.

Telebyte RS232 to RS422 Serial Converter - Self-powered DB9 Connector

Adding an RS422 interface to a PC is now a snap. The TB253P serial converter does this for full duplex signals at data rates up to 19.2 KBPS, without AC or DC power. The unit features a DB9F connector, (allowing it to be plugged directly into any one of the PCs com ports) and an RJ11 (6x4) jack.

TB253P	Telebyte RS232 to RS422 Serial Converter, DB9F, Self-powered	82.32
--------	--	-------

Telebyte RS232 to Current Loop Converter

The TB65A is a small, versatile, RS232 to current loop converter for use with teletypes or computers providing local terminal input via a 20mA (or 60mA) current loop. The TB65A includes a wall-mounted transformer and internal power supply circuitry. Additionally the TB65A provides switch selection of all RS232 operating modes including: Half Duplex - Passive Loop, Half Duplex - Active Loop, Full Duplex - Passive Loop, and Full Duplex - Active Loop. This product will drive 20mA and accept 20mA or 60mA loop currents and operates from DC to 9.6 KBPS.

TB65A	Telebyte RS232 to Current Loop Converter (Includes Power Supply)	134.42
-------	--	--------

Telebyte RS232 Fiber Optic Line Drivers

The TB271 series of RS232 fiber optic line drivers provides maximum protection from ground currents and noise interference between equipment as well as increases operating distances to up to 2km. Three versions are available, supporting RS232 serial interfaces. The TB271 series achieves power from the transmit data line, whereas, the TB271A series has an external power supply (included). DB25M and DB25F versions available. Fiber optic connection utilizes dual ST connectors and duplex 62.5/125 multimode cabling.

TB271M	Telebyte RS232 Fiber Line Driver, DB25M, Self Powered	164.64
TB271F	Telebyte RS232 Fiber Line Driver, DB25F, Self Powered	164.64
TB271AF	Telebyte RS232 Fiber Line Driver, DB25F, Externally Powered	175.06

Telebyte RS422 and RS485 Fiber Optic Line Drivers

Similar to the TB271 series except designed for RS422 and RS485. Both units utilize DB25F and dual fiber ST ports. For use with duplex Multimode Fiber Optic cabling.

TB272F	Telebyte RS422 Fiber Line Driver, DB25F, Externally Powered	175.06
TB276F	Telebyte RS485 Fiber Line Driver, DB25F, Externally Powered	175.06

Telebyte RS232 Fiber Optic Line Driver - Auto Powered

The TB9271 RS232 fiber optic auto powered line driver features a standard DB9 female interface and Dual ST style fiber connectors. It can be installed in applications requiring very high data transmission rates, offers resistance to Electromagnetic Interference (EMI) and isolation from lightning-induced current surges and ground loops. The unit employs an RS232 data interface, can achieve 56Kbps asynchronously and operates in either half or full duplex modes over dual fibers up to 2km in length.

TB9271	Telebyte RS232 Fiber Optic Auto Powered Line Driver	175.06
--------	---	--------

Telebyte RS232, RS422 or RS485 Fiber Optic Modem - DIN Rail Mountable

The model TB8277 is a unique asynchronous fiber optic modem whose optical interface can operate in either point to point or ring (daisy chain) configurations and whose electrical interface can also operate in point to point or multi-drop configurations depending on the user selected interface. The electrical interface is switch selectable between RS232, RS422 and RS485. The TB8277 is supplied with a power cord for the DC input. An optional AC power adapter is available for installations where 12 VDC is not accessible.

TB8277	Telebyte DIN Rail Fiber Optic Media	296.97
TB8277-110PSU	Telebyte Optional 110 VAC Power Supply	16.68

Telebyte Single mode to Multimode Fiber Converter

The TB279 provides transparent conversion between fiber optic devices utilizing multimode fiber and those with single mode fiber. Features of the TB279 include the ability to operate from DC to 2.5 Mbps. This allows a variety of applications to take advantage of the transmission capability of the device and fiber cable. The TB279 is powered by a wall-mounted 12 VDC adapter.

TB279	Telebyte Single mode to Multimode Converter	831.52

ICP DAS USB to RS232/422/485 Converter

The CVTR-I-7561 is a rugged yet cost-effective module that is used for transferring serial data over USB. This converter allows you to connect your serial devices to systems using a USB interface such as a PC. The CVTR-I-7561 contains a self tuner chip, which auto-tunes the baud rate and data format to the RS485 network. CVTR-I-7561 module derives its power from the USB port and does not require an external power supply. This versatile converter also features a high-speed 115.2 Kb/s transmission rate, and supports a multitude of O.S. independent RS232/422/485 Ports. **As an authorized ICP DAS reseller, we can bid on RFQs for any ICP DAS part numbers. Contact us to request a non-obligatory quote.**

CVTR-I-7561	ICP DAS USB to RS232/422/485 Converter	134.97
-------------	--	--------

ICP DAS RS232 to RS485 Protocol Converter

The CVTR-I-7520 seamlessly converts the RS232 protocol to RS485 all in one rugged, economical package. Features include auto switching baud rate of 300~115,200 BPS and a self tuner chip, which auto-tunes the baud rate and data format to the RS485 network. This converter also supports 256 modules max. in one RS485 network without repeater and 2,048 modules max. in one RS485 network with a repeater. Power supply sold separately. **As an authorized ICP DAS reseller, we can bid on RFQs for any ICP DAS part numbers. Contact us to request a non-obligatory quote.**

CVTR-I-7520	ICP DAS RS232 to RS485 Protocol Converter	91.78
-------------	---	-------

