

Description

Galvanized nipples and pipe offer a trusted and easy method of transporting plumbing mediums. General uses for this product are for transporting potable water, compressed air, drainage or to create your own DIY projects. This class of pipe is designed for use with other galvanized fittings. Plastic caps are added at each end to better protect the threads during transportation.

- Used for hot and cold water systems, refrigeration, sprinklers, compressed air, gasoline, diesel, alcohol, and some other applications where conducted fluid needs inner rust-proof protection
- Galvanized steel construction with zinc coating
- Galvanized schedule 40 construction
- This pipe works up to 500 PSI at 150°F
- Threaded ends meeting with ANSI/ASME B1.20.1 standards
- Meets ASTM and ASME standards