ICP DAS RS232 to CAN Protocol Converter

The CVTR-I-7530 offers an economical yet rugged solution for converting RS232 to CAN protocol. Features include maximum transmission speeds up to 1Mbps for CAN and 115.2Kbps for RS232 as well as support for both CAN 2.0A and CAN 2.0B standards. This converter can be easily mounted on a DIN rail and features DB9 connectors. Power supply sold separately. **As an authorized ICP DAS reseller, we can bid on RFQs for any ICP DAS part numbers. Contact us to request a non-obligatory quote.**

RS232/422/485 Fiber Modem		
The FRM220-Serial/485 provides a fiber converter solution to extend asynchronous RS485 or RS232 transmission distance up to 2km over multimode fiber or up to 120km over single mode fiber. The converter is equipped with multiple interface circuits for connection to RS232 or RS485/422 (2 or 4 wire, full or half duplex). The FRM220-Serial secures data transmission over EMI resistant fiber at speeds up to 460kbps for RS232 or up to 1024kbps for RS485/422. When the FRM220-Serial/485 card is placed in the FRM220 rack with SNMP management, in-band management allows viewing the card and remote converter's status, type, version, fiber link status, data link status and alarms. Both card and remote can be configured to enable or disable the port, reset the port and set the interface type.

FRM220-SERIAL-ST002

Passport Networks ESport RS232/422/485 to Ethernet Device Servers

The ESport-10x Ethernet device servers connect RS232/422/485 serial devices to a 10/100 Ethernet LAN/WAN providing a reliable communications connection. The ESport-10x Windows driver installs virtual COM ports in the device manager of the operating system. The ESP101 features one RS232/422/485 DB9M port and one RJ45 10/100 Ethernet port. The ESP102 features a single RJ45 10/100 Ethernet port and two DB9M ports, one port supports RS232/422/485 and the other only supports RS232. The ESP104 ships with its own external power supply (do not use the ESP-PWR power supply with the ESP104). These products can be powered by an external DC power supply or by an optional 9 VDC power adapter. An optional DIN Rail mounting kit is sold separately. Includes a 1-year manufacturer's warranty. **As an authorized Passport Networks reseller, we can bid on RFQs for any Passport Networks part numbers. Contact us to request a non-obligatory quote.**

LAVA Ethernet-to-Serial 4 Port Device Server

The ES4-232 is ideal for POS systems, security systems, industrial automation, building automation, or any application using RS232 devices. The Lava ES4-232, four-port RS232 device server, provides four serial ports that are network-enabled, simple to install, configure and control. Any serial device can send its information to the ES4-232, which then places that information on the Ethernet network. The serial ports support 115.2 kbps throughput rates each. Additionally, each ES4-232 Includes Lava Ether Link Manager software that makes this the easiest device in its category to install and use. By utilizing the ES4-232 one PC is capable of managing hundreds of serial ports, even remotely. **As an authorized LAVA reseller, we can bid on RFQs for any LAVA part numbers. Contact us to request a non-obligatory quote.**

ICP-PET-7018Z

ICP DAS TouchPad Controller

TouchPAD are a series of tiny touch screen controller HMI which are designed for building and home automation. The TPD-430 is equipped with a high resolution 4.3 inch TFT color touch screen and fits in regular electrical wall-mount outlets. It can be easily integrated with I/O modules and have a beautiful, flexible user defined picture display. An ideal choice for upgrading mechanical switches to intelligent control pads. TouchPAD comes with Ladder Designer software for PLC users and a C/C++ language development environment for programmers. You can quickly and easily develop your programs with the development tools provided. **As an authorized ICP DAS reseller, we can bid on RFQs for any ICP DAS part numbers. Contact us to request a non-obligatory quote.**

ICP-TPD-430

Gefen RS-232 Cat5 Extender

The Gefen RS-232 Extender extends your RS-232 device up to 1,000 feet away from your computer using standard Cat5 networking cable. The Gefen-RS232 ships with a local and remote unit which are connected via standard Cat5/5E UTP cable. Both the local and remote units provide one DB9 RS232 port. The RS-232 sender unit, which connects to the local PC, is powered by a 5-volt power supply, which also powers the receiver side. The GFN-RS232 is compliant with the RS-232C standard and includes a six-foot serial cable and 5VDC external power supply. Includes a 1-year manufacturers warranty.

GFN-EXT-RS232

Test Equipment Tutorial

Cable and Network Test Equipment is vital to the uptime of any datacom system. Reports have shown that up to 70% of network downtime can be traced to the physical layer or a cable. By implementing basic go-no-go cable testers as well as more advanced network test and troubleshooting tools, network downtime can be greatly reduced. L-com offers testers for coax, Cat5e (or better), fiber optic, and RJ11/12 cabling and power. Additionally we offer environmental testers to measure light, sound and temperature.

Network Cable Testing Terms

NEXT: Near End Cross Talk. A signal that crosses between twisted pairs or between conductors. NEXT is measured at the transmission end (near end). Measured in dB, failures for this measurement are often caused by termination problems.

FEXT: Far End Cross Talk. Crosstalk that is measured on the conductors that are not being used for transmission at the receiver or far end of the transmission. Measured in dB, failures for this measurement are often caused by termination problems.

Propagation Delay Skew: Used to define the difference in signal speed between the fastest and slowest pair within a cable. It can also define the delay within an individual pair. Must be <45ns for a 4-pair horizontal cable.

Impedance: Measure of the total opposition a circuit offers to the flow of alternating current. Target impedance for UTP and STP cable is 100 Ohms. This can be affected by the twist of the conductors along with the thickness of the insulation around the

conductors. Return loss failures are often caused by cable impedance problems.

Return Loss: The ratio of reflected power to inserted power. It is the measure of the signal reflections occurring along a network cable system. It is often caused by imperfections in the cable conductors, impedance mismatches or bad contacts in a plug or jack.

Network Channel Testing

Network Channel Testing is a method used to verify performance from the workstation to the hub/switch including patch cords. Channel Testing is not accurate for individual patch cords. Both installers and IT professionals conduct this type of testing to insure that the entire cable system is capable of handling network traffic. Channel Testing differs from Permanent Link Testing in that it includes the patch cords on both ends of the installation. Often, patch cords are overlooked as the cause of network failures.

Permanent Link Testing

Permanent Link Testing is the preferred method used by installers to certify a cable installation at a customer site. This type of testing verifies the installation by measuring many factors such as cable lengths, NEXT, FEXT and Return Loss. Several certification testers exist on the market including Fluke Networks DTX-1800 series products. This type of tester features a Permanent Link adapter that connects from a workstation outlet to the telecom closet outlet.

Continuity Testing

Continuity Testing is the most basic form of testing conducted on cables. These types of testers look for opens, shorts or crossed connections. For Ethernet, this type of testing does not confirm network transmission capability. The most common mistake in cable pin-out is an EIA568 A to B cross. A simple continuity tester such as the TL-N044-000-R, can easily find this error without the expense of a certification tester.

Wire Mapping/LAN and Cable Testing

If you require more than just a standard continuity test you might consider a Wire Mapping tester like the AEMC-CA7028. With a tester like this you would get a more detailed report of how your cable is wired/paired. All faults and setting info is displayed textually as well as graphically. But beyond that with TDR technology it can determine if the fault lies at the near end or remote end of the cable or if it is somewhere in between. It can even indicate the distance to the fault as well as determine the length of the cable or cable run being tested.

TL-N044-000-R	Tripp Lite Multi-Function Network/Phone/Coax Cable Tester	57.29

Tripp Lite Multi-Function Network/Phone/Coax Cable Tester

Tripp Lite's Multi-Function Network Cable Tester allows you to test wiring continuity for Cat5/5e, Cat6, RJ11/12 telephone cord sets as well as 10Base2, RF and CATV coax cable assemblies. It can help identify miswired terminations, shorts and open circuits. It features a two piece design, a main unit and a remote unit. The remote unit is designed to slide onto the side of the main unit but can be removed when testing premise cabling where the two ends of the cable being tested are not close by. The main unit features (1) Shielded RJ45 (8x8) Jack, (1) Shielded RJ11/12 (6x6) Jack and (1) Female BNC. The remote unit features (1) Shielded RJ45 (8x8) Jack on one side of the unit and (1) Shielded RJ11/12 (6x6) Jack on the other. The tester also comes with (1) BNC Terminator with a green LED on the end to test BNC coax assemblies. The kit also includes (2) BNC Male to F-Type Female adapters to allow for the testing of RG59/RG6 CATV Coax. A Storage pouch is provided for safe storage of the tester and accessories when not in use. Power supplied by 9V battery (not included). Comes with a Tripp Lite Lifetime Warranty. **As an authorized Tripp Lite reseller we can bid on RFQs for any Tripp Lite part numbers. Contact us to request a non-obligatory quote.**

Pyle 13 Plug Pro Audio Cable Tester

The Pyle PCT40 gives you a simple and easy way to make sure your audio cables are working properly. The unit supports nearly all cable types used in the sound recording industry, providing you with an all-in-one solution to help identify cable continuity issues in your audio set-up. Supports 13 interface types that include USB Type A, TRS Jacks (which can also be used for testing TS), 3 and 5 Pin XLR, Speakon, RCA, RJ45 and more (see chart below for full listing). The Tester features a simple intuitive design, whereby you plug in both ends of the cable you are testing and you turn the selector knob to the different numbered setting to check each conductor individually (tester checks up to 8 conductors). Each numbered setting features two LEDs, one checks the continuity of the conductor the other verifies the ground. Power supplied by 9V battery (not included).

Supports the following connector interfaces:

- 8 Pin Speakon (speaker twist connector)
- USB Type A
- RJ45
- Banana Plug
- 1/4" (6.3mm) TRS
- RCA Phono
- 3 Pin Din
- 5 Pin Din
- 7 Pin Din
- 8 Pin Din
- 5 Pin XLR
- 3 Pin XLR
- 4 Pin Speakon (speaker twist connector)

Senko Fiber Visual Fault Locator

The Senko AFT-G-FC Fiber Visual Fault Locator features a robust and handy design. It emits a 650nm visible red light in either continuous or pulse mode to allow for the quick inspection of fiber assemblies to confirm light path. Can also be used to visually trace fiber optic cable runs within a building.

SK-AFT-G-FC	Senko Fiber Visual Fault Locator with Universal 2.5mm Connection	129.55
SK-AFT-G-CAC	Senko Universal 2.5mm to 1.25mm Adapter for Fiber Visual Fault Locator	37.77

PLANET IEEE 802.3af/at Power over Ethernet (PoE) Tester

PLANET's POE-TESTER is an easy to use PoE diagnostic adapter for network installers, company MIS and even home users to quickly identify the existence of Power over Ethernet on their network. It is designed to detect if IEEE 802.3af/at PoE voltage is running over your UTP cable, and you can use a short patch cord to test PoE ports on devices directly. The POE-TESTER has two simple LEDs one orange & one green that light up to identify 3 different possible PoE states, Mid-span 802.3af/at, End-span 802.3af/at as well as detecting a 4-pair 60-Watt PoE Injector. **As an authorized PLANET reseller we can bid on RFQs for any PLANET part numbers. Contact us to request a non-obligatory quote.**

PTNX1	Fluke Pocket Toner® NX1	35.64

Fluke Pocket Toner® NX1

Test for continuity and short circuits on coaxial cables in one easy step. Basic professional testing does not get any more compact and simple as PTNX1. This tool features lightweight aluminum construction, standard AAA battery, and new dual buzzers that audibly indicate continuity at both ends of the test cable. Like all Pocket Toner® NX test tools, the PTNX1 is 100% low voltage protected so connecting it to live low voltage systems will not damage the tool. **As an authorized Fluke reseller, we can bid on RFQs for any Fluke part numbers. Contact us to request a non-obligatory quote.**

Fluke Pocket Toner® NX2

The individual PTNX2 is for the technician that works primarily with coaxial cable that wants a powerful but super-compact tool to fit in his or her pocket. In addition to testing for continuity and short circuits PTNX2 is packed with advanced features like indication of AC or DC voltage, 50-75 Ohm terminators and auto shut-off to conserve battery life. PTNX2 instantly displays all test results on an easy to read 8-segment LED display as well as giving audible feedback at both ends of the test cable. Like all Pocket Toner® NX test tools, the NX2 is 100% low voltage protected so connecting it to live low voltage systems will not damage the tool. **As an authorized Fluke reseller, we can bid on RFQs for any Fluke part numbers. Contact us to request a non-obligatory quote.**

Fluke Pocket Toner® Cable Test Kits

Fluke PTNX series coax toners are unquestionably the ideal primary devices for testing the installation of coax cable. Test for continuity and short circuits on coaxial cables in one easy step. Basic professional coaxial testing does not get any more compact and simple as Fluke PTNX series. Fluke offers a wide variety of test kits to choose from. For detailed information on each kit, please refer to L-com.com. **As an authorized Fluke reseller, we can bid on RFQs for any Fluke part numbers. Contact us to request a non-obligatory quote.**

ENVIRONMENTAL TESTERS

AEMC CA811 Lightmeter (20fc, 200fc, 2kfc, 20kfc) (20lux, 200lux, 2klux, 20klux)

The model CA811 Lightmeter is a portable, easy-to-use instrument which features optical sensors that are designed to match the response of the human eye, making them ideal instruments for workspace analysis and planning. The ergonomically designed case, large display and intuitive function selection make this instrument the right choice for any application. The Lightmeter model CA811 is designed for simple one-hand operation. It provides selectable lux or foot candle units for display and features a 3-1/2 digit backlit LCD and HOLD function. The model CA811 offers a MAX function. One 9V Alkaline battery is included. **As an authorized AEMC reseller, we can bid on RFQs for any AEMC part numbers. Contact us to request a non-obligatory quote.**

AEMC-CA811	AEMC Model CA811 Lightmeter (20fc, 200fc, 2kfc, 20kfc) (20lux, 200lux, 2klux, 20klux)	128.49
------------	---	--------

AEMC CA832 Sound Level Meter (35db to 80dB) (50db to 100dB) (80db to 130dB)

The model CA832 Sound Level Meter is designed to assess sound ambiances or nuisances in accordance with international safety and quality standards. It complies with standard IEC 651. It is a portable, compact instrument with a 2000-count backlit LCD. It is designed for simple, one-hand operation and may be fitted on a tripod for long duration measurements. It features two weighting curves A and C for measurement integrating the sensitivity of the human ear according to sound frequency. Curve A is the general-purpose curve in an industrial environment and C is more suited in presence of low frequency sounds. Also, mode "F" (fast response time) corresponds to the response time of the ear. Mode "S" (slow response time) will be used to obtain a uniform reading when the sound signal level shows fluctuations. One 9V Alkaline battery is included. **As an authorized AEMC reseller, we can bid on RFQs for any AEMC part numbers. Contact us to request a non-obligatory quote.**

AEMC-CA832	AEMC Model CA832 Sound Level Meter (35db to 80dB), (50db to 100dB), (80db to 130dB)	214.87
------------	---	--------

AEMC CA879 Infrared Thermometer (-58°F to +1,022°F) (-50°C to +550°C)

The model CA879 Infrared Thermometer is a non-contact temperature measuring instrument. It provides precision measurement with its laser target feature. To measure the temperature of an object, simply point the gun at the surface of the object and the temperature will appear on the digital display. The thermometer has an automatic shut-off feature. Shut-off will occur approximately 10 seconds after the trigger is released. One 9V Alkaline battery is included. **As an authorized AEMC reseller, we can bid on RFQs for any AEMC part numbers. Contact us to request a non-obligatory quote.**

AEMC-CA879	AEMC Model CA879 Infrared Thermometer (-58°F to +1,022°F) (-50°C to +550°C)	160.88

Item #	Description	List Price
AEMC CA7024 TDR Fault Mapper		
The model CA7024 Fault Mapper is a hand-held, alpha-numeric, TDR (Time Domain Reflectometer) cable length meter and fault locator, designed to measure the length of electrical and communication cables. It can indicate the distance to a fault in the cable (open or short), given access to only one end of a two or more conductor cable. By incorporating fast-edge step TDR technology, the CA7024 measures cable length and indicates the distance to open or short circuit faults to a range of 6000ft (2000m), on virtually any type of cable. The CA7024 indicates the cable length or fault distance and description alpha-numerically on a 128 x 64 graphical LCD. Includes soft carrying case, BNC pigtail cable with alligator clips, four 1.5V AA batteries and user manual. As an authorized AEMC reseller, we can bid on RFQs for any AEMC part numbers. Contact us to request a non-obligatory quote.		
AEMC-CA7024	AEMC Model CA7024 TDR Fault Mapper	566.86

AEMC CA7027 Fault Mapper Pro® Telephone Cable Tester/Graphical TDR

The model CA7027 Fault Mapper Pro® is a hand-held graphical TDR (Time Domain Reflectometer) designed for identifying and locating faults on power and communication cables, given access to one end only. The Fault Mapper Pro® measures cable length and indicates the length and distance to cable faults to a range of 9ft (3m) to 19,000ft (6000m) on virtually any type of cable. It injects a series of pulses into the cable under test. The velocity at which the pulses travel is determined by the type of cable, which is known as the Velocity of Propagation (Vp) of the cable. The Velocity of Propagation (Vp) is adjustable between 1% and 99% enabling accurate calibration to the cable under test. The Vp value is expressed as a percentage of the speed of light (e.g. 67% or ft/mtrs/micro-second), this value will vary according to the type of cable under test. The Fault Mapper Pro® can accept user selectable values between 1 and 99% (or the equivalent value in feet or meters per micro-second). Based on the selected Vp and the time taken for the pulses to travel through the cable, a reflection profile of the cable under test is displayed. An adjustable cursor assists in locating faults and termination. The Fault Mapper Pro® incorporates an oscillating tone tracer, which is detectable with a standard tone tracer, for use in the tracing and identification of cable pairs. **As an authorized AEMC reseller, we can bid on RFQs for any AEMC part numbers. Contact us to request a non-obligatory quote.**

AEMC-CA7027	AEMC Model CA7027 Fault Mapper Pro (Telephone Cable Tester/Graphical TDR)	1074.33
-------------	---	---------

AEMC CA7028 Wire Mapper Pro LAN Cable Tester

The model CA7028 Wire Mapper Pro is a hand-held structured cable mapping and troubleshooting tester designed for use on UTP, STP, FTP and SSTP cabling equipped with RJ45 connectors and wired to either TIA568A/B (ISO 11801 and EN 50137), USOC or ISDN specifications. It detects open circuit pairs, shorts, crossed wires, crossed pairs, reversed pairs, split pairs and shield faults. The CA7028 has the ability to measure and indicate the length of the cable under test, using a Vp (Velocity of Propagation) set by the user, from a built-in library or manually. It will measure and report the length of all four pairs of wires in the cable under test. It also generates an audible tone that is transmitted into all four pairs on the cable under test. Includes soft carrying case, remote ID (#1), two patch cords, four 1.5V AA batteries and user manual. **As an authorized AEMC reseller, we can bid on RFQs for any AEMC part numbers. Contact us to request a non-obligatory quote.**

AEMC 5233 5000/6000 - Count Digital Multimeters

The model 5233 is a rugged, economical TRMS digital multimeter with a function for non-electrical contact testing (NCV) for detecting live electrical circuits. This multimeter is designed for safety: IEC61010, 600V CAT IV. The multimeter model 5233 provides a Volt, Ohm, Continuity, Diode, Capacitance, Frequency, Duty Cycle and Ammeter function, as well as an AC voltmeter with low input impedance capable of finding ghost voltages by adding a burden to the circuit. It can measure up to 10 Amps directly and can measure temperature in both °C or °F using K-type thermocouples. **As an authorized AEMC reseller, we can bid on RFQs for any AEMC part numbers. Contact us to request a non-obligatory quote.**

AEMC-5233	AEMC Model 5233 Digital Multimeter (TRMS, 6000-cts, V, A, AC/DC, CAP, Ohm, T, NCV)	106.90

AEMC 503 Clamp on Meter

The Clamp-on Meter Model 503 is a general-purpose professional clamp-on. A strong mechanical case design, quality materials, full ranges and compliance to international safety and quality standards ensure a professional and reliable tool. The Model 503 is auto-ranging, and provides the user with AC Volts, DC Volts, AC Amperes, DC Amperes, resistance, and continuity. **As an authorized AEMC reseller, we can bid on RFQs for any AEMC part numbers. Contact us to request a non-obligatory quote.**

----------	---	--------

AEMC AX502 DC Power Supplies/Generators

The model AX502 offers dual 30V outputs. It provides the ability to display both voltage and current for each output. The model AX502 offers a unique master/slave tracking arrangement whereby the ratio between the master and slave can be setup on the fly as needed during the test. Adjusting the master voltage causes the slave to track. Adjusting the slave voltage causes the ratio from master to slave to change accordingly. It offers a coarse and fine voltage adjustment as well as a current limiting adjustment. It is built to provide many years of reliable, precise, easy-to-use operation and will be a welcome addition to any lab, test bench or production line. **As an authorized AEMC reseller, we can bid on RFQs for any AEMC part numbers. Contact us to request a non-obligatory quote.**

Tripplett AC Outlet Circuit Tester with Diagnostic LEDs

Tripp Lite's instant-read CT120 circuit tester detects wiring stability in standard 120 volt AC wall sockets. Simply plug the circuit tester into a receptacle and view the lighted 3 lamp status display for verification of correct wiring, open ground, open neutral, open hot, hot-ground reversal and hot-neutral reversal fault conditions. Sticker on the tester offers lighting combinations for each wiring condition. Ultra-portable design and easy to read lighted display makes the CT120 an excellent addition to any laptop carrying case, tool belt or workbench. Low cost design saves the expense of hiring an electrician to determine wiring stability.

Advanced Fiber Solutions Fiber Optic Power Meter for Multimode and Single mode Cabling

The FOM120 is a general-purpose power meter suitable for both premise and outside plant applications. This unit is ideal for measurement of optical power and optical loss/attenuations in a fiber optic network. The FOM120 meter is calibrated at the five most common industry standard wavelengths 850nm, 1300nm, 1310nm, 1550nm & 1625nm for both single mode and multimode transmitters. The 1mm InGaAs detector offers a broad dynamic range of ~65dB which far exceeds the requirements of the majority of users.

FOM120	Advanced Fiber Solutions Fiber Optic Power Meter for Multimode and Single mode Cabling	442.83
--------	--	--------

Advanced Fiber Solutions Fiber Source for 850/1300nm Fiber Optic Cables

The FOS420 light source is for premises and campus cabling networks with multimode fiber, or single mode fibers under 5km. The ST connector outputs can be adapted to any cable plant with hybrid adapters or hybrid cables. The FOS420 becomes a powerful low cost troubleshooting and maintenance tool when used with an Advanced Fiber Solutions FOM120 power meter.

FOS420	Advanced Fiber Solutions Fiber Source for 850/1300nm Fiber Optic Cables	508.50
--------	---	--------

Advanced Fiber Solutions Plastic Optical Fiber (POF) Test Kit

The Advanced Fiber Solutions POF test kit is the perfect, portable solution for testing plastic and glass optical fiber cables. The FTK51POF includes the OM110N power meter, which is designed for POF (plastic optical fiber) and short wavelength applications (visible and near infrared). It optimizes a silicon detector suitable for large core fibers. It is the ideal tool for working with shorter wavelengths used with glass, plastic or multimode fibers. Additionally, the FTK51POF features the OS417N-MD source which houses a 650nm LED in a modular adapter, which makes it adaptable to any connector style.

FTK51POF	Advanced Fiber Solutions Fiber Source for 1310/1550nm Fiber Optic Cables	935.72
----------	--	--------

Advanced Fiber Solutions Multimode/Single mode Fiber Optic Test Kit

The AF-OLK52N-Q fiber optic test kit allows users to quickly test multimode and single mode fiber cabling. The kit features a power meter and two light sources in a convenient carry case. The power meter supports 850/1300/1310/1490/1550/1625nm light sources and features snap on ST, FC and SC connections. The single mode laser source features the same snap on 3 connector interface as the power meter, while the multimode light source uses an ST connector. The multimode LED source provides 850/1300nm signal and the single mode Laser source provides 1310/1550nm signal. The InGaAs detector in the power meter offers a broad dynamic range of ~60dB which far exceeds the requirements of the majority of users.

AF-OLK52N-Q	Advanced Fiber Solutions Multimode/Single mode Fiber Optic Test Kit	1700.56
-------------	---	---------

Advanced Fiber Solutions Multimode or Single mode Fiber Optic Test Kits

The AF-OLK51N-MM multimode or AF-OLK51N-SM single mode fiber optic test kits feature a fiber optic power meter and a light source to quickly and economically test either multimode or single mode fiber cabling. The power meter supports 850/1300/1310/1490/1550/1625nm light sources and features snap on ST, FC and SC connections. The single mode laser source features the same snap on 3 connector interface as the power meter, while the multimode light source uses an ST connector. The multimode LED source provides 850/1300nm signal and the single mode Laser source provides 1310/1550nm signal. The InGaAs detector in the power meter offers a broad dynamic range of ~60dB which far exceeds the requirements for most applications. Includes a convenient carrying case.

AF-OLK51N-SM	Advanced Fiber Solutions Single mode Fiber Optic Test Kit	1506.21

Advanced Fiber Solutions Fiber Optic Test Kit with Power Meter, Light Source and Tool Kit

The TBX51N-MM features the OS420N light source for use with premises and campus cabling networks that utilize multimode fiber, or single mode fibers under 5km. The ST connector outputs can be adapted to any cable plant with hybrid adapters or hybrid cables. The OS420N becomes a powerful low cost troubleshooting and maintenance tool when used with an Advanced Fiber Solutions OM120 (included with this kit). Tool kit includes: safety glasses, sapphire scribe, armored tubing cutters, Kevlar scissors, needle nose pliers, rotary cable stripper, fiber optic stripper, buffer tube stripper, crimp tool, tweezers, polishing puck, polishing plate, continuity tester and a 200x microscope.

TBX51MM	Advanced Fiber Solutions Fiber Optic Test Kit with Power Meter, Light Source and Tool Kit	1644.28

Brady BMP21-PLUS Label Printers		
The BMP™21-PLUS is the next generation of the popular BMP21 label printer. The ruggedized construction of this device is designed to hold up in rough environments. This printer can handle labels between .25 inches and .75 inches in width. The BMP21-PLUS-KIT1 includes a rechargeable Lithium-ion battery, an AC adapter, and a hard carrying case. As an authorized Brady reseller, we can bid on RFQs for any Brady part numbers. Contact us to request a non obligatory quote.		
BMP21-PLUS	Brady BMP21-PLUS Portable Label Printer	106.90

Brady BMP Series Label Printers

The BMP41, BMP51 and BMP71 label printers provide solutions for a large array of labeling needs, and also for a demanding environment where large quantities of labels are needed. The BMP41 is able to print up to 1 inch labels in width, the BMP51 up to 1.5 inches in width and the BMP71 up to 2 inches. As you move up the line, the speed at which these labels print also increases, up to 1.5 inches per second with the BMP71. **As an authorized Brady reseller, we can bid on RFQs for any Brady part numbers. Contact us to request a non obligatory quote.**

APPLICABILITY OF TERMS AND CONDITIONS

The Terms and Conditions on this page will govern all sales by L-com, Inc. and its subsidiaries ("us", "we") unless otherwise agreed to in writing, signed by L-com at its home office in North Andover, Massachusetts, by an authorized agent. Terms and Conditions contained in Buyer's purchase order or any other document that are different from or in addition to these Terms and Conditions are objected to, are rejected, and will not be binding on us. Buyer will be deemed to have agreed to these Terms and Conditions by issuing a purchase order number and upon receipt from us of a written acknowledgement of Buyer's placement of an order. Notwithstanding the foregoing, if we at Buyer's request, commence performance in any way prior to receipt by Buyer of our written acknowledgement, Buyer's acceptance of these Terms and Conditions will be deemed to have occurred on the date such performance commences. If for any reason, our Quotation is deemed an acceptance of an offer made by Buyer, such acceptance is expressly conditioned on Buyer's assent to these Terms and Conditions, which assent will be evidenced by the earlier of Buyer's acceptance of items delivered by us or any other performance by Buyer or by us. We will proceed to sell items only if Buyer assents to these Terms and Conditions.

APPLICATION DISCLAIMER

Products sold by us are not intended for use in life support or other medical devices or systems, life-critical applications, emergency response or safety related systems, or in connection with any product using nuclear power, or in the aircraft, aviation, aeronautical, aerospace, defense or related industries or for uses or in industries not otherwise provided in the product description. Any such use of products sold by us is at Customer's sole risk, and Customer agrees to indemnify and hold us harmless from and against any loss, claims, damages, liability, or cost (including court costs and attorney's fees) resulting from such use or sale by our Customer or any customer of our Customer. Due to the numerous factors affecting the operating range of radio frequency systems we specifically do not guarantee operating range. Customers are urged to contact a local Professional Installer for assistance in designing and installing any Products. We do not provide installation services or design services. Therefore any assistance or advice provided by one of our employees or representatives in selecting equipment is given on a best-effort basis, and should not be relied upon for final decision of product selection by Customer.

CALL MONITORING

As a part of a commitment to continuous improvement, we utilize systems to monitor incoming and outgoing telephone calls with customers to ensure quality of service.

CONFIDENTIALITY

Buyer agrees that all information furnished by or obtained from us in connection with the sale of items hereunder will be confidential, and Buyer agrees not to (i) disclose any such information to any other person, or (ii) use such information for any purpose, other than performing this contract.

FCC PART 15 AND PART 97 NOTICE

For systems operating within the jurisdiction of the FCC, customer acknowledges that any amplification device it purchases is intended for use only in a transmission system certified under Part 15, Part 97 or other applicable section of the rules and regulations of the Federal Communications Commission.

INTERNATIONAL ORDERS

International orders may be subject to any applicable customs duties, VAT, and taxes in the country of destination, all of which are the responsibility of the customer. If this transaction involves an export under Export Administration Regulations, the products exported by us are exported in accordance with the current Export Administration Regulations. Diversion, use, export or re-export contrary to United States law is prohibited. The commodities, technology and/or software sold or distributed under these terms and conditions of sale may not be exported or re-exported to Cuba, Iran, Libya, Sudan, North Korea or Syria or to other countries, entities and persons that are ineligible under United States law to receive United States commodities, technology and/or software.

JURISDICTION AND VENUE

Customer agrees that any legal action brought against us shall be governed by the laws of the State of Massachusetts or State of Texas (respectively) without regard to its conflict of law principles. Customer agrees that the sole jurisdiction and venue for any litigation arising from any purchase shall be an appropriate federal or state court of competent jurisdiction located in Essex County, Massachusetts or Denton County, Texas.

LIMITATION OF LIABILITY

In no event shall we, our Directors, Officers, Employees and Representatives be liable for indirect, special, incidental, consequential, punitive or other damages including but not limited to loss of use, loss of data, loss of business income or profits or breach of implied warranties of any kind arising out of the purchase, use or performance of the Products, whether or not it has been advised of the possibility of such damages. Some localities do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you.

REMEDIES AND LIMITATIONS ON REMEDIES

In the event of any material breach of the warranty, we will, at our sole option, credit Buyer's account or repair any defective goods or furnish a

replacement part or goods, all subject to Buyer providing written notice of the alleged breach within the time required. The remedies set forth herein shall be the sole and exclusive remedies available to Buyer so that our credit of Buyer's account or repair or replacement is a fulfillment of all our obligations. We shall not be liable for any special, consequential, incidental or punitive damages of any kind, nor under any circumstance shall we be liable for damages beyond the price of the goods purchased by Buyer, whether in contract, in tort or under any warranty or other use.

NOTICES

Any notice to us required or permitted hereunder will be deemed to have been effectively delivered if in writing and served by personal delivery to us or sent by registered or certified mail with return receipt requested, postage prepaid, to us at the address specified.

ORDER ACCEPTANCE

Your receipt of an email or other form of order confirmation does not constitute our acceptance of your order or a confirmation of an offer to sell. We reserve the right, without prior notification, to limit the order quantity on any item and/or refuse service to any customer. All orders are subject to review and acceptance by us. Verification of information may be required prior to the acceptance of any order.

PRICING AND SPECIFICATIONS

All prices and specifications are subject to change without notice. We reserve the right to change pricing, products and specifications, or discontinue items at our sole discretion for any reason whatsoever including, but not limited to changing market conditions, product discontinuation, component unavailability, manufacturing cost changes and errors in advertisements.

RETURNS

Customers wishing to return products must first obtain a Return Material Authorization (RMA) number from a Customer Service representative. This number must be printed on the outside of the package in order for it to be received and processed. Merchandise must be shipped prepaid. We will determine if credit will be issued upon evaluation of the product and packaging after it's returned to us. Other details concerning returns are as follows:

STOCK ITEM RETURNS

Items ordered in error must have a Return Material Authorization (RMA) number issued within 30 days of the original order. These parts are eligible for full credit only if the returned products and packaging are in mint and salable condition. A repackaging/restocking charge not to exceed 25% of the sale price may be charged on any products not returned unopened. Under no circumstances will credit be issued after 30 days from date of invoice or for orders exceeding \$500.00 in total value. All freight charges are the responsibility of the customer.

CUSTOM PRODUCT AND TOOL RETURNS

Custom Products and tools are not returnable for any reason unless they are found to be defective.

DEFECTIVE ITEM RETURNS

Defective items must have a Return Material Authorization (RMA) number placed in prior to shipping.

DISTRIBUTED ITEM RETURNS

Products distributed by L-com, Inc. carry the warranty of the respective manufacturer only. After 30 days from invoice all merchandise returns for distributed products must be handled directly with that manufacturer in accordance with their warranty.

SALES AND USE TAXES

Any L-com orders shipped to or picked up in California, Florida, Massachusetts, Washington, Texas, Pennsylvania, New Jersey or Michigan will include applicable sales tax. The Customer must pay this tax to L-com unless the Customer provides a valid "Exempt or Resale Certificate" for the applicable state when establishing their account. Customer shall be solely responsible for all sales or use taxes, or other taxes, on orders shipped to any other state. Sales tax will be charged on product cost and shipping and handling where applicable and required by law.

SHIPPING COSTS

Shipping or freight charges and insurance will be paid by the buyer and added to the invoice or billed collect unless specifically stated in the quote or order confirmation based on seller practices or promotions.

SHORTAGES

Claims for shortages must be reported within 5 business days of receiving the order, otherwise these orders will be deemed as complete.

TOLERANCES AND VARIATIONS

Except in the particulars specified by Buyer and agreed to in writing by us, the goods being sold to Buyer will be produced in accordance with our standard practices. All goods, however, including those produced to meet an exact specification, will be subject to tolerance and variations consistent with good manufacturing practices in regard to dimension, weight, section, composition, mechanical and electrical properties; to normal variations in surface and internal conditions and in quality; and to deviations from tolerances and variations consistent with practical testing and inspection methods.

EXPORT COMPLIANCE

Each party agrees to comply with all applicable governmental regulations including, but not limited to, the requirements of Arms Export Control

Act, 22 U.S.C.27512794, the International Traffic in Arms Regulations (ITAR), 22 C.F.R. 120 et seq., and the Export Administration Regulations, 15 C.F.R. 730774 as they relate to the import, export, re-export, transfer or re-transfer of information and/or Products and/or Buyer or Seller Property. Without limiting the foregoing, neither the Buyer nor the Seller shall disclose or deliver any information or Products and/or Buyer or Seller Property provided hereunder in any manner contrary to any applicable export or import laws and regulations. The Buyer and the Seller acknowledge that these laws and regulations impose restrictions on import, export and transfer to third countries of certain categories of information and products, and that authorizations or licenses from the applicable regulatory agency may be required before such information and Products and Buyer or Seller property can be disclosed or delivered hereunder, and that such authorizations or licenses may impose further restrictions on use and further disclosure or delivery of such information and Products and/or Buyer or Seller Property.

The Seller shall not be liable for delays or refusals by governmental authorities or other authorities to grant licenses or approvals, nor for suspension or revocation thereof, nor for changes in export classification. Buyer must deliver requested information, including requested end-user information, necessary for export licenses to be granted, and or necessary for the Seller to determine if a license or other type of authorization is required.

For all Custom orders, Buyer shall provide Seller with export classification information for all Buyer property and information (including Buyer drawings) delivered to Seller in relation to this order. Export classification information includes the applicable export control classification, the country of origin and, for hardware only, the Harmonized Tariff Code. For such Custom orders, Seller will supply Buyer with similar export classification information for Products and/or information for which Seller has design authority. Buyer and Seller will promptly notify the other upon a change in classification information

WARRANTY

We warrant our manufactured products and assemblies for a period of one year from time of purchase. These products are warranted against defects in workmanship or materials under normal use. We cannot warrant our products in case of misuse, acts of God, or consequential damage. Alteration of product cancels all warranties. Under no circumstances will we be responsible for any damage beyond the replacement cost of the defective merchandise. We reserve the right to repair or replace any products that are returned under warranty. Products distributed by us carry the warranty of the respective manufacturer only. Goods manufactured by us to meet Buyer's instructions, specifications or requirements are subject to a plus or minus deviation of five percent (5%) in quantity. This warranty applies to the original purchaser only and is not transferable. This limited warranty covers normal use. The limited warranty does not cover damage incurred during shipment, caused by impact with other objects, dropping, immersion in liquid; service by anyone other than us, use not in accordance with instructions, accident, abuse, misuse, natural disasters such as flood, fire, earthquake or lightning, power surges and problems caused by use of power supplies not supplied by us. Warranty coverage will not apply in the event the serial number or brand-name has been removed, altered or defaced. EXCEPT AND TO THE EXTENT EXPRESSLY SET FORTH ABOVE, THERE ARE NO WARRANTIES, EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, ANY WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE AND WE EXPRESSLY DISCLAIM ALL WARRANTIES NOT STATED HEREIN. Some states do not allow the exclusion of implied warranties or limitations on how long an implied warranty lasts, so the above limitation may not apply to you. This warranty gives you specific legal rights, and you may also have other rights that vary from state to state.

PRIVACY POLICY

We collect the mail address, e-mail address, and phone information of those who communicate with us via written correspondence, e-mail, phone calls and information volunteered by the customer such as survey information and/or site registration. The information that you give us and information about your order may be combined with other personally identifiable information (such as demographic information and past purchase history) available from our records and other sources. This information will be used to make our future marketing efforts more efficient. This information may also be shared with other marketers to bring you offers of interest. If you prefer that we do not share your name and address with other marketers, please e-mail us at update@l-com.com or write us at the address below: L-com, Inc. Attn: Mailroom Manager, 50 High St., West Mill, 3rd floor, Suite #30, North Andover, MA 01845.

L-com, an Infinite Electronics brand

Infinite Electronics: A Portfolio of Companies Dedicated to Serving the Engineers' Urgent Needs

Each Infinite company is a specialist within their respective product set, offering broad inventories of engineering-grade product, paired with expert technical support and short lead times.

Brands

Products

Radio Frequency

Comprehensive and continuously expanding portfolio of radio frequency, microwave and millimeter products including interconnects, passives components and active components.

Wireless Connectivity

Full suite of passive WiFi and RFID products primarily used for wireless communications that include antennas, radios, surge protectors, cellular amplifiers and more.

Wired Connectivity

Diverse offering of standard, unique and custom products across the spectrum of connectors, cable assemblies, adapters and contact insertion/removal tools.

Industrial Networking

Network equipment, conversion equipment, power products and test related products with a focus on harsh environments and factory automation.
